DISSTON

TOOLS FOR THE MOTORIST AND MECHANIC

Sell the autoist and mechanic **good** tools—or it is better not to make the sale.

Few workers subject their tools to as great a strain as do the mechanics working on automobiles and engines. A poor tool simply will not do the work; if you sell that kind, the result is dissatisfied customers.

The dealer who sells Disston tools makes two profits—he builds up his trade through satisfied customers and gets a quick turnover.

Have you seen the new Disston "Kleen-Spark,"—a double tool in one piece, handle covers over each end, one end a magneto file, the other end a knife blade,—for cleaning spark plugs? A very compact, efficient tool not much larger than a pencil,—a tool that the motorist has long been calling for.

Do you know about the Disston 38 Screw Driver—"the strongest driver made"? And the Disston machinists' and bearing scrapers? And the Disston hack saws and blades?

The Disston Magneto Files are **real** files; carefully and accurately made of high-grade Disston Steel, made to "stand up" to the work for which they are intended.

These tools are all of the same high grade steel and workmanship that has made the Disston Hand Saw the quality standard of the world.

Ask your jobber or write to us for complete information.

Butterfield Tools

For Increasing Production

That Butterfield tools directly increase production is well known and accepted as an established fact by mechanical men everywhere. If it were not already proven by forty years of actually doing it, it would still be a matter of simple, logical demonstration because their fast-cutting qualities mean more work turned out; their precision and accuracy eliminate "scrapping" of spoilt pieces; the superiority of the material and temper means less time required for sharpening. Do you wonder that Butterfield carbon and high-speed twist drills, reamers, milling and gear cutters, taps and dies are the best sellers in hardware tool departments?

HEATING
HAVE BEEN THE BEST
SINCE 1843
—OVER 1,000,000 SOLD—

New Gurney Heaters for the Garage

OR FOR THAT COLD ROOM OR STORE

HOW are you going to heat the garage this winter? You must protect yourself by heating it. A freeze-up might cost you the price of twenty heaters. You must heat it well too. A cold car that won't start is worse than no car at all.

These new GURNEY heaters have been designed for just this need. They will hold fire for twenty-four hours. They will burn any kind of fuel and take but the minimum of attention.

They are equipped with the same kind of grates and draft control as our finest hot water and steam heating apparatus; and they are sturdily built and economical in operation, worthy to carry our trade-mark, yet they cost no more than the ordinary kind.

We make them in several sizes, one of which will fill your need. Some styles have a single pot hole on top, and others two holes.

Send us a rough sketch of your garage and tell us how it is built and we'll recommend a size that is best suited for you to use, send you more details than we can give here and arrange to have the local dealer supply and put it up, if you so desire. Anyhow, you'll be under no obligation if you write that letter to-night, and it leads to car comfort in winter with least coal.

Firmness in Steel Maintains Hardware Prices in Face of Sagging Market; Helps Accessory Trade

Lower Price Tendency Affects Practically Every Line Except Hardware—Drop in Automobile Prices Should Help Accessory Business—Duplication Caused Overproduction and Helped to Produce Slackness in Automobile and Other Industries—Lower Prices an Effective Stimulant

THE dropping of prices on a wide range of products in the United States is continuing and is followed on a somewhat narrower scale in Canada. The trend of price revisions in the United States may, however, forecast similar changes to come in this country within the very near future.

One of the large mail order houses of Chicago, which recently announced drastic price revisions, is said to be daily making refunds to 20,000 customers as result of reductions which run up to more than 50% on some lines and affect practically every line except hardware. In Canada hardware lines have recently been firm with a very few declines and these due to local circumstances rather than indicating a general trend. The opinion is expressed that prices must be reduced sufficiently to stimulate buying or a period of unemployment and stagnation will ensue. This appears to be the underlying motive in the present price reduction movement.

Statistics show that since this movement commenced in the United States, that 248 articles have been reduced in price. The largest number of these have been reduced to the extent of 1 to 11% while a few have been reduced as much as 40 and 50 per cent.

Firmness of Steel Maintains Hardware Prices

It is rather significant that price revisions in both the United States and Canada have not as yet affected the hardware trade to any appreciable extent. This is said to be the result of a shortage of iron and steel for several months past and for which there is little relief yet in sight. Dealing with this subject one New York authority says, "There are still several commodities that are notably high. Steel, for instance, has maintained its price stubbornly. The last week or two even this has shown some sign of yielding. Last month, for the first time in a year, the Steel Corporation reported a decrease in unfilled orders. If the forward business of this great corporation has begun to shrink, one can imagine what must be happening to the independents who have been asking decidedly more for their products. A recession to at least the Steel Corporation's level is pretty generally predicted. Whether it will be beyond this remains to be seen, but it is at least possible."

It is further stated that two things which this readjustment has demonstrated are that the old law of supply and demand is still functioning and secondly that the recent high prices were not primarily, the result of profiteering by sellers but of competition by buyers. As soon as prices reached the point where buying contracted it became quickly evident that there was really plenty to go around and the moment competition materialized, sellers had to reduce prices. It is stated that buyers really had themselves largely to blame for prices paid and now that they have grasped the fact that it is no longer necessary to bid up to secure articles a more healthy competitive condition is expected. Profits under these conditions will be very different, it is pointed out, but as soon as the markets have found themselves they will still be substantial.

Giving a different opinion on the steel outlook the head of a large steel corporation says: "I do not believe you are going to see lower prices for steel for a long time to come. Wages are at the high mark and we will have to provide for the increase in freight rates. Besides most steel companies are booked well up into next year. A small advance in steel prices is more likely. If the railroads enter the market as purchasers on a large scale, steel prices will go higher, but the advance will not be pronounced."

Iron and steel being basic materials of hardware commodities, the reason is apparent from the foregoing why prices of hardware goods have not yet been reduced as have other goods.

Reduction of Automobile Prices

While hardware lines have not yet been reduced one thing of importance to the trade is

the fact that prices on many lines of automobiles have been reduced. Up to the time of going to press, price reductions by the following seven manufacturers of automobiles have been announced:—Ford, Franklin, Studebaker, Hudson, Essex, Willys-Overland. These reductions amount to $400 in some cases.

Prices of second-hand automobiles have also been reduced in proportion to the reductions on new cars. The result of this all round reduction in prices of automobiles will be to increase the number in use with a consequent extension of the market for auto accessories. It is a well known fact that for some time past the automobile manufacturing industry has been quiet. In many cities it has been possible to purchase an automobile and take delivery the same day as purchase, a thing which was unheard of a short time ago. Furthermore the factories of automobile manufacturers and subsidiary industries have been operating at less than capacity in recent months. Two manufacturers near Toronto recently laid off a large number of employees.

Selling Canadian Autos in United States

So quiet had the market become in Canada for automobiles that at least one Canadian manufacturer, the Gray-Dort Co., was shipping cars to the United States and selling them there. The drawback of duty charges helped to compete with U.S. makes as far as price was concerned. This occasion is said to be the first on record where Canadian automobiles were sold in the United States in open competition with U. S. cars and it may introduce a new era for Canadian automobile manufacturers if they are able to carry on such competition successfully. It is stated that people of the United States like the Canadian built car, realizing that it must be of very substantial construction to withstand Canadian roads.

Lower Prices Stimulates Business

It is evident that the condition of the of the automobile and subsidiary industries, as described herewith, was much the same as that existing in U.S. manufacturing circles prior to the recent price reductions. It was realized that a period of lower prices must be introduced in order to avoid further slackness, unemployment and consequent hard times.

Over Production in Many Industries

Overproduction, due to a number of reasons, has also undoubtedly had its part in bringing about the present condition. By this term overproduction is meant a condition brought about in the automobile and other industries due to the categorizing of enquiries as potential business. A man wanting an automobile would go to one manufacturer to buy and would be told that he could not get delivery for some months. He thereupon would proceed to another manufacturer, but not before his name and address were taken by the first. This process was repeated a number of times and the result was that perhaps five or six manufacturers would have the name of this prospect on their lists. This was looked upon as potential business and production carried out on that basis. The same difficulty was found in the steel and wire and other industries in the United States. One of the leading manufacturers of steel and wire in the U.S. discovered that he had many as ten orders from ten different jobbers for a car of wire which was ordered by one man. Fortunately in that particular case the discovery was made in time and the nine cars cancelled. Undoubtedly this process has been enacted many times over in this and other industries, all of which has helped to bring about the condition which now makes necessary a drop in prices to stimulate business.

Tax Stamps on November 1

After much delay the announcement is now made from Ottawa that stamps will be used after Nov. 1 in the collection of the excise taxes imposed on sales of luxuries by the budget legislation of the last session of the Dominion Parliament. Arrangements for the introduction of the new method of collection are being completed by the Customs and Inland Revenue Department. Stamps are being printed and perforating machines for their cancellation are being prepared for distribution free of charge to merchants dealing in taxable commodities.

From the luxury taxes the Dominion derived a revenue of $6,000,000 last month. Still larger returns are expected in months to come. Investigations by Inland Revenue officers are said to have disclosed cases of deliberate evasion of the tax law and cases of non-compliance due to ignorance of the provisions of the statute. In a score of cases of deliberate evasion, it is understood, prosecutions are being initiated. Thirty auditors were recently appointed to check returns of tax collections in various sections of the country.

Some Opinions From Montreal

In discussing this matter with hardware jobbers, stove manufacturers, and leaders in other lines sold through the trade, Hardware and Metal has found almost the same conditions, and similar comment has been made to the effect that early and drastic reductions are not in sight, and unlikely. The best summing up of the matter was given by the manager of a Montreal firm when he said: "A commodity which is not fundamentally correct as to price will find its level." What are the facts?

Continuing, this informant said, in part: "Foods, and some lines where they have gone up abnormally, have not been on a fundamentally correct basis; the advances have not been justified. For instance, in New Zealand sugar was selling, I know, for 6½ cents a pound when we were paying 23 cents. There is something fundamentally wrong there."

Referring more specifically to raw materials used by him in the manufacture of his lines: "Pig iron is selling for $68 a ton and more. Ship plates have been selling for as low as 4 cents a pound. And still pig iron is strong. We are manufacturing at very close to cost. Even if business should fall off—although it is still active—we cannot possibly sell for less than present prices. According to our production costs they ought to be higher. I know very well that we cannot expect any improvement as regards labor; wages cannot be reduced.

Other Sidelights

"A sack of refined sugar and a keg of nails sold for about the same price, roughly speaking, before the war," was another expressed view. "A keg of nails in 1920 costs a little over $6; a sack of sugar over $20. Some difference. There is no argument, looking at matters from this same viewpoint, for a sheer toboganning of hardware prices."

There may be, and doubtless are individual instances where some easing of prices will come, probably soon. This will first be probable on lines that are in limited demand, and which may be of somewhat unnecessary or impractical use. The fact must be recognized that the ornate and decorative is more taboo than it was, say six months ago, but the hardware man's lines are of the utilitarian type to such an extent that there be little cause for anxiety to the merchant who has conducted his buying along lines that have been suggested to his better judgment.

"We are still very busy, and the trade is buying freely, though carefully," commented a Montreal hardware jobber. "The best advice that a retail hardware dealer can be given is to continue buying carefully and to proceed along sensible and conservative lines. He can in this way keep his stock in good shape and avoid trouble. One of the best indications that we have at the present time as regards general business is that collections are good." And this view was expressed by many others. It indicates that the retail trade is closely following up this very vital end of their business, and they will be well advised to tread that path most consistently.

Making Comparisons

A rope manufacturer was discussing

(Continued on page 68.)

Increasing Utility of Motor Vehicles Makes Big Future Certain for Sale of Auto Accessories

Efforts Now Being Made to Keep Main Country Roads Open for Motor Vehicles in Winter—New Field of Business for Rural Dealers—Automobile Brings Increased Business in Many Ways—Lower Prices on Cars an Important Factor—Set of Rules for Winter Driving

EVERY year sees new strides made to increase the utility of the automobile. Such advances take the form of increasing its usefulness in a commercial way and also to increasing the comfort of motoring from the standpoint of the passenger car. No matter which phase is developed the general effect is to popularize the motor car and to offer a bigger field for the sale of automobile accessories.

The winter season is now approaching, the season when according to old custom the motor car's usefulness was considered to be pretty well over for another year and it was put away in storage. To-day however this action is no longer necessary, for advances in manufacture have rendered motor vehicles serviceable for the winter season, for both commercial and pleasure purposes. Furthermore, the preparation and use of cars for winter driving necessitates more expenditure in the way of accessories than at any other time of the year.

Lines for Winter Use

Winter driving necessitates the use of better tires than for summer; chains are also used more frequently over winter roads. For the comfort of the motorist, gauntlets and warmers must be used. Of the latter there are several types, some are connected with the exhaust from the engine and heat the car through an opening in the floor. Others are in the form of a portable heater for the feet, and still another device is an electrical apparatus for heating the hands on the steering wheel. Windshield cleaners are also much in demand during the winter season when snow and sleet block the vision. Rugs are another line to be featured at this season. Then, too, there are several points on which the dealer can give the motorist some information to help him prepare his car for winter driving. A different grade

An attractive window of automobile accessories recently dressed by Alex. Baillie, for the Sumner Co., Ltd., Moncton, N.B. Herewith is a very comprehensive showing of accessory lines, and each article is emphasized by being shown clearly and not all thrown together. It will be noted in the background that tires and chains are suspended and suitable literature is used at the back of the display. A glass shelf is also hung in the centre to display small articles which would otherwise be lost sight of. Lines which are of importance in winter driving are featured. In the centre is a cup donated by Mr. F. R. Sumner to the Moncton Amateur Baseball League and a shield presented by E. A. Reily for the best batting average. This interest in local sport is always well rewarded. The cup and shield provide a centre of attraction which makes the display more valuable.

of oil should be used in the engine in cold weather, and there is much information to be given about the care of tires in the wet and cold weather in order to get the maximum mileage. Such information is easy for the dealer to obtain and a set of rules for winter driving might profitably be prepared and hung in the accessory department for the information of customers.

A Help for the Rural Dealers

In the rural and farm districts motoring in the winter time has been handicapped in past years for reasons which have not been overcome by the advent of the car with devices to render winter driving comfortable. This handicap has been the result of inability to keep country roads sufficiently clear of snow to enable the use of a motor car in the winter. Now that the good roads movement is under way in all the provinces of the Dominion it is interesting to note that simultaneously a movement has been initiated to provide means for keeping country roads passable for motor vehicles during the winter months. Efforts are being made to increase the use of motor vehicles from a commercial standpoint, and it is quite evident that one of the biggest drawbacks is the inability of the motor car to give service during the winter time over country roads as compared with the rapid service which is at all times assured over the electric or steam roads. Therefore action is being taken to provide motor truck snowplows to keep the main arteries of travel open throughout the country during the winter, such means to be aided by the use of snow fences liberally distributed along the sections where drifting is liable to occur.

The Toronto-Hamilton Highway which is one of the most popular motor roadways in the country, has been kept open throughout the past two winters by the use of snowplows and so successful has this plan been that the work is expected to be extended to other roads during the coming winter. The snowplow is especially effective when the snow is falling and it is a matter of small difficulty to keep a road open by this means, notwithstanding the severity of the snow storm.

With improved highways throughout the Dominion, it is felt that there will be comparatively little difficulty in keeping the roads open. Traffic is naturally diverted to the best roadways, and with the volume steadily growing in this country, as it is bound to do, less difficulty will be experienced in providing the necessary equipment for snow clearing. The plans of the Government provide for a wider roadbed than exists in the majority of the country roads at the present time, thus rendering it more easy to keep the centre of the roadway free from deep snow.

This development will render the automobile of much greater value and will provide a big boom for accessory sales throughout the country. This movement can therefore have the support of dealers similar to that which has been given good roads movements.

A folder used by Sumner Co., Ltd., in connection with their automobile accessory trade. The statement is made that this folder, through force of circumstances, takes the place of the usual accessory catalogue issued by this company. It is for distribution to automobile owners and drivers throughout the district served by Moncton, and represents the wide extent of the accessory trade done by this store. Certain lines are of more importance at this season of the year than at others, and these can well be emphasized in all forms of publicity. Such folders can be mailed to a list of prospective customers, and handed out over the counter or enclosed in parcels.

Auto Brings Increased Business in Other Ways

The advent of the automobile has caused some changes in our national life and other changes will come as this mode of transportation undergoes further development. One interesting change which the advent of the automobile to the farming communities has brought about has been the alteration of farmers' shopping hours. In many parts of the country it is reported that where formerly big crowds of farmers came to town on Saturday morning to do their shopping, the big crowd of farmers now come to town on Saturday evening and bring their families with them. This is due to the fact that the farmer now has a more rapid means of travel and he can work during the day and get into town in short order in the evening. One important phase of this matter is that instead of driving in alone in his working clothes in the morning the farmer's whole family now come to town in the evening, dressed, to enjoy themselves. The logical result is that dealers in the towns now have a better opportunity of getting into close touch with their customers' families and of getting better results from window displays and other forms of publicity. Trade in many such centres has benefited greatly by this means so that the local hardware dealers in such centres stand to gain in more

Trapshooting Popular in New Brunswick

LARGELY through the encouragement of men representing various branches of the hardware trade in the Province of New Brunswick has trapshooting become a popular sport, and the extent to which this pastime is now engaged in is evidence of how valuable such a branch of this business can be made to the hardware trade. These are snaps taken at the St. John Trapshootings' Tournament held at Glens Falls, N.B., by HARDWARE AND METAL *representative. The first view on the upper left shows the members at the club house for ammunition. Next is shown Jack Learmont, the Dominion Cartridge Co., representative, working the traps. On the upper right Mr. Burrell, of Yarmouth, N.S., is shown working the trap for St. John men. The man shooting is Percy Seeley, of W. H. Thorne & Co., Ltd., St. John. On the lower left is shown a mixed team shooting. In the centre, J. Walker Andrews, is shooting and Learmont is pulling. On the right a group are getting ready to break all records and birds.*

than one way by the wider usefulness of the automobile.

Lower Prices on Automobiles

The price-cutting campaign now under way in the United States and Canada, wherein the prices of many automobiles are being lowered, will help to increase the use of automobiles, for they will be brought more within the means of the average citizen and farmer.

All these factors point to the wider use of the automobile and the simultaneous widening of the field for the sale of automobile accessories and the trade in this has a most important department and one which should be kept to the front at all times of the year where local conditions warrant.

Hamilton Firm Bonuses Employees

It was decided at the annual meeting of the Banwell Hoxie Wire Fence Co., Ltd., of Hamilton, to present their employees with bonus cheques as a token of the company's high appreciation of the work that has been performed. The employees were invited to attend a banquet at the Royal Connaught Hotel, Hamilton, where a very enjoyable dinner was served, after which some short speeches were made by both the executives of the company and the employees, and the bonus cheques were then presented by the manager, J. Frank Walker. The bonuses were worked out on the following basis: For one year's service, 5 per cent of wages earned; for three years' and up to five years', 7 per cent. of wages earned; for five years' service, 10 per cent. of wages earned. In addition there was 1 per cent. extra allowed for each year over five years. Thus, a man who has been connected with the organization for fifteen years would get 20 per cent.

CANADIAN IMPORTS AND EXPORTS OF HARDWARE AND CUTLERY

During the month of June Canada imported hardware and cutlery to the value of $624,350, as compared with $263,973 for the same period last year.

The value of the imports for the three months ending June is $1,465,250, as compared with $791,003 for the same period in 1919 and $1,073,376 in 1918.

Canadian exports of hardware and cutlery for the month of June were valued at $861,618, as compared with $557,903 for the same period last year.

The value of the exports for the three months ending June 1 is $2,281,334, as compared with $1,603,925 in 1919 and $1,247,298 in 1918.

Editorial Comment

EDITORIAL BRIEFS

MANY of the high prices stated to have been due to profiteering by sellers were really due to competition by buyers.

* * *

WITH men now seeking jobs, instead of jobs crying out for men, there is a noticeable improvement in production. There are few employers of labor who are unwilling to pay high wages to their employees provided the employees reciprocate, thus creating mutual benefits.

* * *

THE slimy trail of the Red Bolshevist parading under disguised names has been followed into many unexpected places in Canada. The weeding out process, carried on quietly but effectively, has been a boon to the people of Canada.

GOVERNMENT "COMES TO TIME" REGARDING TAX MEASURE

HARDWARE AND METAL is too modest to take full credit for getting some action favorable to the trade from the Department of Inland Revenue in regard to the imposition of the luxury and excise taxes, but it is significant that the publication of an article pointing out the weak spots in the Act, as appearing in September 25 issue of Hardware and Metal and reprinted by many other papers, has been followed by a definite announcement from Ottawa clearing up most of the uncertainties. This week the announcement is made that the stamps for the collection of the tax will be ready on November 1. The punches for the defacement of stamps are being issued "free" to retail merchants; prosecutions will only be made where intentional contravation of the Act can be proved and the Minister of Customs and Inland Revenue himself is to make a tour of the country to meet merchants and Boards of Trade to assist them in a correct interpretation of the law.

The hardware trade of Canada believes in the paying of the country's debt and the collection of money with which to meet such obligations, but an efficient system of levying and collecting the tax is wanted in order that all may share in right proportion. The Government's action to indicate that this is its desire and that it is acting in good faith in securing the co-operation of the retail merchants is worthy of approval.

EFFECT OF PRICE-REDUCTION ON HARDWARE TRADE

A PRICE reduction wave sweeping the United States, and extending on a somewhat narrower scale in Canada, brings up the question as to the likely effect on hardware lines. The steel market has been very firm for some time and the consensus of opinion seems to be that owing to high labor costs, increased freight rates, etc., steel prices will remain fairly stationary. This being the case little change can be anticipated on the great majority of hardware commodities of which iron and steel are the basic materials. Confirming this it is significant that a large Chicago mail order house which recently announced price reductions ranging up to 50 per cent. on some lines has not reduced prices of any hardware commodities.

The announcement of price reductions ranging as high as $400 in some cases on a number of automobiles is of interest to the hardware trade. This reduction is reflected in the second-hand automobile market as well and the logical result would be to eventually increase the number of automobiles in use. This of course would carry with it an extension of the field for the sale of automobile accessories.

Recent conditions in the field of manufacture of automobiles and other lines have made necessary the reduction of prices to stimulate business. A number of Canadian manufacturers of automobiles, tires and kindred lines have recently laid off a number of employees and Canadian automobiles were recently taken to the United States to be sold for the first time on record. A condition of overproduction existed which was to some extent the result of the categorizing of enquiries as potential business and planning production on that basis. This factor has helped to bring about the stagnant condition which price reduction is expected to terminate.

Minister Plans Tour to Explain Taxes

Minister of Inland Revenue to Meet Boards of Trade—Banks to Sell Stamps—Want Closer Co-operation of Merchants.

SUBSEQUENT to the announcement elsewhere in this issue that the use of stamps to collect the new tax is to be commenced on November 1 comes the announcement that the Minister of Customs and Inland Revenue, Hon. R. W. Wigmore, is planning a tour of several towns and cities in order to remove many of the misapprehensions now existing in regard to the luxury taxes.

The plan will be to arrange meetings through the Board of Trade in each of the larger centres, and have the merchants present to explain their difficulties and to have misunderstandings cleared away. In this way it is hoped to secure a greater measure of co-operation from the merchants throughout the country, and thus bring in greater returns from the new taxes.

The stamp system of collecting the tax will be inaugurated on November 1. Merchants will then attach stamps for the amount of luxury tax to the package in which the wrapped goods are sold.

The details of the method of affixing and cancelling stamps used for this purpose have been worked out, and it is hoped to have a plentiful supply of special stamps of different denominations available to the dealers in plenty of time for starting the new system on the above date.

The stamps will be sold through the banks in most cities, but in some of the larger centres, such as Montreal and Toronto, it is likely that an office will be opened by the department, where the sales of these stamps will be taken care of. The stamp method is expected to provide a much better means of checking sales, and also to bring in the returns from the luxury taxes much more quickly than under the present system.

Duty Levied on Gold Value of Imports, Not Paper Value, in Future

New Regulations of Far-Reaching Importance —Collector Says No Discrimination Against Goods From United Kingdom—Importers Ask Refund

A NEW regulation of the Department of Inland Revenue, based on a decision of the Department of Justice, provides that the rate of duty on imports is, with certain exceptions, to be calculated on the estimated gold value of the goods imported and not on the paper money price in the foreign country from which the goods come, as heretofore. This will prove a benefit to certain lines such as glass, imported into Canada from countries whose currency has a small gold value to-day.

This regulation at first appeared to be very far-reaching and to discriminate against imports from the United Kingdom, for example, as compared with imports from other European countries whose paper money is of very low gold value.

J. H. Bertram, collector of Inland Revenue for the Port of Toronto, denies that there is any particular discrimination against imports from the United Kingdom in fixing values for the purpose of levying the customs toll. "The new regulation, which came into effect on July 22 last, simply means that instead of collecting duty on the par value of our imports, we are collecting on the gold value, which is the real value," explained Mr. Bertram.

"If an English manufacturer bills his goods in terms of the pound note and shows also the relative value of the goods in actual gold, even though the transaction has not taken place in gold specie, we will collect duty on the gold value the same as we do on the gold value of shipments from France or Germany. That is our interpretation of the regulation," said Mr. Bertram.

The regulation has just now come to the notice of most importers though dated July 22, 1920. A number of importers who have paid the duty on the full paper value of their imports have made application for refund.

With duty reduced from two-thirds to three-quarters of the present amount on imports from France, Germany and Belgium and about one-fifth on imports from the United Kingdom, local manufacturers and importers predict an increase in imports.

The following table shows the difference between par value of foreign moneys and the value in gold as of yesterday's rates:

	Par value.	Gold value.
Sterling pound	$4.86⅔	$3.86.8
Italian lire	19.3	4.59
Belgian franc	19.3	7.75
Swiss franc	19.3	17.77
Dutch florin	40.2	34.10
German mark	23.8	1.69
Austrian crown	20.3	.50
Greek drachma	19.3	11.82
Swedish krone	26.8	22.05
Norwegian frone	26.8	14.79
Danish krone	26.8	14.96
Spanish peseta	19.3	16.17
Rumanian leu	19.3	2.16
Yokohama yen	49.8	56.37

TALK OF LOWER PRICES ON GASOLINE AND CONSERVATION OF OIL

Plans for cutting the price of gasoline and the establishment of a national exchange for all stocks were discussed by delegates to the twelfth annual convention of the Independent Oil Men's Association, in session in Denver this week. T. J. Gary, of Little Rock, Ark., president of the association, told the 1,000 delegates that steps must be taken to conserve the oil supply. He said a shortage is a possibility, and that all members of the association should co-operate with the automobile manufacturers in their efforts to produce cars that will consume less fuel.

NEW DUTY REGULATION MAY BENEFIT BELGIAN GLASS AND OTHER IMPORTS

Glass imported into Canada from Belgium is one line which may be affected by the new regulation which provides for the levying of duty on the estimated gold value of the goods imported rather than on the paper money value, according to a statement made to Hardware & Metal by Jas. Taylor, of Jas. Taylor & Sons Toronto.

The Belgian franc prior to the war was worth 19.3 cents, whereas it is to-day worth only 7.75. Duty being formerly figured on the larger amount and now being figured on the smaller amount which represents the gold value, means that the duty will be less and lower prices are therefore expected to result in such cases.

Mr. Taylor, who just recently returned from Belgium, states that any such decrease will likely be made up by a further increase in glass prices in Belgium, when the manufacturers again form their association. At the present time manufacturers are acting independently, and price cutting is being indulged in. Mr. Taylor states that orders placed at present low levels will be shelved when the association is re-formed and prices again advance, in favor of orders placed at the higher quotations.

News of Western Canada

Consolidate Western Hardware Wholesales

Marshall-Wells Co., Ltd., and Merrick-Anderson Co., Ltd., Hardware Wholesales, Winnipeg, to Consolidate With Capital of $1,500,000.

Winnipeg.—An important announcement of interest to the hardware trade of Western Canada has just been made concerning the consolidation of the two large wholesale hardware firms of Marshall-Wells Co., Ltd.; and Merrick-Anderson Co., Ltd., of Winnipeg. Complete details of the consolidation are not yet available but it is stated that the new organization will be capitalized at $1,500,000, and that Thomas L. Waldon, of Marshall-Wells Co., Ltd., will continue as vice-president and managing director and George A. Merrick will become a director of the Marshall-Wells Company.

Western Notes

Star City, Sask. — D. K. McLeod has sold out his hardware business here.

* * *

Saskatoon. — Belauss Bros., hardware merchants, are discontinuing business here and their stock is being moved to Humboldt and Lancer.

* * *

Calgary.—Frederic Sara, manufacturers' agent, is sailing for England on October 16th and will visit the principal manufacturing centres. He will spend Christmas there and return early in the New Year.

Wood Vallance Baseballers Win

Winnipeg. — The final game for the championship and cup of B division in the Commercial Baseball League was played off at Wesley College grounds, between Gordon-Ironsides and Fares and Wood, Vallance, Limited, resulting in a win for Wood, Vallance by the narrow margin of one run, the final score being three to two. For the winners, Dave Miller pitched a splendid game, and his base running and hitting were responsible for two runs. Bert Lloyd caught his usual steady game and was there with two timely hits; in fact, the whole team played like champions all the way. The lineup was as follows:

Wood, Vallance, Limited—Dave Miller, Bert Lloyd, Gus Ward, Chic Little, Joe Lyons, Frank Traughton, Alex Morrison, Morley Paul, Dick Bird.

Gordon-Ironsides and Fares—Vic Nestor. J. Caswell, McInnes, M. Strome, McNeill, McWilliams, Johnson, Hamilton, Falconer.

Umpire—Schumacher.

In addition to winning the above series and cup, Wood, Vallance, Limited, captured the splendid trophy and prizes put up by the North-west Commercial Travellers' Association at their annual picnic on July 11th. Winning two cups in one season is some record.

Winnipeg.—Western Steel Products Co., Ltd., Winnipeg, are making an addition to their factory. This will give them considerably more warehouse space and will supply them with new office quarters, which they contemplate having on the second floor.

Luseland, Sask. — Nicholson's hardware and furniture store, formerly Paterson's, was recently opened for business.

Hardware Trade Outlook Good in Edmonton

Edmonton, Alta. — Speaking of the outlook for fall wholesale business in hardware, J. F. McMullen, manager of the local branch of Marshall-Wells Co., Ltd., stated that as a result of the harvesting of a bountiful crop business would be better than for some years past.

Says B.C. Turpentine Industry in Experimental Stage

In view of the recent report that tests made by the Government of turpentine properties of Douglas fir trees in British Columbia had shown results not sufficiently encouraging to warrant further development, it is interesting to note a letter reproduced in the "Savannah Weekly Naval Store Review and Journal," from W. E. Burns, writing from Vancouver concerning the matter. The letter is as follows:

"Replying to your request for information, the reason I have not answered before is because we are still in the experimental stage so far as the production of turpentine from the Douglas fir is concerned.

"We believe that it will eventually be worked out, but previous to its success being established as an actual fact and decided beyond question, we hesitate to give too great a prominence to the endeavor.

"We are tapping the live Douglas fir by means of half-inch auger holes, the basis of the production being the actual excess yield of resin by the tree and also by the pockets formed in the tree by accumulations of past excesses.

"The rosin obtained is of the highest grade and is distilled by a method of distillation which gives turpentine of the highest grade, fir oils, rosin oils and rosin in one process and its continuation.

"We have also manufactured true Burgundy pitch and true Venice turpentine.

"The plant end of it is beyond the experimental stage and patents are pending in connection with the process.

"The field operations, however, are still experimental and it is for this reason that we cannot pronounce it a complete success as yet.

"I have given in the above a general idea of our project and for the reasons above mentioned we do not desire to go into more details."

Promise of Good Business in West

In conversing with F. L. Baker of the McDonald-Baker Company, Calgary, attending the annual convention of A. Ramsay and Son Company in Montreal last week, he stated to Hardware and Metal that the outlook in Alberta for a good fall season is very satisfactory.

"Crops are good nearly everywhere," said Mr. Baker, "and there should be good business as a result. This crop should bring in a lot of money and enable business men to pay their accounts. With the exception of a limited few places there have been good yields all over Alberta, both in the north and the south. I think there should be a satisfactory business as a result, and we are very optimistic.

Mr. Baker believes that the crop returns now in sight are just what have been needed to put business on the better basis that all desire to see. It is a matter now of harvesting and threshing the grain, and this is being rapidly proceeded with. It is particularly gratifying that Southern Alberta has come along so well; they needed a big return.

Uses Leaflet to Announce Fall Goods

E. H. Dulmage, Wilkie, Sask., Uses Attractive and Well Illustrated Leaflet of Eight Pages to Announce Lines for Fall Trade.

AN eight-page leaflet is used by E. H. Dulmage, hardware merchant, of Wilkie, Sask., to introduce to customers the lines of interest in Fall trade. This leaflet, part of which is illustrated herewith, is very attractively arranged, well illustrated and gives prices on all lines. The outside measurement of the leaflet folded is 5½ by 8½ inches. On the introductory page or the cover, is the heading "Hardware Suggestions from E. H. Dulmage, Wilkie, Sask." Following this is a personal word of explanation which reads as follows:

"This Fall you will no doubt be needing more or less in hardware and as a reminder of your wants we have issued this leaflet on hardware. We trust we may have the privilege of serving you in your requirements and will try and see that you get full value for your money. On account of the better crop conditions we have stocked up considerably in anticipation of your demands and trust we may have the opportunity of serving you. Our old motto of 'If it's hardware you need, ninety-nine chances out of a hundred we will have it' we do our best to uphold, even with the difficulty of securing goods at this time, and the extra money it now takes to keep up our stock at the increased cost of merchandise."

The second page of the leaflet is devoted to stoves, with three types illustrated. The statement is made that the excessive cost of hard coal has made it necessary to use soft coal in heating stoves. This is followed with the statement that "we have put in only such soft coal burners that we figure will give the most heat for the amount of soft coal burned." Oil heaters "to take the chill off the room in the fall or add to your heating in some places at other times" are also mentioned.

Tools Also Featured

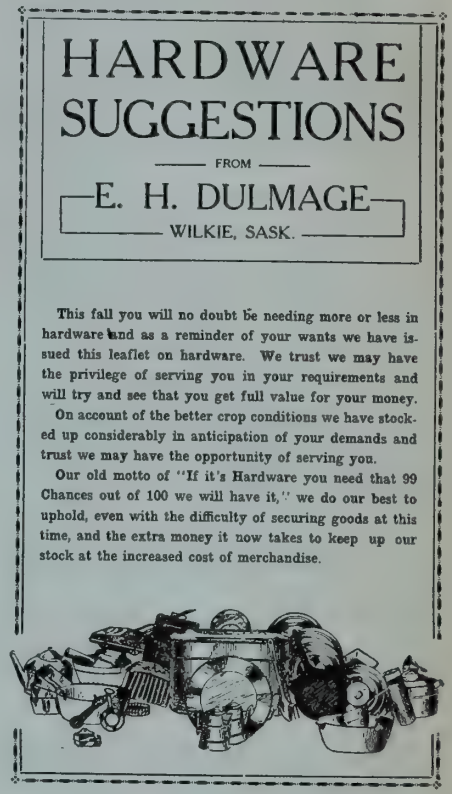
Mechanical tools are featured on the third page with illustrations of wrenches, saws, calliper rules, pliers, axes, hammers, etc. A section is devoted to each article with brief description.

The fourth and fifth pages are illustrated herewith, and it will be noted that such lines as jack knives, razors, hardware for threshing outfits, silverware, barb wire, floor varnish, are all illustrated and described.

Page six is devoted to kitchen utensils, illustrating wire strainers, water pails, well buckets, kettles, sauce pans, etc

Page seven illustrates watches and alarm clocks, flashlights, and lanterns.

A concluding statement is as follows: "We could go on enumerating our different lines of hardware practically indefinitely, but it would make this leaflet unnecessarily long. What we wish to impress upon you is that we carry a complete stock of the best hardware, which we offer at the lowest possible price."



HARDWARE SUGGESTIONS

FROM

E. H. DULMAGE

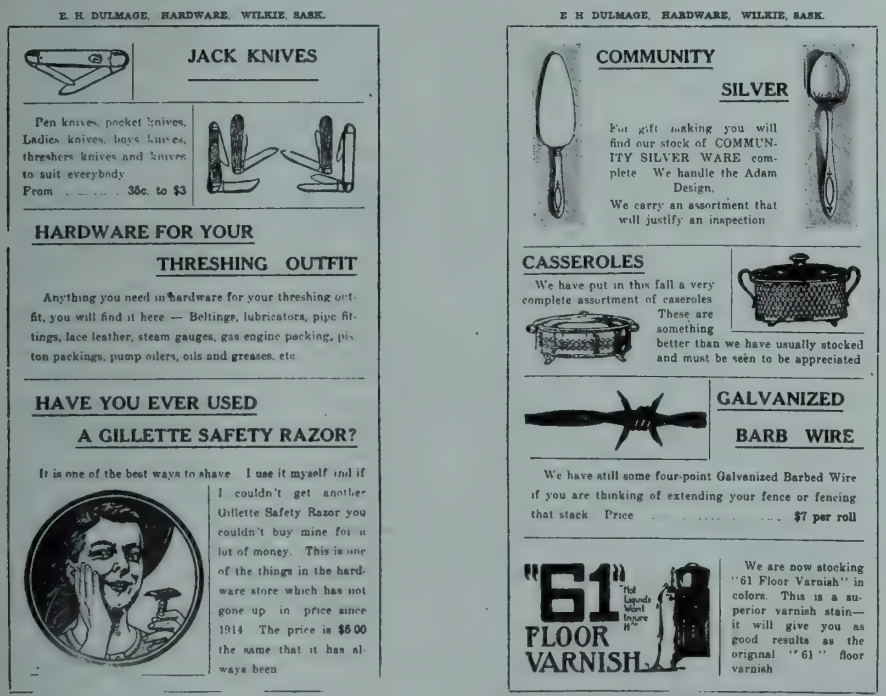
WILKIE, SASK.

This fall you will no doubt be needing more or less in hardware and as a reminder of your wants we have issued this leaflet on hardware. We trust we may have the privilege of serving you in your requirements and will try and see that you get full value for your money.

On account of the better crop conditions we have stocked up considerably in anticipation of your demands and trust we may have the opportunity of serving you.

Our old motto of "If it's Hardware you need that 99 Chances out of 100 we will have it," we do our best to uphold, even with the difficulty of securing goods at this time, and the extra money it now takes to keep up our stock at the increased cost of merchandise.

The cover of the leaflet with its message to prospective customers for fall trade.



E. H. DULMAGE, HARDWARE, WILKIE, SASK.

JACK KNIVES

Pen knives, pocket knives, Ladies knives, boys knives, threshers knives and knives to suit everybody
From . . . . . 35c. to $3

HARDWARE FOR YOUR THRESHING OUTFIT

Anything you need in hardware for your threshing outfit, you will find it here — Beltings, lubricators, pipe fittings, lace leather, steam gauges, gas engine packing, piston packings, pump oilers, oils and greases, etc

HAVE YOU EVER USED A GILLETTE SAFETY RAZOR?

It is one of the best ways to shave I use it myself and if I couldn't get another Gillette Safety Razor you couldn't buy mine for a lot of money. This is one of the things in the hardware store which has not gone up in price since 1914 The price is $5 00 the same that it has always been

E. H. DULMAGE, HARDWARE, WILKIE, SASK.

COMMUNITY SILVER

For gift making you will find our stock of COMMUNITY SILVER WARE complete We handle the Adam Design.
We carry an assortment that will justify an inspection

CASSEROLES

We have put in this fall a very complete assortment of casseroles These are something better than we have usually stocked and must be seen to be appreciated

GALVANIZED BARB WIRE

We have still some four-point Galvanized Barbed Wire if you are thinking of extending your fence or fencing that stack Price . . . . . $7 per roll

"61" FLOOR VARNISH

Not Liquids Won't Injure It

We are now stocking "61 Floor Varnish" in colors. This is a superior varnish stain—it will give you as good results as the original "61" floor varnish

The centre double-page of the leaflet showing how the lines are illustrated and described.

Methods of Distribution

Such a leaflet as this has been used by hardware dealers in other parts of the country as well, with good effect, either by distribution through the mails to a selected mailing list or by distribution from door to door. Other dealers hand them out to customers visiting the store and still another plan is to enclose one in each parcel purchased. The idea is a good one providing it receives attention at the hands of those who are prospective customers and such methods of distribution as will best be fitted to local conditions should be used to attain this end.

$43,000,000 Increase in Imports Over August 1919.

The total external trade of Canada reported for the month of August was $238,085,400, as compared with $202,235,978 for the corresponding month in 1919. Imports were valued at $124,318,014, and exports at $113,767,395. Imports show an increase of about $43,000,000 over August, 1919, but exports declined approximately $8,000,000.

Events in the Trade

Business Changes

Valparaiso, Sask.—W. J. Newson, hardware merchant, has sold out.

Star City, Sask.—D. K. McLeod, hardware merchant in Star City, Sask., has sold out.

New Business

Mindemoya, Ont. — Cushing & Jackson recently opened a new store here and carry a line of hardware goods, automobiles, accessories, etc.

To Close at Noon Wednesday All Year Round

St. Catharines.—The hardware merchants of the city of St. Catharines have decided to close every Wednesday at noon throughout the year.

Outlook Good in Quebec

Herman Young, of the Herman Young Co., Reg'd, Quebec, Que., was a visitor at Hardware and Metal Toronto office during the week. Speaking of business conditions, Mr. Young referred to the prosperity in the rural districts of Quebec and stated that the outlook for future business is excellent. Money is plentiful and business failures are few. Business with his company was never as good as at the present time. The chief difficulty is to secure sufficient supplies of goods.

Electrical Engineers Elect Canadian President

E. S. Jefferies, first vice-president of the Steel Company of Canada, was elected president of the Association of Iron and Steel Electrical Engineers for the ensuing year. The election took place at the fourteenth annual convention of the association at the Hotel Pennsylvania. Mr. Jefferies succeeds B. W. Gilson.

The convention occupies the entire roof of the Pennsylvania Hotel. There is an exposition of electrical devices comprising seventy-one exhibits.

Mr. Jefferies said that the gradual transition of the steel and iron mills would continue until their complete electrification was virtually a reality.

"The association, which has successfully exploited the electrical engineer profession in the steel industry, is now fostering a standardization of equipment," he said.

Western Ontario Notes

The wedding was solemnized at Windsor recently of Miss Meta Maude Derbyshire, daughter of Mr. and Mrs. H. W. Derbyshire, formerly of Wheatley, and C. T. Salton, of Detroit. Among those attending were Mr. and Mrs. G. F., Mr. and Mrs. T. S. and Mr. and Mrs. W. H. Derbyshire, of Wheatley.

Petrolea, Ont., has always occupied one of the foremost places in sport of the smaller towns of Western Ontario, thanks to the support of Dr. C. O. Fairbank of the hardware firm of Van Tuyl & Fairbank. At a meeting held this week to organize a Rugby football team Dr. Fairbank was again elected president.

Work was commenced this week at Watford, Ont., on an extension to the factory of the Andrews Wire Co. to cost $35,000.

James Pettit, hardware merchant at Melbourne, Ont., intends moving to Strathroy shortly. He disposed of his business not long ago to Arthur Staples of Melbourne.

Canada Foundries Sell Buffalo Subsidiary

Canada Foundries and Forgings Ltd. has sold its Buffalo subsidiary, The De Laney Iron and Forge Company.

Trade Commissioner to Visit United Kingdom

The British Government Trade Commissioner in Ontario, F. W. Field, will leave Toronto on the 8th October on an official visit to the United Kingdom to confer with the department of Overseas Trade, London, Chamber of Commerce, and manufacturers and merchants throughout the British Isles. He will be overseas three months or more.

Crane Company Development

The Crane Company have purchased the business of Mr. Henderson Black in Canadian Potteries Ltd., St. Johns, Que. This firm manufactures sanitary earthenware and the plant will be operated under the old name at the above place. This furnishes the Crane Company with another link in its Canadian chain, branches of the firm being located now in the principal Canadian distribution centres. At Toronto, the pipe plant, warehouse and garage are expected to be completed within a comparatively short time.

Canadian Copper Corporation to Start Mills

The Canada Copper Corporation will start its mill early in October. This plant has a nominal capacity for treating 2,000 tons of ore daily. Flotation process will probably be used.

Concentrates will be shipped to the Trail smelter of Canadian Pacific, which after refining the product will include the copper in its own quota for market. The Canada Co. will not figure in the copper market of the United States at all. Canadian Pacific has built a line to the copper company's property and through a subsidiary will furnish it with electric power.

Iron and Steel Market Shows Signs of Weakening

The reductions in automobile and other prices in the past week have caused a further shrinkage in iron and steel buying, and in a number of directions the market has shown weakness. Accompanying the cut made by the Ford Motor Co. is a determined effort to force down the price of automobile steel. The Detroit company is expected shortly to buy steel on a large scale for 1921, and already some makers of automobile parts have been urged to make a downward revision of existing contracts, says "The Iron Age."

At the same time, the periods within which the mills can make deliveries on new orders have been shortened in a number of cases, pointing to a more rapid adjustment between supply and demand than seemed likely two months ago.

Besides a large current output, the shipment of the 1,500,000 tons of steel products accumulated at rolling mills in the weeks of railroad paralysis has gone on at such a rate that many manufacturing consumers are quite well stocked up. This condition enables buyers in various lines to await price developments without any of the concern they have had over supplies in the past year.

The general tendency of pig iron prices is decidedly toward lower levels. Malleable has been sold at Buffalo at $3.75 below recent quotations; 5,000 tons of basic was sold at Chicago to a St. Louis steel company at a concession of $2, and prices of Ohio silvery iron have been shaded from $2 to $4. In fact, wherever there has been a real test, weakness has developed.

ONTARIO HEADLIGHT ANTI-GLARE LAW NOW EFFECTIVE

As we go to press announcement is received that the Ontario Headlight anti-glare law which makes necessary the use of some headlight device on every motor vehicle to eliminate glare, has been authorized by the Minister of Highway effective from Thursday, September 30th. The following twenty-five devices for the elimination of glare have been sanctioned by the Department.

Sun-Ray, Holophane, Sills (Green Top), Sills (clear); Benzer; Primolite; Violet Ray; Sunlite; Kopps; Liberty; Macbeth; Clamert; Patterson; Lee Knight; McBride; Levelite; Raydex; Conophore (clear); Conophore, (Novial); McKee, Osgood; Shaler Roadlighter; Legalite.

Convention of New Brunswick R. M. A.

Ask That Luxury Tax Be Transferred to Manufacturers—Salesmanship Course Should Be Included in Vocational Training—Next Convention at Woodstock, N.B.

ST. STEPHEN, N.B.—At the sixth annual convention of the Retail Merchants' Association which was held at St. Stephen, N.B., Sept. 22 and 23, the following officers were elected:—President, W. G. DeWolfe, St. Stephen; first vice-president, F. W. Daniel, St. John; second vice-president, T. B. Price, Moncton; treasurer, A. A. McIntyre, St. John. The report of the provincial secretary, Miss Alward, of St. John, was read giving an account of the activities of the provincial board during the year. Very appreciative speeches of the service of Miss Alward were made by William Hawker and W. G. DeWolfe, of St. Stephen and others, and a vote of thanks was passed to that lady.

Place Luxury Tax on Manufacturers

On Sept. 23 several resolutions were passed. Among them was one asking the government to place the luxury tax with the manufacturers instead of the retailers. Addresses were delivered by F. A. Dykeman, of St. John, advocating that Provincial Government in vocational training should include training in salesmanship. R. A. Macaulay spoke on efficiency in salesmanship and M. W. Wasson on behalf of Mr. Scovil, of St. John, on commercial advertising.

The visitors were taken by automobile to the banks of the St. Croix harbor at Oak Point, where a shore dinner was served and greatly enjoyed, after which the party moved on to St. Andrews and returned to St. Stephen about 6 o'clock. During the dinner, Mr. Stewart, of Ontario, gave an interesting address dealing with the question of expenses and profits in retail business. Brief addresses were also made by John F. Clarke, president of Clarke Bros., of Oak Point, and J. W. Graham, manager of St. Croix Mills, Milltown, the former dealing on the great possibilities of St. Croix harbor as one of the national ports of Canada.

It was decided to hold the next annual convention at Woodstock, N.B.

They Will Write Again

Last Friday a $5 bill came to the Subscription Department pinned to a circular regarding MACLEAN'S MAGAZINE, but minus the name and address of the sender. Nothing can be done in this case until the remitter writes in to complain that he is not getting the magazine.

An hour later in came a memo from "F. R. Thorn" in regard to his subscription to THE FINANCIAL POST, but with no address given. As the stencils are all filed according to post offices nothing can be done in this case either.

Shortly afterwards a post card arrived from New Glasgow, N.S., with our name and address plainly written on the front, but perfectly blank on the reverse side.

These three instances, which all occurred in one morning, are typical of hundreds which happen in the course of a year on all publications—and they explain why this publication is bound to receive a number of (on our part) unavoidable complaints.

Association News

TAX ON TINWARE

The secretary of the Ontario Retail Hardware Association has taken up with the Inland Revenue Department the question of excise tax on tinware manufactured in hardware stores. The matter is explained in the following correspondence:

30th August, 1920.

G. W. Taylor, Esq.,
Asst. Deputy Minister,
Inland Revenue,
Ottawa, Ont.

Dear Sir:—

I am enclosing herewith a letter from a member of this association requesting information as to Excise Tax on such goods as are made up in an ordinary tinshop. For the most part tinshops are of small calibre and much of the goods made up are with the intent of keeping the employees busy during the slack times so as to keep the men for installing furnace work, etc., when required. It would not appeal to me that the intent of the act was to apply to a business so carried on in a retail manner, and the Excise Tax was previously paid on the material used.

After reading the enclosed would you kindly give me the information required—for the use of the members of our association.

Yours truly,
SECRETARY.

Department of Customs and Inland Revenue.
Ottawa, Sept. 9th, 1920.

Ontario Retail Hardware Ass'n.,
Prescott, Ont.

Sirs:—

I acknowledge receipt of your letter of 30th ultimo regarding tinware processed in a retail store.

You are informed that a tax of 2% is collectable on tinware so processed when the finished article is sold over your counter or to other retailers, and a tax of 1% should said article be resold to wholesalers or jobbers.

There is no tax on goods sold by a retailer to a consumer when said goods are sold in the same condition as when purchased, excepting in the case of goods which are subject to Luxury Tax.

I remain, Sir,
Your obedient servant,
G. W. TAYLOR,
Ass't. Deputy Minister, Inland Revenue.

The Editor, Hardware and Metal,

Sir:—

Having had several enquiries re Excise Tax on goods made up in retail tinshops, I wrote the Department as per enclosed copy, asking for definite information—and an enclosing you herewith copy of the reply received.

I still believe that it was not the intent of the act to collect any Excise Tax on small sales of goods made in the retail tinshop, and think a hearty protest by those affected should effect a change in the ruling and exempt this class of trade from the operations of the Excise Tax, which involves the making of duplicate sales slips for every small sale, and the collecting of the tax from the customer, necessitating innumerable explanations to and disputes with the customers over an exceedingly small amount.

Our next convention will undoubtedly take this matter up in an endeavor to have the same satisfactorily adjusted.

W. F. MACPHERSON,
Secretary.

Newsy Notes From Here and There

Toronto.—The following were among the visitors to the McClary Manufacturing Co. this week: V. T. Chapple, representative of Chapple & Smith, Chapleau, Ont.; Messrs. McMillan, representative of Iroquois Falls Merchandizing Co., Ltd., Iroquois Falls, Ont., and Smith, representative of Smith & Schaefer, Bolton, Ont., and Charles Bailes, of J. Bailes & Son, Oshawa, Ont.

* * *

Montreal. — Starke-Seybold, Limited, of Montreal, are branching out into new territory, and have secured Mr. A. D. Anderson to represent them in Ottawa and outside points. Mr. Anderson, who is well known by the hardware trade of Ontario, having travelled the ground for about nine years, expects to take up his new duties at once, with a full line of general hardware and automobile accessories. He will make Ottawa city his headquarters.

* * *

Montreal.—R. Bissonette and Rene Guilbeault have joined the sales' staff of Lewis Brothers, Ltd. Both will cover the city of Montreal in connection with the motor accessories department of the firm.

* * *

Montreal.—James Kinsman, of North Brothers Manufacturing Company, Philadelphia, Pa., called on the Montreal trade this week. J. Trenchart Cox was in Montreal this week representing his principals, Hounsells, Bridport, England. John H. Cameron, representing the Winchester Repeating Gun Co., Ltd., New Haven, Conn., called on the trade here.

Hardware Letter Box

DOUBLE AND TRIPLE HEATERS

James V. Moriarty, Newboro, Ont. — Kindly let me know if there is any firm at present manufacturing double and triple heaters.

Answer.—The McClary Mfg. Co., Ltd., Toronto, London, etc., manufacture a heater of this description called the "Yukon."

* * *

HAND POWER CIDER MACHINES

F. A. Rutton, Stouffville, Ont.—Where can we procure hand power cider machines?

Answer.—London Foundry Co., Ltd., London, Ont.; Hergott Bros., Mildmay, Ont.; W. B. Perrin, Ltd., Toronto; Boomer & Boschert Press Co., Syracuse, N.Y.; A. B. Farquhar, Ltd., York, Pa.

* * *

DISH WASHING MACHINES

Connell & Grigg, Edmonton, Alta. Can you put us in touch with manufacturers of dish washing machines?

Answer.—McClary Mfg. Co., Ltd., Toronto; T. S. Blakeslee & Co., Sarnia, Ont.; Fearless Dishwasher Co., Rochester, N.Y.; Success Dishwasher Co., Wooster, Ohio; Insinger Co., Stencow Ave,. Philadelphia, Pa.

* * *

WOOD MANTEL MANUFACTURERS

Thompson & Sutherland, Ltd., North Sydney, N.S. Can you put us in touch with factories making wood mantels?

Answer.—The Blond Lumber & Mfg. Co., Ltd., Chatham, Ont.; Canada Mantels & Tiles, Ltd., Toronto; Christie Woodworking Co., Ltd., St. John, N.B.; Lea Paul Co., Ltd., Moncton, N.B.; Paquet & Godbout, St. Hyacinthe, Que.; Schultz Bros. & Co., Ltd., Brantford, Ont.; Wilson Bros., Ltd., Collingwood, Ont.; Burton & Baldwin Mfg. Co., Ltd., Hamilton, Ont.

COOPERS' TOOLS AND BARREL HOOPS

G. L. Milligan, Orillia, Ont.—Kindly let me know where I can get coopers' tools and hoops for barrel making.

Answer.—Coopers' Tools:

The Canadian Edge Tool Co., Galt, Ont.

The Josiah Fowler Co., Ltd., St. John, N.B.

Gilmour Bros. & Co., Montreal.

Colwell Cooperage Co., 412 Greenwich, New York City, U.S.A.

Coopers' Hoops, Staves, Etc.:

Canadian Cooperage Co., Ltd., Smiths Falls, Ont.

J. S. Ainslie & Bro., Comber, Ont.

London & Petrolia Barrel Co., Ltd., London, Ont.

McAllister & Sons, Ltd., Guelph, Ont.

Merritt & Co., Chatham, Ont.

Trenton Cooperage Mills Ltd., Trenton, Ont.

Wallaceburg Cooperage Co., Ltd., Wallaceburg, Ont.

Steel Hoops and Ties:

The Laidlaw Bale Tie Co., Ltd., Hamilton, Ont.

The Steel Co. of Canada, Ltd., Hamilton, Ont.

Canada's Production of Lead

Canada's production of lead in 1919 was 15,563 metric tons, being lower than in any other year since 1913. In 1916 it reached 19,550 tons, and was second lowest in 1916 with 16,254 tons.

Iron and Steel Price Readjustments Now More Likely

General price readjustments in iron and steel in line with the nation-wide movement now in progress apparently are a more immediate possibility than they seemed likely to become a few weeks ago, says the Iron Trade Review. With the exception of a few products, the trend more distinctly is in the direction of easier market conditions. Buyers sensing the new note in the situation, continue to hold off awaiting substantial inducements and some are checking specifications to avoid increases in inventories. In this position, they are being favored by the sustained growth of production which with a number of companies is at its crest for the present year. Present shipments are far in excess of new bookings.

Pig iron which has run in even strength for many months is developing its first symptoms of price reversal. Out of conflicting market reports it is clear that some producers are more willing to make concessions for business which has been extremely sluggist of late.

Protecting Fish and Game

A much needed reform which the Government is about to put into effect is the establishment of a new system for the protection of fish and game.

The details of the new system have not been determined, but the men who were working part time have been let out, and it is understood that a fraction of their number will be engaged at reasonable salaries to give their whole time to the preservation of fish and game.

New Regulations Give Empire Preference

Montreal. — Details of new customs regulations and tariff changes "affecting exporters in Britain's overseas Dominions" have been received here from London by the British Trade Commissioner. The changes have been made with a view to conferring a preference on Empire products, and customs duties are to be charged at reduced rates on goods imported into Great Britain, which are shown to be consigned from and grown, produced or manufactured in the British Empire.

U.S. Steel Corp. to Rehabilitate French Steel Industry

The United States Steel Corporation has agreed to finance the rehabilitation of the French steel industry, and it is said that Judge Gary, when he was in Europe, perfected a scheme whereby Spanish iron ore will be furnished France to replace that formerly obtained from the mines in Alsace-Lorraine, which were destroyed during the war, and are unproductive at the present time.

The scheme as outlined is gigantic, Judge Gary agreeing in behalf of the Steel Corporation to furnish any additional ore necessary to carry on the industry until the French mines regain their pre-war productivity.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1945. **Iron and steel products.**—An English commission agent located in Egypt inquires for Canadian iron and steel products and for hardware.

1947. **Painters' brushes.**—A Scottish importer desires to hear from manufacturers of painters' brushes in Canada. He would like to receive catalogues and sample lots, and wants to get in touch with those who can make early deliveries.

1948. **Paints, oils and varnishes.**—A firm of commission agents in Trinidad desire to secure an agency for paints, oils, varnishes and leads. Good references.

1951. **Asbestos brake lining.**—A Bristol company require supplies of asbestos brake lining, and invites offers from Canadian manufacturers of same.

1939. **Axes.**—A commission agent in St. John's, Nfld., is open to represent Canadian manufacturers of axes and edged tools.

1940. **Metals, etc.**—A Manchester firm is prepared to consider offers of iron, steel, copper, brass, zinc, aluminum, and all kinds of scrap.

1941. **Electrical supplies.**—A commission agent in St. John's, Nfld., desires to represent Canadian manufacturers of all kinds of electrical supplies.

1942. **Agricultural machinery, etc.**—A firm in Alexandria which has already sold Canadian agricultural machinery would be disposed to negotiate with Canadian houses for agricultural machinery, cream separators, belting, pumps, etc.

1943. **Hardware.**—A sales agency in Barbados would like to secure the agency for small hardware of all kinds, also nails.

1944. **Foundry materials.**—A firm of manufacturers' agents in Barbados are desirous of representing a house supplying foundry materials, such as iron rods, etc. Good references.

1952. **Autos and accessories.**—A very important automobile importing firm in Cairo and Alexandria would be disposed to handle Canadian cars and accessories. At present this firm is handling Canadian tires.

1953. **Autos and accessories.**—An Italian firm with a New Zealand partner in Alexandria inquire for autos and accessories.

1954. **Automotive supplies.**—A firm of manufacturers' agents in Barbados are open to represent a Canadian firm supplying a complete stock of automotive goods. Good references can be given.

1976. **Hardware.**—An important firm in Alexandria and Cairo, with sister houses throughout the world, are anxious to do business with Canadians in the foregoing and other articles suitable for the Egyptian market.

1971. **Agency.**—A Cape Town commission agent is seeking the representation of iron and steel goods of all kinds, except machinery.

1972. **Leather cloth.**—A Johannesburg firm of manufacturers' representatives make inquiry as to the possible supply of imitation leather from Canada.

1955. **Glass (sheet).**—A South African firm of importers, with branch warehouses in several cities of the Union, ask for quotations on sheet glass.

1956. **Domestic glass.**—A London firm of import and export merchants are desirous of obtaining the agency of Canadian manufacturers of domestic glass.

1973. **Twines and string.**—One of the best South African agency firms, covering every centre of South Africa, make inquiry for either purchase or agency arrangement on Canadian-made twines and string.

1978. **General merchandise.**—A newly-organized English company in Cairo is in the market for handling Canadian agencies in Egypt.

1979. **General products.**—An English company in Alexandria, which can be highly recommended, are open to take up Canadian agencies in products which interest the Egyptian market.

1987. **Representation.**—A Britisher now in New York and about to visit Canada wishes to arrange to represent Canadian manufacturers while taking a trip to New Zealand, Australia, Dutch East Indies, Siam, Straits Settlements, Burma, British India, Ceylon and South Africa.

Catalogs and Booklets

WOOD GOODS, WAGON AND IMPLEMENT HITCHES

D. Ackland & Sons, Ltd., Winnipeg and Calgary, have issued a new catalog, No. 17D, of their line of ironed and painted carriage, wagon and farm implements, wood goods and farm implements and accessories.

Their many new lines include Westwo wagon and plow sets, Westwo "Perfect" equalizers, Dreadnaught implement hitches, Caswell tractor binder hitches, Uni-ty binder knotter hooks and many other lines.

They list a full line of singletrees, doubletrees, neckyokes, eveners, hitches, etc. Wagon boxes and wagon and implement tongues, bolsters and reaches are also listed, together with sleighs and cutter gears and farm trucks.

The catalog is well got up and attractively illustrated, and a copy would be found very useful by all merchants who cater for the farming trade.

"Wood-Vallance, Ltd., Winnipeg, are now distributing a quantity of very handsome display cards on Moffat Stoves—Canada B, Nelson B and City Queen. These have an advantage over the ordinary display card, inasmuch as they are covered with a coating of white varnish, which can be cleaned off at will with a damp cloth. These make a very attractive display card."

Latest Montreal Building Permits

Montreal.—Permits taken out with the City of Montreal for buildings, since September 1, are swelling themselves to near the million mark. Early this week the totals had reached $824,000, so that by the month-end the figure should be well above the $1,000,000 figure. The permits are of all descriptions, some being taken out for industrial buildings and others for warehouses, etc. There are many covering extensive alterations or repairs. If this work is proceeded with, as in many cases it will, this fall, it will mean considerable activity well into the year-end.

Crated in Constantinople!

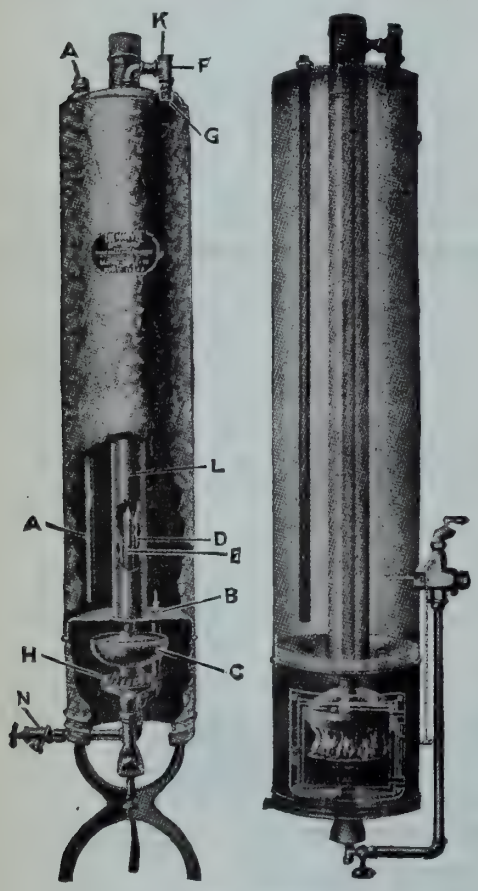
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

COMBINED RANGE BOILER AND HOT WATER HEATER

Bastian-Morley, Ltd., of Hanson St., Toronto, are manufacturing a combination range boiler and gas hot water heater, termed the Royal, which has been tested and approved by "Good Housekeeping Institute."

It is claimed that it will provide instantaneous hot water for bathroom,



Combination Hot Water Heater

kitchen and laundry, at an approximate gas consumption of from 3,000 to 3,500 cubic feet per month without increasing the present motor or gas line service in the home.

It is said to heat the entire capacity of the tank in a surprisingly short time and to be silent, odorless and safe.

The company also make a non-automatic heater in the same general style of construction, but without the automatic feature known as the Marvel.

Simple, scientific principles, combined with rugged durable construction, give efficiency and lasting service.

Both heaters can be connected with stove or furnace, so eliminating the necessity of a separate range boiler. Absence of coil or copper makes the heater equally durable and efficient with natural or artificial gas.

LINE OF HOSE FOR CANADIAN TRADE

William J. Brown and Company, 117 Youville Square, Montreal, have taken on the agency for Tighe's wire bound hose. This is made of a composition material and one of the features claimed for it by the manufacturers, Tuck and Co., Ltd., London, is that it has great strength, wire bound as it is inside and outside.

NEW INSERTED TOOTH METAL SAW

An inserted tooth metal saw which promises to meet a long felt demand has been invented and is being placed on the market by the Simonds Manufacturing Company of Fitchburg, Mass. This saw, which is designated as No. 000, was especially designed to meet the requirements for a saw to cut structural iron, I-beams, channels, and stock with thin walls that could not be cut as successfully with other saws of similar design, because the pith or spacing of the teeth was not fine enough to keep two teeth in the cut at all times in this work. This new saw, through its arrangement and closed spacing of teeth provides for smoother running and eliminates chatter, which is often noted where the teeth are placed further apart in the plate. It is a fast cutting saw and is fitted with as many teeth as it is possible to securely fasten into the plate, and at the same time retain the perfect alignment of teeth and strength of plate necessary to stand up and cut true. These saws are being made from 10 inches in diameter with kerf of ¼ inch and maximum of 40 teeth to 50 inches in diameter. 15-32 inch or 7-16 inch kerf, with 210 teeth as the maximum number.

NEW LINES OF ALUMINUM WARE

W. D. Shambrook & Co., Hamilton, in introducing to the trade a new line of aluminum ware, known as "Duro," are offering for Christmas trade sets of this ware boxed in attractive holly boxes. The boxes are lithographed in colors and the sets make a practical and attractive gift especially suitable for Xmas presents.

"Duro" ware is guaranteed by the makers to be pure, and the outer surface is highly polished.

The six sets comprise twenty articles, all good sellers, and includes 5 sizes of saucepans, pudding pan, preserving kettles, pie plates, utility bowls, soup ladles and casseroles. The sets retail from $2.25 to $5 per set, and W. D. Shambrook expect to be able to ship these sets at an early date.

EQUATOR UTILITY STOVE

The "Utility" stove made by the same firm, catalogue No. A5, is said to be a splendid general purpose stove. Built of steel and finished in highly polished nickel. It has exchangeable heating units, is supplied with six feet

Equator Utility Stove

cord and attachment plug and consumes 600 watts.

AUTOMOBILE ENGINE AND CARBURETOR HEATER

The Equator Mfg. Co., Hamilton, Ont., are making a new auto engine heater to place under hood when car is in garage in cold weather. The heater has oxidized copper finish, is 12 inches long, supplied with eight feet of waterproof cord and attachment plug, has exchangeable heating units. Catalogue No. A6, 200 watts.

WESTWO PERFECT EQUALIZER

This equalizer sold by D. Ackland & Son, Winnipeg and Calgary, is claimed to be not an experiment but the last word in draft equalization, and to be necessary to all teamsters and farmers, as with this equalizer each horse of the team is pulling his just share of the load and no more. No teamster can keep each of eight or ten horses pulling just his part of the load on a dead or solid hitch.

It is said to be the lightest hitch made and to throw the draft higher on the team. The feature of light weight is obtained by use of fewer parts and lighter construction, and the hitch is reinforced against wear and breakage. The equalizer is made in 13 different sizes in addition to 14 varieties of harvest hitches, giving a wide variety of combinations.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE hardware markets show fewer price changes this week than has been usual of late.

In advances the chief feature is probably the new price for poultry netting which shows a considerable increase in price for next season's booking. With the recent advances on wire and wire products this is hardly a surprise.

Other advanced prices are quoted on bar iron and steel, roofing nails and wrapping papers. Gas engine, cylinder and other lubricating oils have been increased in price. Polishing oils and mops have a higher price.

Some lower prices are quoted this week on window glass due partly, it is said, to a weaker tone in the Belgian markets and the arrival of some imports from that country.

Hardware and Metal understands, however, that it is very unlikely that supplies of window glass will be available in any large quantity from that source for some time to come.

Stocks of wire nails which have been very low for some time are said to be somewhat improved, but the scarcity of large headed roofing nails is still very acute.

Very little improvement is noted in supplies of black and galvanized sheets and plates, or of pipe and pipe fittings. Bar iron and steel are also extremely low in stock.

Hardware and Metal understands that stocks of some of these are in better shape in some of the mills, but transportation remains the chief difficulty, and no material change in this direction is expected for some time yet.

There seems to be some indication of a decline in hardware prices as the primary markets in iron and steel show signs of some weakening.

Business in country districts is said to be very good and the fall fairs are now in full swing.

MONTREAL MARKETS

MONTREAL, September 30.—Despite the fact that many have been looking for a downward revision of prices on many lines, there are still numerous advances for regular and special lines of hardware. Bar iron and steel furnish one of the most interesting examples this week and this advance is due, largely, to the strong demand. Latest advices just to hand, however, would seem to indicate that some lower prices may be the outcome of the recent sagging of the market.

Nail stocks are somewhat heavier but advances have, in one or two instances, been made by the manufacturers, this totaling 25c per keg. The jobbing price still holds at $6.40 per keg. Roofing caps are higher and roofing nails are extremely scarce. Pipe vises of certain lines are higher Wax candles are higher and are scarce, too. Silver polish is up. Wire cloth for next year will sell at $3.50 per 100 square feet. Wrapping paper is again advanced. Barrel churns are up. Shaft splices, and stall fixtures, both made of steel, are marked higher. Radiation and boiler are marked higher. Stoves, ranges and heaters are in good demand and all are very firm and selling, manufacturers state, close to cost. Ingot metals, such as copper and spelter, are lower. Reach baseball goods are revised downward slightly. On all sides reports are favorable regarding country business. There is little indication here of any precipitate declines on manufactured hardware lines.

Lead Products Quiet; Revisions May Come

Montreal.

LEAD PRODUCTS.—In view of the fact that pig lead is purchasable on a lower basis, it may be that, ere long, prices will be shaded on pipe and sheets. Solders, too, in view of the easing trend on tin, may be easier. There is a fair, though restricted volume of business at the present time.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of	10%
Lead traps and bends ..... List plus	30%
Lead wool, lb.	0 16

Oil and Gasoline Firm, But No Change

Montreal.

OIL, GASOLINE.—Prices have remained without change on both oil and gasoline and there is an active sale for both. Coal oil prices range from 31 cents per gallon upward and motor grade gasoline from 43½ cents up. The freight rate increases made a difference in price of about two cents a gallon, this being already recorded.

Bigger Nail Stocks But Will Not Last

Montreal.

NAILS.—There is some improvement in the delivery of nails from the mills. This is welcome news to the trade in view of the very stringent condition surrounding these products for many months. One jobber stated this week

that there was now no difficulty whatever in getting his requirements of standard wire nails in various sizes. Prices are unchanged with the basis for standard wire nails $6.40 per keg and that for cut nails $9.90 per keg. Prices have, in some cases, been marked higher. The next few weeks, it is said, will record many heavy shipments to the lake head, and this will reduce any surplus held in hand here.

Galvanized Sheets Promise to Hold Now

Montreal.

SHEETS AND PLATES.—A slow but sure improvement promises in the galvanized sheet situation. It may take some weeks for this to manifest itself greatly, but supplies have been arriving from outside points with greater frequency than during the early part of the summer, and it is hoped and expected that this will continue. Prices are still firmly maintained, and some jobbers report even higher prices than those quoted in the market.

BLACK SHEETS—	
10 gauge	10 95
12 gauge	11 00
14 gauge	11 05
16 gauge	11 15
18-20 gauge	11 20
22-24 gauge	11 25
26 gauge	11 30
28 gauge	11 45
GALVANIZED SHEETS—	
U.S. Standard—	
10¾ gauge	15 00
28 gauge	14 60
26 gauge	13 25
22 to 24 gauge	14 05
20 gauge	14 05
18 gauge	14 05
16 gauge	12 75
English Standard—	
28 gauge	....
26 gauge	....
24 gauge	....
22 gauge	....
18 and 2 0gauge	....

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Roofing Caps Higher; Very Hard to Obtain

Montreal.

ROOFING CAPS.—An advance to $15 per 100 pounds has been made for roofing caps. These are very hard to obtain and in view of the fact that felt roofing nails are also very scarce, the situation is not promising. Jobbers state that they are almost sold entirely out of stock of both kinds.

Pipe Vises Scarce; Are Marked Higher

Montreal.

PIPE VISES.—An advance has been made in one line of pipe vises, No. 1 standard now selling at $4.55 each, and No. 3 standard at $7.30 each.

Wax Candle Prices Show an Increase

Montreal.

CANDLES.—Wax candles have advanced, and this is doubtless a direct consequence of the firming of petroleum market prices recently. In sets of 6 they are now selling at $1.35 per carton, and in sets of 12 $1.45 per carton.

Prices Are Higher For Silver Polish

Montreal.

LIQUID POLISH.—Higher prices are effective for a well known line of silver polish, Putz Cream. The present prices are as follows: ¼ pints, $1.45 per dozen; ½ pints, $2.40; 1 pint, $4.25; 1 quart, $7.10; ½ gallon, $12; 1 gallon, $22.

Wire Cloth to be $3.50 Per 100 Feet

Montreal.

WIRE CLOTH.—The price for the season of 1921 on wire cloth has been fixed at $3.50 per 100 square feet. This is somewhat less than the price quoted last year and will be welcome news to the trade.

Another Advance Made For Wrapping Paper

Montreal.

WRAPPING PAPER.—Higher prices are again effective for kraft wrapping paper, the present price of the jobbing houses being 15½c per pound. There is no indication that lower prices are likely to prevail on this product and advances are rather to be looked for from time to time.

Revolving Barrel Churns Advanced

Montreal.

CHURNS.—Revolving barrel churns are revised in price, this being an advance, and standard sizes selling as follows: No. O, each, $13.50; No. 1, $13.50; No. 2, $15; No. 3, $16.50; No. 4, $19.50, and No. 5, $24. A discount of 20 per cent. from these prices f.o.b. Montreal is allowed to the trade.

Prices Are Higher on Shaft Splices

Montreal.

SPLICES.—Higher prices are quoted in this market on Hercules shaft splices, which are now selling at $4.80 per dozen. The last price quoted was $4.50 per dozen, and the market is reported as being rather bare of supplies.

Active Sale Now For Stove Cements

Montreal.

STOVE CEMENT.—There is steady and active demand for stove cement from the trade at the present time. Prices hold without change.

Cotton Waste Easy; Might be Reduced

Montreal.

COTTON WASTE.—There is a somewhat easier tendency on the cotton waste market, although definite changes have not been made. A considerable quantity of cotton rags are now being used, it is stated, and these are selling at prices ranging from 13 to 20 cents per pound. The easing condition on cotton products generally indicates that there may be a downward revision on various grades a little later.

No Immediate Change on Auto Accessories

Montreal.

AUTO ACCESSORIES.—There is a continued movement of automobile accessories to the trade and the undertone remains steady and unchanged. Dealers are hoping that prices will be revised downward, but jobbers report that with continued high wage outlays, high transportation costs, and other outstanding items in the production charges, that there is little or nothing to indicate the possibility of a near downward revision.

Upward Revision on Small Tools

Montreal.

SMALL TOOLS.—There is a fairly good demand for small tools, such as pliers, wrenches, etc., and these lines are very firm. It has already been noted that one line of these goods advanced last week 5 per cent., and in view of the material and labor situation no declines are now anticipated.

Prices Are Higher on Stall Fixtures

Montreal.

STALL FIXTURES.—Stamped steel fixtures are higher in price. The present quotation to the trade is $2.50 per dozen.

Slight Reduction on Baseball Goods

Montreal.

BASEBALL GOODS.—A new price list has been issued on Reach baseball goods. This covers baseballs, mitts, leg guards, uniform bags, bat bags, bases, score books, masks, bats, gloves, etc. There has been a good demand for these products all through the season and even the small decline which has been made in this revised list will be welcome to the trade.

Further Advances on Iron and Steel

Montreal.

STEEL AND IRON.—There has been some change in the market and bar iron and grades of ordinary steel had been marked higher. This is due, in part, to the short runs of the rolling mills, who have not been producing for a good many weeks. In view of this fact supplies had been hard to obtain although the jobbing trade have have been taking care of retailers quite well. Revised prices will be found herewith.

IRON AND STEEL	
Common bar iron, 10 0lbs.	5 15
Refinish iron	6 15
Iron finish machinery steel	5 25

Mild steel	5 30
Band steel	5 50
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	5 20
Tire steel	5 50
Toe calk steel	6 20
Harrow Tooth Steel	5 45
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

Prices Still Firm; Iron Pipe Is Scarce

Montreal.

IRON PIPE.—Skelp is still hard to obtain and manufacturers are unable to offer any increased quantities of iron pipe to the trade, to speak of. At the same time, it is hoped that improvement will come this fall, although with conditions as they are at present it is doubtful if any early improvement in the matter of price can be looked forward to.

Radiators and Boilers Advanced About 10%

Montreal.

RADIATORS.—An advance of approximately 10 per cent. has been made in hot water and steam radiators. This is something which was more or less anticipated in trade circles and is due to the increase in the price of pig iron, freight rates and higher labor charges. Round hot water boilers are now on a 40 per cent. discount basis, square 9-13 series water, 34 per cent.; steam, 35 per cent.; wall radiators, 7, 9, and 12 ft., $1.05; 5 ft., $1.15; with a discount of 34 per cent. on both water and steam. The market is very strong and demand has been fairly good for several weeks past.

Old Material Lags Except Some Lines

Montreal.

OLD MATERIAL.—Prices have remained fairly steady on a number of the old scrap materials. On others there has been a tendency to sag, but dealers expect that mills will be in the market for supplies a little later, and then the undertone will improve. Dealers in the country have not been sending in much of late.

Rope and Cordage Have Held Firmly

Montreal.

ROPE AND CORDAGE.—There is little change in the rope situation. The demand is restricted at the present time and manufacturers think that business will improve in the near future. There is nothing at present to indicate a reduction in the basis on either manilla or sisal ropes, although competition from outside points on inferior grade fibres has been quite noticeable. Pure manilla basis is 35½c, New Zealand, Beaver, and similar grades of manilla 28c and sisal 22½c per lb.

Stoves and Ranges Active and Very Firm

Montreal.

STOVES AND RANGES.—A very strong undertone characterizes the stove and range market and same condition applies to heaters. Manufacturers have been very busy in turning out supplies to fill orders in hand for Fall business. As a matter of fact the demand, as regards heating stoves, has been greater than the available supply in some cases. Dealers who have deferred placing their initial orders will have no little difficulty in obtaining necessary supplies, according to recent advices. While no advances have been registered in stoves or ranges the undertone is very strong. Pig iron, heavy steel plates, and wages are dominating factors in the present strong market.

Ware Lists Indicate a Steady Undertone

Montreal.

WARES.—There is an active demand for various grades of wares such as enameled wares, galvanized wares, frying pans and all lines of fall goods which will soon be selling actively in the retail trade. These lines are steadily firm without change, and the undertone is quite strong.

Ingot Metals Remain Quiet and Some Easier

Montreal.

INGOT METALS.—Prices are remaining steady on some items, while copper and spelter are easing. There is not much new in the situation and the movement is limited.

TIN.—There is plenty of this in the market and prices remain unchanged, though the undertone cannot be stated as strong. Price still remains 53c per lb.

COPPER.—Easier in outside points and also easier here, with 23c quoted on casting and 23½c on electrolytic.

LEAD.—While a price of 8¾c still obtains on this there is a tendency toward lower quotations and these may be ruling soon.

ANTIMONY.—A price of 9½c still obtains on this, and there is nothing new since last week.

SPELTER.—As stated last week this has been ruling easier. There is a definite price change since that time, quotations here being half a cent less at 10c.

ALUMINUM.—Ruling unchanged and is quiet. Price in average quantities, 36c per lb.

TORONTO MARKETS

TORONTO, Sept. 30.—Among fewer price changes than usual the outstanding feature is the new prices on poultry netting for next spring. They constitute a considerable advance on this season's prices, equivalent in the two inch mesh to twenty-five per cent. This is not altogether a suprise as wire with all wire products including fencing has been very scarce all the year and has had a continual upward tendency.

Other advances include lubricating oils which have been increased from one to five cents per gallon according to grade, but fuel oil is shaded down a trifle, for the second time in two weeks. O'Cedar polish and mops are advanced in price. Screen wire cloth is being booked for next season at a fraction less than this year's prices.

Very little improvement is recorded in staple lines which have been reported from week to week as being hard to obtain, and stocks of bar iron and steel, sheets and plates, pipe and fittings, nails and wire are low, in some instances extremely so.

Very Great Shortage of Canada Plates

Toronto.

CANADA PLATES. — The demand for Canada plates seems as far from being filled as ever. These goods are nearly off the market and jobbers are unable to get supplies. Orders for stove pipes have to be turned down on account of inability to get deliveries of plates. One firm had to refuse an order for 12,000 stove pipes on that account.

Rope and Cordage Quieter, But Unchanged

Toronto.

ROPE AND CORDAGE.—No change is reported in the rope market. A little sorting up business is being done but quieter conditions prevail which is not unusual at this time of the year however. Quotations are firm at following base prices:

Pure Manilla 35½ cents per pound; New Zealand Hemp 28 cents per pound; Sisal 22½ cents per pound.

Shortage of Pipe Still Maintained

Toronto.

WROUGHT AND STEEL PIPE. — No change is recorded in the price of pipe and there is still a very great shortage. Many jobbers say their stocks were never in such a low condition and they have continually to turn down orders.

The mills have been unable to get sufficient supplies of skelp and cannot produce to their full capacity.

Prices, which are expected to remain firm, are as below:

LIST NO. 46
Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Wrought Iron Galv.

No Change in Iron and Steel Shortage

Toronto.

IRON AND STEEL.—Very little new can be said this week regarding iron and steel.

No improvement in deliveries is reported, supplies are still very scarce although jobbers say that they have promises of improvement from the mills. Transportation now appears to be the main difficulty.

Prices remain firm as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 25
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	6 00
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	6 00
Hoop steel	7 50

Sheet Prices Unchanged But Scarcity Prevails

Toronto.

BLACK AND GALVANIZED SHEETS.—There still remains a big scarcity of supplies of both black and galvanized sheets, especially among the lighter gauges. 10 3-4 oz. is said to be particularly scarce.

While a little improvement in transportation was noted recently across the "border," it has not been maintained and the opinion is expressed in the trade that there will not be any decided relief in the situation before spring.

Quotations are as follows:

BLACK SHEETS

14 gauge	$11 35
16 gauge	11 50
18-20 gauge	10 80
22-24 gauge	10 85
26 gauge	10 90
28 gauge	11 00
3-16 inch plate	9 75
¼-inch boiler plate	...

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier	Apollo
10¾ oz.	$12 50	$13 25
U.S. 28	12 70	12 85
U.S. 26	12 40	12 55
22 and 24	12 25	12 40
18 and 20	11 95	12 10
16	11 95	12 10
12 and 14	11 20	11 95

An extra is now charged on galvanized sheets 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Valves and Bibbs Firm, But Unchanged

Toronto.

VALVES AND BIBBS. — Compression goods, valves and cocks are firmly held without change. No particular scarcity is reported in these goods and the demand continues fairly good.

Quotations on principal lines are as follows:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Bath cocks, Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C	Net
Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%

Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Compression	16%
Quick opening	28%

Another Advance on Black Oil Prices

Toronto.

BLACK OIL.—There was an advance recorded last week in black oil and it has again been increased another cent a gallon. The higher freight rates are said to be the chief cause of this latest advance.

The summer oil is now quoted at 0.55.60 and the winter black at $0.34.10 cents per gallon, barrel lots, less 15 per cent.

Five Cents Added List Kerosene Tractor Oil

Toronto.

KEROSENE TRACTOR OIL. — In the revision of oil prices this oil has been advanced five cents a gallon on list, and is now selling at $1.50 less 15 per cent.

Machine and Cylinder Oils Take Slight Advance

Toronto.

MACHINE AND CYLINDER OILS. —Due principally to increased costs caused by the higher freight rates, the different machine and cylinder oils listed below have been advanced about one cent per gallon.

New prices are the following:—Capitol cylinder oil $1.01.60; machine oil $0.65.10; imperial gas engine $0.66.10; paraffine oil $0.46.10. List less 15 per cent on above.

O'Cedar Mops and Polishes Advance Fifteen Per Cent.

Toronto.

O'CEDAR MOPS AND POLISHES.— Higher prices go into effect on October 1st, on O'Cedar mops and on the polishing oil. The demand for these goods is very large, but increased costs make the higher price necessary, it is stated. The advance is approximately fifteen per cent. New prices are given below:

Mops. — O'Cedar mops, less handle, $14.00 per dozen; with handle $16.00 per dozen.

Polish. — 4 ounce bottles, $2.40 per dozen, net; 12 ounce bottles, $4.80 per dozen, net; 1 quart can, $12.00 per dozen, net; 1-2 gallon can, $20.00 per dozen, net; 1 gallon cans, $28.00 per dozen, net.

Screen Wire Cloth New Booking Price

Toronto.

SCREEN WIRE CLOTH.—Prices for next spring bookings on black screen wire cloth are in effect and it is being

quoted at $3.50 per 100 square feet. This price is a very little lower one than that of the present season which was $3.60.

Five Cents on List Added Polarine Oils

Toronto.

POLARINE OIL.—This line of gas engine cylinder oil has advanced about five cents per gallon on list and is now quoted at $1.50 per gallon, barrels, less 25 per cent.

Stiff Advance on Poultry Netting Prices

Toronto.

GALVANIZED POULTRY NETTING.—The booking prices for poultry netting for next season's booking are as follows:—Canadian, 1 inch and 2 inch mesh, list plus 25 per cent; American, lay flat, list plus 30 per cent.

This is a considerable advance as Canadian 2 inch mesh has been selling at net list, and 1 inch mesh at list plus 5 per cent.

Fuel Oil Again Shaded Slightly

Toronto.

FUEL OIL. — Fuel oil on which a drop of one cent per gallon was recorded last week is again down this week 4-5 of a cent.

Present quotations are 20 cents per gallon, net, in barrels and 18 cents in tank cars.

Gasoline and Coal Oil Firm and Unchanged

Toronto.

GASOLINE AND COAL OIL. — No change is announced in the price of these two commodities which are firm at prices as per current market quotation pages.

Prices Unchanged on Cotton Waste

Toronto.

COTTON WASTE.—Although there is an easier tendency reported in the cotton market no change has yet been made in waste prices which are given below:

WASTE	
Cream, Polishing	0 28
WHITE	
XXX	0 23
XX	0 21½
X	0 20
Japanese	0 17
XXX	0 24
XX, grad.	0 22½

No. 1B	0 12½
Fancy	0 19
Lion	0 17
Standard	0 15
Popular	0 13
Keen	0 11

Above lines subject to trade discount for quantity.

Copper and Brass Sheets and Rods Are Firm

Toronto.

BRASS AND COPPER.—No change has taken place in these metals and supplies while not over plentiful are in better shape than are iron and steel. Prices are unchanged and market quotations are as per current quotation pages.

Conductor Pipe, Elbows, No Change But Scarce

Toronto.

CONDUCTOR PIPE AND EAVES TROUGH.—No change in price has taken place on these goods and they are still scarce owing to shortage of galvanized sheets. They are quoted at 25 per cent. above list and the elbows at 50 per cent. above list.

Inactivity in Waste Materials

Toronto.

OLD MATERIALS. — Very little movement is reported in the waste material market. Scrap iron and steel have been fairly active, but other lines have been quiet. Prices are unchanged and are as follows:

WASTE MATERIAL	
No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Heavy lead pipe	0 05¾
Tea lead	0 03
Automobile tires	0 02½

Higher Price on Butter Moulds

Toronto.

BUTTER MOULDS.—The "Daisy" wooden butter mould has been advanced in price and is now quoted at $2.75 per dozen.

Ingot Metals Dull; Some Lower Quotations

Toronto.

INGOT METALS.—A sagging tendency has been reported this week on ingot metals, with trading in most lines dull, and slightly lower quotations general.

TIN.—This metal has had a downward trend and reached a lower level than for some time on the English markets. Present local quotations are from 53 to 55 cents per pound.

COPPER.—Reductions are announced in U. S. markets on copper, but local markets are said to have been stagnant. Quotations for casting copper are unchanged at 24 cents.

LEAD.—An easier feeling is reported in lead markets, due to exchange and the arrival of foreign metal. Local markets have been quiet, and it is being quoted at 9½ cents per pound.

ANTIMONY.—No material change has occurred in antimony, which has been dull, and prices range from 10 to 14 cents according to grade.

SPELTER.—This has been fairly active at lower levels, and present quotations are around 10¼ cents.

ALUMINUM.—The market is said to be dull in this metal and prices are unchanged at 37 to 39 cents.

LONDON MARKETS

LONDON, ONT., Sept. 30.—Most prices continue firm, but with fewer changes noted. Linseed oil and turpentine are both a little easier again.

Among goods bearing a higher price this week are Westcott wrenches, carpenters' chalk, Johnson's floor wax and wooden rat and mouse traps.

The hardware business has been fairly good, although the exceptionally warm weather is retarding the sale of many cold weather fall lines. Goods are said to be coming forward a little faster now, but very many lines are still scarce. Nails and builders' hardware are in good demand. Collections are good.

Linseed Oil Little Easier in Tone

London, Ont.

LINSEED OIL,—A slightly easier price is being quoted this week on linseed oil but demand is not above normal. Quotations are as following:

Linseed Oil—	Raw	Boiled
1 to 2 barrels, gal.	$1 67	$1 70
3 to 5 barrels, gal.	1 66	1 69
6 to 9 barrels, gal.	1 64	1 67

Less barrels add 15c per gal.

Turpentine Declines Ten Cents a Gallon

London, Ont.

TURPENTINE.—There has been a decline of about ten cents per gallon on spirits of turpentine this week and present jobbers' quotations are the following:

Turpentine—	Per Imp. Gal.
1 barrel lots	$2 40
2 to 4 barrels	2 39
5 gal. lots	2 55

Wire Nails Scarce; Demand Is Good

London, Ont.

NAILS.—There is a very good demand here for nails and some sizes are rather hard to obtain. They are being quoted at $6.25 base for wire nails and $7.50 base for cut nails.

No Changes in White Lead

London, Ont.

WHITE LEAD IN OIL.—A good seasonable sale without any change in price is reported on white lead in oil. Present quotations are as follows:

	Tons	Less Tons
Pure	$20.45	$20.80 per 100 lbs.
Elephant Brand	20.95	21.30 per 100 lbs.

Window Glass Demand Is Steady

London, Ont.

WINDOW GLASS.—Orders at the present time for window glass are of a sorting character and are fairly good. No change from previous discount is announced although it is understood that better prices are being quoted. The American market is said to be firm but the Belgian market is easier, but supplies from there are not large.

Putty Sales Seasonable; Prices Firm

London, Ont.

PUTTY.—No changes in putty prices are reported. It is firm with a seasonable demand, but in no very large quantities. Prices are the following:

Putty—Standard—100-lb. drums, $8.30 per 100 lbs.; 25-lb. drums, $8.55. Pure—100-lb. drums, $10.80; 25-lb. drums, $11.05.

Good Demand For Ash Sifters

London, Ont.

ASH SIFTERS.—These goods are selling well at the present time and quotations are, for common wood side, $3.75 dozen; Banner, $3.65 each; No. 1 Rocker, $6.25 each.

Carpenters' Chalk Advanced in Price

London, Ont.

CARPENTER'S CHALK.—A new higher price is being charged on blue carpenter's chalk and present price is $3.00 per gross.

New Prices on Westcott Wrenches

London, Ont.

WESTCOTT WRENCHES. — New stocks of these goods are arriving and are being sold at the following prices which are higher than previous prices: 6 in., $12 per doz.; 8 in., $15; 10 in., $18; 12 in., $27.

School Crayons Costing More

London, Ont.

SCHOOL CRAYONS.—School crayons are costing more and the new price on the enameled white crayons is 35 cents per gross.

Johnson's Floor Wax Advances Five Cents

London, Ont.

JOHNSON'S FLOOR WAX. — This make of prepared floor wax has advanced five cents per pound this week and is now quoted at 75 cents per pound.

Victor Wood Traps Costing More

London, Ont.

MOUSE AND RAT TRAPS.—Wooden mouse and rat traps are now selling at a higher price and the following are the prices on the Victor make: Victor mouse traps, 47 cents per dozen; Victor rat traps, $1.75 per dozen.

Stove Boards in Demand; Present Prices

London, Ont.

STOVE BOARDS.—A good demand is being experienced for these goods and the following are prices quoted for wood lined boards:

Stove Boards, Wood Lined—24 in. square, list $18.50 doz.; 26 in., $21; 28 in., $23.50; 30 in., $25.50; 33 in., $32; 36 in., $37; 18 x 28, $19; 24 x 32, $25; 26 x 34, $26.50; 26 x 38, $28.50; 28 x 44, $40; 30 x 48, $50. Add 10 per cent. to list.

Coal Hods Are Moving Well

London, Ont.

COAL HODS.—Japanned and galvanized coal hods are now selling well and the following are prices charged:

Japanned—16 in., open, $6.84 doz.; 17 in., $8.64; 17 in. funnel, $10.26. Galvanized—16 in. open, $10.45; 17 in., $12.35; 17 in. funnel, $15.20.

Present Prices on Snow Shoes

London, Ont.

SNOW SHOES.—Fall orders are now being shipped for snow shoes and the prices are rather higher than last season. Quotations on the regular selling lines are given:

Boys', 10 in. x 33 in., $2.65 pair; Ladies', 11 in. x 36 in., $3.75; Men's, 12 in. x 42 in., $4.40; Men's, 14 in. x 42 in., $4.85; Men's, 16 in. x 42 in., $5.25.

Ice Skates Now Moving Out

London, Ont.

ICE SKATES.—Skates are now moving out and the prices on the Starr make are the following:

Starr Line—Acme Spring, No. 100, list $1.75 pair; Hockey, No. 153, $1.70; No. 150, $1.90; No. 154, Bull Dog, $2.10; No. 157, Beaver, $2.75; No. 173, Climax, $3.50; No. 193, Dreadnought, $4; No. 129, Mic-Mac, $5; No. 196, Imperial, $6; No. 181, Velox, $6.50; No. 190, Tube, $6.50. Less 30 per cent.

Latest Quotations on Furnace Scoops

London, Ont.

FURNACE SCOOPS.—The demand for furnace scoops is now commencing and prices charged are $12.50 per dozen for the heavy make in long or D handle, and $10 for the light make.

Good Demand For Builders' Hardware

London, Ont.

BUILDERS' HARDWARE.—The demand for builders' hardware here continues very good. Prices keep very firm with many shortages.

Discount Off New List Miscellaneous Wire Nails

London, Ont.

MISCELLANEOUS NAIL LIST.—The discount on the new miscellaneous wire nail list is 65 per cent. off list, instead of 50 per cent. off as it was on the old list.

Hand Sleighs Moving; Present Quotations

London, Ont.

HAND SLEIGHS.—Booked orders are now being filled, and goods shipped, on sleighs for the winter trade. Prices on the Canadian Buffalo Sled Co.'s lines are given below:

No. 27, list, $9.60 doz.; No. 26, $12.40; No. 30, $13; No. 32, $12; No. 33, $15.40; No. 36, $18.75; No. 36C, $27.50; No. 42, $27.50; No. 42C, $34; No. 36H, $21.50; No. 42H, $29.50; No. 85, $39; No. 86, $41.50; No. 87, $56; No. 16, $37; No. 17, $46; No. 18, $52.25. Less 35 per cent.

Hockey Sticks Higher in Price

London, Ont.

HOCKEY STICKS.—There is a probability that there may be a shortage of hockey sticks again this winter. Manufacturers have endeavored to take care of their customers who booked early, but the right kind of lumber is said to be scarcer and higher in price. Prices on some of the well-known makes are as follows:

Youth's White, $2.90 doz.; Rock Elm, $4.25; Dominion Special, $5.50; Hespler Special, $7.80; D.W.S. Hand Made, $10.80.

Skate Strap Prices For Present Sales

London, Ont.

SKATE STRAPS.—The following are latest prices on leather skate straps for this coming season: 21 in., $1.60 per dozen pairs; 24 in., $1.90; 29 in., $2.20.

Ammunition in Demand; Present Quotations

London, Ont.

AMMUNITION. — The demand for shot shells and metallic cartridges continues to be very good and Dominion make is quoted at 37½ per cent. off Canadian list, and Winchester and Savage at plus 27½ per cent. on American list.

WINNIPEG MARKETS

WINNIPEG, Sept. 28.—Hardware prices this week for the most part are very firm. Few changes have been made in prices and are for the most part in an upward direction. The new list of "extras" which has just been issued will alter the cost of most sizes of nails, although the base price has been unchanged. More shipments of galvanized sheets have been received, but did not last any length of time, as there was only sufficient to fill some of the many orders in hand. Axe handles are very scarce and some lines have been advanced in price this week. Coil chain is scarce and the price has also been advanced this week on this commodity. Lower prices are quoted on washing machines. Barbed wire receives another boost in price this week. Columbia batteries and Hot-Shot batteries are quoted this week at higher prices. A number of builders' hardware lines are advanced. Cold drawn machinery steel and angle iron are also advanced in price.

Business in the hardware trade is quite active, especially in the country trade.

Collections are reported to be good.

New High Prices on Car Movers

Winnipeg.

CAR MOVERS.—There has been a scarcity of car movers for some time, but these are again available and a fair supply is now in hand. The Badger No. 5 is now quoted at $7.00 each.

Dry Cell Batteries Costing More Money

Winnipeg.

BATTERIES.—Although there seems to be a good supply of batteries on the market the prices have been advanced, due to the greater cost of raw material used in their manufacture. Prices quoted this week are as follows:

Columbia, No. 6—Barrel lots of 125, $48.35 per 100; 50 or less than 125, $49.35; 12 or less than 50, $51.85; less than 12, $56.85.

Columbia, No. 8—Barrel lots, $107.90 per 100; 25 or less than 50, $111.40; 12 or less than 25, $114.40; 6 or less than 12, $133.90.

Hot Shot Batteries—No. 1461, $2.45 each; No. 1462, $2.45; No. 1561, $2.77; No. 1562, $2.77; No. 1662, $3.65.

Multiple Batteries—No. 266, $6.75 each; No. 356, $9.00.

Gate Latches and Hinges Advanced in Price

Winnipeg.

GATE LATCHES AND HINGES.—The price has been revised upwards on these lines this week and they are quoted as follows: Gate latches, No. 65, per doz., $3.35; No. 60, per doz., $3.35. Gate Hinges, No. 60, per doz., $6.00; No. 65, per doz., $4.65.

Barbed Wire Again Advanced

Winnipeg.

BARBED WIRE.—Although the price on barbed wire was raised last week another advance has been made this week owing to the scarcity and increased cost of raw material. Lyman 4 pt., Fort William, $5.80; Winnipeg, $6.35. Gliden, Fort William, $5.65; Winnipeg, $6.15. Baker, Fort William, $5.55; Winnipeg, $6.05.

Machinery Shafting Prices Have Upward Revision

Winnipeg.

MACHINERY SHAFTING.—There is a very limited stock of steel on hand and it is very difficult to get any at all. The prices of cold drawn machinery shafting have been revised upwards and quotations received this week are as follows:

5-16 in., $11.31 per 100 lbs.; ⅜ in., $11.31; 7-16 in., $10.83; ½ in., $10.83; 9-16 in., $10.83; ⅝ in., $10.51; ¾ in., $10.51; ⅞ in., $10.35; 1 in., $10.35; 1⅛ in., $10.25; 1¼ in., $10.25; 1⅜ in., $10.25; 1½ in., $10.11; 1¾ in., $10.11; 2 in., $10.11; 2¼ in., $9.85; 2½ in., $9.85.

Higher Prices Quoted For Cable Chains

Winnipeg.

CHAIN.—Higher prices have been looked for on different lines of chain for some time due to natural causes that have been prevalent with other lines and therefore the higher prices quoted below this week will cause no surprise:

Cable Chain, Electric Weld—3-16 in., $20.25 per 100 lbs.; ¼ in., $18.85; 5-16 in., $16.30; ⅜ in., $13.55; 7-16 in., $13.20; ½ in., $12.85; 9-16 in., $12.85; ⅝ in., $12.35; ¾ in., $12.15.

B.B. Short Link—⅜ in., $15.95 per 100 lbs.; 7-16 in., $15.60; ½ in., $15.25; 9-16 in., $15.25; ⅝ in., $14.45; ¾ in., $14.25; ⅞ in., $13.85; 1 in., $13.50.

Angle Steel Has Advanced in Price

Winnipeg.

ANGLE STEEL.—Another advance in the price of angle steel has been recorded this week and it is quoted as follows:

3-8 in., $6.80 per 100 lbs.; 5-16 in., $7.05; 1-4 in., $7.05; 3-16 in., $7.05; 1-8 in., $7.05.

Cant Hook and Harrow Tooth Steel Are Higher

Winnipeg.

CANT HOOK AND HARROW TOOTH STEEL.—New higher prices on these have gone into effect and quotations are as follows per 100 lbs.: Harrow tooth steel, $6.55 base; cant hook steel, $7.30 base.

Logging Chains Advanced in Price

Winnipeg.

LOGGING CHAINS.—New higher prices are in effect this week on logging chains and present quotations are:

Log Chains—¼ in., $21.75 per 100 lbs.; 5-16 in., $18.70; ⅜ in., $15.95; 7-16 in., $15.60; ½ in., $15.25.

Trusty Screw Drivers New Selling Prices

Winnipeg.

TRUSTY SCREW DRIVERS.—A recent shipment of these has lately been received at slightly higher prices and they are now selling as below: No. 4x4 in., $5.50; 5 in., $5.50; 6 in., $5.75.

A New Shipment of Combination Pliers

Winnipeg.

COMBINATION PLIERS.—A shipment of six-inch combination pliers has been received here, No. 1180 x 6 in., and is quoted at $12.40. This is the most reasonable plier offered here for some time.

PITTSBURGH MARKETS

PITTSBURGH, September 30.—Independent steel producers make considerably less effort than formerly to conceal the fact that they expect steel prices to decline. A common prediction now is that prices will not go below the Steel Corporation level. As no one had predicted that they would the statement is not particularly important, except as a definite admission of an abandonment of the hopes independents had entertained from time to time that the Steel Corporation would advance its prices. The main question now is one of time, when it will be that the independent steel prices will drop. Thus far they have not declined to any really noticeable extent, for the decrease in premiums for particularly prompt shipment that has been in progress at intervals for three months or more does not represent a general market decline. Naturally, in keeping with traditions, the aim of independent mills is to hold their prices up as long as they have much contract business on their books, as to reduce prices would be to encourage cancellations and suspensions of shipment.

The Automobile Declines

Up to date, Ford, Franklin and Crow-Elkhart have announced reductions in the prices of their cars, from 15 to 30

per cent. In some quarters these reductions, doubtless to be followed by other automobile makers, are regarded as containing a challenge to the steel industry to reduce its prices. The steel industry, however, shows some indisposition to admit that any challenge of this sort is necessarily implied. They point out that during the past nine months, or say since the first of the year, the automobile makers have received steel at a very wide range of prices. In the aggregate, by far the major part was at the Industrial Board prices, and a relatively small part was at very fancy prices. It is asserted that automobile prices of late have been in relation with the highest priced steel, constituting the smallest tonnage, rather than in relation with the lowest priced steel, constituting by far the bulk of the tonnage. The fanciest prices were made by the automobile industry, seeking additional tonnages to supplement deliveries due on contract, and practically disappeared when that particular trade stopped buying.

In view of the fact that the sharp price advances in steel products early this year were due in great part to the eager and extravagant bidding of the automobile industry, and were recognized at the time as being caused chiefly by that industry, when other consumers who wanted steel were unable or unwilling to bid fancy prices, it might be considered natural enough that now the automobile industry should be able to exert an influence in the opposite direction, and produce low prices as it formerly produced high prices. One difficulty, however, is that the automobile industry does not really take any large part of the steel output, and another is that the trade has been so sudden in its recent cancellations of orders and instructions to suspend shipments that its contracts cannot well be set at a high valuation, excepting, of course, one or more large makers who are good in living up to contracts.

Heavy Deliveries of Steel

The great increase in steel deliveries that has occurred in the past few weeks does not seem to be rated as high as it deserves to be in constituting a market factor. The stagnation in new buying is properly attributable chiefly to this increase in deliveries. It should be noted, first, that the production of steel in August was seven per cent. more than the production in July, while the production August 1 to date has been well in excess of output in the same length of time prior to August 1. Next it must be noted that up to about August 1, and beginning in April, the steel mills were stocking steel, on account of car shortage. Since about the beginning of August they have been moving their stocks, and the highest estimate is that one-third of the stocks remain, while the lowest estimate is that practically nothing remains of the stocks. Thus the stocks have been moved at a much greater rate than that by which they accumulated, and the production itself, also moved, has been greater than formerly. Obviously the tonnages of steel received by jobbers and manufacturing consumers have been much greater in the past few weeks than in July and preceding months. This change would in itself be amply sufficient to account for the stagnant market.

It is the common view, however, that there is a decrease in consumption of steel, with further decreases in prospect, and thus no one seems to expect the market to recover. The common view is that prices will have to go through a course of liquidation, so that the only questions are when the readjustment will occur and how far prices will drop.

As to decreases in consumption, there is the automobile industry, which is consuming less than one-half as much steel as it did at the top point, and then there is the showing made by the fabricating shops, the report of the Bridge Builders' and Structural Society showing bookings of fabricated steel contracts in August equal to 40 per cent. of the fabricating capacity, against 50 per cent. for July and an average of 72 per cent. for the first six months of the year. Again, there is the case of the railroads, which are buying but little now, and are hardly likely to be in the market again in the near future. In the first eight months of the year about 65,000 freight cars were ordered by the railroads and industrial concerns, but there is no likelihood that the last four months of the year will add much more business.

The independent plate market is quotable at about 3.25c. There are rumors of lower prices being done, but these lack positive confirmation. Merchant steel bars can generally be bought at 3c by buyers with regular mill connections, and mills that are quoting higher prices, up to 3.50c or more are probably getting little, if any, business. Shapes are 3.10c, but with scarcely any buying. Black and galvanized sheets show a declining tendency, but are very difficult to obtain for early delivery at any price. A fair average of the independent sheet market is 7c to 7.50c for black, 8.75c for galvanized, 5.25c for 5.50c for the heavier gauges of blue annealed, say 12 and heavier, with 5.75c base for 16 gauge.

The Steel Corporation prices, which are going to be more and more in evidence, are: Bars, 2.35c; shapes, 2.45c; plates, 2.65; blue annealed sheets, 3.55c; black sheets, 4.35c; galvanized sheets, 5.70c. These apply only to the domestic market.

Pig Iron

The local pig iron market is quotable unchanged simply because nothing has occurred, and the "market" must be given at the levels at which business was last done, $50 for foundry and malleable, and $48.50 for Bessemer and basic, f.o.b. valley furnaces. Lower prices might be quoted even now if there were any inquiry, but there is none. Pittsburgh foundries do not even buy southern iron, which can be had at $2 36 less, delivered Pittsburgh, than valley iron.

Factors That Suggest Steady Glass Market

Demands This Year Have Been Heavy—Present Trade Quieter But Little Improvement in Stocks Carried—Importers Can Only Get Actual Requirements and Accumulation Difficult.

Interview with F. J. Kerr, Montreal manager Pilkington Brothers

MONTREAL. — Trade for glass in Canada during many months of the present year has been exceedingly heavy. This has reduced stocks to the point of exhaustion on many sizes—particularly the larger plates, and in many instances, for a time, several smaller plates had to suffice where the larger were required. Of late this condition has improved and plates can now be supplied with reasonable promptness. This does not mean that all the glass necessary is in the hands of importers. The condition is influenced by the falling off of demand that has been manifest for a few weeks. Were the demand as great as formerly there would still be the acute shortage on those larger sizes.

Belgian glass has been forthcoming for some time past. This has gone into Canadian trade channels promptly, and many different jobbers were handling the products from there. In fact quite a considerable competition has arisen in the marketing of these supplies and this has had the effect of somewhat unsettling the market, a number of those possessed of this grade selling it at shaded prices. Some of this competition is still manifest, but as supplies are not excessive, or even normal, there seems to be little justification for price-easing. Wages and other production costs have held high.

Limited Improvement

Glass has been forthcoming from three sources—the United States, Great Britain and Belgium. Supplies from England have been restricted. Representations made to the manufacturers there, however, have served to improve the situation in so far as the allotments to this market are concerned. Canada has been receiving a larger (though not as large as desired) supply of both plate

and box glass than she received for many months in the earlier part of this season. The demands there prevent the sending of more than actual present and immediate future needs justify, and there is no possibility of building up a surplus.

The supplies available from the United States have been restricted, home demands absorbing much of the production. Reports indicate that the manufacturers have not been able to get those results from labor that were desired or expected. While the "fires" were in operation longer than usual this year, it appears that the extra runs did not secure the output it was hoped for. As a consequence the immediate home demands are such as to absorb the output of the mills quite regularly, although, of course, some glass comes into Canada from there.

The state of things in Europe, generally, has doubtless favored Canada, in so far as glass shipments are concerned. For instance, it is understood that Germany has not been letting Belgian glass in, while Russia, too, and some of the Balkan States are understood to not be buyers or prospects up to this time. The matter of credit has doubtless been a factor. Therefore there was some surplus glass that could be spared and Canada got it. Even at this, it is said that much of the glass came forward on a spot cash understanding. The Belgian makers are said to not be extending credits and that shipments have been sent along on the basis of cash against documents. Supplies of this glass are understood not to be extensive, as far as imports to Canada go.

As to Prices

In the matter of prices there is nothing to indicate an early change. The fact that stocks are limited and even short is a big item in itself. In ordinary times stocks would be eight or ten times greater than at present. It will not be possible to secure replenishment of these stocks, in the regular way, for a long time. Some are holding back from buying in the hope and expectation that there will be a decline, but this is not looked for now.

There is much need for building of all kinds and when those wanting to build can be assured that markets will not tumble precipitately they will go ahead.

Higher Freight Affects Paint Business to Very Small Degree

Experience with Higher Freight Rates in United States Shows that Better Transportation Much More to Be Desired Than Low Rates on a Poor System.

IN view of higher freight rates in Canada it is interesting to note the opinion of how higher freight rates in the United States affect business, especially in so far as paint trade is concerned. Dealing with the subject the American Paint Journal says:

"The increase in the cost of producing a gallon of paint, due to the advance in freight rates will be very slight, and it is not probable that it will be reflected in the selling price. It is pointed out that the freight on a car of material, average haul, is approximately 60 cents per hundred. An increase of 20 per cent., it will be seen readily, means only two or three cents per gallon in the cost of production.

"That which is of keen interest to manufacturers and jobbers relates to the rate adjustments between competitive points. A percentage advance makes wholesale disturbance in rate relationship. A 40 per cent. increase on a dollar rate is four times more than a 40 per cent. increase on a 25-cent rate. Consequently a percentage advance will compel the longhaul shipper to absorb a very substantial portion of the advance to meet the prices of his competitors.

"A representative of a St. Louis paint manufacturing company, discussing the increase in freight rates, said if the new tariff would bring an improvement in the service, it would mean a decrease in the cost of producing paint instead of an increase.

"Retailers say there will be little increase, if any, in retail prices. Opinions such as that the consumer will pay three times as much as the increased freight are not justified, and even if true it would not add largely to the retail prices. The amount of retail prices of goods charged to transportation is comparatively small. It is possible that profiteers might undertake to use the plea of heavier freight costs to cover up their excessive prices, but the rule of supply and demand under competition is bound to have its way and freight rates will in the end have only their normal effect upon prices.

"Manufacturers more than anybody else will be affected by traffic changes. Yet even they quickly adjust their business to them. The prosperity of the country and the economic living of the people depends far more upon the regular and adequate and speedy transportation of goods than it does upon the freight tariff. What the country needs is better transportation. The cost of it should be a secondary matter."

CANADA LEADS IN EXPORTS OF TIN AND TERNE PLATE

Canada, for the month of July, exported 14,442,405 lbs. of tin and terne plate to the value of $1,046,-121, being more than any other country in the world.

Easier Glass Prices Due to Belgian Imports

Lower prices on window glass this week are said by H. M. Adams, of the Toronto Plate Glass Importing Co., to be due to the unloading of Belgian glass in the Canadian market. Other opinions are that receipts of Belgian window glass are temporarily falling off owing to the large demand for this product in the English market.

N.C.R. Has Novel Profit-Sharing Plan

A profit-sharing plan of an original and unusually liberal character is announced to the Canadian employes of the National Cash Register Co. by Frederick B. Patterson, vice-president, who made the trip from Dayton expressly to explain the many unique features of the plan. Briefly summarized, the plan calls for a clean fifty-fifty division of profits between company and all employees, who are not members of the company, with odds, if any, inclining in favor of the employes.

The profits of the company are to be determined by an outside firm of accountants. From the total profits will be deducted an amount equal to six per cent. interest on the money invested by the company.

After the six per cent. interest is deducted, the remaining profits are divided equally between employees and company

Between 85 and 90 P.C. of World's Consumption of Asbestos Met by Quebec Province

Canada leads in asbestos, and exportations continue to grow more important. Ontario's pre-eminent position with regard to nickel is closely approximated by Quebec's wealth in asbestos. While a large part of the first-named mineral is refined in Canada, however, only a very insignificant portion of the asbestos output is obtained for domestic manufacture.

Exports of Canadian asbestos in 1919 totalled 134,478 tons, with a value of $9,886,460, according to the Canadian Customs Department. Of this quantity 95,976 tons of asbestos fibre, crude and mill stock, with a value of $7,232,744, went to the United States; 10,500 tons, with a value of $902,796 went to Great Britain, and 3,446 tons, with a value of $1,490,155 went to other countries: 26.156 tons of asbestos sand and waste, valued at $259,875, was exported to the United States, and 15 tons, valued at $900, to other countries.

Establishing a Paint Service Dept.

Some Pointers to Help the Paint Department Along at This Season of the Year—A Service Department With Salesmen Who Can Give Expert Advice on Decorating Problems.

Written specially for Hardware and Metal by F. A. FARRAR

LUMBER prices like everything else are going skyward, not only lumber but all items entering into building construction.

A neighbor of mine had planned to build a home last year, a building which totaled $14,000. He had a fine lot, and this spring set about planning the erection of this new home, but he found that the old figures had gone up to $32,000, an increase of $18,000. He did not build.

An illustration of a paint service department similar to that described in this article.

On this basis it is very important that proper protection by means of paints and varnishes be given to all wood, plaster and metal. This idea is being driven home to consumers through the "Save the Surface and You Save all" Campaign, and if you properly sell the consumer on this idea, your paint profits are going up. You can build a large fall paint trade and sell for use by those who will be indoors through the long winter months.

Paints Not Getting Any Cheaper

There is a great inclination and ability now on the part of customers to buy paints as well as other necessities of life. Paints are not getting any cheaper, and considering all the contributory elements covering the high price of this commodity, there seems no immediate prospect of their being any cheaper. There is no sign of an early price decline, and people are becoming reconciled to the fact that a permanently high price level may be expected, there being no general expectation of lower prices as a factor to be counted on.

While a point of great importance is the actual need for paints in order to make up for neglect which has been practised in the last few years, and under these conditions unique selling plans will attract the attention of buyers and new and novel methods of going after the paint and varnish business will bring results.

One very strong booster for paint sales is to advertise locally that you have established a paint and varnish service department. Select one of your best clerks from the paint section, one who is well versed in the manufacture and importance of painting, and use his name in your ad., advising that if trade will call upon "Mr. So and So" he will be very glad to be of real service to them in the selection and proper use of painting materials.

You should have in this department finished panels of varnishes, paints, enamels, etc., all of which can be secured from the manufacturer from whom you receive your goods, especially if you advise him of the service you are establishing.

If you can't have a special room for this purpose at least arrange a certain portion of your paint department for this exclusive use, and put up a sign reading: "PAINT AND VARNISH DEPARTMENT."

It will greatly stimulate your sales if you can partition a little room off with beaver boad and appropriately decorate it. The walls can be painted with an attractive combination of two shades of flat wall paint or even kalsomine which you sell. Put up a small plate rail and put on this WOOD PANELS FINISHED WITH FLOOR VARNISH, HOUSE PAINT, VARNISH STAINS, FLAT WALL PAINT, MISSION FINISHES, etc. Then on the under edge of this rail you can put little brass cup hooks and hang additional panels attractively finished. On the counter or table have color cards and advertising literature.

You see most hardware stores with paint departments do not go to this trouble, but you can profitably push paint in this way. (We are giving an illustration here of how a little booth can be arranged.)

Moore's Automobile Finish

Dealers will find this all year staple a profitable addition to their accessory counter.

The wise motorist will enamel his car this Fall to withstand the rigors of Winter.

Moore's Automobile Finish renews the appearance of automobiles and makes them look like new. It is easy to apply, self-levelling and dries over night. There are nine shades: Black, Oriental Yellow, Auto Gray, Emerald Green, Vermilion, Jockey Red, Wine Color, Cobalt Blue, Brewster Green.

This popular finish "grips the metal" and leaves a strong, elastic finish that does not chip or crack—a powerful selling point with the motorist. He buys, and once he buys, repeat orders are assured.

The Brush Department

Regarding the Manufacture of Brushes

Description of Interesting Features of Manufacture in One of Canada's Important Industries—Knowledge of the Line Makes a Dealer a Better Salesman of Brushes.

(Continued from last issue)

WITH the smaller brushes, especially with the better kinds, the proper spaces for the holes are marked and then a small bit is used, the operator holding the back in his hand and guiding it to the machine.

The bristles used in the finer hair brushes are obtained from Russia, and with Russia in its present state of upheaval it is difficult to get this material. The peasants of Russia collect the bristles, which grow upon the hide of the wild boar. It may be remembered that hunting the wild boar was, in the old days, the sport of European kings, the pastime of spearing these ferocious animals being sufficiently dangerous to attract the venturesome in search of excitement. When the bristles from these wild boars were first used for brushes is not known, but the fact is that for many years the peasants have made a regular occupation of collecting them. It was not always necessary to capture or kill a boar as in districts where the animals were plentiful, bristles could be picked up on the ground. Before being exported, the bristles are cleaned and sized. Some of the best grades are as much as seven inches in length. Whatever the size, they are gathered together and put in pound or half-pound rolls.

The same is true of the bristles sent from China, the exporters in that country packing their goods with accuracy and neatness.

Bristles are not the only material entering into the manufacture of brushes for the many varieties of household brushes require different fibres of different degrees of stiffness.

Other interesting raw materials, which are imported from the four corners of the earth, include rice root from Mexico; Tampico fibre, also from Mexico, being a tough substance obtained from leaves of a plant something like the cactus; Palmyra fibre, also a tough, very stiff substance obtained from tree bark in India; bassine, another Indian product; bass from Africa; Palmetto fibre, obtained in Florida; soft horse hair from England to supplement the Canadian supply; and Kittool, a fibre obtained in South America, and especially adapted to the making of horse brushes.

To be continued.

"Losing Money," Say Turpentine Producers

Southern Operatives Planning Curtailment of Production—Surplus Growing Each Week Gives Little Hope for Better Prices.

TURPENTINE is being produced at a loss, according to claims made by the Southern operatives, and a plan for curtailing production is being discussed," says "American Paint Journal."

"It is represented that rosin and spirits now are in a worse condition than they were in 1914, when fully 80 per cent. of the operators were forced to close down or discontinue working a very large portion of their boxes. Representation is made that the operators are producing only with the hope that prices will get better, which they now claim is hardly possible unless production is cut fully one-third. With a tremendous surplus, which is growing larger each week, and with no apparent let-up in the production, operators claim they can have no hope of better prices.

"A plan has been suggested by E. A. Smith, of Perry, Fla., which would require organization, a large fund of money, and concerted action. He plans to form an association to take one-third of the products off the market and store it, holding it until prices are stiffened.

"This plan was suggested to the zinc and lead producers of the Joplin district last year, and several meetings of the mine operators were held to discuss it. Finally it was decided that the only way to take ore off the market was to quit producing it. It was pointed out that the minute the concentrates were dumped into the bin of the mine operators it represented production, and became surplus ore, regardless of whether it was in the bin of the operator, the smelter, or the warehouse company.

"Instead of trying to elevate the price, the chances are that the turpentine producers will get better results by shading the wage scale, which is reported to be out of all proportions, and by increasing their plant and labor efficiency."

Glass Importations from United States Show Decrease

Canada's importations of common glass from the United States in 1915 were 38,444,324 square feet, while in 1919 imports had decreased to 17,785,-624 square feet. These figures were misquoted in a recent table appearing in Hardware and Metal.

Carpenter-Morton Co. Expands

Carpenter-Morton Company, Boston, are making an extensive addition to their factory at Everett, Mass. The new brick building which will be occupied about November 1, 1920, is 60 feet by 50 feet and five stories high which will be about 15,000 square feet additional floor space. The basement of the new building will be used for storage. The first floor will be occupied by the advertising department. The second floor will be used for the packing of dyes and a part of this floor will be given for a lunch and rest room for the factory employees. The third floor will be occupied by the production department. A portion of this floor will be fitted with shower baths. On the fourth floor will be the chemical laboratories.

CANADIAN IMPORTS OF ROSIN AND TURPENTINE FROM U.S. IN JULY

Canada during the month of July, 1920, imported 16,818 bbls. of rosin valued at $287,789 and 114,734 gallons of turpentine valued at $180,200 from United States.

More than 60 Years in your Service

1856-1920

To the left is the first Boeckh factory, 1856. Below is the present warehouse and factory as it appears now, in 1920

SIXTY years seems quite a long time, doesn't it? It is a long time. Not many firms in Canada can look back over an unbroken record of more than threescore years.

Our business, too, has increased proportionately while we have succeeded in winning and retaining, as we have grown, the sincere respect and friendship of the retail trade with whom we have done business.

There has been a reason for our success, as there is always a reason for every big, strong and progressive institution, and that reason isn't far to seek.

Why is our business impressive in its magnitude? Not by accident. Not on account of the advertising it has received. If our brushes were not superior, or if they were not what we claimed for them, you would never have heard of us. The chances are that we would be struggling along in a little place on a side street.

If our prices were excessive, or if we sold only to the merchant who doesn't spend his money wisely, our business would be very small instead of very large.

The reasons which have appealed to other progressive and successful retailers as sufficient to warrant them in giving us their business will, we believe, appeal with equal force to you.

The retailer, absorbed daily in the arduous and exacting duties of store and office routine, is in a position to appreciate to the full the kind of service our long experience and close study of his needs enable us to give him.

Most Canadian hardware, paint and oil, and general store merchants are constant users of this service. If by chance you are not yet one of them, suppose you let us prove its worth to you. You will find our mail order department especially careful, efficient and prompt in handling your orders whether large or small. The combined knowledge and experience of sixty years are at your disposal in assisting you to win and hold the trade and good-will of your customers.

The Boeckh Company Ltd., Toronto, Canada

Floor Finish—the Shelf Starter

The Most Profitable Product on Your Varnish Shelves is Floor Finish Says Charles H. Smith—Good Floor Varnish is Also a Good General Purpose Finish

By CHARLES H. SMITH, Manager Architectural Dept. Berry Bros., Inc.

IN every line of business there are certain commodities for which the demand is greater and more continuous than for the general line, and even among such special articles there is usually one that is more prominent than the rest—a sort of natural leader from a selling standpoint, says Charles H. Smith in the American Paint and Oil Dealer.

If I were asked what this particular staple was in the over-the-counter varnish business. I should say without any hesitation "Floor Finish."

There is a reason for this. A good floor finish has a very broad field of usefulness. Every varnish will not answer for floors, but a good floor varnish can be used for practically any purpose and give excellent results.

Floor finish therefore has more sales chances than other varnishes. The ordinary demand for floor finish is large and always growing because of the wider and wider adoption of natural wood floors. This demand is enormously increased because a good floor finish can be consistently recommended as a general purpose varnish.

Floor varnish should be sufficiently tough and elastic to withstand the kind of usage a floor usually receives. It should cover well, stand water without injury, dry well, look well, and give the maximum wear for any interior finishing use. As will readily be seen, these qualifications fully warrant the dealer in suggesting the use of floor varnish for any interior finishing purpose and the arguments in its favor are so logical and true that the average buyer cannot fail to be impressed.

The net of all this is, the dealer can

Charles H. Smith

greatly simplify his varnish sales department by carrying fewer brands and educating his customers to call for floor finish not only for floors but for all interior uses when a good durable varnish is wanted.

I think, without question, the most saleable floor finish is the clear or transparent, which is suitable for all floors and interiors. If a dealer carries colored floor finishes, he must handle an assortment of such colors as he finds saleable or suffers a handicap.

To establish a good demand for floor finish attracts business for other lines, and has a stimulating effect on the volume of sales. Get people to cultivate the habit of coming to your store for floor varnish and you can eventually hold them on other lines if your goods are right.

To get permanent and profitable returns from a floor finish stock, the dealer must get his name allied with brands that through a combination of meritorious goods and skillful advertising have become household words wherever varnish is used. Use shelf and show window liberally, and also display such store cards as are supplied by the manufacturer, taking care to place them where they can be seen to the best advantage.

It does not require a large investment to put in a stock of floor varnish. From seventy-five to a hundred dollars will be ample for a first order and the dealer can replenish his stock according to his needs. One gallon, half gallon, and quarter gallon cans are the principal sizes called for and the dealer's discount is the same as on other architectural finishes.

Floor finish is an especially attractive proposition for the dealer, because:

1. The great demand for it is always growing greater.

2. The combined demand for floor finish for its particular purpopse and also for the multiplicity of uses it can be recommended for, make it certain that the demand will not only always be great but permanent.

3. It enables the dealer to carry fewer brands of varnishes without curtailing his sales.

4. To specialize on a good floor varnish establishes a desirable prestige and attracts trade for a dealer's whole line.

New Differentials on Putty and Lead

Montreal.—Following the advanced freight rates higher differentials on putty and white lead are made effective. The following advances over Montreal prices apply to white lead: Toronto and Hamilton, 45c; Brantford, 50c; London, 55c; Windsor, 60c; Port Arthur and Fort William, 75c. Freight equalized on all points excepting Port Arthur and Fort William. The Maritimes, including St. John, carry a 50c differential over Montreal.

In the Far West the following differentials apply: Winnipeg, $1.25; Victoria and Vancouver, $1.50; Calgary and Edmonton, $2.35; Regina, $1.90; Moose Jaw, $1.95: Saskatoon, $2.

Putty differentials have been changed from Fort William east. The base price is unchanged in bulk barrel putty but on other packages these differentials are now effective, 100 pound iron $1 over bulk price; 25 pound tins or irons (loose) $1.25; 12½ tons or irons (loose), $1.50; bladders in barrels, $2.25; bladders in cases, $2.50. In the event of 25 pound or 12½ pound tins being wanted in a separate case, a charge of 75c extra is made.

Establishing a Paint Service

(Continued from page 66.)

Back up this service department with local newspaper advertising in which you feature certain goods for specific sale, and also put a good sized card in your window calling attention to this service department, and stating that you can intelligently solve any home decorating problem.

By putting some paint clerk in charge of this home service section you greatly stimulate his interest, and with a little guiding and suggesting you can make him of very valuable assistance in your merchandising plans. Be sure that he knows the approximate amount of materials required to paint a certain size of house. You can get this from the back of any house paint color card. See that he is well up on how paint will act over certain surfaces, the number of coats to be applied, the number of square feet one gallon will cover, etc., and he should also be able to explain convincingly the advantages of ready-mixed paint, we will say, over white lead and oil, its greater durability, freedom from chalking, and the fact that it covers more surface, etc. See that he knows the advantages of a good paint over a cheap one; let him have figures at hand and cultivate a little knack for pleasant color combinations.

The Luxeberry Painter Says:

"The Australian savage is not the only one who makes boomerangs. I was hit by a varnish boomerang once. I figured too low on a contract and bought some cheap varnish that made me do the job over at my own expense. It was sure some boomerang. I have never wandered away from 'Berry' brands since."

The Berry label is a certain protection against inferior varnish, and all buyers know it.

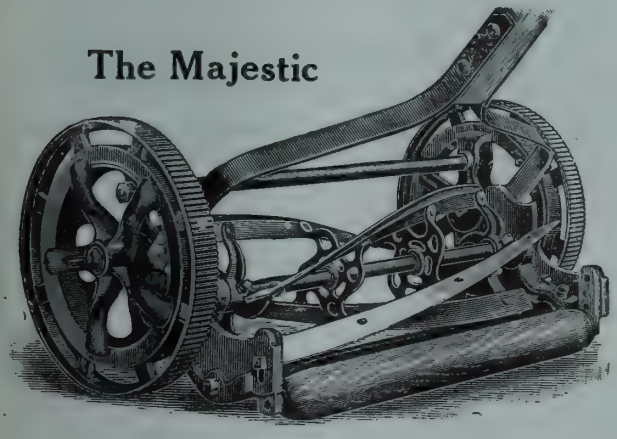
The Majestic



Speedy in Action Speedy in Sales

Before placing your order for mowers, it will pay you to investigate Eureka Machines. Our range consists of the following:

Rapid, Garland, Majestic, Speedy, Forest Glen and Federal.

Sizes: 14, 16, 18 and 20 in. cut.

The Speedy is one of the Eureka Famous Six, that has met with popular favor wherever used. Its reliable action, resulting from the high quality crucible steel blades, eliminates that fault found in many machines of pressing the grass in the earth, instead of cutting it. The Speedy is a quality machine built for service and it "delivers the goods." The hardware man will find the Speedy a machine he can sell with ease, customers recognizing quickly its superior advantages. It pays to sell Eureka Mowers. Why not be our sole agent in your district? Write to-day.

Limited
Woodstock, Ontario

Weekly Paint Markets

MONTREAL

MONTREAL, Sept. 30.—The condition of the paint market remains steady and there is practically no change from last week. There is some improvement in the movement of various lines to the trade, and prices are maintained. Some change has been made in putty differentials to Western and Eastern points, and these will be found elsewhere. There is but a limited movement of white lead in oil but putty sales have been heavier. Prepared paint and specialties, as well as varnishes, are selling seasonably well. Linseed oil and putty hold with little change from the quotations of last week.

Linseed Oil Prices Unchanged; Uncertain

Montreal.

LINSEED OIL.—This is really the between season on linseed oil as far as the crushers are concerned. Some factories are just cleaning up old stock and preparing to take in this crop's seed, and there is still some doubt as to what prices will be in the near future. Some expect that $1.50 per gallon will be reached as a basis although quotations are still resting around $1.60 to $1.65 per gallon.

Raw—	Imp. Gal.	
1 to 4 barrels	1 57	1 67
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 69½	1 79½
3 to 4 barrels	....	....

Turpentine Steady With Ample Stocks

Montreal.

TURPENTINE.—Prices have been maintained here, and there is a fair amount of stock to meet trade needs. The quotations still are high, however, and some are hoping for lower prices still. The producers are inclined to hold out as long as possible in the hope that outside factors that have not been buying will again come into the market, Europeans in particular.

Turpentine—	Imp. Gal.	
Single barrels	2 40	2 50
Small lots	2 50	2 60

(Packages extra.)

Glass Is Quieter; Putty Sales Better

Montreal.

GLASS AND PUTTY.—The glass and putty market is somewhat quieter, and supplies are a little freer than they were some time ago. This is due to a falling off of demanad and also to the arrival of some stocks from Belgium. At the same time jobbers assert that they cannot obtain all the glass they want and that it will be some time indeed before surplus stocks are in hand. The discount on box glass still remains at 15 per cent. and there is no indication of any change, one way or the other.

Putty is quoting fairly well at the present time, and dealers are expecting delivery of initial stocks for fall. The price basis remains the same, but differentials, as elsewhere referred to, have been changed to conform with the recently-increased freight rates.

Putty—	5 ton	1 ton	Less than ton
Bulk, in bbls.	6 50	6 75	7 10
Do., in half bbls.	6.65	6 90	7 80
Do., 100-lb. drums	7 50	7 65	8 10
Do., 25-lb. drums	7 75	8 00	8 35
Do., 12½-lb. drums	8 00	8 25	8 60
Bladders, in bbls.	8 75	9 00	9 35
Do., in cases	9 00	9 25	9 60

Paints and Specialties Have Been Maintained

Montreal.

PREPARED PAINTS, SPECIALTIES.—There is a better movement of prepared paints and specialties this week than has existed for a while past. Manufacturers advise Hardware and Metal that dealers are buying again for spring delivery and the present condition of business is seasonably satisfactory all around. As already reported, the market is steady and reductions are not anticipated.

Little Movement White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—There is a restricted movement of white lead in oil at the present time but this is not unusual. Jobbers report that the price basis remains steady with 5-ton lots of Government standard lead selling at $19.50 per 100 pounds, ton lots at $20, and smaller quantities at $20.35. Differentials to western and eastern points have been changed in accordance with the recent advances made in freight rates and special mention of these is made elsewhere. This in no way affects the base price.

TORONTO

TORONTO, Sept. 30.—Business in paint circles is stated to be picking up a little and to have shown an improvement during the past week.

Prices on prepared paints and varnishes, dry colors, etc., are holding firm. Linseed oil and turpentine are unchanged this week. The tone on both is firm and though there may be further alterations, no radical change is anticipated. White lead and putty are also unchanged with demands seasonable.

The glass situation appears a little unsettled and easier quotations are being given for window glass. Various reasons are advanced for the easier prices and one of these is the weaker tone in the Belgian markets. The supply from that source is not very large at present however and the American markets are reported to be firm with stocks not very heavy.

Putty Firmly Held Without Change

Toronto.

PUTTY.—There has been no change in putty and price continues firm with demand seasonable but not large.

Quotations are as below:

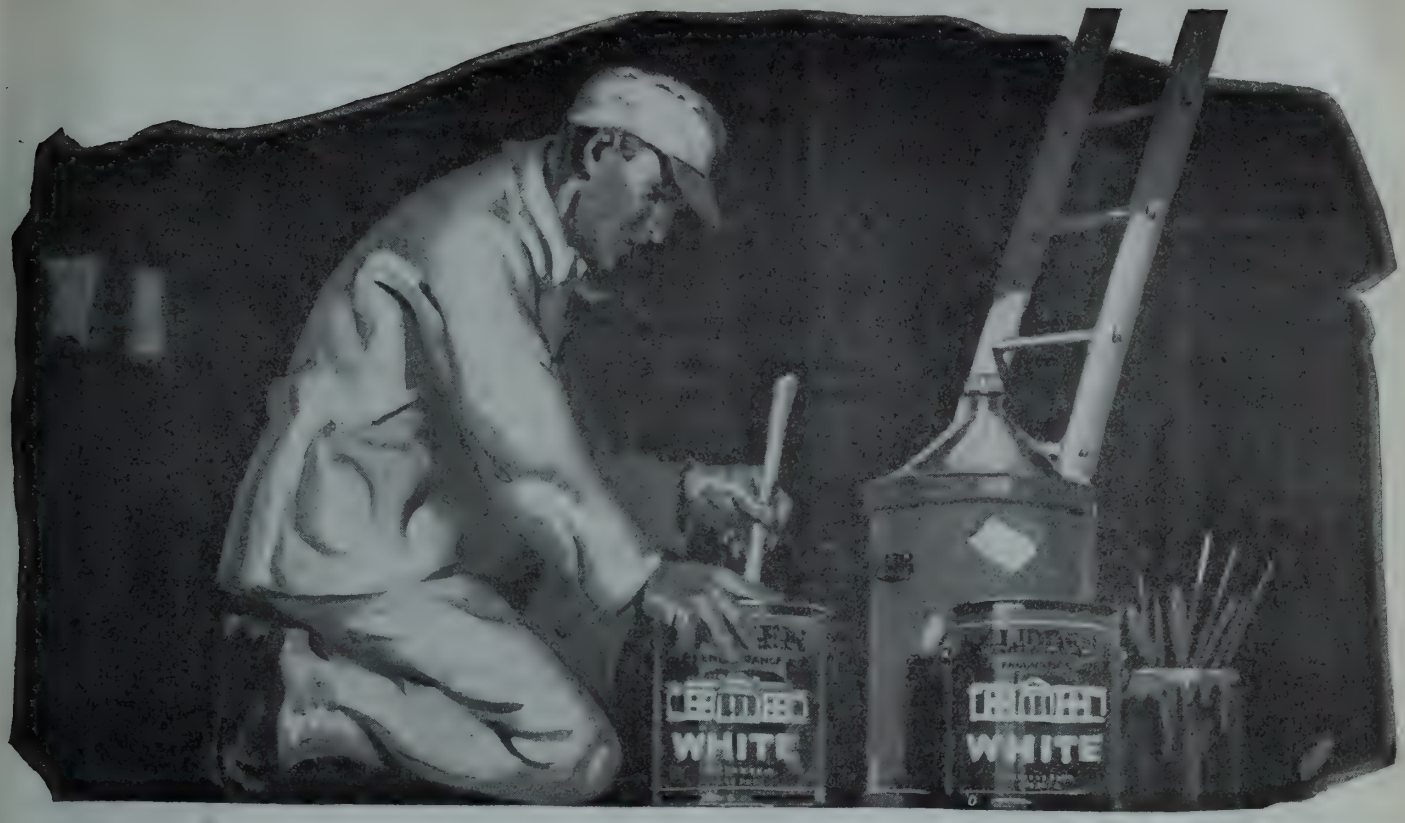
Putty—Standard, in 100-lb. drums, $8.20 per 100 lbs.; 25-lb. drums, $8.55.

Window Glass Unsettled; Variable Quotations

Toronto.

GLASS.—The markets in window glass appear to be a little unsettled at present, and some jobbers are offering better prices than the 15 per cent. off list, which has been the prevailing discount for some time. In fact quotations range all the way from 15 per cent. to 20 and 7½ per cent., up to twenty-five boxes and to as much as 25 and 10 per cent. for larger quantities than that. The easier tone may possibly be only temporary as jobbers state that the American market is firm, and the factories appear only too glad to accept cancellations of back orders. It is pointed out that boxing charges have not been increased on window glass as they have on plate and fancy glass, and with the high cost of lumber and extra freight charges it seems unlikely that lower prices on window glass may be expected.

American producers still require, it is said, ninety days to ship "rush" orders, and Belgium while exporting larger quantities of plate is not in a position to make large shipments of window glass, but the present weaker tone of the Belgian markets and the fact that the Canadian Government intend fixing the duty on the current gold value in-



Results Insured

There's a sureness about the Glidden result that will cement your relationship with the painter and make the owner a steady customer for you both.

The results are insured by a policy of paint making that builds up the right quality first and then maintains that quality in every package.

Why should you or the painter run risks when you can get a sure Glidden product for every kind of painting in demand? Glidden "everywhere on everything" solves the problem for *everyone*.

Write to-day for our complete plan with prices and selling data.

There's no obligation.

THE GLIDDEN COMPANY, Limited

Toronto, Ontario

Branches: Montreal and Winnipeg

If interested tear out this page and place with letters to be answered.

rtead of at the pre-war value is apparently affecting the local markets.

White Lead in Oil Quieter; Price Unchanged

Toronto.

WHITE LEAD IN OIL. — The demand for white lead in oil is stated to be a little quieter, though regarded as seasonable. No change is recorded

Linseed Oil Steadies; Price Maintained

Toronto.

LINSEED OIL.—The market appears a little steadier this week and prices are firm at previous week's quotations.

English oil had been coming in to the market but is said to have ceased as English prices have advanced.

Business is a little quiet with smaller demand. Quotations are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 67	1 70
3 to 5 barrels, gal.	1 66	1 69
6 to 9 barrels	1 64	1 67

Turpentine Prices Unchanged; Less Demand

Toronto.

TURPENTINE. — The price of turpentine is unchanged from last week and little alterations are expected.

Producers are said to be not over anxious to do business at present prices and the indications are that they anticipate a stronger tendency.

The following are usual quotations:

Turpentine—	Per Imp. Gal.
1 barrel lots	2 40
2 to 4 barrels lots	2 39
5 gal. lots	2 55

Varnishes Having Firm Tendencies

Toronto.

VARNISHES.—The demand for varnishes has been good, with firm tendencies in prices. The varnish stains for interior decoration and for furniture find a ready sale and business has been very good in these lines.

Prices are unchanged

Floor Wax in Demand and Continues Firm

Toronto.

FLOOR WAX. — The demand for floor wax grows steadily and the different makes all show firm prices.

Quotations on Johnson's prepared wax are 75 cents per pound in one pound cans and 70 cents per pound in 4 and 8 pound cans.

Litharge Prices a Little Easier

Toronto.

LITHARGE.—A little lower price seems to be in evidence on litharge and quotations are 16 cents per 100 pounds in casks and 20 cents in small quantities.

Kalsomine Colors Firm and Unchanged

Toronto.

WATER PAINTS — The demand for kalsomine paints has been large this season and the shortage earlier in the year owing to the scarcity of whiting has been overcome.

Sales continue good with prices firm and unchanged

FIRMNESS IN STEEL

(Continued from page 38)

the general situation with several manufacturers in the same line of business in New York. There it is not expected that there will be much change from the present levels—not for some time at least. Certain influences are at work, the outcome of which is not definable at this time. "But labor and other costs, increased freight rates and decreased production are big factors in holding prices steady," he said. "We do not expect that there will be any immediate change. Conditions are quiet but the Western crop has been good and there ought to be a normal fall business. The trade is not overstocked, letting the manufacturer carry the stock. Some hemp materials have been costing a little less, but we feel that the offsetting influences such as labor, freight, etc., absorb this difference."

Conditions have been somewhat quieter in this line of industry for a time. They will doubtless improve in a few weeks' time. In the meanwhile, both here in Canada and in the New England states the tendencies have been to maintain prices. Some outside competition in a number of the cheaper lines of manufactured cordage has reflected in an easing on a few products of this nature.

In discussing the situation with Col. Robert Starke, vice-president of the Canadian Wholesale Hardware Association, some interesting views were given Hardware and Metal. Col. Starke said: "So far as hardware is concerned, there is no sign of a tobogganing of prices. On the contrary there was an advance last week of $4 a ton in pig iron, which is the basis of nearly everything in our line. There can be no change of price until the supply overtakes the demand, and this condition has, in no sense, been reached. There is no indication of an easing of prices in any one line as far as I can see, and in two or three lines of wire goods on which prices were named last week, quotations for next year are higher. Glass is the one line which has probably shown a little easing off and this is due to some increase in the production and the arrival of glass from Belgium. Perhaps, next year there will be a lower price on this. Three nail factories, last week, advanced their prices on standard wire nails 25 cents per keg. When shipments are sent forward to the head of the lakes for the Western spring business it will greatly decrease the supplies that have been laid aside over the present demand, and I expect this line will be very firm.

"Demands from both the city and country are good. Collections are satisfactory and there is lots of money in the country. One line in particular, that of rubber roofing, is very scarce, in fact it is as scarce as diamonds. This country has got to go ahead everywhere, and there is a tremendous scarcity of accommodation, as we know, all over the country. If immigration comes, as it will, this year, a lot of building has got to be done, and when this starts there will not be enough hardware to supply the demand."

Jos. Dowling, manager of Caverhill-Learmont & Co., past president of the Canadian Wholesale Hardware Association, feels that present wage levels and the new freight rates will be big factors in maintaining the basis on many lines for some months. It is probable that then there will be some lowering of prices gradually.

British Imports of Canadian Products Fall $69,000,000 in First Half of 1920

The imports into the United Kingdom from Canada during January-June, 1920, were valued at $165,332,797 as compared with $234,776,000 for the same period in 1919. This is a decrease of over $69,000,000 or nearly 30 per cent.

Exports from the United Kingdom to Canada during the same period show an increase of $72,500,000 or 238 per cent., being valued at $103,023,747 in 1920 as compared with $30,515,529 in 1919.

Britain's re-exports to Canada show an increase of over $15,000,000 or some 600 per cent., being the largest in the British possessions.

Re-exports for the first half of 1920 were valued at $17,657,667 as compared with $2,502,870 for the same period in 1919.

Roumanian Trade

Montreal.—The Canadian Manufacturers' Association of Montreal is in receipt of advices from A. Simard, Consul-General for Roumania, stating that Dr. Nica Pecruscu, Commercial Attache on the Roumanian Immigration at Washington, will visit Montreal shortly. The object of his visit will be to consider the trade and commercial relations as between Canada and Roumania, with a view to an expansion of the trading which has existed heretofore. Dr. Pecruscu is expected to be in Montreal within the next few weeks.

DISCOVERS PAINT MINE

Prospectors who had been digging vainly for gold on Mullet Island in the Salton Sea of Southern California have just discovered that the highly colored mud around the island consists of valuable mineral pigments, from which paints of many colors can be made.

Tommy and Betsy Build Sales

HERE'S another of the interesting "61" domestic dramas being depicted this Fall in Everywoman's World, MacLean's, Canadian Courier and Toronto Saturday Night, American, Cosmopolitan, Pictorial Review; Woman's Home Companion, Good Housekeeping, Country Life and House Beautiful.

It's the old morris chair that is brought back to life this time — and there's hardly a home without one. Have you the "61" Floor Varnish — *in all colors* — to meet the demand in your locality?

The "61" proposition is a mighty interesting one — drop us a post card and let us tell you about the special introductory assortments. The co-operation that goes with these assortments has been created with characteristic Pratt & Lambert thoroughness — it will make a strong appeal to you.

DECOTINT

The Sanitary Cold Water Paint for Walls and Ceilings

A SATISFACTORY Wall and Ceiling Paint—inexpensive, artistic and sanitary and made in twenty-two delicate colors, from among which it is an easy matter for every customer to select the tints best suited to any particular purpose.

Decotint is put up in the form of a dry powder, requiring only the addition of cold water to make it ready for immediate use.

The Decotint demand, already big, is certain to be greatly enhanced during the spring months by a strong campaign of consumer advertising which will appear in the most widely read Canadian publications.

Place your order now and put yourself in line to secure a share of the demand for Decotint and the other Deco-Tint household specialties sold under the blue label.

All Canadian Products

DECO-TINT PRODUCTS

HAT-BRITE—The best hat enamel made.
METAL BRITE—Metal polish.
DECO-WAX—The wax polish for floors, furniture, autos, etc.
POLISH-OL—Auto and furniture polish.

TINKER TOM'S TALKS.

No. 279

BETTER DELIVERIES—

We are glad to be able to say once more that your **orders for Premier Galvanized Steel Sheets** will be shipped in fair time as used to be the case.

DON'T BLAME YOUR JOBBER for the delays during the past six or eight months—He certainly has made life busy for us—but it was physically an impossibility to get materials and his stock was reduced to nothing.

CONDITIONS ARE BETTER—prospects are good for improved service—orders will soon be filled promptly from stock.

TINKER TOM.

If interested tear out this page and place with letters to be answered.

Paints, Oils, Varnishes, Glass, Etc.

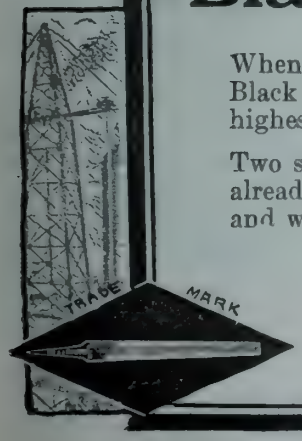
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Stephens'

REGISTERED TRADE MARK

Celebrated Wa-Ko-Ver Stain

Wa-Ko-Ver beautifies all woodwork and literally wears like iron. Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore its freshness. This reliable, trustworthy stain has long since won the confidence of consumers. It gives full value in service and creates consumer-satisfaction in the goods and confidence in the store that sells it.

This established reputation makes Wa-Ko-Ver Stain a pleasure to sell. A good display in your windows or on your counter reminds the housewife and keeps it moving.

The Lost Kitchener

THERE was a despatch from the Front. It had gone to the War Office—to Kitchener, and Kitchener was nowhere to be found.

Britain's Premier awaited irritably for news of his whereabouts. His Cabinet gathered around him supplying various suggestions as to his whereabouts, while the Premier muttered something about "D—d cheek." This is one of the illuminating incidents told in Mrs. Asquith's story that leave a vivid impression of the breathlessness and uncertainty and crucifying suspense of those first grim days of war.

There are other stories of the rough wooden crosses taken out on her first visit to the front, to be planted under gunfire. Other stories and incidents, too, that could only be told by one who lived, as she did, in 10 Downing Street in the crucial days of the Empire and of the world.

Interesting as all Mrs. Asquith's recollections have been, this instalment has the added interest of being a cross-section of history from the inside.

Many Other Articles of Moment

There are many other articles and stories of unusual interest in this number that can only be outlined briefly here; any one of them being worthy of serious consideration.

"A Straight Talk on Courts," by Magistrate Emily F. Murphy, is a challenging article questioning whether our police courts, in their ideals or practice, are really serving the community, or are doing anything for the criminal other than inflict punishment.

"From Dominie to Dominance," by J. L. Rutledge. Some record of Canadian public men who have climbed to prominence, partially at least by reason of the training received as teachers. The list itself is a matter of unusual interest.

"People, Personalities and Peculiarities," by Colonel George H. Ham. A further record of the people Colonel Ham has met and known in his long service with the C.P.R. told in the Colonel's own inimitable style.

Stories of Unusual Interest

"The Pig in the Parlor," by Nan Moulton. **"The Skipper's Business Affair,"** Henry P. Holt.
"The Piano and The Patent Washer," a Jeff Crane Story, by C. W. Stephens.
"The Little Warrior (serial), Pelham Grenville Wodehouse. **"The Parts Men Play"** (serial), Arthur Beverley Baxter.

A World of Interest in Review

Here are some sample titles from the Review of Reviews section:

Hugo Stinnes, Boss of Germany.
The Progress of Republican China
The Brains of the Sinn Fein Movement
Planning Another Exodus
The Man With the Gift of Tongues

Barrett Roofings, Cements Industrial Paints etc.

YOUR customers know that the use of these Barrett Products will absolutely insure their barns and other buildings against the ravages of the winter months. You owe it to your trade to be well stocked to meet their needs.

Everlastic Liquid Roofing Cement

UNEQUALLED for resurfacing worn-out felt and "Rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1 pint tins to 40-gallon barrels.

Elastigum Plastic Patching Cement

THE plastic cement of a thousand uses—tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs—of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions.

Elastigum is a popular repair material for which dealers are finding a tremendous demand this year.

In 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. packages, ½ barrels (about 300 lbs.) and barrels (about 600 lbs.).

HERE are some other Barrett Products ready to make money for you. They all bear the Barrett name—and they're all Barrett quality. The popular Everlastic "Rubber" Roofing, Everjet Elastic Carbon Paint, Nox-Aer-Leek Boiler Setting Cement are money-makers and satisfaction-producers.

A·G·M·CO. VIKO ALUMINUM

Quick Turnover and Good Profit

Compare aluminum with other metals from which cooking utensils are made. The advantages of aluminum are instantly apparent. It has durability without weight, and is therefore easy to handle. It takes heat quickly and holds it long.

There is a merchandising advantage in stocking VIKO, The Popular Aluminum. The line is complete. It fills every stock need. The utensils are practical in design, and sturdily constructed. Viko is made from sheet aluminum, not cast or spun. The excellence of Viko quality combined with the popular Viko price makes for quick turnover and good profit. For dealer proposition—

ORDER FROM OUR NEAREST FACTORY

HARRIS HEAVY PRESSURE

The Distinctive Babbitt

Round in shape, Copper coated, with profile and wording that thousands of users know by years of service.

Put out and guaranteed by a Firm with a metal experience of over one-third of a century, and whose guarantee means something.

DEMAND THIS CAKE FROM YOUR JOBBER.

THE CANADA METAL CO., LIMITED

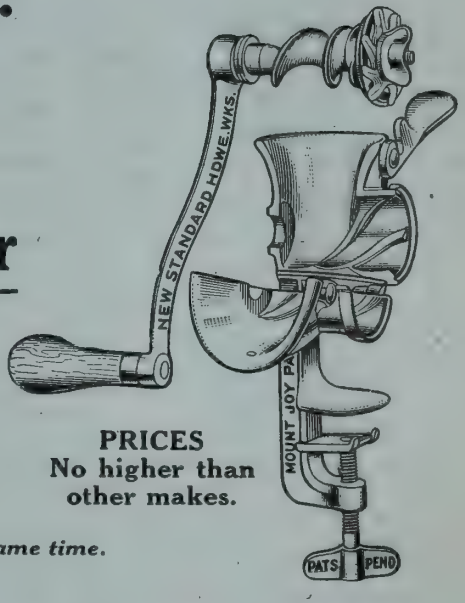
TORONTO HAMILTON MONTREAL WINNIPEG VANCOUVER

"CLICK"-and it's clean!

Here's a Food Chopper at last without a fault—one that almost cleans itself. As easy to wash as a saucer, because **"it opens like a book."** No cracks or corners where food can lodge. The

New Standard Food Chopper

has many superior features. It is in a class by itself for refinement of design, quality of workmanship and finish. The **easy-cleaning feature, alone, sells it on sight,** will increase your sales and bring you more satisfied customers. Investigate for yourself.



PRICES
No higher than other makes.

Send your order through your jobber—notify us at the same time.

"Ask the housekeeper who uses one."

Why is the Disston Trowel the choice of so many careful workmen?

Because it is manufactured in one piece from extra quality Disston-Made Steel. It is hardened and tempered by special Disston processes to give the much desired flexible blade. It is ground perfectly, insuring a smooth working surface. The post is straight and sits at an angle to the blade which gives an excellent balance to the tool. The handle whether Beech, Gum, Hickory, or Apple, fits the hand with unusual comfort. All these things mean a tool that is a real pleasure to use.

HENRY DISSTON & SONS

This Sprayer Is In Demand

"It's a back saver"

Year after year the demand has steadily increased for this lightweight, efficient, handy sprayer known everywhere as the

O-K-SPRA

Dealers should take advantage of this popular demand and be prepared to supply the O-K-SPRA. It is a fully guaranteed sprayer. This protects you and your customers. There is no exchange or duty to pay on the O-K-SPRA. It is a completely made-in-Canada sprayer.

If your jobber cannot supply your needs, write us direct for prices and literature.

Burgess-Norton All Steel Hatchets

No Loose Heads—No Shrunken or Broken Handles

This splendid selling line of hatchets has many selling points to account for its successful sales record.

The All-Steel Hollow Handle, reinforced at the neck, can be subjected to a stress of 300 lbs. pull on the handle without injury. About 150 lbs. will break a wooden handle.

Your customers appreciate these features and not only buy again, but send their friends to buy.

The Reason Why

Burgess-Norton Mfg. Company

Geneva, Illinois, U.S.A.

Mowers With An Ever-Growing Demand

There is a growing demand for really high-grade, close-cutting Lawn Mowers for continuous service, for use on Bowling Greens, in Public Parks, Cemeteries, School Grounds, etc., and experienced hardware dealers appreciate the advantage of carrying Ontario and Adanac Lawn Mowers in stock to supply this demand.

Think this suggestion over. You have an opportunity. An Ontario Mower on the local Bowling Green is a wonderful ad. to you, because Bowlers are lawn enthusiasts and delight in close-cropped, velvety sod. Include a few of these high-grade machines in your specification.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

Chart of Recommendations for Automobiles
(Abbreviated Edition)
How to Read the Chart

The Correct Grades of Gargoyle Mobiloil for engine lubrication are specified in the Chart below.

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

These recommendations cover all models of both passenger and commercial vehicles unless otherwise specified.

Where different grades of Gargoyle Mobiloils are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and constitutes a scientific guide to Correct Automobile Lubrication.

If your car is not listed in this partial chart, consult the Chart of Recommendations at your dealer's, or send for booklet, "Correct Lubrication," which lists the Correct Grades for **all** cars.

Advisory Selling

Why it helps to sell more oil as well as hardware.

A man comes into your store to buy a lock for his garage. You naturally ask him several questions. Then from the information obtained you determine exactly what lock best suits his requirements.

By your questions you have shown the man that you know your business.

Dealers who sell Gargoyle Mobiloils according to our Chart of Recommendations enjoy such good profits from repeat sales for the very same reason.

Our Chart of Recommendations hanging on your wall is your guide in selling the correct grade of Gargoyle Mobiloils for every automobile, truck, tractor or motorcycle.

And it is proof to your customers that you are equipped with the information to specify the correct oil for their machines.

Can you afford to disregard such a confidence-builder?

The Super-Test

¶ BEFORE you were asked to buy or try Dunlop Cord Tires, they must undergo a test such as you would never give them.

¶ Tires, just like your garagemen and dealers now sell, are put on our own test cars, and away speed the drivers.

—A Test that is kept up day and night.

—A Test that takes in some of the worst roads in the country and the generality of bumps, bad turns, and all the sudden stops that go with them.

—A Test that specifies the number of miles which must be made by the drivers each day and night.

¶ The results of this crucial test, naturally, have an important bearing on our manufacturing policy.

¶ Tested-in-Advance Service aptly applies to *Dunlop Cord Tires—"Traction," "Ribbed."* Can you ask for a greater guarantee than the story the road tells—a story which in the case of Dunlop Cord Tires proves that our manufacturing methods are not only Right but *Dead Right?*

Why are all Fords Equipped with Champion

Dependable Spark Plugs

The answer is found in the Ford instruction book which says:—

"The make of plugs with which Ford engines are equipped when they leave the factory, is best adapted to the requirements of our motor."

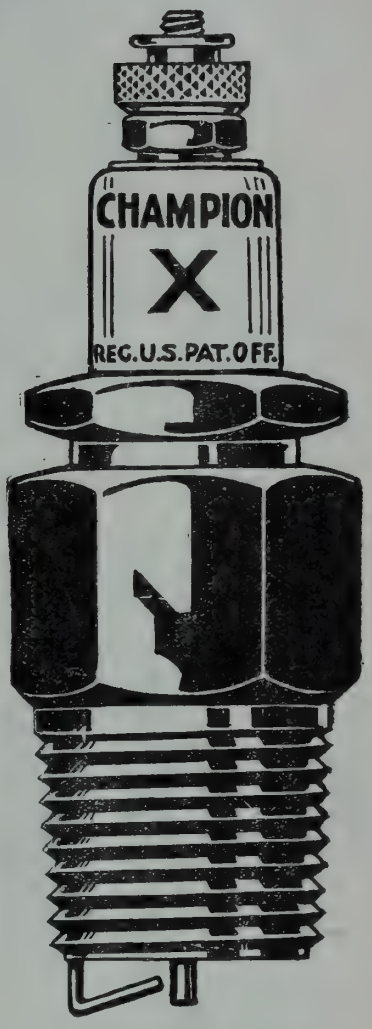
Since 1911 Fords have been, and are now, Champion equipped.

For motor owners who have other makes of cars we have developed a type of spark plug to give that same unfailing dependability for which Ford motors are known. Absolute confidence can be placed in Champion Spark Plugs to carry through any emergency that an engine will stand up under.

The right plug has "Champion" on the insulator as well as on the box.

Display the Champion dealer helps and get your share of the business that our advertising has created.

Order from your jobber to-day.



Champion "X"
A15—½ inch
Price 90c
Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911.

A Selling Point That Sells

Kopper King Spark Plugs are anti-fouling and rust-proof. This is a selling feature that really appeals to the car owner. A Kopper King Plug will not rust into the cylinder head.

This enables you to sell your customers a Spark Plug that ensures freedom from trouble.

The Kopper King is a Salesbuilder — once a car owner buys his first one, he will, in future, enthusiastically specify Kopper King Spark Plugs throughout.

Rust-proof

A heavy coating of copper protects the body of the plug. This prevents carbon deposits; carbon under electrical heat will not adhere to copper.

KOPPER KING

Kopper King Spark Plugs ensure you a better margin of profit than any competing plug. They meet every requirement. Once sold, they stay sold.

It's not the power it's the traction

Here's the Story—

The above illustration was suggested by a well known business man who was standing on the curb at the foot of a sharp incline leading to a bridge spanning a river.

The scene made such an impression upon him that he described it to us in detail and urged us to picture it in an ad so that all motorists might learn the lesson he got from it—***"to always put on Weed Tire Chains*** when the roads are wet and slippery."

"The bridge had just swung closed and the policeman had given the 'Go' signal. All the motor cars, motor trucks and wagons, a long line of them, started ahead, but right in front of me stood a big car—a beauty—which seemed to me to have as much power as a locomotive, but she didn't move a foot. *Stood like she was anchored,* and I judged the 'clutch was slipping' until I realized that all this time the rear wheels were 'spinning' on the cobble stones like a windmill.

"It surprised me to see a small-power delivery truck with a heavy load turn out and go by the big car and up the grade without any trouble. Then I noticed that the cars that were moving were equipped with Weed Chains while *the big car had nothing but slippery, bare tires.*

"Here was the driver of the big car, with all its tremendous power, standing still, wasting time and *wearing out his tires* spinning on a rough, uneven road. And when I thought of what those big 36x5 tires cost and how they were being ruined, *it taught me a lesson* I will never forget.

"In the past few years I have read over and over again how Weed Chains gave positive traction and *prevented slipping and skidding,* but I never saw it so vividly portrayed.

"If every motorist could see it in the same way, *not a single one would attempt to drive* on slippery streets or pavements without Weed Tire Chains."

We are glad to put our friend's story into print and hope the lesson will "strike home" to a lot of drivers who have been either careless or indifferent about using Weed Chains—one of the most important factors in sane motoring.

"Mr. Dealer: Write us for advertising material, also for names and addresses of nearest jobbers stocking Weed Tire Chains."

DOMINION CHAIN COMPANY, Ltd.

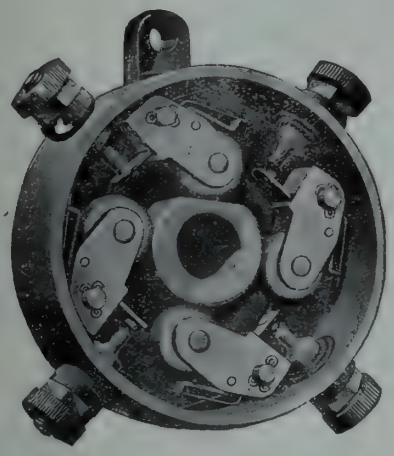
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

A Double Duty Timer



The magneto contact of the Duplex Timer gives to each cylinder a direct contact between two genuine Tungsten points, timed by the accuracy of the single roller. In the Duplex we have combined the accurate firing of the roller type, and the superior contact of the magneto, and give you the Double Duty Timer.

The only revolving part in the Duplex is a roller the same principle as the regular Ford assembly, but instead of a solid steel roller that must be oiled, and in so doing, further hinder the electrical contact, the Duplex roller is a double row enclosed type of ball bearing, with sufficient lubrication on assembly to last forever, making positive the elimination of the necessity of oil in the timer. No electrical current is carried through the roller, to cause electrical wear on its surface.

THERE ARE TWO FACTORS that determine the value of a publication as an advertising medium.

Editorial excellence will indicate its influence with its readers.

Membership in the Audit Bureau of Circulations indicates its business ethics and methods.

The first shows whether the paper is worth reading.

The second shows how many people read it.

In both the advertiser is vitally interested.

Hardware and Metal invites the closest scrutiny. Its A. B. C. report is accessible to advertisers. No other hardware paper in Canada has submitted its circulation records to the Audit Bureau of Circulations.

SOVEREIGN IRONS

SELLING an electric iron may be a commonplace occurrence—but, there are still plenty of housewives who have yet to break away from the traditions of their ancestors, and discard the old sad irons.

To a woman who has never owned an electric iron it is a specialty—and should be sold as such. Selling a "Sovereign" Iron paves the way for a series of sales. In fact it is a typical C.G.E. electric appliance, in which you can place explicit confidence.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

O. P. W. is a leader—
whether
For making sales
Or withstanding weather.
It leads the way,
All dealers say,
For sales and service—any
day!

"Save the surface and you save all" Paint & Varnish

"Paints and Varnishes for Every Purpose"

Inside Decoration Makes Paint Sales

To-day, progressive merchants have become thoroughly alive to the fact that the sales of the Paint and Varnish Department are independent of the calendar. Paints and Varnishes are no longer regarded as "seasonable" goods. Educational advertising copy has freed consumers of this old-fashioned notion. Alert dealers now concentrate on the sale of inside paints and finishes as soon as cold weather prevents outside painting.

Are you preparing for inside sales? Are you prepared with a stock that enables you to recommend and hand over the counter the right O. P. W. product for every inside requirement? Have You: Indestructo Varnish, Jas-per-ite and Jas-per-lac Specialties and all the other quick-selling, serviceable O. P. W. Products for interior decoration?

COMMUNITY PLATE

Take Full Advantage of Community Week

During the week of Nov. 6 to 13—Community Week—every housewife will be more interested than usual in COMMUNITY PLATE.

This is your opportunity to do a big business in all the Community pieces.

Every woman in Canada is being told through our national newspaper advertising that she will find COMMUNITY PLATE on display at the better shops. Your customers will expect to be able to select what they need from your showcases.

Let the people in your town know they can inspect Community at your shop.

To help you do this, an attractive window display which has been prepared for your use, will be sent on request.

Get full benefit from Community Week. The opportunity is unusual.

"Movie" of a One-Gross Order of Aladdin Dye Soap

Act 1, Scene 1

A progressive dealer who has been asked for Aladdin Dye Soap a number of times decides to order a gross.

'Phones the wholesaler to send one gross (and include the Revolving Display Stand as offered with the gross FREE).

Order delivered. He unpacks stand (says to himself, "It's a beauty"). Fills it up with Aladdin's 18 assorted colors and puts it on the counter.

Act 2, Scene 1

Customer enters, who has seen the big space newspaper advertisements telling about Aladdin in an unusual and attractive way.

Customer sees Display Stand of Aladdin on counter. Turns it. Selects the colors she wants. Says she will try them; if she likes them, will come back tomorrow.

Such is a moving picture of an order of Aladdin Dye Soap.

It's brought right in, turned around, and quickly sold out again.

P.S.—Ten days later the same customer comes in and buys four more cakes of Aladdin. Says she likes to keep them handy in the house.

UNIVERSAL

"The Trade Mark known in Every Home"

Home Needs

Why I Do Not Dread Housework

The woman with complete equipment of UNIVERSAL Home Needs doesn't dread housework, because there is none to dread. She tackles the housework, puts it through and sings her joyous whoop-sey-do.

The sweetest music to the dealer's ears is the ring of the cash register. With a well rounded stock of UNIVERSAL Appliances you can keep your register ringing loudly and continuously during the holidays.

The housewife will soon intimate to her husband that she would like something "Universal" for Christmas. If he doesn't take the hint she will buy what she wants and attach a card bearing "Merry Xmas from Hubby" written in her own hand. Stock UNIVERSAL lines for Christmas trade and play them up in your displays. Their designs and finishes will lure the eye—their quality and usefulness will open purses.

Healthy Sales

—Not only in volume; but because with each sale you sell Health!

Intensely human in its appeal, our Fall Vacuum Cleaner advertising emphasizes the necessity of the Vacuum Cleaner in the modern home as the safeguard from germ-laden dust and dirt.

Its plain truths, published from coast to coast, point out the folly of hand sweeping and dusting—driving home the fact of how easily, economically and thoroughly the work may be done by the Northern Electric Vacuum Cleaner.

A booklet entitled "A Vacuum Approach—That Pulls Sales" will be gladly sent on request to our nearest branch house.

This little booklet tells a big story of what we are prepared to do to help you make a record in Vacuum Cleaner Sales.

Concealed Contacts and T-T Slots are *exclusively* HUBBELL

*" * * tandem or parallel * * the caps may be fresh from the dealers' shelves or purchased a decade ago — yet they fit, because the Hubbell Line has always been standard."*

The T-T Slots are a Hubbell invention.

Based upon Hubbell consistent standardization for the past fifteen years, this exclusive feature keeps good faith with the jobber, the dealer, and the consumer, for it widens, and does not restrict, the scope of Hubbell utility.

Each T-shaped opening incorporates a tandem and parallel slots just wide enough to admit a cap blade. These blades may be tandem, parallel, or polarized; the caps may be fresh from the dealers' shelves, or purchased a decade ago—yet they *fit*. Because the Hubbell Line has always been standard.

Passing through the narrow T-T Slots the blades are gripped by strong phosphor bronze contact springs. Sputtering, weak connections are impossible, for these springs grip and lock fast to *both sides* of each blade.

Each spring is secured in its own chamber. A solid wall of porcelain or other dielectric material surrounds it. Any spark at make or break cannot cause short-circuiting or reach the open air, for the contacts are *enclosed.*

All these features are exclusively *HUBBELL.*

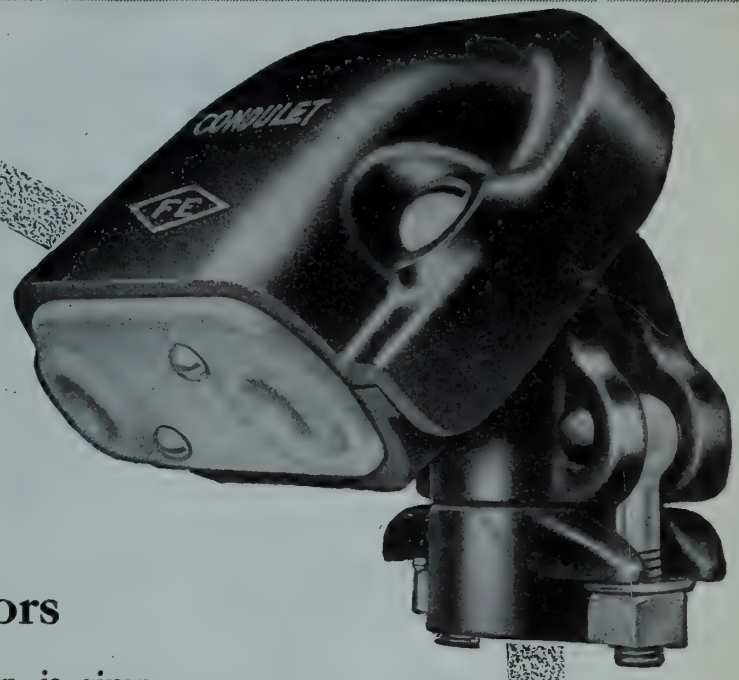
CONDULETS



FE CONDULET
The inclined hood of this Condulet so guides the wires that a natural drip loop is formed.

An Ideal Outlet for Large Conductors

UNLESS careful consideration is given where wires enter into or immerge from conduit, electrical troubles follow.

For outdoor installations the FE Condulet is ideal. It is constructed so as to prevent the entrance of water in the conduit system and the abrasion of insulation.

A removable hub and top facilitates the installation of the Condulet on the conduit and makes pulling of large conductors easy.

Send for Condulet catalog.

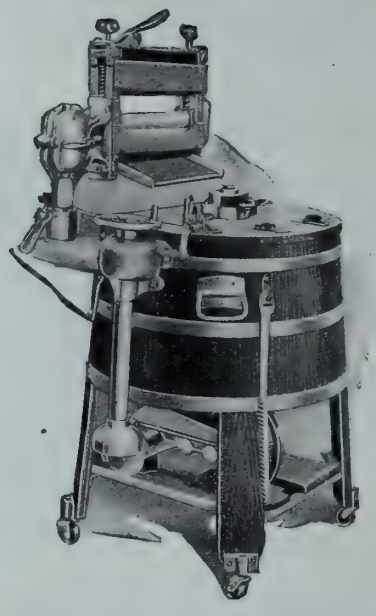
ASSURED PROFITS WITH THE

Connor Perfection Electric Washer



Just consider these points of superiority and every one is important:

Four full swivel castors with wide tread which will not mark any floor.
Stave leg built into tub, assuring absolutely rigid construction.
Tub made of extra heavy selected cypress, built to last a life time.
Best quality rubber rolls 12″ wide, giving generous wringing surface.
Swinging wringer which will lock in any position, equipped with large reversible water board.
Safety device to separate rolls.
All gearings covered.
Endless "V" Belt underneath the tub and out of the way.
Equipped with belt tightener.
Cover opens away from front of wringer, and gives free access to rolls.

We have on fyle most of the information of the characteristics of the lighting currents from which these machines are run; however, to avoid error, it is just as well to state this when ordering.

Machines supplied as standard equipment with the following motors:—

25 cycle, 110 Volt A. C. Motors.
30 cycle, 110 Volt A. C. Motors.
60 cycle, 110 Volt A. C. Motors.
32 Volt D. C. Motors.
110 Volt D. C. Motors.

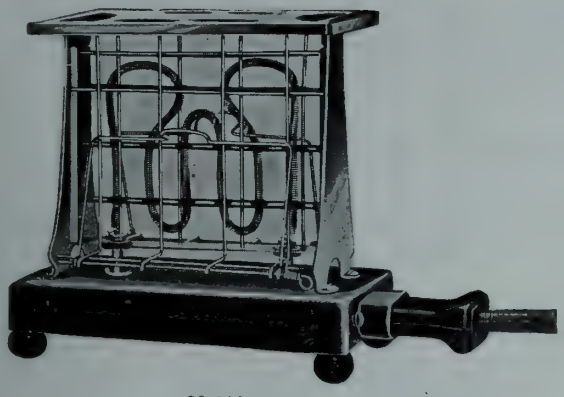
J.C. TOASTERS

Save You Time--Consequently Money



N 610

W 600

MR. DEALER:

Do your customers bring in a toaster for repair and want it right away—just when you are busy, too? On account of it being a fiddling job, tearing down the whole works just to renew the element, it is placed on the shelf and consequently forgotten.

Why not make yourself and your customer happy by getting rid of the job as soon as it is received? You can do this with J. C. Toasters. The heating element can be replaced right on the counter, and in less than two minutes your customer has left, taking his toaster with him. In this way you have made another satisfied and boosting friend.

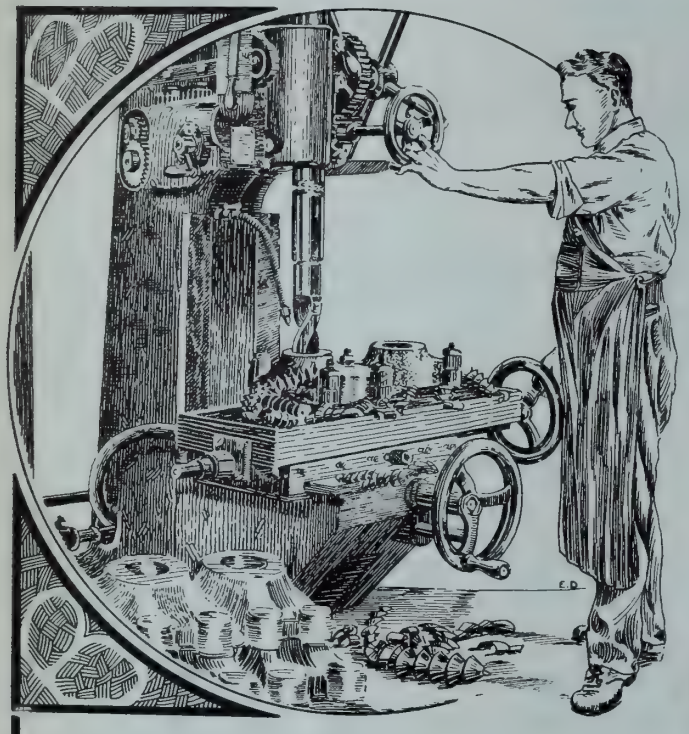
BUTTERFIELD



The tools that mean more pieces of work

accurately turned out each working day

That's Why They Sell Well!

In stocking, displaying and selling Butterfield drills, taps, dies, reamers, milling and gear cutters you are offering tools that have had an established reputation with mechanical men for 40 years. You have no introducing or explaining to do. The superiority of Butterfield tools is known and admitted.

Their precision, fast cutting and ability to stand up to the work is widely known.

Display them and they sell.

Story for Week Dated October 9, 1920 | Hull in 1851 | Being No. 26 in the Series

The Home of the E. B. Eddy Co.'s Giant Sulphite Pulp Digester

Every visitor to Ottawa and Hull knows the appearance of this great square stone tower which, like a massive castle keep, looks out over the Ottawa River and watches the long tows of logs arrive for the Eddy Plant. Inside this tall tower there is placed in an upright position the Eddy Company's giant sulphite pulp digester. The big digester is made of steel plate one inch thick, and the whole great boiler is forty-seven feet tall and fifteen feet in diameter. The same process of "cooking" the chips is carried on in this digester as takes place in the smaller ones you read of last week, but this digester is "blown off" instead of shovelled out when the cooking is complete. The tower in the picture is 112 feet high, and its walls at the base are four feet thick. It is a veritable Castle of Industry.

Helping You Sell It with Eddy Company Advertising

The Eddy Company's Advertising Is but One Item of its Service to Dealers

CONCENTRATE!

Would you rather carry one hundred articles in stock and turn them once a year—or ten, and turn them ten times a season? Answer—obvious.

Apply the principle to your stock of shotgun shells. *Concentrate* your stock on the loads listed below. We know from long experience that these loads meet every requirement and give perfect satisfaction. (They are for 12-gauge guns.)

	DUPONT SMOKELESS Drams	BALL STITE SMOKELESS Grains	DUPONT BLACK Drams	OUNCES Shot	SIZES Shot
Large Ducks	3, 3¼ or 3½	24, 26 or 28	3½	1⅛ or 1¼	4, 5, 6 or 7
Small and Medium Ducks	3, 3¼ or 3½	24, 26 or 28	3½	1⅛ or 1¼	5, 6, 7 or 8
Grouse, Partridge, Prairie Chicken	3 or 3¼	24 or 26	3¼	1⅛	6, 7 or 7½
Pheasants	3	24	3¼	1⅛	5, 6, 7 or 7½
Geese	3½	28	3½	1⅛	4, 3, 2, 1, or BB
Wild Turkey	3½	28	3½	1⅛	4, 3, 2 or 1
Squirrel, Rabbits	3	24	3¼	1⅛	6 or 7
Doves, Pigeons	3 or 3¼	24 or 26	3¼	1⅛	6, 7 or 8
Quail	3 or 3¼	24 or 26	3¼	1 or 1⅛	7½, 8 or 9
Snipe, Woodcock	2¾ or 3	22 or 24	3	1 or 1⅛	8, 9 or 10
Shore Birds	2¾ or 3	22 or 24	3	1 or 1⅛	8, 9 or 10
Sora Rail	2¾ or 3	22 or 24	3	1 or 1⅛	8, 9 or 10
Trap Loads	3 or 3⅛	24 or 25		1⅛ or 1¼	7½ or 8

Cut down your investment—eliminate the dead ones. Get quicker turn-over and greater profits by concentrating on these Du Pont loads.

Keep this list handy. Use it when ordering shells. Remember—

For quick turn-over specify

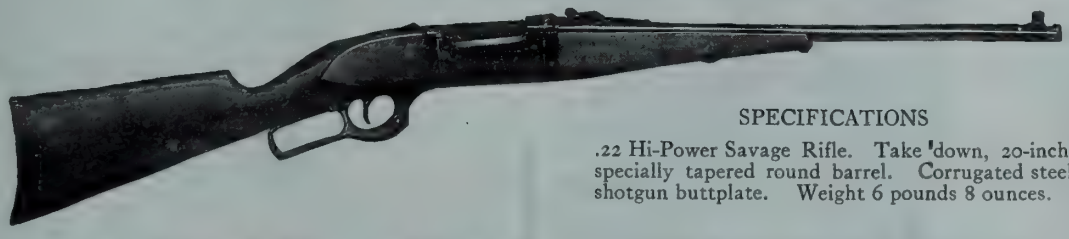
ANOTHER STRING TO YOUR BOW

In stocking the popular Savage line of high-power rifles don't overlook the .22 High-power—the little "Imp" which has been selling Savage satisfaction to customers for years.

It is well known as an ideal rifle for all-round hunting, and is one of the quickest selling rifles in the Savage line, because of its enviable record of performance on all kinds of game, as large as deer and mountain sheep.

If you stock the .22 High-power you have "another string to your bow." It will add new names to your list of satisfied Savage customers.



SPECIFICATIONS

.22 Hi-Power Savage Rifle. Take down, 20-inch specially tapered round barrel. Corrugated steel shotgun buttplate. Weight 6 pounds 8 ounces.

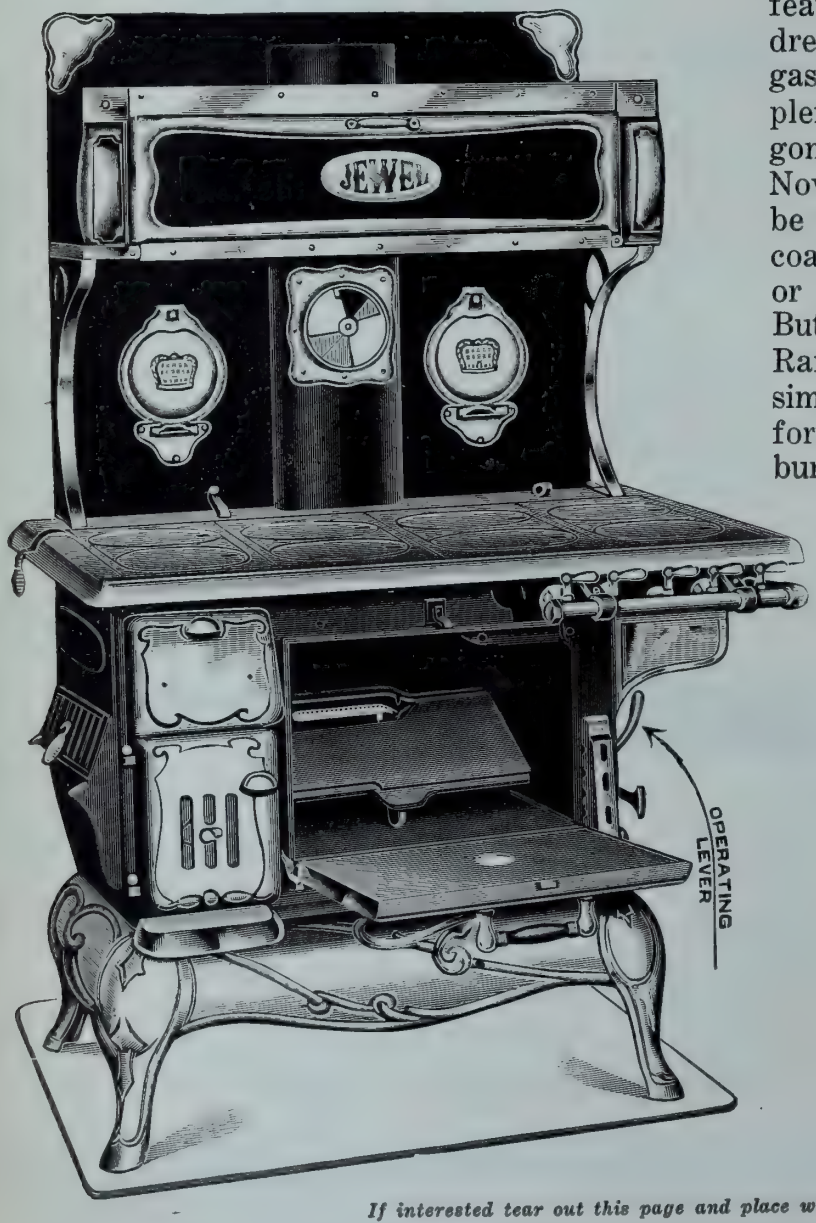
Do you remember the "Triplex Jewel" Exhibit which attracted attention at the Toronto Exhibition?

IT IS evident that the interest which was quite apparent in the Burrows, Stewart and Milne Exhibit this year was more than casual. The results which have been derived from the efforts of our salesmen in demonstrating the "Triplex Jewel" Combination Range are beginning to show in a tangible form.



There is a real reason this year for the return of the old-time careful buying which is being practised by the average housewife in the choice of a range. The reason is the extremely high price of coal, the uncertainty of the supply of coal, natural and artificial gas, as well as wood.

The "Triplex Jewel" with its combination feature has solved this problem for hundreds of Canadian housewives. To-day gas either natural or artificial, may be plentiful and by to-morrow the supply is gone. The same applies to wood and coal. Now with a gas range the housewife would be right up against it. With a shortage of coal or wood the housewife with either coal or wood stove would have need to worry. But with a "Triplex Jewel" Combination Range all her worries are gone, for with the simple turning of a lever the stove is transformed from a gas range into one that will burn coal or wood, or vice versa. She is never stuck, but always ready for the emergency.

Thousands of interested housewives saw the "Triplex Jewel" demonstrated at the Toronto Exhibition this year and everywhere the note of approval was heard. Are you taking advantage of the work our salesmen have started for you?

You should have a "Triplex Jewel" on your floor right now. Show one in your window and start in where our salesmen left off. It's your opportunity. Write to Burrows, Stewart and Milne Co., Ltd., Hamilton, Canada, for further information.

If interested tear out this page and place with letters to be answered.

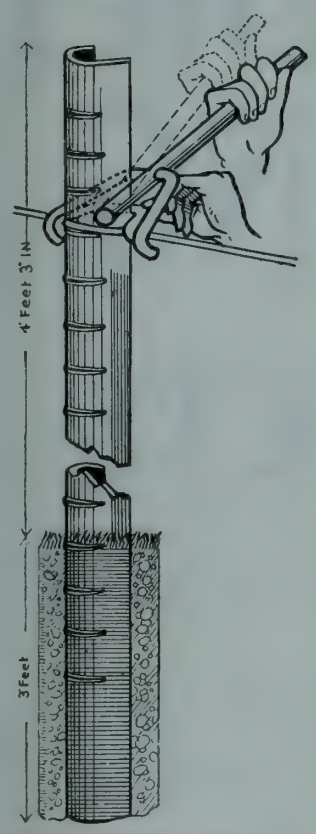
Burlington Steel Fence Posts

Are Successfully Replacing Cedar Posts

The scarcity of cedar posts and their steadily increasing price is forcing farmers, and others who have fences to build, to seek a satisfactory substitute.

They are naturally turning to and using Burlington Steel Fence Posts.

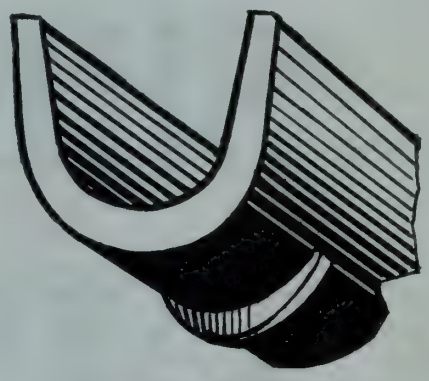
Thousands of these posts are now being used throughout Canada and in every instance are giving satisfactory service and standing every farm strain to which they are subjected.



Right hand works handle, left hand places clip.

Our long experience in manufacturing special steel reinforcing bars enables us to produce a post of unusual strength and rigidity.

They Make
Strong
Solid
Permanent
Sturdy
Fences



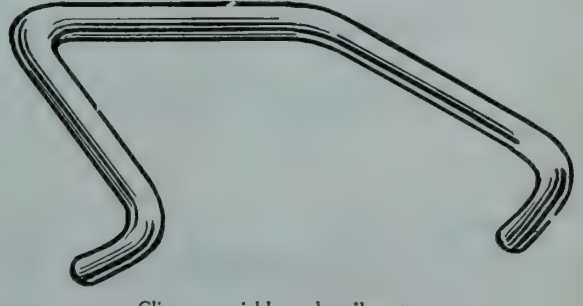
Section of Post. Actual size. Note unusual thickness.

Burlington Steel Fence Posts

are made of high carbon steel, rust resisting, analyzing .45 to .55 per cent. carbon with a yield point of 55,000 to 65,000 pounds to the square inch. They will not bend, break, nor burn. They also afford protection from lightning. They are driven into the ground. The Special "U" design anchors the post permanently. There are no holes in the post to weaken it. The wire is fastened with clips which grip tightly and do not slip. With the Fastening Tool, clips can be put on in a second.

DEALERS

Burlington Steel Fence Posts are being liberally advertised every week in almost every farm paper in Canada. Thousands are now in use. The field is unlimited. Be first in your territory to sell them. You will find a steady demand and can build up a profitable business. Write for particulars, section of post, booklet and prices.



Clips are quickly and easily put on.

Will they buy from you— or go fifty miles away?

Other things being equal, the store located nearest its prospective customers, ought to get the business. But do you get it?

AROUND THE CORNER from you, there is a factory using screw-threading tools. If you have what they need you can probably give them more service, quicker deliveries and better satisfaction than a store a hundred miles away.

Perhaps there's a machine or auto repair shop up the street from you.

Other things being equal, *you* are the one to sell them — we'll say a No. 311 Little Giant screw plate set — or new taps and dies to replace those that are worn out or lost.

Will you let this business go begging into the next town or the next state, because the prospective buyer happens to see the very things you're selling in some far-off window or catalog?

Or will you *anticipate* that need by walking three blocks up the street to make the sale yourself?

A few of those little trips may mean trade for your store amounting to thousands of dollars just from your own trade area. It will build up your GTD line and make it one of the best payers in repeat orders in your whole stock.

A Fitting Answer to the Collar Pad Question

Farmers realize the necessity of a reliable, dependable Collar Pad to protect horses' shoulders.

If any question arises as to the kind of Pad which will give greatest satisfaction, the answer, satisfactory and complete, may be given by the Dealer who handles

TAPATCO REGISTERED TRADE MARK BRAND **COLLAR PADS**

Every part is designed to give extra wear. The patented Stapling Device (Patented in U.S., December 1, 1914—Patented in Canada, April 6, 1915), is one of many superior features.

A wire staple reinforced by felt washer, firmly grips hook to body of Pad, so that it remains secure even when the fabric itself has become weakened by sweat and long use. This feature combined with a soft, flexible, cushion-like and absorbent pad, insures 100% satisfaction.

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

Profitable Advertising

WHEN you make a display of Imperial Polarine in your windows, on your counter or sales floors, or in your local newspaper advertising, you are doing profitable advertising, for you identify your store as correct lubrication service headquarters.

It pays to feature Imperial Polarine because its sterling quality is known to the big majority of Canadian motorists and your action in bringing your stock to their attention reminds them of their needs.

To make the greatest profit you should sell all six sizes of the three grades for cylinder lubrication:—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A. Also the special Imperial Polarine transmission and differential oils and greases. You should sell by the Imperial Polarine Chart of Recommendations, too.

Imperial Polarine is put up in half-gallon, gallon and four-gallon lithographed sealed cans, twelve and a half-gallon steel drums, half-barrels and barrels of steel or wood. It is extensively advertised in your territory. If you do not sell Imperial Polarine, the Imperial Oil man will show you how you can make highly satisfactory profits with this line.

IMPERIAL
Polarine
MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.
IMPERIAL POLARINE
(Light medium body)
IMPERIAL POLARINE HEAVY
(Medium Heavy Body)
IMPERIAL POLARINE A
(Extra Heavy Body)
One of these grades is specially recommended for the correct lubrication of any car or truck in your community.
See the Imperial Polarine Chart of Recommendations—display it prominently and sell by this chart.
For Efficient
Automobile transmission and differential lubrication sell
IMPERIAL POLARINE TRANSMISSION OIL
In cases where grease is required or preferred, sell
IMPERIAL POLARINE TRANSMISSION GREASE "BB"
IMPERIAL POLARINE CUP GREASE

Retailers and Wholesalers to Pay License Fee; Stamps to be used for Collecting Luxury Taxes

License Fees and Substitution of Stamps for Collection of Tax Are Main Points of New Regulations Effective November 1—Perforators to Be Loaned to Dealers—Records to Be Kept for Two Years—Drastic Penalties Provided.

NEW regulations in regard to the enforcement and collection of the luxury and sales taxes have been prepared, to become effective on November 1 of this year. These are very extensive and of great importance to the retail trade, hence full information has been secured by Hardware and Metal. The most important new features are those providing for the licensing of retailers and wholesalers and the use of stamps and perforators for the collection of the luxury tax.

Opinions expressed by retail hardware dealers indicate that the trade has some grievances yet in face of the latest action. Some dealers are of the opinion that it is overstepping the mark to ask the trade to pay a license fee for the protection of the tax collection system and to give the Government a means of levying a penalty on offending dealers. The trade is already acting in the capacity of tax collectors, without paying for the privilege.

The experience of the trade in affixing stamps to certain patent medicine lines has not encouraged the idea of having to follow this procedure with all the hardware lines subject to taxation. However, as some dealers point out, no tax measure is popular.

The regulations are outlined in detail herewith:

Retailers and wholesalers selling articles which come under the tax regulation are required to purchase licenses from the Inland Revenue. The retail tax is $2 and wholesalers also pay this figure, with the exception of manufacturers making or wholesaling articles subject to the sales tax, the license fee for this class being $5. A penalty of $1,000 for neglect or refusal to take out this last tax has been set.

Wholesalers dealing in articles coming under the retail luxury tax must not sell to retailers unless the latter have their license. The number of this license must appear on all orders.

Stamps to be Used

The luxury tax is to be collected by means of stamps, which may be secured from the Inland Revenue Department, all customs offices or from the banks. This section reads as follows: "Vendors selling articles subject to luxury tax are required to furnish the purchaser, at the time of sale, with a voucher or sales slip representing such sale and showing the tax as a separate item. Before delivering such voucher or sales slip to the purchaser the vendor must affix to such voucher or sales slip a stamp or stamps of the requisite denomination sufficient to cover the tax payable upon such article. The vendor must cancel the stamp or stamps after they have been affixed to the voucher or sales slip by means of an authorized perforator in such manner that the cancellation is entirely surrounded by the outer edges of the stamps."

The penalty provided for any retailer failing to affix these stamps and to duly cancel them or neglecting or refusing to pay the tax is a fine not less than ten times the amount of the duty not paid, with a minimum fine of $50 for each offence.

Will Loan Perforators

The perforators required will be issued, on loan, to merchants by the department, through collectors of divisions, and the merchant will be required to furnish a receipt. This receipt is to contain the serial number of the perforator, an acknowledgement that the perforator is the property of the department, and an agreement to return the machine when not further needed, or when called upon to do so by the department. All the perforators will be serially numbered. The retail merchant is also required to keep on hand a sufficient supply of stamps to meet requirements, and delay in the transmission of

Continued on page 38

New Tax Regulations in Brief

(Following changes effective November 1, 1920)

LUXURY TAX

Retailers to be licensed. Fee of $2. Number of license to appear on all orders.

Wholesalers, if subject to sales tax, pay license fee of $5, otherwise $2. Penalty of $1,000.

Stamps to be used—can be secured from Inland Revenue Dept., Customs offices, banks.

Purchaser must be given sales slip showing tax separate. Vendor must affix to sales slip on voucher sufficient stamps to cover tax; stamps then to be perforated. Penalty, a fine ten times duty not paid. Minimum of $50.

Perforators loaned by Government—each numbered.

Failure to have stamp supply on hand no excuse for non-payment of taxes.

Collectable at time of sale by manufacturer and jobbers or on importation, payable each month. Books open to inspector's examination. All records must be kept for two years.

SALES TAX

Manufacturers and wholesalers must furnish purchaser with written invoice showing sales tax separately.

Manufacturers can absorb only a portion of sales tax. Where it is 2 per cent. manufacturer can absorb 1 per cent. and show 1 per cent. on invoice.

On exports.—Sales tax applicable except on sales and deliveries direct to foreign purchaser.

Trade discounts allowed for excise tax purposes. Tax paid on amount of cash discount can be credited in next tax return if made in 60 days.

Sales tax on importations computed on duty-paid value of importations. If subject to luxury tax sales tax not collected on amount of luxury tax.

Ready Roofing Industry Makes Great Headway

Four Important Factors Will Determine Future Price Trend—Expected Revival of Building and Good Crop Will Boom Roofing Business.

An Interview by A. H. ILLSEY of Hardware and Metal with Herbert Kennedy.

MONTREAL.—"There has been an immense demand this year for prepared roofings and similar products," said Herbert Kennedy, general manager, the Standard Paint Company of Canada, Ltd., Montreal, to Hardware and Metal in discussing the situation. "And we expect that there will be immense demand for this line for many years to come."

Mr. Kennedy said that so great has demand been this year that manufacturers have been unable to lay aside any surplus. He is convinced that there will be a heavy demand because of the fact that many new buildings are needed. The farmers of the country have had an excellent year and this fact is also important. They will have to erect barns and new out-buildings. For these they will require thousands of squares of roofing, and there is a real opportunity to improve this chance of selling more such products to the farmers of Canada.

A Changed Basis

The prices of prepared roofings have greatly increased during the year. This is due to the higher prices asked for old rags, of which the basic felt is made. So great have these increases been that, within the past few months, prices ranged between $85 and $90 per ton, whereas, at one time, a fair price for them was around $20. Manufacturers were doing a large amount of business as already outlined, but they had to go into the open market and buy at the high prices. Outside competition absorbed the supply rapidly and various makers were compelled to buy weeks in advance to keep plants operating. And while the prices have somewhat eased off in recent weeks, high priced raw materials are still being used in the finished product. There may be a more favorable basis on this one line by the first of the year.

There are three other items to be considered in the manufacture of the roofings, asphalt, coal and labor. Each of these is very important and the outlook on all of them is more than usually interesting at this time. In the first place asphalt is high in price and there is every likelihood of there being a substantial advance in its price within the next few months. This is due to the Mexican situation, the Mexicans largely controlling the market.

There have been four or five increases made to labor within the year. Roofing makers either had to do this or their help would have gone over to nearby plants. Wages are therefore higher than ever and are likely to remain high.

Coal is an important item in the production cost. As much as $18 per ton is being paid for this, for, while contracts were made for supplies of coal long ago, operators are unable to fill these contracts; the manufacturer has to pay the price.

Prices May Not Advance

Despite the fact that prices on these four important factors are so high—felts, asphalt, coal and labor, Mr. Kennedy feels that possibly the crest of prices has been reached. The enormous demands for the manufactured article have enabled the manufacturer to produce for less percentage of profit, and if the demands continue as is likely it is probable that higher prices than those now in effect may be avoided. The crest of the market may have been now reached, but with the factors just outlined the governing ones, there is little to warrant any reductions whatever. These will have to await the development of other factors of a favorable nature which are not now apparent.

RETAILERS AND WHOLESALERS PAY

Continued from page 37

stamps is not to be taken as excuse for non-payment of taxes.

The Sales Tax

The sales tax is collectable at the time of sale by manufacturers, wholesalers or jobbers on importation. This tax must be forwarded to the collector of the division by the last day of each month. A total amount of sales and tax accompanied by an affidavit of the dealer or a certificate from a chartered accountant or independent auditor will be accepted. Sales by manufacturers direct to retailers or consumers are subject to a sales tax of 2 per cent., and to wholesalers or jobbers, or by wholesalers or jobbers, to a tax of 1 per cent. Importations by manufacturers, wholesalers or jobbers are subject to the sales tax of 1 per cent., except when for their own use, in which case the tax is 2 per cent. Importations by retailers or consumers are subject to a tax of 2 per cent.

Books Open for Examination—Records Kept for Two Years

The new regulations provide that the books and records of manufacturers, wholesalers or jobbers must be open at all times to examination by Government officials, and that the return or sales taxes will be audited by the department as frequently as is deemed necessary. All such vouchers, books or records must be kept for at least two years by the dealer. Instructions for determining the rate of the sales tax are given as follows:

Some Points for Manufacturers

"Manufacturers purchasing material from other manufacturers, such material to be used and incorporated in or attached to their finished product, must certify on their orders that such materials are for use as above, and must also state the nature and serial number of their license.

"Manufacturers selling materials to other manufacturers on orders which do not bear the above certificate must charge the second manufacturer the 2 per cent. sales tax.

"Manufacturers must charge a sales tax of 1 per cent. when the orders received from wholesalers or jobbers state that such wholesaler or jobber is in possession of a sales tax license and note the number thereof, otherwise they will be charged 2 per cent.

"Manufacturers must charge a sales tax of 2 per cent. unless orders for materials show that the purchaser has a manufacturer's or wholesaler's license and states the number thereof. The status of persons purchasing from manufacturers is subject to special corroboration by officers of this department.

"Customs officers and manufacturers will be able to verify the character of license held by persons, firms, or corporations, by reference to collectors of Inland Revenue, who will keep a record of all licenses issued.

Demand Written Invoice

"Every manufacturer, wholesaler or jobber dealing in articles subject to the sales tax must furnish the purchaser with a written invoice of such sale. Such invoice must show as a separate item the amount of tax upon such sale to at least the extent of 1 per cent.

Manufacturers Can Absorb Only a Portion of Sales Tax

"Manufacturers only are allowed to absorb a portion of the tax, and that only when the sale is made by the manufacturer to the retailer or user whereby the tax is 2 per cent.; in this event the manufacturer may absorb 1 per cent. tax, but must show 1 per cent. on the invoice to the purchaser as a separate item.

"The tax paid by manufacturers, wholesalers or jobbers at the time of purchase of goods may be charged to the person purchasing from such manufacturer, wholesaler or jobber, provided it is not shown as a separate item on the invoice and not included in the seller's cost upon which profit is calculated.

On Goods Exported

"As regards goods destined for export, the sales tax is applicable except on sales and deliveries direct to a foreign purchaser, that is to say, material sold by a dealer to a foreign purchaser is not

(Continued on page 68)

Sells the "Idea" of Electrical Devices

Saving of Drudgery and Increasing of Efficiency Are Underlying Ideas Which Prove the Best Arguments in Selling Electrical Plants, Water Systems and All Such Appliances—A Potent Factor in Keeping Young People in the Rural Districts—Getting Motion in the Window Displays—How One Dealer Sold Nine Electric and Water Systems.

ONE of the strongest arguments which rural dealers can use for the sale of all kinds of electrical devices for use in the home or in the farm buildings is that their use will help to overcome the serious problem now confronting the community through the exodus of young people from the farming districts to the cities. This is a question which has come in for a great deal of discussion and many so-called solutions have been put forward.

Getting down to the root of the question, however, as was done by the sales manager of a large United States firm when speaking on the subject recently in Toronto, it was pointed out that the experience of dealers in that country had taught them that young people leave the farm largely because the country home lacks conveniences which have been common in even the humblest of urban homes for the past 20 years. Running water, modern lighting, transportation facilities, labor saving devices, are the main features that are mentioned as necessary to make rural life sufficiently attractive to keep the young people where their training will make them of greatest usefulness.

Recent medical surveys in the United States have confirmed the fact that there is more defective eyesight to be found in the inhabitants of rural districts than in the cities, the reason, of course, being poor lighting arrangements. This argument also extends to many other diseases which are said to

GREAT DEMAND FOR ELECTRIC RANGES

Hamilton.—Fully five hundred more electric ranges would be in use if the power was available to operate them, Controller O'Heir states. He said that the Hydro department had received applications from 500 householders for power for ranges, but was unable to accommodate them. He thought this was proof that the average citizen was keen to use electricity as a fuel, and that it showed there was a demand which would ultimately be met. A civic gas plant, therefore, would be a hazardous undertaking, he contended.

Combining a window display of electric fixtures with fire grate accessories. This combination makes a seasonable appeal at this time of year when grate fires are required for a time until furnaces are lighted for the winter. Linking up the electrical display tends to make passers-by think of their electrical requirements with special regard to the fall and winter season. The long, dark evenings are here and indoor activities are in the forefront. Now is the time to suggest electric lighting fixtures, heaters and other devices particularly seasonable.

Illustrations showing the uses to which electrical devices may be put are generally most effective. Herewith are two well illustrated ads. showing lamps, fixtures, heaters, irons, washers, cleaners and table appliances. In the ad. by Ingram & Davey, St. Thomas, Ont., a brief description is given of each line with prices. The ad. by Rice Lewis & Son, Ltd., Toronto, makes an introductory appeal to "cook electrically and you will add to the comfort of the family and ease the labor of the household."

be more prevalent in rural districts due largely to the lack of ordinary sanitary protection.

The foregoing presents a very strong argument for the increased use of water systems, electric light plants and electric labor saving devices in these districts. For the sake of humanity apart from a business consideration there is a strong principle involved.

Various Uses of Water Supply Systems

Electric water supply systems can be used for a great variety of purposes. Next to their use in the home and in the farm buildings, they can be used profitably by owners of greenhouses, dairymen, poultrymen, etc., all of whom require water under pressure. The experience of dairymen has been that in cold weather the stock is kept in much better condition by being supplied in the stable with running water rather than being taken out in the cold to drink water from a trough which is half frozen with ice.

Another source of business for water supply systems, as developed in some of the more settled districts, is for factories which as a rule have been in the habit of spending large sums annually on icing water during the hot summer months. A number of factories have installed a pumping machine and drawn water from a deep well for the use of its office and factory staff. The water is always cool and the saving in ice for one or two seasons will pay for the expense of the pumping outfit.

Getting Motion in the Window Displays

The need for attractive window displays in selling water supply outfits, electric light plants and labor saving devices, is an important point. It is wise to show action wherever possible as it arouses a keener interest among passers-by. One dealer uses a model barn and farmhouse with grounds laid out. He borrowed the equipment from a window display provided for advertising paints. A miniature fountain with running water and other faucets were located around the grounds showing water running into troughs for the stock, into the sink, etc. Miniature electric bulbs illuminated the buildings and grounds. Another suggested display is to show a kitchen with a washing machine connected with the motor used for water pumping. Such a display indicates the double value of having this source of energy in cases where certain communities have been unable yet to secure Hydro electric service. A bathroom display can also be arranged showing the comparison between the old way and the new way, comparing the hand pump with the water running under pressure from the faucets, or a dining room display can show a table set, the percolator steaming and working in electric grills and other devices.

Sells Nine Electric and Water Systems

One dealer hit upon the scheme of conducting a contest which would comply with the law, and it proved very successful in the sale of electric light plants, water systems, etc. The plan followed was to have every person who drew a number register their name and address. The important point of the contest was that only persons who were able to show that they needed an electric light plant or water supply system were allowed to draw. As a result of the contest the dealer secured the names of 200 local people who openly admitted that they needed such a system. It is significant of the success of the plan that this dealer sold nine systems to those who had registered, within 30 days.

Use Local Exhibitions

Taking advantage of the publicity offered by local exhibitions is another point emphasized in the sale of electrical plants, household appliances, etc. People visiting fairs are in a receptive

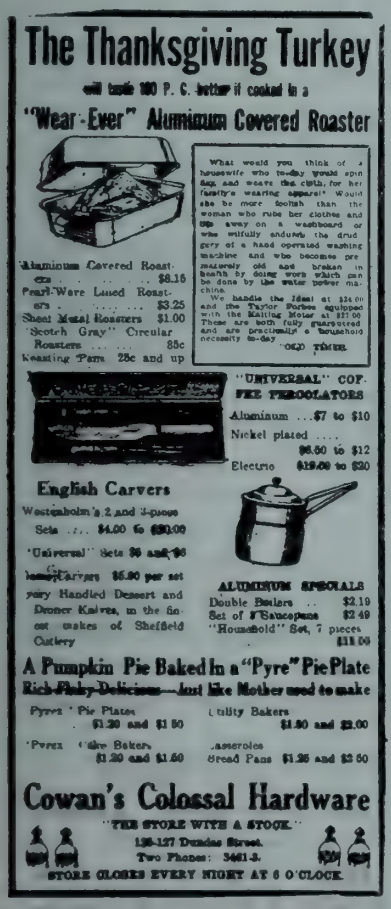
(Continued on page 59)

Thanksgiving Season of Festivities Now at Hand

Many Dealers Take Advantage of Such Occasions to Push Seasonable Lines—Cutlery, Silverware, Kitchen Utensils Among the Most Active Lines at this Time—Use Frost Tinted Leaves, Pumpkins, Harvest Scenes to Achieve Seasonable Effect.

FOR the dealer who follows the plan of making the most of seasonable features throughout the year, Thanksgiving time offers opportunity for developing special interest in connection with certain lines.

Thanksgiving is a festive season originating as a time for the giving of thanks. The date this year in Canada is set for October 18, following out the usual plan of holding this celebration at a time when the crops have harvested, and when, therefore, the country which has had a bountiful harvest has reason for giving thanks. The day has become historical as one for festivities, and in Canada it has generally been celebrated with a dinner of fowl or other game.



An ad emphasizing roasting pans, carving sets and pie plates, arranged in order to conform with the progress of the Thanksgiving dinner. By Cowan's Hardware, London, Ont.

Here is an attractive arrangement of a Thanksgiving display by the Bond Hardware Co., Guelph, Ont. It shows the leaves tinted by the frosts, always significant of Fall, and neatly printed cards emphasize the suggestion it is desired to convey. The lines shown include cutlery, silverware, etc., all plainly price marked.

Carving Sets and Roasters for the Turkey

It is for this latter reason that dealers have become accustomed to advertising carving sets, platters, and other food receptacles at this time of the year. Being a festive season, customers are perhaps in a more receptive mood for suggestions along this line. There is a psychological connection between the customer's visions of the Thanksgiving dinner and the dealer's endeavor to sell the articles mentioned as accessories to that festivity. This should be the basis of all displays, advertisements or other publicity done at this time.

Herewith are shown a sample window display and some advertisements of lines for the Thanksgiving season. These lines include cutlery, silverware, aluminumware, enamelware, etc. A good suggestion to make the display timely is to decorate it with branches and leaves tinged by the frost. Some neat cards are also used to carry the suggestion home.

Articles for all Stages of Thanksgiving Meal

The advertisement by Cowan's Colossal Hardware, London, Ont., emphasizes aluminum and enamel roasters for the Thanksgiving turkey followed with a mention of carving sets. Following out the progress of the meal, the last-mentioned article is the pie plate for the pumpkin pie. It would form the basis of a good advertisement to list the lines on sale to conform with the progress of the dinner.

Editorial Comment

THE ENFORCEMENTS OF THE HEADLIGHT ANTI-GLARE LAW

MOTOR fatalities in Ontario due to glaring headlights, and which have occurred since the passing of the new Headlight Anti-Glare Law, indicate the necessity of such a regulation being rigidly enforced at the earliest opportunity. There has been some misunderstanding of the recent step of the Ontario Government in putting into effect this law, due to newspaper reports that it was not to be enforced until January next. The situation really is that the Government is allowing motorists a little time to secure legal devices but nevertheless motorists who do not secure headlight devices in the meantime leave themselves open to prosecution, the matter being left to the discrimination of the magistrate. After January 1, 1921, the law will be rigidly enforced and every motorist will be compelled to have headlight devices which prevent glare. After that date the Provincial Highways Department will also prosecute offending motorists.

Some owners of automobiles will wait until the last minute to attend to their headlights. This element exists in every community. But if such motorists' headlights are the direct cause of any accident between now and January, 1921, the magistrate is empowered to make a prosecution for neglect to comply with the law. If the granting of further time to motorists to secure headlight devices is to extend the list of fatalities then it should be enforced rigidly at once.

INFLUENCE OF EARLY CLOSING REGULATIONS IS EXTENDING

THE reported action of the city of Winnipeg in enforcing its local early closing by-law respecting retail stores adds another city to the list of those which have found such action to be in the interest of local merchants. In the case of Winnipeg a petition signed by nine thousand citizens was presented in opposition to the enforcement of such a regulation but was practically ignored. Investigation by a representative of local retailers and clerks established the fact that a great many stores were remaining open at night particularly in certain sections of the city.

RETAILER TO PAY LICENSE FEE FOR PRIVILEGE OF COLLECTING TAXES

A NEW series of regulations governing the application of the luxury and sales taxes, to be effective on November 1, make necessary the taking out of licenses by retailers and wholesalers for which a fee of $2 and $5 respectively is charged.

Retailers have felt keenly the alleged discrimination against them as a class in connection with the taxes and the expression of their grievances through the trade press, among which Hardware and Metal has been particularly active, has brought some amelioration of conditions. There are still some grievances, however. To some dealers it looks like adding insult to injury to ask them to pay a license fee for the protection of the government's tax scheme and for the privilege of being a government tax collector, but it must be borne in mind that a tax measure is never a popular one.

The collection of taxes by the use of stamps makes the system more efficient and more productive from the government's point of view, while the affixing of stamps and their perforation makes added work for the dealer.

Drastic regulations have been made as penalty for non-compliance with any section of the Act on the part of any dealer and it is demanded that dealers keep records for two years and that books be available for inspection at any time.

It is evident that the revised regulations have been decided upon after more thought than was given the original resolution, but where blanket statements made formerly in ignorance were very drastic in nature as result, the carefully planned regulations as now in force are equally drastic in effect though not seeming to be as comprehensive.

Selling 15,000 Rounds of Ammunition

How One Eastern Hardware Dealer Assisted in the Formation of a Local Gun Club Which Used 15,000 Rounds of Ammunition and a number of Targets at a Recent Tournament—Trapshooting Vogue is Spreading Rapidly—Begin at Home With a Modest Set

THE vogue of trapshooting is spreading faster than at any time in the history of sport. Since the war many of the returned boys have been showing a longing for some means to retain the art at which they had so much practice. Every hardware man is in a position to start a gun club, or to interest his customers in trapshooting.

All trap enthusiasts do not get their start on regulation grounds. Often the love for the sport begins in a small way, and for this reason the dealer can realize how important it is to give considerable attention to the sale of small trap outfits. Right here is the opportunity to sell small gauge shot guns, hand traps and lots of ammunition.

It is not only the men who will be interested in these small outfits, but the boys and women will absorb the idea so strongly that as soon as they acquire experience they will be quick to fall in line for the real thing.

There is no reason why the gun and ammunition department of any hardware store should not be developed until it ranks as important as the automobile accessory department which has proved to be a great success.

To be a successful merchant it is necessary to do more than supply demand.

Create Demand First

The men who are making the most headway are the ones who create the demand first and then do the supplying. The proprietors of many hardware stores have founded golf clubs, and later reaped a good reward when the citizens became interested, by having on hand a good stock of golf supplies to meet the demand they themselves created.

Gun clubs, according to the experience of all dealers who have been connected with them, are business getters, and many a member who gets interested in the sport wants to buy the best gun the market affords for his own use when he goes after the birds. Of course ammunition sales are increased, and it will pay the dealer to encourage the organization of clubs by offering medals and trophies for competition among the club members.

Trapshooting Associations Extending

Gun clubs are springing up all over the country, and many shooters forecast that before long every town in Canada will have at least one trapshooting association. There are many very small towns in Eastern Canada that are able to boast of having a flourishing gun club, and this year has seen the forming of it. The formation of a club is a very easy matter. The following is an example of the method applied by one go-ahead club.

Two or three gun enthusiasts, one of them a member of a hardware firm, got together and talked things over. The next evening there appeared in the local newspapers an advertisement asking all persons interested in trapshooting to meet at an hotel on a certain evening. On the evening specified about 20 men turned up and a very enthusiastic meeting took place. A date was fixed for a meeting to organize the club, each man pledging himself to bring at least one friend. This club now has over 100 members, and more citizens are becoming interested every shoot. A tournament was held recently and 15,000 rounds of ammunition were used. This means that 15,000 cartridges and a larger number of targets were sold by dealers, which would never have been sold had it not been for the energies of two or three men, and mainly the energy of the man connected with the hardware business.

What this man has done can be done by all hardware merchants, and the sale of ammunition, shot guns and clay pigeons made an important end of their business.

Important Notice to Exporters

DRAWBACK claims filed after 31st December, 1920, are limited to goods exported during period of one year; claims must be presented within six months from date of last entry covered by claim.

Firms engaged in export trade are notified of the foregoing important change in the customs regulations, effective December 31st, 1920, relative to drawback claims covering exported goods.

The new regulations, established by order-in-council, were issued by the Department of Customs on the 14th April, 1920, and will be found in the Department of Trade and Commerce "Weekly Bulletins" Nos. 848 and 528, dated May 3rd and August 23rd respectively.

Clause 5 of the regulations reads as follows:

"Claims for drawback submitted after the 31st day of December, 1920, shall not cover goods exported for more than one year and must be presented to the customs with complete evidence attached within a period of six months from the date of the last export entry covered by the claim."

The Commissioner of Customs states that no drawback claim submitted to the department after December 31, 1920, as covering exported goods, will be approved for payment unless the claim is filed with the proper customs officer within six months of the date of the last export entry covered by the claim; also it is required that the claim shall only cover goods exported during the period of one year. Of course there is no objection whatever to the claim covering a shorter period.

Note.—The limitation of time only applies to the time within which the goods have been exported. There has been no change in the provision that to be entitled to drawback the materials used must have been imported within three years of the date of exportation of the manufactured article.

BIG INCREASE IN CANADIAN TOOLS GOING TO SOUTH AFRICA

W. J. Egan, Canadian Trade Commissioner in South Africa, reports that the value of the imports of Canadian tools and implements into South Africa increased from $2,000 in 1913 to $459,000 in 1919. There is not the same demand for Canadian pickaxes as there is for shovels. The Western Cape Province uses more shaped handles than the other Provinces, where the D-shape is more popular. Canadian axes, hatchets, hammers, saws, wrenches, and forged tools have also secured a good footing. The bulk trade by the wholesale importers is in staple and cheap tools of all kinds. The better-grade mechanics' tools are handled almost entirely by retail stores. There is a constant demand for hoes and picks as used by the natives, but there does not seem to be much keenness in Canada to supply these implements. Ploughs, harrows, and parts were imported from Canada to the value of $632,800 last year, and in reaping and mowing machines the imports from Canada were valued at $14,550. Other agricultural machinery, including spades, rakes, forks, etc., accounted for $95,500.

News of Western Canada

Marshall Wells Co. Open in Moose Jaw

Former Warehouse of Gray-Campbell Co., Moose Jaw, Purchased by Winnipeg Wholesale Hardware—Business to Be Commenced at Once.

MOOSE JAW, SASK.—It is stated that Marshall-Wells Company, Ltd., wholesale hardware firm of Winnipeg, Man., has purchased the old warehouse and site of the Gray-Campbell Company, 574 High Street West, and will open up a wholesale hardware warehouse at once.

The purchase of the site from the Gray-Campbell Company has just been completed. The property consists of 100 feet frontage on High Street and 120 feet on Sixth Avenue. It is served by a C. P. R. spur track and there is a two story brick building on the corner of High Street and Sixth Avenue, and a one story warehouse covering the greater part of the property.

The premises are being purchased by the Marshall-Wells Company to be used as temporary premises for this winter, and construction of their new premises will be commenced in the spring.

The building was built by the Gray-Campbell Co., and was used by them for seven years prior to the occupancy of the Douglas building on Main Street, where the Western headquarters of the firm is now situated.

The Marshall-Wells Company will take over the major portion of the buildings immediately and the remainder as soon as the present occupants vacate.

Details of Western Consolidation

Merrick-Anderson Building Paper Factory Also Absorbed to Be Under Management of J. A. Merrick—Will Mean Economy in Operation.

WINNIPEG. — Supplementing the announcement which appeared in last week's issue of Hardware and Metal concerning the consolidation of the wholesale hardware firms of Marshall-Wells Co., Ltd., and Merrick-Anderson Co., Ltd., the following statement is now given out:

The consolidation of Merrick-Anderson Co., Ltd., and Marshall-Wells Co., Ltd., wholesale hardware merchants of Winnipeg, also includes the absorption of the Merrick-Anderson building paper factory at Elmwood. T. L. Waldon, who will continue vice-president of the Marshall-Wells Co., Ltd., states that the wholesale hardware business of the two companies will continue under the name and trade mark of the Marshall-Wells Co., Ltd., while the paper factory will be continued under the Merrick-Anderson Co., Ltd., name and trade marks. G. W. Merrick will become a director of the Marshall-Wells Co., and the building paper factory will be under the management of Joseph A. Merrick. Mr. Waldon has been connected with the wholesale hardware business in Winnipeg for twenty-five years, fifteen years of that time being spent with the Marshall-Wells Co., Ltd. Both firms have a good standing and the consolidation is expected to mean economy in operation and more efficient service. The department managers, staff and travelling salesmen of Merrick-Anderson Co., will continue with the new organization.

New Cordage Plant in British Columbia

With a capacity of 8,000 pounds of hemp per day, a new cordage plant will be opened in New Westminster, B.C., this month to supply not only the British Columbia market, but also that of the Prairie Provinces.

The new plant will represent an investment of $260,000, of which, it is said, the Provincial Government loaned $200,000 and the remaining $60,000 has been subscribed by the stockholders. The plant will be under the management of John Passmore. The first product is expected to be turned out by October 15. The building is ready for occupancy and part of the machinery has been installed.

Eston, Sask.—A new hardware store has commenced business here under the name of Moore's Hardware Ltd.

Western Notes

Victoria, B.C.—W. R. Herbert has been appointed general sales manager of the British America Paint Co., Ltd.

Estevan, Sask.—Holmgren Bros., who have heretofore been carrying a line of hardware and groceries, is discontinuing the grocery business.

New Store Opened Following Fire

Watson, Sask.—Smith Bros., hardware, moved into their new building on October 1. The main store is 70 ft. by 30 ft, and an oil house adjoining is 20 ft. by 20 ft. The building is of brick and tile, absolutely fireproof. W. F. & J. L. Smith are brothers. They started business in 1907 and last Christmas their old store was burned.

T. Cope Appointed Assistant Buyer for Wood, Vallance Ltd.

Weyburn, Sask.—Terry Cope has been appointed assistant buyer for the Wood, Vallance Hardware Company at Regina.

Coming to Weyburn in 1912, Terry Cope entered the employ of McKinnons Ltd., in their hardware department, where he remained until going overseas in 1915. Upon returning to the city in 1919 he took charge of the department but later resigned to assume the managership of the branch of the Winnipeg Oil Company in the city, which position he has since held.

Retail Clerks of Winnipeg Form Association

Winnipeg. — (Special.) — A meeting is to be held this week for the purpose of organizing an association of the retail clerks of Winnipeg. Temporary officers announce that the association hopes to include in its membership the majority of the 5,000 retail salesmen and clerks in the city.

The association is the outcome of a temporary organization of clerks and salesmen, which was formed for the purpose of urging on the city council the necessity of passing the early closing by-law. According to A. H. Galle, temporary secretary, one of the originators of the association plan, there is need for an organization embracing in its membership all salesmen and clerk employees in the retail business. The organization will not be in the form of a union but will be independent and will have as its purpose the bettering of working conditions in city stores and shops, he said. Strict enforcement of the early closing by-law will be one of the aims of the association.

Manitoba Retailers Hold Annual Session

Present System of Collecting Business Tax Should Be Changed—Commercial Education Endorsed—Officers Elected.

WINNIPEG (Special).—The annual convention of the Manitoba board of the Retail Merchants' Association, was held in the Board of Trade Bldg., Pres. A. G. Cox, Carman, presiding. Following the address of the president and the reading of the secretary's report, a number of resolutions dealing with various subjects in connection with the association were passed. Among the more important were the following:

Business Taxation

"Whereas the tax commissions appointed by the city of Winnipeg and the Province of Manitoba, both recommend that the present system of collecting the business tax should be changed in view of the irregularities which exist, be it resolved that the executive take this matter up with the Provincial Government with a view to having the recommendations of the commissions put into effect."

School Books Sales Tax

"That we endorse the action of the association in requesting that the sales tax on school books be removed."

Commercial Education

"That whereas the University of Manitoba has offered commercial education in the form of evening lectures and courses, both of which have proven of great value to those engaged in business, therefore be it resolved that this meeting request the executive to co-operate with the advisory committee on commercial education of the University of Manitoba in the development of a department of business organization and research."

Freight Rates

"Resolved, that this meeting endorse the action of the Winnipeg Board of Trade in deciding to appeal the question of freight rates."

Fire Prevention

"Whereas by a proclamation, His Excellency the Governor-General-in Council has set apart October 8 as Fire Prevention Day, therefore be it resolved that this association co-operate with the Fire Commission of Manitoba in regard to fire prevention."

Community Clubs

"Whereas it is desirable that the work of community development be continued in the Province of Manitoba, therefore be it resolved that your executive take such steps to have a department of community organization and development established under the direction of the Department of Education, so that the clubs so formed will be able to take advantage of the service of the various departments of the Provincial Government."

Officers elected as follows: Hon. president, A. G. Cox, Carman; president, A. F. Higgins, Winnipeg; 1st vice-president, T. A. Canell; 2nd vice-president, W. E. Crawford; hon. secretary, H. M. Dunham; treasurer, J. W. Kelly. Members elected to represent the province on the Dominion board were: A. F. Banfield, H. M. Dunham, T. A. Connell, W. E. Humphries, and C. F. Rannard.

Enforce Winnipeg Closing By-law

Large Number of Stores Were Remaining Open—No Hardship on Returned Soldier Store Owners—Petition of 9,000 Citizens for Stores to Remain Open Had Little Influence.

WINNIPEG.—The Early Closing of Shops by-law is to be immediately enforced in Winnipeg. This matter, which has occupied so much attention of the council during the past few months was finally disposed of when the market, license and relief committee's recommendation that no action be taken to amend the present by-law was endorsed by the council. The acceptance of this recommendation means that the by-law will immediately come into force.

The committee submitted that it had fully considered the question of referring the question to a referendum of the people and asked that no such action be taken, but that the former finding of the committee that the city has no jurisdiction to restrict or prohibit the sale of goods so long as a shop is allowed to remain open and that no action be taken to change the present by-law be concurred in.

R. Stark, who claimed that he represented 100 per cent. of the owners of "one man stores and the retail clerks," urged the council to immediately enforce the by-law as it now existed. He stated that representatives of the interests which he represented had made a canvass of the city to ascertain the number of stores which were being kept open after hours. They found open after 6 o'clock in the evening, 23 stores in Ward 1; 24 in Ward 2, 52 in Ward 3; 32 in Ward 4; 24 in Ward 5; 16 in Ward 6, and 31 in Ward 7. Mr. Stark added that a number of small dealers stated that while they were complying with the law it was proving a great hardship on account of the fact that others were keeping open after 6 o'clock.

It had been claimed that the enforcement of the by-law would create a hardship upon returned soldiers, who, since returning from overseas have opened small stores in the city. Mr. Stark submitted figures compiled by the canvassers, which, he claimed, showed the class of citizens who were keeping their stores open after 6 o'clock.

	Foreign	British	Returned
Ward 1	4	11	1
Ward 2	20	4	2
Ward 3	43	9	1
Ward 4	27	5	0
Ward 5	21	3	0
Ward 6	16	0	0
Ward 7	17	14	3

R. A. Bonnar appearing for the Small Stores' Association, urged that a referendum be taken on the question. He reminded the council of the petition signed by 9,000 citizens urging the council to amend the by-law to allow certain stores to remain open, and submitted that this petition was surely worthy of consideration.

Upon the matter being further discussed by the council the recommendation of the committee that the by-law be enforced without amendment was concurred in with but one dissenting voice.

Cheaper Alcohol for Industries

Ottawa.—A change in the regulations governing the denaturing of alcohol for industrial purposes has been made with a view to making industrial alcohol available to the arts and industries at a more reasonable price than the present. Circulars are being sent out by the Department of Inland Revenue authorizing the manufacture and sale without restrictions of a new grade to be known as grade two benzol. The denaturants used in this are benzol, nitrobenzol and pine oil, and the cost of these denaturants will be very small as compared with the cost of methyl alcohol, which was formerly the only denaturant allowed to be used. The cost of the denaturant was responsible in a large measure, it is stated, for the high cost of industrial alcohol, and therefore a committee, composed of three members from the Department of Inland Revenue with two from the research council held several meetings to decide on the form of a new and cheaper denaturant to be allowed. This has now been set forth in the circulars which are being issued from the department.

While nine distilleries have been licensed for the manufacture of industrial alcohol, it is stated that only two have yet begun the work. The operation of prohibition in Canada had reduced the output of the distilleries to a great extent, and some of them had closed down entirely. As a result there is a great shortage of alcohol for industrial purposes, but it is expected that within a short time several distilleries will be manufacturing industrial alcohol, which has been spoken of as the successor of gasoline as a motor fuel.

Events in the Trade

Business Changes

La Tuque, Que.—Fortin & Gauthier, hardware merchants, have effected a dissolution.

Melbourne, Ont.—Pettit James has sold his hardware business to J. Staples and is now located in Strathroy.

New Firm

Ottawa.—John W. Newton has commenced a new hardware business here.

Change of Address

Toronto.—The Oak Tire & Rubber Co., Ltd., of this city, have moved to 258 Victoria Street, Toronto.

Incorporations

Canadian Flashlight, Ltd., has been incorporated with a capital of $2,000,000 to manufacture electrical devices, flashlights, signs, and electrical goods of all kinds, their chief place of business to be at Vancouver, B.C.

The Haupt Company Ltd. have been incorporated with a capital of $50,000 to manufacture iron, brass, copper, tin, steel and metal products of all kinds, etc., their chief place of business to be at Montreal, Que.

Fulton Motors, Ltd., has been incorporated with a capital of $2,000,000 to manufacture automobiles, motor cycles, bicycles, tricycles, accessories, parts, machinery tools, tires, oil, gas and gasoline, etc., their chief place of business to be at Toronto, Ont.

National Castings, Ltd., has been incorporated with a capital of $50,000 to manufacture iron, steel, and all other metals from ore to the finished product, iron manufactures, etc., their chief place of business to be at Belleville, Ont.

Ramsay Kelly Co., Ltd., have been incorporated with a capital of $50,000 to manufacture tacks, locks, paints, tubs. piping, wire, roofing, general hardware fixtures, etc., their chief place of business to be at Montreal, Que.

Canadian Flashlight Ltd., have been incorporated with a capital of $2,000,000 to manufacture electrical devices, flashlights, signs, circuit interperator, electrical goods of all kinds, etc., their chief place of business to be at Vancouver, B.C.

Guarantee Batteries, Ltd., has been incorporated with a capital of $300,000 to manufacture batteries, etc., their chief place of business to be at Guelph, Ont.

To Manufacture Hardware Accessories

Montreal.—The Richmond Wire & Iron Company, Limited, with offices and works at Richmond, Que., contemplate the erection of a plant at the above address for the manufacture of wire goods, stamped metal goods, electrical goods, automobile specialties, metal fittings, augur bits, and various lines of drop forgings. Among the objects of the company, as set forth in its prospectus, is that of selling direct to hardware dealers the lines made in its factory, and particularly a number of lines that are now being imported. Interest in the company is being offered hardware dealers, and those holding stock will be entitled to buy their requirements, the outlined policy of the company states, at a discount of 10 per cent. over regular trade discounts.

It is stated that property and other rights have already been secured and that plans have been prepared for the erection of the first section of the factory, this to be erected in units as required.

Chas. Dufresne Died Suddenly

Montreal.—Gustave Charles Dufresne, son of the late Louis P. Dufresne, passed away at Longueuil, opposite Montreal, on Sunday last at the age of forty-one. Mr. Dufresne had been at his work on Friday last, and the news of his demise came with startling suddenness to his many friends, although he had suffered severe illnesses during the past year which severely taxed his strength, and from which he had not enjoyed complete recovery.

For over eighteen years, the late Mr. Dufresne had been associated with the wholesale hardware firm of Lewis Bros., Ltd., at Montreal, as a salesman. Here he had become widely known to city and country customers, and his affable nature drew many to him. Prior to this he was connected with A. Prud'homme & Fils, wholesale hardware, Montreal. He was unmarried, and had resided for some months past at Longueuil. The remains were interred at Cote des Neiges Cemetery, Montreal, on Wednesday.

Restrictions Removed from Export of Oil

Bucharest.—All restrictions on the export of petroleum from Roumania have been removed.

Western Ontario News

London, Ont.—The wedding was solemnized at St. Paul's Cathedral, London, Ont., on Saturday afternoon, of Miss Helen L. Reid, daughter of Mr. and Mrs. Robert Reid, and Russell H. Beattie, proprietor of the Russell Beattie hardware.

H. H. Todd, of the Hamilton Stove and Heater Co., Hamilton, has been appointed general manager of the Canadian Malleable Iron Co., at Owen Sound in place of A. Gutenkunst, who is going to Milwaukee, where he will go into business for himself.

Work was commenced at London, Ont., this week on the first factory building in connection with the $3,000,000 plant to be erected by the Ruggles Motor Co., of Alma, Michigan.

Wood, Alexander & James Building Nearing Completion

Hamilton.—The new warehouse and office of Wood Alexander James, Hamilton, Ont., is now nearing completion with the most modern equipment to facilitate service.

Beside the main building which covers a large area, the iron warehouse has several acres of floor space.

The entire plant is of fire-proof construction, being built of steel, brick and cement.

Welland Steel Works Closed Down Last Week

Welland, Ont.—The Electrical Steel and Metals Company, Ltd., has ceased operations. The closing down came as a complete surprise to the general public. The plant has been a big asset to Welland since its inauguration about seven years ago, doing a big business and employing, at times, as many as four hundred hands.

Mr. G. C. Mackenzie, the general manager, states that the unfavorable conditions of the market are responsible for the officers of the company deciding to discontinue production.

Tire Company Manager Honored

Montreal.—On the eve of his departure for Toronto to assume the management of that branch, Joseph Lobraico, Montreal manager of the K. & S. Tire & Rubber Goods Company, was made the recipient of a gold chain and a cigar cutter by a number of associates. The presentation was made by D. Carroll, and following this an impromptu concert served to bring a happy evening to a close.

Social Function at Opening of New Weaving Mill

Hamilton, Ont.—An "At Home" was given by the B. Greening Wire Company to their employees in connection with the new weaving mill which is now almost ready for occupancy. A fine musical programme was provided, at the conclusion of which refreshments were served, the balance of the evening being spent in cards and dancing.

Two very pleasant events of the evening were the presentation by Mr. Fred Rutherford on behalf of the company of sweater coats to the Crescent ball team, who won the shop championship in the baseball league, and the presentation by Mr. Ed. Grader, of a beutiful silk Union Jack to Mr. H. B. Greening, the president of the company.

For the dancing, Mr. Robert Jackson acted as floor manager. Mr. Nat Greening, of Warrington, England, was a guest.

Mr. Frank Maw, secretary-treasurer of the company, and Mr. D. F. Griffith, sales manager, assisted to make the event a success. The affair was in charge of the executive of the recently formed veterans' organization of the company.

When the machinery is all installed in the new weaving mill the capacity for turning out black screen cloth will be increased 25 per cent.

To Build Big Wire Factory

Hamilton.—Plans for the construction of a large wire mill have been prepared by the Steel Company of Canada. The site recently secured from the city, at the blind ends of Cathcart and Murray Streets, will be utilized. The present factory on Wellington Street will be extended to the west, at a cost of $250,000, and will provide employment for 300 additional hands.

The Oneida Community Ltd. to Extend Plant

Niagara Falls.—The Oneida Community, Ltd., will erect three new buildings near its plant here. The grounds have been staked out and the contracts will be let immediately. The purpose of the new buildings is to make the Canadian plant independent of the parent factory in Oneida, N.Y. Until now the product has come into Canada partly finished. Now the entire process will be completed in Canada.

Seven Lindsay Industries Requested to Close Down

Lindsay, Ont.—Seven local industries have been requested to shut down their plants one day a week by the Hydro-Electric Company because of the great shortage of water power in the Trent Valley District. At a meeting of the town council a protest was lodged in shape of a resolution to Premier Drury claiming that Lindsay was being discriminated against in the matter of electric power.

First Run of Metal is Made at Baldwins

Toronto.—The first "run" of plates was recently made at the plant of Baldwins, Ltd., in the Ashbridge industrial area. The machinery and cranes operating the buckets containing the molten metal from the furnaces was set in operation by a number of Toronto ladies, who also set the rollers in operation. Over 500 men are now employed at the works and the number is to be increased in the near future.

Br.-American Safety Razor Co. In Britain and Canada

The British-American Safety Razor Company, Limited, will be launched within the next few weeks in England to take over nearly all of the foreign business of the American Safety Razor Corporation. George L. Storm, chairman of the board of the latter company, will sail for England on October 12 to organize the British concern. The British-American Company will take over all patents, trade marks and rights to use automatic machinery from the American Safety Razor Corporation, and will operate throughout the world except in North and South America, the Philippines, Japan and China. A company similar to the British company will be formed to handle Canadian business. The company will be underwritten by the same interests underwriting the British-American Company.

Edison Opening St. Thomas Plant

St. Thomas, Ont.—An important business transaction which will have much effect upon the industrial development of the city of St. Thomas, was announced, when the Canadian Edison Phonographs, Ltd., concluded the purchase of large factory buildings here. The new corporation, which is the Canadian branch of the Edison Company, of Orange, N. J., will engage in manufacturing phonograph cabinets and the assembling of cabinets and phonograph mechanism for the Canadian trade, and eventually for the export trade for all parts of the British Empire.

All Taxes May be Due for Revision

Advices from Ottawa point to the strong probability that the coming session of Parliament will see considerable variation in the taxation measures of the Government. The business profits tax is likely to go, and possibly the luxury tax may be replaced by the sales tax. It will be recalled that the business profits tax was renewed this year, despite very strenuous objections from business interests which represented it to be an impediment to commercial and industrial expansion. The Minister of Finance was not enamored of it, but took the stand that money had to be raised and this was a fixed and proven source of revenue. The additional taxes levied and the revenues now accruing from them suggest the dropping of the tax on business in the new budget. While there is less talk about it, some proposals are being considered of modifying the luxury tax.

New Buildings for E. C. Atkins & Company

Two new buildings have recently been added to the plant of E. C. Atkins & Co., Indianapolis, Ind. As soon as the additional story to the handle factory was completed, a four story addition to the power plant and a three story building was started. The two new buildings will give additional floor space of about 60,100 square feet. The first floor of the power plant building is to be used as an engine room from which the company will generate its own electricity. The other three floors will be used for factory purposes.

SOME MISUNDERSTANDING OF ONTARIO HEADLIGHT ANTI-GLARE LAW

Owing to the fact that certain reports in circulation have been misrepresenting the situation by stating that although the New Ontario Headlight Anti-Glare Law has been passed it is not effective until after January, 1921, Hardware and Metal has definitely ascertained from the Provincial Highways Department that Ontario motorists are liable to prosecution immediately for not complying with the Act. The matter of their prosecution is wholly left to the discrimination of the magistrate. The reason it will not be rigidly enforced until after January, 1921, is to acquaint people with the law and to give the motorist time to decide on a device.

After January, 1921, the Provincial Highways Department may prosecute any motorist not complying with the law. In the meantime, for his own protection the motorist should be urged to adopt an authorized device.

Newsy Notes From Here and There

Montreal.—E. J. Henderson, of Windsor, Ont., an ex-president of the Canadian Manufacturers' Association, is reported seriously ill in the Royal Victoria Hospital of this city.

* * *

Montreal.—David Griffith of the Dominion Wire Company, Hamilton, was a visitor to Montreal this week. J. W. Albiston, travelling representative of Russell & Erwin Mfg. Co., New Britain, Conn., called on Montreal trade this week. Alex Gibb, manufacturers' agent, Montreal, was in Ontario points last week calling at Meaford, St. Catharines, Toronto and other Ontario centres.

* * *

Montreal.—R. M. Cruise, representing Corbin Cabinet Lock Company, of New Britain, Conn., was in Montreal during the week. Harry James, of Shurly and Dietrich, Galt., Ont., called on the Montreal trade this week. Mr. Stevens representing Wallace Brothers, of Wallingford, Conn., was a trade visitor to Montreal during the week.

* * *

Montreal.—James Bodel, buyer for the hardware department of the Hudson's Bay Co., Ltd., Calgary, was in Montreal this week. Among those attending the annual meeting of the Canadian Wholesale Hardware Association this week at Toronto were Past-president Jos. Dowling, Vice-pres. Col. Robert Starke, R. H. McMaster, and H. T. Diplock. It was hoped that other members of the association could also attend before the sessions closed.

* * *

Montreal.—John Richardson, representing Richardson & Bureau, manufacturers' representatives, left on Wednesday for Western Canada and will go right through to Vancouver. Mr. Richardson will visit the principal Western points and will be gone about a month. Frank W. Moore, with the Fitzgerald Manufacturing Company, Torrington, Conn., was a visitor to Montreal last week.

* * *

Toronto.—The following were among the visitors to H. S. Howland Sons & Co.: Percy J. Virgrass, Seguin Falls; Kennedy and Son, Georgetown, representative of Chalmers Bros., Palmerston; J. I. Kitchen, Schomberg, representative of Chas. Day & Son, Streetsville; L. Stewart, Thistleton.

H. T. Macintosh, Locust Hill, R. Blain, Brampton, H. Spafford, Elmira.

* * *

Toronto.—A. B. Lyall, for several years city representative for Stewart & Wood, Ltd., has gone to Vancouver.

* * *

Toronto.—The following were among the visitors to McClary Manufacturing Co.: Representative of Padgett & Hay, Agincourt; J. A. Henderson, Brampton; and Messrs. Matthie of Boxall and Matthie, Lindsay, and Smith of Smith & Schaefer, Bolton.

* * *

Toronto.—James A. Hossack, sales manager of the Lufkin Rule Co., leaves on Tuesday for an extended trip in Western Canada.

* * *

Toronto.—Fred Muxon of Picton was a visitor to Gurney Foundry Co., Ltd.

* * *

Hamilton, Ont.—Robert J. Lavelle, manager of the Hamilton Whip Co., recently joined the benedicts, having been married at St. Andrew's Church, Oakville, to Miss L. E. Moore.

* * *

Allandale.—Five stores in Allandale were broken into last week. J. S. Brunton's hardware store was among those entered, where a small amount of cash was secured.

* * *

Stirling, Ont.—McGee & Lagrow's hardware store was visited by thieves last week.

* * *

Cayuga.—Murray's hardware store was robbed early this week. Three revolvers, one rifle and forty boxes of cartridges were taken. The thieves broke a rear window to enter and left a door open. The money in the till was untouched. There are no clues.

Hardware Letter Box

STOVE BRICKS

MacKenzie & Co., Fort William, Ont.—Can you advise us who makes fire bricks and linings for Quebec Heaters in Canada?

Answer.—The following are some of the manufacturers of stove bricks:

R. Campbell's Sons, Hamilton, Ont.

Dominion Sewer Pipe Co., Ltd., Swansea, Ont.

Hamilton & Toronto Sewer Pipe Co., Ltd., Hamilton, Ont.

Montreal Fire Bricks Works Co., Ltd., Montreal, Que.

Standard Clay Products, Ltd., St. Johns, Que.

The Toronto Fire Brick Co., Mimico, Ont.

H. Case & Co., Toronto, Ont.

CALCULATOR OR TALLY REGISTER

Collingwood Hardware Co., Collingwood, Ont.—Could you inform us where we could get a pocket checker or calculator?

Answer.—We fancy the article you require is what is usually known as a tally register and these can be procured from most wholesale hardware jobbers. The following have them in stock:

H. S. Howland Sons & Co., Ltd., Toronto.

Rice Lewis & Son, Ltd., Toronto.

The Kennedy Hardware Co., Toronto.

PEERLESS PREMIER STEEL RANGE

Hope & Son, Perth, Ont.—Kindly advise if possible who makes the Peerless Premier Steel Range.

Answer.—The Premier line of ranges are made by the Thos. Davidson Mfg. Co., Ltd., of Montreal, Toronto, etc., but they state they have not made a Peerless Premier. McIntyre & Taylor, 501 Queen St. W., Toronto, can furnish repairs for this stove but has no record of the maker.

MEASURING TABLES

F. W. Miskelly, Smith's Falls, Ont.—Can you tell me where I can procure measuring sheets like part enclosed?

Answer.—The set sent are now out of print but a simliar set of tables is given in the McClary Mfg. Co., Ltd., catalogue. You will also find several sets of tables of this nature in the "Modern Sheet Metal Workers' Instructor," published by F. J. Drake & Co., Chicago, U.S.A.

RICHELIEU UNION SCALE

Emerson & Fisher, Ltd., St. John, N.B.—Can you inform us who manufactures the Richelieu union scales?

Answer.—We understand that this was manufactured by the Richelieu Scale Works of Montreal, but that they are now out of business.

TWO TUB POWER WASHING MACHINES

Whyte & Orr, Ltd., Heisler, Alta.—Can you advise us of names of firms manufacturing or distributing two tub washing machines?

Answer.—The J. H. Ashdown Hardware Co., Ltd., Winnipeg and Calgary, are Canadian agents for Voss Bros. Mfg. Co., of Davenport, Iowa, who make these machines. Other makers are: The One Minute Mfg. Co., Newton, Iowa; The Dexter Co., Fairfield, Iowa; The Meadows Mfg. Co., Bloomington, Ill.

Cannot Supply Gas for Heating in Windsor

Windsor, Ont.—Local consumers of natural gas, who depend upon it for heating as well as other domestic purposes, were notified by the Windsor Gas Company that they should not rely upon sufficient gas for heating this winter, and they are urged to lay in a supply of coal.

Canada Has a World Market Through London

Production of Pig Iron, Ferro Alloys and Steel Ingots Shows Slight Decrease Over 1918 Period—Slight Increases Registered in Production of Rolled Iron and Steel Products.

An Interview by A. H. ILLSEY of Hardware and Metal with H. Stewart.

MONTREAL.—That Canada has a wonderful opportunity to keep her factories busy without interruption by way of exporting her surplus manufactured products, is the opinion of H. Stewart, manager of the Gourock Ropework Export Company, Limited, Montreal. Mr. Stewart returned on the Metagama from an extended trip to the British Isles, and from observations while there, as well as through discussions with business men in Belfast, Glasgow and other centres, he is satisfied that the Canadian manufacturer who really wants an outlet for any surplus products he has will find an unquestionable opportunity for development right now. "There is a well-defined desire to trade with the colonies, and especially with Canada," said Mr. Stewart to Hardware and Metal. "They really are showing a preference for development along these lines, and because of the facilities they have, as a result of increased production during the war, they are arriving at the point where exporting on a large scale will be possible very soon. The large factories that have either been purchased or built they desire to keep in operation, and this will enable them to do an increased export trade."

Is Interdependent

The foregoing ilustrates that British manufacturers are looking ahead with a view to increasing their output via the export route. And they will do so vigorously, by entering into competition with other manufacturers and meeting prices.

Mr. Stewart indicated that many diverse products would be saleable. The fact that a given manufactured article may be made in Great Britain does not mean that a competing line would not sell. But, as Mr. Stewart said, it is necessary to have the direct representation.

The extent to which manufacturing plants can be kept operating will guide the future of prices.

In referring to the present conditions in Great Britain, Mr. Stewart said that everywhere prosperity was evident. All classes reflected the better conditions under which they were living, and those working for wages were especially well-to-do. This will very probably continue.

From the standpoint of industrial activity Mr. Stewart said that the English Government had, apparently, been prepared for the present threatened crisis among the coal miners. Stocks of coal have been laid in; plants are, in many cases, well supplied with coal to carry them along for some time, and there is not so much alarm prevalent there as is indicated in press reports. Besides this, Mr. Stewart asserts that large sections of opinion, even among union men, are opposed to the idea of striking.

One of the interesting things noticed by Mr. Stewart while away was the evident intention of the masses to purchase with greater care, and this will have its own bearing on the future of prices generally.

Greater Restriction in Buying Firearms Advocated by M.P.

Montreal.—That 75 per cent. of the murders committed in Canada were committed with small firearms, was the declaration of Mr. Robert Bickerdike, ex-M.P., at a meeting of the Canadian Prisoners' Welfare Association, held at the Windsor Hotel.

In his view there should be much greater difficulty in buying revolvers.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

2046. **Commission Agency in British Honduras.**—A wholesale commission house in Belize, British Honduras wish to represent Canadian firms prepared to export the following products: Wire (fence, barbed), corrugated zinc for roofing, cartridges and firearms, hardware, crockery, toys, etc.

2033. **Iron or steel bars.**—Firm in Scotland are open to receive quotations for the following, each 5 tons: iron or steel bars, 1½-inch by 1½-inch by ¼-inch angle by 20 to 21 feet; 2-inch by 2-inch by ¼-inch angle by 20 to 21 feet; 3-inch by 3-inch by ½-inch angle by 18 to 20 feet.

2034. **Galvanized solid wire and barbed wire.**—Firm in Scotland are open to receive quotations for the following: 3 tons No. 8 galvanized solid wire; 3 tons No. 7 galvanized solid wire; 2 tons No. 8 galvanized solid wire; 4 tons galvanized barbed wire, four points 6 inches apart.

2035. **Mild steel bolts and nuts.**—Importers in Scotland are desirous of getting into touch with Canadian manufacturers of these in small sizes from ¼-inch thick up to ½-inch.

Catalogs and Booklets

UNIVERSAL VACUUM CLEANER

Landers, Frary & Clark, New Britain, Conn., have issued a booklet on "How to Use and Care for the Universal Vacuum Cleaner." Information and instruction is given on the care and use of the cleaner and includes voltage range, removing and cleaning the bag and brush, directions on oiling and how to attach hose, use of attachments for upholstery and furniture, draperies and curtains, mattresses and pillows, floor coverings and blower attachment. First aid instruction if cleaner fails to operate satisfactorily is also given and card is attached for purchaser to fill in and mail to factory, upon receipt of which guarantee is sent.

"THE KEY TO ZOURI."

The Consolidated Plate Glass Co. of Canada, Ltd., of Montreal, Toronto and Winnipeg, are distributors of a catalog entitled "The Key to Zouri."

The Zouri system of metal store front construction is fully described in this catalog, which shows the latest methods of installing and securing plate glass in store fronts and similar locations and reducing to a minimum the danger of breakage which often occurs through improper settings.

A few of the Zouri features includes: 1. A rigid gutter, no yielding and no distortion; 2. Indirect screw pressure; 3. Glass is set on adjustable blocks; 4. Sash is key-set, permitting delicate adjustment; 5. Face moulding absolutely smooth; 6. Durably constructed of solid copper.

The methods of adjusting division, corner and three-way bars is clearly shown by diagrams and in a brief review it is impossible to cover the many features other than to add that the catalog is well gotten up, fully illustrated, shows many designs of store fronts and a copy should be secured by architects and by all merchants who intend building or installing new or altering existing store fronts.

"BUFFALO" STANDARD PIPE COIL HEATERS

Catalog No. 460 of "Buffalo" Standard Pipe Coil Heaters, manufactured at Kitchener, Ont., by the Canadian Blower & Forge Co., Ltd., is just to hand. This catalog has been prepared with a view to making it useful to architects and engineers in figuring the heating requirements for fan heating and ventilating work.

The numerous tables to be found in the catalog have been elaborated to include all conditions usually met with in practice and to enable the user to read the values direct. For unusual conditions tables are added giving curves, illustrating values for various steam pressures and air velocities. With the aid of these, it is stated, any condition can be taken care of and a Buffalo Standard heater can be selected to meet any requirements. The different points of superiority claimed for the Buffalo heater are fully described.

The standard heater is made up of one-inch full weight steel pipe screwed into cast iron bases and each section of heater is given a hydrostatic test at 100 lbs. before leaving factory. The heaters are usually made up in the return bend pattern, but open area pattern can be furnished when desired.

The Vento cast iron heater, designed especially for low pressure work is also listed and tables, for this heater are given in full. The catalog is finely printed on high-grade paper and is perforated for use with filing system.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

PRONTO FIRE EXTINGUISHER

The Pronto Co., 171 Yonge Street, offer what is claimed as the first practical fire extinguisher at a reasonable price. The Pronto fire extinguisher has but five parts, no valves, levers, pumps or costly complications, nothing to operate or get out of order. It is installed in a "foolproof bracket, and all that is necessary when a fire starts is to pull it from its bracket and dash contents into the blaze, when a heavy non-inflammable

Pronto Fire Extinguisher

blanket is immediately formed, which is stated will put out fire.

Pronto, while new in Canada, is a development of one of the world's largest corporations. It retails here at $3.75.

THE F. F. ROTARY RECTIFIER

The France Mfg. Co., 1021-31 Berea Road, Cleveland, Ohio, are offering a new battery charging apparatus to be known as the F. F. Rotary Rectifier.

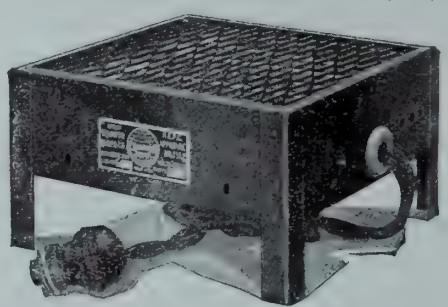
They claim that it combines all the good features of older forms of heavy charging apparatus with none of their inherent defects.

The alternating current passes through a revolving switch which causes negative and positive alternations to flow in the same direction, producing a full wave pulsating charging current.

It is said to be fully automatic and no danger is liable in night charging. The voltage and current regulator can be set at any desired value and raised or lowered gradually regardless of number of batteries being charged.

EQUATOR TOASTER STOVE NO. A9

The Equator toaster stove described as made by the Equator Manufacturing Co., of Hamilton, is of a different type to the upright style of toaster and can be also used for heating a kettle, fry-



Equator Toaster Stove

ing, etc. It is nickel-plated on steel, has exchangeable heating units and is fitted with plug and six feet of cord.

GLUE POT HEATER, NO. A10

The Equator Mfg. Co. are also making a glue pot heater, which should appeal to cabinet makers, carpenters, etc. It is strongly made of steel, finished in

Equator Glue Pot Heater

black, with a surface measurement of 6 by 6 inches, and has exchangeable heating units the same as their other goods.

NEVERBREAK FIRE SHOVELS

The Union Fork and Hoe Co., Columbus, Ohio, are offering a new line of fire shovels which they are marketing under the name of "Neverbreak" fire shovels and which are claimed to be both strong and light. They are said to be made of high grade material with handles that offer a good grip to the hand and have a correct curve.

HYRATE CADMO READER

The Service Station Supply Co., 30-32 Larned St., Detroit, Mich., are offering the trade a new invention under above title.

The Hyrate CADMO READER is a high grade voltmeter with combination handle and base, designed for many uses in connection with storage battery work. The principal uses are:

Voltage test of cells; cadium test, and polarity test.

A cadium test of a storage battery is the only method of determining which group of plates fails to give capacity

Hyrate Codmo Reader

or to become charged, and will locate defects.

The Hyrate Cadmo Reader is convenient to handle, and has two reading scales, one for cadium and one for voltage.

In its adaptability it is said to be much superior to other instruments upon the market, which sell for a higher price. The stationary spike, the supporting clip, as well as the flexible conductors, cadium and conductor contact points, are integral with the instrument itself, but can be easily renewed when necessary.

One striking advantage of the Hyrate Cadmo Reader over ordinary cadmium testers is its means of self-support while tests are being made, leaving the right hand free for recording readings or for other use.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE outstanding feature of hardware markets this week has been the reduction in prices of various cotton goods handled by the trade.

The lower prices are due to declines in raw cotton markets and have affected cotton rope, twines, sash and awning cords, lamp wicks, etc. Some grades of cotton waste are also lower.

A smaller reduction has been made in prices of manila rope and sisal.

Linseed oil and turpentine show another decline again this week.

Against the reduction noted, goods manufactured from iron and steel show a tendency towards higher prices and hammers and sledges are advanced in price. Farm and lawn fencing and gates, and netting also show higher prices and among other goods costing more are fence staples, snare and stove pipe wire, and some lines of wrenches. Wrapping paper has again advanced in price, reaching a high level.

The market is easier in some metals and lead shows a decline.

Prospects look better in bar iron and steel and in black and galvanized sheets for future deliveries, but present stocks are extremely low. Shortage due to lack of raw materials is still very acute on stoves and stove pipes, and manufacturers cannot keep pace with the demand.

The coming of cooler weather has caused a revival of business in town and country trade and seasonable goods are in large demand.

MONTREAL MARKETS

MONTREAL, October 7.—One of the noticeable features of the market this week is that of a decline on quite a number of goods. These lower prices apply, however, on goods others than those made of iron and steel. Notable among the reduced items are those of cotton rope and twines, sash cord, candle and lamp wick, wrapping twines, etc. This easing tendency was forecast last week in Hardware and Metal and there may be lower prices on some of these lines than those now prevailing. Razor strops are freer, and the better grades of these, some think, may be marked lower. Pure manila and sisal rope are marked lower, this resulting from outside competition, for the most part. Old materials and ingot metals are also softer, and some are reduced.

There has been a firming, on the other hand, of a number of lines more akin to the steel and iron lists. Hammers of various kinds, shoe lasts, hog rings, etc., are revised upward. Lubricating oils and wax candles, etc., are higher owing to increased freight rates. Wrapping paper is again higher this week. O'Cedar polishes and mops are marked higher. The "extras" on refined iron are higher, and are uncertain owing to scarcity.

While there is a quieter condition on some lines, orders from the country are satisfactorily frequent to meet the jobbers' wishes.

Heating Stove Trade Now Very Active

Montreal.

HEATING STOVES.—These are very short at the present time and a large Montreal manufacturer stated to Hardware and Metal this week that there will be an increasing shortage when the cold weather approaches. Shipments have been going forward to the trade very actively for some time but it is now apparent that there will be a real shortage this fall and orders are being turned down at the present time.

Fall Stove Trade Good; Firm Markets

Montreal.

STOVES AND RANGES.—The movement of cooking stoves and ranges at the present time is quite active and prices are very firm although there have been no actual advances. Manufacturers claim that they are working very close to production cost, and that with pig-iron high and coke scarce and high in price, together with maintained high labor costs, they are working on a very close and narrow margin.

Active Trade Now For Stamped Wares

Montreal.

STAMPED WARE.—A very active demand exists for stamped ware of various kinds, including enameled ware, tin ware and other lines of similar manufacture. The supplies are not abnormal but the trade is receiving fairly prompt delivery of requirements.

Stove Pipe Scarcity Seems Inevitable

Montreal.

STOVE PIPES.—While Canada plates are expected to be freer next year than they are at the present time, there seems little hope for a replenishment of stock this fall. The basis is very firm and a nominal price condition prevails in view of the scarcity.

Various Hammers Cost More Money

Montreal.

SUNDRY HAMMERS.—Among the hammer prices advanced this week are those of sledge and stone. Sledge hammers Nos. 45, 46 and 47 are selling at $20 per 100 lbs., Nos. 67 and 68 at $26, while stone hammers No. 48 are being quoted at $20 per 100 lbs. Striking hammers No. 6 from 3 to 5 lbs. are selling at $25; 5½ lbs., $20.

Hammer Prices Are Marked Higher

Montreal.

RIVETING HAMMERS.—In accordance with the general advance made on hammers this week various numbers of riveting hammers have been marked up. Among these are the following: 15G, per dozen, $11.75; 15F, $12; 15E, $12.55; 15D, $13.25; 15C, $14; 15B, $15.

Aluminum Ware Steady and Active

Montreal.

ALUMINUM WARE.—Retailers, jobbers and manufacturers all report an active condition as regards the sale of these products. The line has come to stay and appears to be making great headway. Prices are steadily maintained, and in view of the fact that manufacturers have no more than overtaken some of their long-outstanding orders it is doubtful if lower prices will prevail in the near future.

Automobile Accessories Are on Steady Basis

Montreal.

AUTO ACCESSORIES.—Prices on auto accessories have been maintained without change. There is a fairly good demand for them, and in view of the high cost of manufacture, any changes in the way of a decline will very probably be very gradual, and may be deferred for some time.

Chain Market Steady; Sales Fairly Active

Montreal.

CHAIN.—The market is firm at the recent advances and demand is fairly active at the present time. Doubtless the present basis will continue for some weeks at least.

Wheelbarrows May Be More Available

Montreal.

WHEEL BARROWS.—Manufacturers of steel wheelbarrows have obtained relief within the past few weeks. This has come about through the release of certain steel sheets used by automobile manufacturers and which may be used for the various grades of wheel barrow trays. It is expected that deliveries will improve from now on, although there has been no reduction of prices yet.

Shaving Brushes Promise to Come

Montreal.

SHAVING BRUSHES.—The present outlook is much more favorable than it has been for many months, particularly on high-grade brushes. Hardware and Metal is informed that supplies of bristles are finding their way out of Russia at the present time, and while improvements along this line will unquestionably be slow, it will be very welcome to brush manufacturers and to the trade in general. Prices still remain high and supplies are freer than they were two or three months ago.

Active Sales Made of All Flashlights

Montreal.

FLASHLIGHTS.—The demand for flashlights continues active and jobbers are very well pleased with the volume of business coming to them this fall. In view of the high cost of labor, there is no promise of an early decline in the price of various cases, but it is not indicated on the other hand that there will be any further increase of price.

Better Razor Strops May Now Be Had

Montreal.

RAZOR STROPS.—In view of the more favorable accumulation of various grades of leather, supplies of razor strops, and particularly those of higher grade, are more readily available. Prices are unchanged at the moment but the condition is becoming more favorable from day to day and an early decline for some lines which have reached abnormal figures will not come as a surprise.

Polishes and Oil Mops Are Marked Up

Montreal.

OIL POLISHES. — Hardware and Metal reported recently that higher prices were probable on O-Cedar Oil and O-Cedar Mop. This advance has now transpired and the following prices are being quoted on Oil: 4 oz. bottles, per dozen, $2.40; 12 oz., $4.80; 1 qt., $12; ½ gal., $20, and 1 gal., $28. O-Cedar Mop with handles are advanced to $18 per dozen.

Wrapping Twines and Wick Lower

Montreal.

TWINES, WICK.—In accordance with the general decline this week in cotton goods, both wrapping twine and other grades made of cotton are reduced but the reductions are not uniform. The same applies to candle wick and lamp wick.

Nail Hammers Move Upward

Montreal.

NAIL HAMMERS.—An advance has been made in the price of various nail hammers and No. 1A are now selling at $19 per dozen; No. 1B, $18.75; No. 1C, $18.50; No. 2A, $18.75, and 2B, $18.50 per dozen.

Machinists' Hammers Take on Higher Prices

Montreal.

MACHINISTS' HAMMERS.—An advance has been recorded in the price of machinists' unhandled hammers and the prices are as follows: ½ lb., $1.75; ¾ lb., $1.15; 1 lb., 80c; 1¼ lb., 70c; and higher than 1¼ lb., 70c; all prices being per lb. Handled hammers of the same variety are selling as follows: ¾ lb., $14; 1 lb., $14; 1¼ lb., $15; and 1½ lb., $16 per dozen; 1¾ lb., $17.25; 2 lb., $18.50; 2½ lb., $20.25; 2¾ lb., $20.75; and 3 lb., $24.25 per dozen.

Snare and Pipe Wire High and Scarce

Montreal.

WIRE PRODUCTS.—As already outlined in Hardware and Metal there is a greater demand for the average wire product than can be supplied. This is particularly true at the present time as regards stove pipe wire and snare wire, both of which are scarce and high in price.

Wire Hog Rings Will Cost More

Montreal.

HOG RINGS.—An advance has been made in the price of wire hog rings which are now selling at 95c per 1,000. This is due to the scarcity of wire products generally and the undertone is firm.

Shoe Last Prices Take Upward Trend

Montreal.

LASTS.—An advance has been recorded this week in the price of lasts and fans. The regular japanned-filet variety is now selling at $7.80 per dozen.

Another Advance For Wrapping Paper

Montreal.

WRAPPING PAPER.—It is only last week that an advance was reported in the price of kraft wrapping paper. The price has again advanced 50c per 100 lbs. The quotation now is 16c.

Lower Prices Prevail on All Awning Cords

Montreal.

AWNING CORD.—An easier undertone is manifest in this market and prices have dropped off considerably. These are as follows: Drab, No. 3½, per dozen, $2.90; No. 4, $6.30; No. 4½, $8.50; for white in the corresponding sizes the prices are $2.60, $5.25, and $7.35 per dozen, respectively.

Candle Wick Down to Eighty Cents

Montreal.

CANDLE WICK.—Candle wick has been marked lower this week following the lower price basis for raw cotton materials and is now quoted at 80c a lb.

Cotton Clothes Lines Take on Lower Prices

Montreal.

CLOTHES LINES.—Following the general decline in the prices of various

cotton goods this week, cotton clothes lines are down and are selling as follows: 30 ft., per doz., $2.80; 40 ft., $3.40; 48 ft., $4.20.

Cotton Rope Down; New Prices Quoted

Montreal.

COTTON ROPE.—Following the softness in the undertone of the cotton market a decline has been registered this week in the price of cotton rope. The present prices are: 3-16 in., per lb., 76c; ¼ in. and larger, 75c.

Reduction Made on Sash Cord

Montreal.

SASH CORD.—A decline of considerable importance is registered this week in the price of regular sash cord. No. 6 is now quoted at 95c per lb.; No. 7, 94c, and Nos. 8 to 10, 93c. This is the first decline in this product for several years and is a welcome sign.

Fencing Prices Are Marked Higher

Montreal.

FENCING, GATES, etc.—Prices on Dominion fencing have been revised upward. The increase is not stated, but new lists, effective from mid-September, are now being issued to the trade. The new list covers field fencing, gates, poultry fencing, lawn fence and steel fence posts.

Higher Extras on Refined Iron Basis

Montreal.

IRON AND STEEL.—While there has been no change in the basis on iron and steel, the "extras" on refined iron are revised upward. Jobbers state that the mills are unable to state definitely what the extras will be from day to day, but they average around $1.50 per 100 lbs. just now. It is impossible, therefore, to state what the additional charge will be in individual cases over the base quotation.

IRON AND STEEL

Common bar iron, 10 0lbs.	5 15
Refinish iron	6 15
Iron finish machinery steel	5 25
Mild steel	5 30
Band steel	5 50
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	5 20
Tire steel	5 50
Toe calk steel	6 20
Harrow Tooth Steel	5 45
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

Freight Rate Affects Selling Price Candles

Montreal.

CANDLES.—Various wax candles and other wax products were advanced last week. This resulted from the advance in freight rates, and the average increase of one-fifth of a cent per pound.

Freight Increase Boosts Lubricants

Montreal.

LUBRICATING OILS.—Owing to the freight increases, lubricating oils have been advanced to cover this, to the extent of 1.60 cents per gallon. This will be added to the current quotations on the various grades of oil, and greases will doubtless be affected in a similar way and to a like extent.

Oil and Gasoline Holding Without Change

Montreal.

OIL, GASOLINE.—There has been a steady market for gasoline and coal oil and the basis remains unchanged. Demands have pretty well absorbed stocks as they came to hand but there is no real shortage. Coal oil is selling at 31c per gallon up, and gasoline at 43½c per gallon, motor grade.

Stove Boards and Hods Very Active

Montreal.

STOVE BOARDS, COAL HODS.—Prices are firm on stove boards and mats and on coal hods. These are in very active demand at the present time and there has been every indication of a record fall trade. The supplies of the makers are fully taxed, but thus far there has been ample stock to meet the requirements. Tinplate for making the boards and sheets for the hods have both been obtained, but in some cases the difficulties have been accentuated.

Range Boiler Basis Holds Steadily Firm

Montreal.

RANGE BOILERS.—Prices are firm and steady on range boilers and there is little probability of early change. The makers were able to supply themselves with their needs early in the season and while there has been active sale for them the season will finish with enough stock to see the trade through, in the opinion of manufacturers. Standard 30-gallon size is selling still at $15 and the extra heavy at $18.

Some Grades Rope Reduced Two Cents

Montreal.

ROPE AND CORDAGE.—A reduction of two cents a pound on pure manila and on other grades of manila rope has been effected this week. Sisal has been reduced one cent. This is due, primarily, to competition from without, and various grades of cordage have been offered from sellers overseas. A rather quiet condition of trading has also obtained of late, and it is expected that the reduction of price will have the effect of stimulating demand. Prices now are: Pure manila, per lb., base, 33½c; Beaver and New Zealand, 26c; sisal and lathyarn, 21½c.

Galvanized Sheets Promise to Improve

Montreal.

SHEETS AND PLATES.—The movement of galvanized sheets to the trade is well maintained, and still there is a big shortage of many gauges. Supplies promise to come from the English market soon, and while this improvement will necessarily be a gradual one, there is much encouragement in sight. As supplies come forward there is likelihood of prices declining to an extent, but this may be deferred for some weeks yet. Meanwhile there has been a continued nominal price situation.

BLACK SHEETS—		
10 gauge	....	10 95
12 gauge	....	11 00
14 gauge	....	11 05
16 gauge	....	11 15

24 gauge	12 65	12 35
22 gauge	12 30	11 90
18 and 20 gauge	11 60	11 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Old Metals Sagging; Market May Improve

Montreal.

OLD MATERIAL.—Prices are on the down grade on a number of old metals and this is due to a quiet condition as regards demand from the mills. Many lines are marked down this week, such as copper, brass, lead, auto tires, etc. It is hoped that the steel and iron foundries will be opening a little later, in which case there ought to be an improvement on iron scrap material.

DEALER'S BUYING PRICES

Automobile tires	....	0 01

Lead Products Easy; May Move Downward

Montreal.

LEAD PRODUCTS.—Prices are easing on various lead products and this is due to the easing off on pig lead. There is every hope that lead pipe will be reduced, and this will perhaps develop in the not distant future, following the

lower prices quoted last week on sheet lead.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%

General Weak Market on the Ingot List

Montreal.

INGOT METALS.—Prices have eased off on nearly all ingot metals during the past week. There has been a dearth of orders, generally, and this may not improve for another week or two.

COPPER.—New York markets are weaker and there is a tendency to place upon the market large quantities of copper bands, a war product of which there are many hundreds of tons for disposal, and which naturally are strong competition for virgin ingots. The price here of electrolytic is 23¼c and casting is quoted at 22c per pound.

TIN.—This is fairly steady and is quoted at 53c. There is but a small demand.

LEAD.—This is still softer and the bottom does not seem to have been reached although the metal is not easily defined. A price of 8¾c is quoted.

SPELTER.—Belgian and English spelter have been arriving more freely and are thus competing with the Canadian product. Price, 9½c per lb.

ANTIMONY.—This is very uninteresting and quite dead. It is quoted at 8¾c.

ALUMINUM. — This is somewhat steadier. Advices from some large factors are to the effect that the market will hold steadily, there being a good demand in a large sense, from manufacturers for the virgin ingots.

TORONTO MARKETS

TORONTO, Oct. 7.—The special feature of the week has been the reduction in prices of cotton goods, though at present it is mainly confined to cordage, twines and clothes lines in hardware goods.

A new list of "extras" on cut nails is in effect with higher prices especially on smaller sizes, base remaining unchanged.

Other articles that have advanced in price are netting staples, grindstone fixtures and Westcott wrenches. Cotton waste prices have been revised. Wrapping papers are also higher in price.

There is very little sign of any improvement in supplies of goods which have been reported from week to week lately as being scarce, and pipe and fittings, black and galvanized sheets, Canada plate and bar iron and steel are unanimously said to be just as hard to obtain and with stocks in most cases at an unprecedented low state. Promises of better shipments from the mills across the line are reported, and the strikes in the Montreal district have been settled and operations resumed, so that better deliveries from now on may probably be looked for.

Business in some lines appears to have quickened up a little, and the cooler spell helped the demand for seasonable goods.

Collections remain good.

Iron and Steel Unchanged; Shipments Still Slow

Toronto.

IRON AND STEEL. — The expected improvement in shipments of bar iron and steel from the mills, which was recently looked for, has not yet materialized, and deliveries are still very slow. With the strikes in the Montreal area settled and the resumption of operations in the mills there, it is expected that it will afford some relief to local markets within the next month or so.

Prices remain firm, but are unchanged as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	5 85
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 25
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	6 00
Hoop steel	7 50

Stove Demand Exceeding the Supply

Toronto.

STOVES AND RANGES. — No improvement is noted in the shortage of stove materials. Manufacturers report great difficulty in obtaining sufficient supplies to keep plants operating at even reduced capacity, and the result has been that the supply has not been equal to the demand.

Little expectation of any lower prices on stoves for this season appears the feeling of the trade.

Deliveries of Sheets Still Very Slow

Toronto.

SHEETS. — The situation with regard to black and galvanized sheets is very little different. The prospect for future deliveries looks somewhat brighter as there are promises of cars, but present stocks are very small, and as one jobber remarked to a representative of Hardware and Metal, "the galvanized sheet situation could hardly be worse; the market is absolutely bare of light gauges."

Prices are still nominal and the trade sees no prospect of lower prices though the belief is expressed that it is possible that they may not go any higher at present.

Transportation is still a difficulty, though labor is said to have been the main trouble and drawback during the past year.

Ordinary quotations are given under.

BLACK SHEETS

14 gauge	$10 15
16 gauge	10 25
18-20 gauge	10 70
22-24 gauge	10 75
26 gauge	10 80
28 gauge	10 50
3-16 inch plate	7 00
¼-inch boiler plate	6 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier	Apollo
10¾ oz.	$12 50	$13 25
U.S. 28	12 70	12 85
U.S. 26	12 40	12 55
22 and 24	12 25	12 40
18 and 20	11 95	12 10
16	11 95	12 10
12 and 14	11 20	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Declines in Prices of Cotton Cordage

Toronto.

COTTON CORDAGE. — Lower prices are in effect on cotton rope, due to the decline in cotton markets. The reduction is a considerable one, ranging from 15 to 25 cents per pound, and new quotations on ¼-inch size and larger are from 68 to 74 cents per pound, with usual extras for smaller sizes.

Leather Tap Soles in Good Demand

Toronto.

TAP SOLES. — The demand for leather soles and heels continues very good. Prices remain firm, there being

no change since a month ago, and any further declines are not expected.

Leather Belting is Unchanged

Toronto.

LEATHER BELTING.—Manufacturers of leather belting state that business is very good, the season having seen a big demand for these goods. Only the best grade of leather can be used for this purpose, and stocks are not very large.

Discounts are unchanged, and are as per current market pages.

Canada Plate "Almost Off Market"

Toronto.

CANADA PLATE. — Stocks of this article appear to be non-existent, and it is practically unobtainable. As showing the state of the market one jobber instanced a box being quoted at $24.50. Whether price was intended to freeze out enquiries was not known, but no improvement of conditions appears to be in sight.

Stove Pipe Elbows Are Very Scarce

Toronto.

STOVE-PIPE ELBOWS. — There is an extra large demand for these articles at the present time and dealers are finding it very difficult to fill orders. Stocks are very low and material very scarce.

Prices are unchanged at 66 2-3 per cent. above list.

Wrought and Steel Pipe Scarce and Unchanged

Toronto.

PIPE. — The scarcity in black and galvanized wrought pipe is still very pronounced and no improvement is reported. Prices are unchanged as follows:

LIST NO. 46

Boat and Dory Nails — Packed in 25-lb. boxes. Can also be supplied in 100-lb. kegs, but 25-lb. boxes only carried in stock.

Sash Cord Reduced Approximately 15%

Toronto.

SASH CORD. — Following the lower prices on all cotton commodities, sash cord has dropped in price approximately 15 per cent. Quotations are: Hercules, No. 6, 95 cents per pound; No. 7, 94 cents per pound; Nos. 8, 9, 10, 12, 93 cents per pound.

Reduced Prices on Cotton Twines

Toronto.

COTTON TWINES. — A reduction of 15 cents per pound has been made on cotton wrapping twines.

The 3-ply in 5 pound cotton bags are now quoted at 80 cents per pound, and the cones at 75 cents, and the 4-ply on cones at 82 cents per pound.

Wrapping Papers Higher in Price

Toronto.

WRAPPING PAPER. — A higher price is being quoted on Kraft, which now sells at $15.50 per 100 pounds.

There appears to be no sign of any likelihood of lower prices on this commodity for a while. Supplies are none too plentiful, and mills are only accepting orders at price ruling at time of shipment, and with the amount of business in hand new orders cannot be placed for delivery within from four to six months' time.

New Extras List on Cut Nails

Toronto.

CUT NAILS. — A new extras list on

cut nails is in effect. The base remains the same.

List is reproduced on page 55 of this issue.

The base price F.O.B. Toronto remains at $7.35.

Valves and Bibbs Prices Firm and Unchanged

Toronto.

BIBBS AND VALVES. — A fair demand is being experienced for these goods and stocks of most lines are said to be sufficient. No changes in lists or discounts have been made and prices on principal lines are as below:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C.	Net
Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%
Radiator valves, standard	23%

No Improvement in Fitting Supplies

Toronto.

PIPE FITTINGS. — No changes have taken place in prices and fittings, especially malleables, are still very scarce and hard to get. Quotations are as follows:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2-in.	8%
Do., 2½-in. and larger	5%
Nipples, up to 4-in.	50%
Do., 4½-in. and larger	40%
Do., running thread, 4-in. and under	20%
Couplings, 4-in. and under	20%
Couplings, 4½-in and larger	Net list

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Lower Quotations on Awning Cords

Toronto.

AWNING CORD. — New lower prices are quoted on awning cord, due to lower cotton prices. New quotations are as follows:

Awning Cord—No. 3½, White, $2.40 per doz.; No. 4, $5.10; No. 4½, $6.95; No. 3½, Drab, $2.70; No. 4, $5.90; No. 4½, $8.00.

New Higher Prices on Netting Staples

Toronto.

POULTRY NETTING STAPLES. — New higher prices are out on poultry netting staples, and the ¾-inch, ⅞-inch and 1-inch, are now quoted at $10 per keg of 100 pounds.

Cotton Clothes Lines Reduced in Price

Toronto.

COTTON CLOTHES LINES. — A reduction has been made in the price of cotton clothes lines, and the following are quotations on these lines: 40 foot lengths, $3.20 per doz.; 48 foot lengths, $3.85 per doz.; 60 foot lengths, $4.80 per doz.

Grindstone Fixtures Revised in Price

Toronto.

GRINDSTONE FIXTURES. — A revision has been made in the price of grindstone fixtures, and 15-inch now sell at $10.80 per doz., and 17-inch size at $11.40.

New Prices on Westcott Wrenches

Toronto.

WESTCOTT WRENCHES. — This make of wrench has been revised in price, and present quotations are the following:

6 in., $10.50 per doz.; 8 in., $13; 10 in., $18.50; 12 in., $21.50.

Mop Handles Advanced in Price

Toronto.

O-CEDAR MOP HANDLES. — In quoting the new prices on O-Cedar mops and polishes last week the price on extra handles was omitted. These now cost $2.40 per doz. net.

No Changes on Gasoline or Oil

Toronto.

GASOLINE AND COAL OIL. — No change is reported on either coal oil or gasoline. The demand keeps heavy for both and Royalite grade is quoted at 29½ cents per gallon, Toronto, and gasoline at 42 cents.

Rope Prices Show a Decline

Toronto.

ROPE.—A reduction in rope prices took place this week, and pure manila shows a reduction of 2 cents per pound and beaver manila and New Zealand hemp 1 cent. Lath yarns are also reduced 1 cent. per pound. Following are new quotations:

Pure Manila, basis	....	0 33½
Beaver Manila, base	....	0 26
New Zealand hemp, base	....	0 26
Sisal, base	....	0 21½
Single lath yarn	....	0 21½
Double Lath Yarn	....	0 22

Tarred Felts and Sheathings Selling Well

Toronto.

TARRED FELTS.—A big demand is being experienced for roofing materials, tarred felts and sheathings. Prices rule firm and quotations on the "Elephant" brand are as under:

Elephant Brand, tarred paper, per roll	1 70
Do., dry sheathing, per roll	1 50
Do., tarred felt, 7, 10 and 16 oz., cwt.	6 00
Do., roofing cement, per doz. cans	9 00

Cotton Waste; Some Prices Lower

Toronto.

COTTON WASTE. — Reductions amounting to 1 cent per pound have been made on some lines of cotton waste though revisions have not been general. The present decline appears to be due more to increased stocks than to a falling cotton market as jobbers state that the threads used in the manufacture are no cheaper. The demand is said to be good and prices are expected to remain near present quotations.

Lead and Zinc Products Show Easier Tendencies

Toronto.

LEAD AND ZINC PRODUCTS.—While no actual changes in price of lead products is reported there is an easier tone in the markets and some reductions are possible in view of price declines in pig lead. Quotations vary on solders. Business is fair without being heavy. Prices on principal lines are as follows:

Lead pipe, list, per lb.	....	0 17
Lead waste pipe, list, per lb.	....	0 18

Waste Materials Market Weak

Toronto.

WASTE MATERIALS.—The market in waste materials has been weak with very little trading. Both scrap iron and steel, with yellow metals have been quiet and prices are unchanged as follows:

WASTE MATERIAL

Io. 2 busheling	$13 00
Stove plate, pe rton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06

Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Heavy lead pipe	0 05¾
Tea lead	0 03
Automobile tires	0 02½

Ingot Metals Quiet; Practically Unchanged

Toronto.

INGOT METALS.—A relatively quiet market is noted with very little change in quotations. Lower tendencies are reported from outside markets.

TIN.—The demand for tin has been dull with smaller volume of business. On outside markets it dropped to the lowest level reached since January 1917. Prevailing quotations are 53 to 55 cents.

COPPER.—An easier tone in copper but with no increase of activity is the state of U.S. markets. Locally copper has been dull anl unchanged, with 24 cents asked for casting ingots.

LEAD.—While lead has been rather dull an easier tendency is reported, foreign markets being decidedly lower. Local quotations are around 9¼ cents per pound.

SPELTER.—A improved demand is recorded for spelter with markets steady. Present quotations of 10¼ cents are unchanged.

ANTIMONY.—This has been inactive with absence of demand and prices range from 10 to 14 cents.

ALUMINUM. — Inquiries for this metal have been small with market dull and unchanged at 37 to 39 cents per pound.

LONDON MARKETS

LONDON, Ont., Oct. 7.—Prices continue very firm, with the exception of cotton goods such as sash cord, cotton rope, clothes lines and cotton wrapping twines which have declined in price about ten per cent.

Linseed oil and turpentine also show a further reduction in quotations.

Cut nails have a new extra list, and are higher, especially the smaller sizes.

Plaster of Paris and weather stripping are also quoted higher.

Business in this district has been excellent this past week. The cooler weather has speeded up the sale of many fall lines and stoves, stove boards, ash sifters, stove pipes and elbows are all in good demand.

Collections continue very good.

Wire Nails Scarce, With Price Unchanged

London, Ont.

WIRE NAILS.—No change is announced in the base price of wire nails which is still $6.25, but there is yet a shortage in stocks, especially among the smaller sizes.

New List of "Extras" on Cut Nails

London, Ont.

CUT NAILS.—A big advance on the extras over base on cut nails has been made, and the smaller sizes take the largest increases. The new list is printed in another column. (See page 55.) The base price is $7.50.

Linseed Oil Prices Drop Five Cents

London, Ont.

LINSEED OIL.—Paint oil has declined five cents per gallon this week and present quotations are the following:

Linseed Oil—	Raw	Boiled
1 to 2 barrels, gal.	1 62	1 65
3 to 5 barrels, gal.	1 61	1 64
6 to 9 barrels, gal.	1 59	1 62

Less barrels add 15c. per gal.

Ten Cents Reduction in Turpentine Prices

London, Ont.

TURPENTINE.—Lower prices are reported on turpentine, which is down ten cents per gallon since last week. The demand is not very large just now. Latest quotations are as under:

Turpentine—	Per Imp. Gal.
1 barrel lots	2 30
2 to 4 barrels	2 29
5 gal. lots	2 45

Window Glass Sales Quicken

London, Ont.

WINDOW GLASS.—Good sales are reported on window glass here, with the prices unchanged. The cooler weather is said to be responsible for an increased demand.

Plaster Paris Quoted Higher

London, Ont.

PLASTER PARIS.—A new and higher price is quoted on plaster paris and the Hammer brand is now selling at $5.25 per barrel.

Builders' Hardware Demand Continues Good

London, Ont.

BUILDERS' HARDWARE. — Prices continue very firm on builders' hardware for which there is a good steady demand at the present time.

Putty Sales Better; Prices Unchanged

London, Ont.

PUTTY.—Prices on putty are unchanged and the demand is seasonable. Present quotations are the following:

Putty—Standard—100-lb. drums, $8.30 per 100 lbs.; 25-lb. drums, $8.55. Pure—100-lb. drums, $10.80; 25-lb. drums, $11.05.

Seasonable Sales on White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—There is a good seasonable sale at the present time for white lead in oil. Prices are unchanged as follows:

	Tons	Less tons.
Pure	$20 45	$20 90
Elephant	20 95	21 30

Sash Cord Cheaper By Fifteen Cents

London, Ont.

SASH CORD.—New prices are in effect on sash cord, which shows a drop of about 15 cents per pound. New quotations are: No. 6, 95c per lb.; No. 7, 94c per lb.; Nos. 8 to 12, 93c per lb.

Demand For Sash Weights; Latest Prices

London, Ont.

SASH WEIGHTS.—These goods have been in good demand lately and present prices are for solid $5.40; for 1 lb. sectional $6, and ½ lb. $6.60 per 100 lbs.

Mortar Stains Moving Well

London, Ont.

MORTAR STAIN.—The sales of mortar stains have been very good this season. It is selling as follows: Red, $2 per 100 lbs.; black, $3.80 per 100 lbs.

Higher Prices For Frost King Weatherstrip

London, Ont.

WEATHER STRIP—The "Frost King" make of weather strip is priced higher this season. It is moving well at the present time. New prices are $5.75 per dozen packages.

O'Cedar Goods Advanced Fifteen Per Cent.

London, Ont.

O'CEDAR GOODS. — O'Cedar mops and polishes have taken an advance of approximately 15 per cent. New prices are as below:

Mops—Nos. 1, 3, 5, and 14, with handles, $16 doz.; less handles, $14 doz.

Polish—4 oz. bottles, $2.40 doz.; 12 oz. bottles, $4.80 doz.; quart cans, $12 doz.; ½ gal. cans, $20 doz.; 1 gal., $28 doz.

Irwin Auger Bits; Stocks Now Available

London, Ont.

IRWIN AUGER BITS.—This make of auger bit has been short for a considerable part of the season but stocks are now coming in better and price remains at list plus 20 per cent.

Washers and Wringers Moving Well

London, Ont.

WASHERS AND WRINGERS.—At

the present time there is a very good movement of washing machines and wringers. There is no change in prices and 20 per cent. is quoted off list. Electric washing machines are also enjoying a good demand and the list price on the New Century is $160 and Seafoam $128, both less 60 per cent.

Electric Goods Having Ready Sale

London, Ont.

ELECTRIC GOODS.—The demand for electric goods has been very good indeed and electric heaters are especially meeting with a ready sale at the present time. Quotations on some of the lines are as follows:

Majestic Heaters—No. 7, one coil, $11,50 each, list; No. 8, two coils, $17.50 each, list.

Canadian Beauty—Electric Iron, $8 list; Toaster, $8 list; Grill, No. 402, $14 list. Less 27½%.

Game Trap Quotations; Demand Is Good

London, Ont.

GAME TRAPS.—With the high prices paid for furs and the unprecedented demand last season for traps there is good reason to expect another large demand for these goods. The sales already are large. Prices are firm as follows:

Victor—No. 0, with chain, $2.20 doz.; No. 1, with chain, $2.65; No. 1½, with chain, $4; No. 2, with chain, $5.50; No. 3, with chain, $9.35; No. 4, with chain, $11.25.

O'Neida Jump—No. 0, with chain, $3 doz.; No. 1, with chain, $3.50; No. 1½, wit hchain, $5.25; No. 2, with chain, $8.40.

Newhouse—No. 1, with chain, $7.50 doz.; No. 1½, with chain, $11.35; No. 2, with chain, $16.75; No. 3, $22.35; No. 4, $26.35.

Snow Shovels Moving; Latest Prices

London, Ont.

SNOW SHOVELS. — Manufacturers and jobbers are shipping out snow shovels and prices are higher than last season. Present quotations are as under:

Prince, or No. 20, $11.25 doz.; Queen, or No. 30, $12.50; King, or No. 40, $15; Moose, or No. 50, $18.75; Light Japd., $4.90.

Furnace Scoops—Light Socket, $10 doz.; Heavy, $12.50.

Stove Boards Selling Well

London, Ont.

STOVE BOARDS.—The cold snap quickened up the enquiries for stove boards and sales have been good during the week. The wood lined is quoted at list plus 10 per cent.

WINNIPEG MARKETS

WINNIPEG, Oct. 7.—Some important price changes are recorded this week, of which some are higher and a few lower. Linseed oil has dropped 27 cents per gallon. Wrought iron pipe has again been advanced on account of the higher freight rates. Other lines such as wrought iron washers, annealed and bright wire have also been advanced on account of higher freight rates. The base price on iron and steel rounds and squares of the small sizes has been advanced considerably. Boat spikes and railroad spikes are higher in price this week, also another advance has been made this week on Columbia and Hot-shot batteries. A number of line of builders' hardware have been increased in price, also several items of sporting goods and cutlery are advanced in price.

There seems to be a general feeling that prices have reached their highest, but as yet there is no indication of a downward tendency. It may be true of other commodities but not with hardware. There is no doubt that the mills are short of raw material and that it is very difficult to get it, and this condtion prevailing, together with higher freight rates, it looks as if it will be some time yet before any decline takes place in prices.

Collections continue good.

Higher Prices on Wrought Iron Pipe

Winnipeg.

PIPE.—All the prices on wrought iron pipe have been advanced this week due to the increased freight rates. The following are the prices now quoted:

	Black	Galv.
⅛ in.	6 21	8 69
¼ in.	5 94	8 28
⅜ in.	6 12	8 46
½ in.	8 24	9 95
¾ in.	10 22	12 51
1 in.	15 08	18 50
1¼ in.	20 43	25 02
1½ in.	24 48	29 93
2 in.	32 94	40 28
2½ in.	53 33	65 39
3 in.	70 07	86 40
3½ in.	88 20	107 10
4 in.	104 40	126 90
4½ in.	124 20	152 10
5 in.	144 90	177 30
6 in.	188 10	229 50

Wrought Iron Washers Advanced in Price

Winnipeg.

WASHERS.—The prices on wrought iron washers have been advanced this week due largely to increased freight rates. They are also very scarce. The following prices are quoted:

	Case lots.	Less than Case lots.
3-16 in.	22 50	23 00
¼ in.	19 80	20 30
5-16 in.	18 60	19 10
⅜ in.	17 25	17 75
7-16 in.	16 20	16 70
½ in.	15 60	16 10
9-16 in.	15 45	15 95
⅝ in.	15 30	15 80
¾ in.	15 15	15 65
⅞ in.	15 00	15 50
1 in.	15 00	15 50
1⅛ in.	15 00	15 50
1¼ in.	15 30	15 80
1⅜ in.	15 30	15 80
1 7-16 in.	15 30	15 80
1½ in.	15 30	15 80

Higher Prices on Annealed Wire

Winnipeg.

ANNEALED WIRE.—Higher prices are quoted on annealed wire this week. It is hard to procure, factories cannot get supplies of raw materials and increased freight rates are also affecting the market. Present quotations are:

Annealed—Nos. 0 to 9, $7.60 per 100 lbs.; No. 10, $7,66; No. 11, $7.72; No. 12, $7.80; No. 13, $7.90; No. 14, $8; No. 15, $8.15; No. 16, $8.30.

Bright Wire Scarce; Prices Somewhat Higher

Winnipeg.

BRIGHT WIRE.—There is a scarcity of bright market wire and prices have been advanced this week due to manufacturers not being able to procure sufficient raw material and to the fact that the steel rods are costing more and also higher freight rates are having an effect on the prices. The following are this week's quotations:

Bright Market—Nos. 0 to 9, $7.85 per 100 lbs.; No. 10, $7.91; No. 11, $7.97; No. 12, $8.05; No. 13, $8.15; No. 14, $8.25; No. 15, $8.40; No. 16, $8.55.

Columbia Batteries Again Advanced in Price

Winnipeg.

BATTERIES.—On account of higher freight rates Columbia batteries are costing more money and are quoted as follows:

Columbia Batteries—No. 6, bbl. lots, $48.50 per 100; lots of 50 or less than 125, $53; lots of 12 or less than 50, $56; lots of 6 or less than 12, $61.

Hot Shot and Multiples Are Costing More

Winnipeg.

HOT SHOT AND MULTIPLE BATTERIES.—Another increase in prices has taken place on battery sets and following are new prices on these ignition sets, due to higher freight rates:

Hot Shot Batteries—No. 1461, $2.32 each; No. 1462, $2.32; No. 1561, $2.85; No. 1562, $2.85; No. 1662, 45c.

Multiple Batteries—No. 266, $6.97 each; No. 356, $9.21.

Another Advance in Price of Cow Chains

Winnipeg.

COW CHAINS. — Cow chains are scarce and the price has been advanced, due in part to that and to higher freight

rates. The following prices are now in effect:

Cow Chains—Electric Weld: 4/0, \$6.60; 3/0, \$5.25; 2/0, \$4.80; 1/0, \$4.35.
Browns—4/0, \$6.60; 3/0, \$5.25; 2/0, \$4.80; 1/0, \$4.35.
Three Chains—4/0, \$6.60; 3/0, \$5.25/ 2/0, \$4.80; 1/0, \$4.35.
Stall Fixture Pattern—4/0, \$4.80; 3/0, \$4.20; 2/0, \$3.60; 1/0, \$3.30.

Iron and Steel Revised; Base Price Higher

Winnipeg.

IRON AND STEEL.—The base price on rounds and squares in iron and steel have been revised and are higher. The following are this week's prices:

Iron, rounds or squares—3-16 in., \$8.80 base; ¼ in., \$7.95; 5-16 in., \$7.75.
Soft or Mild Steel, rounds or squares— 3-16 in., \$8.80 base; ¼ in., \$7.95; 5-16 in. \$7.75.

Boat Spikes Sell for More Money

Winnipeg.

SPIKES.—There is a great scarcity of all kinds of spikes and the prices on boat spikes has been advanced this week, particularly on account of higher freight rates. New prices are as follows:

Boat Spikes—¼ in. x 4 in., \$10.80; ¼ in. x 6 in., \$10.45; 5-16 in. x 5 and 6 in., \$10.05; ⅜ in. x 6, 7, and 8 in., \$9.25; ½ in. x 8, 9, 10, and 12 in., \$9; ⅝ in. x 10 and 12, \$9; ¾ in. x 14 in., \$9.

Track Spikes Take Higher Level

Winnipeg.

TRACK SPIKES.—Higher freight rates and shortage of supplies have caused an advance in the price of railroad spikes. These goods are very scarce. Following are new prices:

Railroad Spikes—2½ x 5-16, \$10.25; 3 x ⅜, \$9.60; 3½ x ⅜, \$9.60; 4 x ½, \$9.25; 5 x ½, \$9.40.

Post Hole Augers Higher in Price

Winnipeg.

AUGERS.—Vaughan post hole augers are higher in price and are quoted as follows per dozen: 5 in., \$19; 6 in., \$19.50; 7 in., \$22; 8 in., \$24.75; 9 in., \$27.

Linseed Oil Again Reduced in Price

Winnipeg.

LINSEED OIL.—The price of linseed oil has again been lowered, due to the fluctuation of the flax markets. The supply is good and it is being sold in large quantities. This week's quotations are as follows: Raw, in barrel lots, \$1.98 per gallon; boiled, in barrel lots, \$2.01 per gallon.

PITTSBURGH MARKETS

PITTSBURGH, Oct. 7.—In itself, the iron and steel market shows very little by way of new developments and not much progress has been made, visibly, towards lower prices. General sentiment, however, has become much stronger on the subject of substantial price declines being necessary. Undoubtedly the declines in automobile prices have had a great deal to do with molding public opinion as to prices generally. It seems that the public takes particular interest in whatever occurs in the automobile field. In last report it was noted that Ford, Franklin and Crow-Elkhart, had reduced prices. To the list may now be added Locomobile, Studebaker, Mercer and Overland. One may well conclude that a general and substantial decline in automobile prices is in progress, no matter what technical denials individual automobile makers may give to the press. The reductions are not sporadic, the names on the list of reductions thus far being typical of altogether too many classes of machines. Locomobile, Franklin, Studebaker and Overland each fall in a different class.

Steel and Automobile Prices

The steel industry is quick to refuse to admit that steel price declines can be connected with automobile price declines. It is commonly admitted in the steel trade that steel price declines must occur, the common view being that independent prices will recede to the Steel Corporation level, whether in a few weeks or a few months, and it is also the common view that the Steel Corporation prices will not be reduced. Some independents may have to cut under Steel Corporation prices to regain trade lost by what some buyers have not hesitated to call profiteering practices. The steel trade wants it to be understood, however, that the automobile trade itself cannot force down steel prices. It is admitted that the automobile trade was in large part responsible for the particularly fancy prices for prompt deliveries of steel that obtained early in the year, but it is asserted that the trade's power to put prices down is by no means measured by its influence in putting prices up earlier in the year, when automobile and part makers bid for prompt deliveries when the mills had already sold their product.

As to possible declines in Steel Corporation prices an impressive comparison is made, showing that from the Steel Corporation's standpoint automobile makers can have no argument that since they have reduced their prices the Steel Corporation should reduce its prices. The comparison takes an automobile that has been selling at between \$2,000 and \$3,000. The reduction in price on this movement might be \$150, or \$300, or even \$400. Less than one gross ton of rolled steel, in the form in which the average steel mill sells steel, is represented in that automobile. The Steel Corporation's rated capacity is 16,200,000 tons a year, of products weighed in the form in which sold. A fair production can be taken at not under 15,000,000 tons. The common shares outstanding amount to about \$508,000,000, so that \$15,000,000 would represent \$1 a ton on a year's output and would also represent a three per cent. dividend. The corporation certainly would not reduce prices to the automobile trade and keep them up to the railroads, to investors putting up bridges, buildings, etc., and to other buyers, hence a horizontal reduction in all prices is the only thing that could be considered. A reduction, therefore, that would be equal to a three per cent. common stock dividend would amount to less than \$1 in the mill cost of the steel entering into a \$2,000 or \$3,000 automobile. In other words, the steel mills cannot help the automobile trade to recoup when it reduces prices of automobiles.

Another item that dissociates the automobile price reductions from the steel market as it is made from day to day and week to week is that the automobile trade is not in position to offer orders of any consequence at this time. Many of the automobile makers have contracts running to the end of this year, with the prospect that on account of reduced consumption deliveries will run into the new year. General Motors is commonly understood to have a contract running through next June, covering considerable parts at least of the requirements of its various subsidiaries. If there is such a contract it is with the Steel Corporation and at the Industrial Board prices, since the corporation has sold to domestic trade at no other prices since the schedule became effective March 21, 1919, and an automobile manufacturer can hardly complain about Industrial Board prices.

Two Steel Markets

There used to be three steel markets, the Steel Corporation set of prices, a schedule of prices, not entirely definite, at which certain large independents were selling to regular trade for extended delivery, and a wide range of prices representing prompt deliveries, charged chiefly by smaller mills that kept their order books relatively clear. The last named market has now practically disappeared. One can, as a rule, secure rather prompt deliveries at the prices formerly ruling only for somewhat extended or delayed deliveries. That market is substantially unchanged. It is represented by 3c for bars, 3.10c for shapes and 3.25c for plates. In time these prices will doubtless yield, but there is no distinct evidence that they have yielded thus far.

Last week the American Pig Iron Association, composed of merchant furnacemen from a majority of the producing districts, held its monthly meeting at the William Penn Hotel, Pittsburgh. The prevailing, practically the unanimous, sentiment at the meeting, derived from information obtained from customers, was that a general industrial depression is impending, to exhibit its full force in the first quarter of the new year, with greatly reduced consumption and production and materially altered pig iron prices. The atmosphere of that meeting was as different as can be imagined from that of the meeting two months earlier, when several fur-

Paint Should Not be Star Boarder in Fall and Winter—How Some Dealers Initiate Movement to Stimulate Fall Selling of Paints and Finishes

Dealer Must Show First Enthusiasm—Moving the Paint Department to the Front of Store—Demonstrations, Advertising, Window Display—All Season Trade Gives Bigger Volume and Better Results—Auto Finishes Much Used in Winter.

METHODS, having for their object the increasing of fall paint sales, are now being considered by dealers. In this connection perhaps no other one factor will be of such importance as some step taken by the dealer to show that he himself believes the fall is the time for paint activity. His initiative will be the first step in awakening local interest at this time of the year and in helping to overcome the fast dying opinion that other seasons are better for painting.

Realizing that to keep interest alive he must give the paint department as much publicity as possible, one Western Ontario dealer recently moved his paint department from the rear to the front of the store and opened a campaign of newspaper advertising and circularizing, backed up with paint window displays. He decided that whereas he had formerly handled two brands of paint that in future he would handle only one brand and that he would learn as much about that brand as possible and talk it at every opportunity. "I got quick and very satisfactory results," said this dealer to Hardware and Metal, explaining that as a result his paint sales have been doubled. He is to-day thoroughly convinced that for biggest sales at all times of the year and for keeping interest alive at all seasons, particularly in the fall when interest is inclined to lag, that it is best to concentrate upon one line of paint and give it all the publicity possible.

Ads., Circulars, Etc.

As the opening shot in a recent campaign this dealer used quarter and half pages in the local newspapers and sent out about 500 special paint circulars. In mailing the monthly accounts he enclosed paint literature. All this effort was backed with the use of attractive window displays which were changed weekly. Underlying the whole plan was a determination to increase paint sales and stimulate this branch of business. This was the inspiration of the campaign, without which little can be achieved.

A demonstration was also used featuring lines for use in interior work in conjunction with fall housecleaning—wall and ceiling finishes, stains and varnishes for old floors, woodwork and furniture. Attention was also paid to the farmers visiting town, and now that crops are harvested is a good time to point out that this is a good season to paint farm buildings. At no other time of the year has the farmer as much time on his hands when atmospheric conditions make possible good painting and this is the time to get his business. This appeal for use of exterior finishes also applies to rural and city trade to some extent at this season but interior finishes can be given a position of prominence for they are much in demand at this time of year.

Lost Nothing Through Rearrangement

The question might be asked "Did this dealer lose sales of the line which was removed from the front of the store to make way for the paint display?" His answer is emphatically "No." He took care to remove a line for which he had already an established reputation and by the periodic use of window displays, mention in advertising, etc., interest in that department was maintained. A suggestion in this connection is the use of a display stand or two with a number of shelves on which displays of the line moved back can be arranged and set at an angle facing the store entrance. This display would supplement that of the wall cases.

Certain lines of finishes, in addition to those enumerated, can be pushed profitably at this season. Automobile finishes are an example. Many motorists still lay their cars up for the winter for personal overhauling. In spare time many cars are painted by their owners during the winter months. In this connection the dealer is in a position to give some expert advice on how this should be attempted for the result is likely to prove very disappointing and an expensive mistake be made if the proper plan is not followed. The process of rubbing, applying of body flat colors and of finishing with varnish, and doing the whole job in a place where no dust is flying, can be explained and much valuable advice given. If the customer sees this amount of interest taken in his case he will know where to go for all his future needs of paint—and advice.

"Save the surface and you save all" Paint & Varnish

"Save the surface and you save all" Paint & Varnish

Mooramel

Easy to Clean--Easy to Sell

Mooramel is made in Gloss and Eggshell White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

Mooramel works easy, has perfect flowing properties, combined with whiteness and other qualities which make it, without any question, the most practical and also the most economical article of its kind ever manufactured.

Mooramel can be used with equally good results on either interior or exterior work and can be cleansed with soap and water as often as necessary without any injurious effects.

Housewives everywhere have recognized Mooramel as the ideal household enamel for interior or exterior painting.

Do Not Solicit Financial Aid from Hardware Trade

Statement from Chairman "Save the Surface Campaign" Committee in Reply to Executive Ontario Retail Hardware Association—Outlines Purposes of Campaign.

MR. GEO. HENDERSON, Chairman of the 'Save the Surface' Campaign Committee, has issued a statement, referring to the report of the Ontario Retail Hardware Association Executive meeting appearing on page 39 of the Sept. 11th issue of Hardware and Metal. Mr. Henderson refers specifically to the section of the report which stated:—

"Save the Surface Campaign"

"The Save the Surface campaign came in for considerable discussion. Geo. May of West Toronto informed the executive that he had attended a meeting of Save the Surface Committee in Toronto some time ago, and had been suddenly and unexpectedly called upon by Mr. Henderson, a representative of the Ontario Retail Hardware Association, to give an expression of opinion regarding the campaign and indicate whether or not the campaign would secure support from the Ontario Retail Hardware Association. When asked as to the nature of the support expected, both Messrs. May and Caslor, who had attended the meeting, indicated that their impression was financial support. This suggestion was emphatically turned down by the executive, who stated that while they were in sympathy with the paint manufacturers in any movement which they may carry out to increase the sale of paint they did not feel as retail hardwaremen they should contribute to a campaign of this kind any more than they should contribute to a campaign affecting any one of dozens of other lines which are equally as big or bigger lines than the paint department in the hardware store.

"One member of the executive emphasized the fact that while the paint and varnish department of his store is an important and a large department it is only one of many departments and he could not see why the Ontario Retail Hardware Association should be expected to contribute to a sectional campaign of this kind.

"Another member of the executive objected seriously to the manner in which the advertising arrangements of the Save the Surface campaign was being carried on in his city, whereby the names of master painters in his city were allowed to be run on the same page as the Save the Surface advertising, whereas the advertisements of hardware dealers in the same city were not allowed to run on the same page. This, it has been explained to him, was the result of the Master Painters' Association contributing to the fund and financially supporting the Save the Surface movement.

"After considerable discussion the executive declined to suggest a contribution towards the campaign, but passed a motion of sympathy with the movement."

Statement From the Chairman

The statement received from Mr. Henderson, Chairman Save the Surface Committee follows:—

"In a report of a meeting of the Executive Committee of the Ontario Retail Hardware Association, given in Hardware and Metal on September 11th, the impression received was that the committee in charge of the 'Save the Surface' campaign, now being carried out throughout Canada, were desirous of obtaining the financial support of the Ontario Retail Association.

"The 'Save the Surface' committee wish to correct this impression and to state that while they are heartily desirous of obtaining the fullest co-operation of every retail paint and varnish distributor in Canada, it was not their intention, nor has it ever been, to seek or solicit the financial support of any of the retail associations. In all of the conventions held on behalf of the 'Save the Surface' campaign, throughout Canada, any solicitations of this nature have been carefully avoided.

"The committee, however, has sought and will continue to seek the co-operation of retail distributors in individual communities in giving, not only their moral support, but in using the 'Save the Surface' slogan arguments, and advertising to further this educational work and to increase their own sales in their own communities. For this purpose the committee supplies all necessary electros, cuts, copy free of charge, providing the retail distributor or any local organization or distributor will provide for the expense of the space used.

"On the occasion of the Toronto convention held last May, it was not intended to ask financial assistance of the Ontario Hardware Association, but their support by resolution, as well as co-operation on the part of individual members.

"On that occasion, as on the occasion of every 'Save the Surface' convention members of the committee have taken the opportunity of pointing out that neither in the preparation of the advertising copy, nor in the conduct of the campaign, is any preference given to any description of paint, such as white lead in oil over ready mixed paint, or ready mixed paint over white lead in oil, nor advantage given to any class of buyer, as for instance—the painter over the dealer or the dealer over the painter, and we wish to assure you that such is a fundamental characteristic of the committee's work.

"The committee mention this because of the reference made to an objection taken by a member of the executive of the Ontario Retail Hardware Association to the appearance of the names of painters on the same page as 'Save the Surface' advertising, attributing this to the fact that they were subscribers to the fund. It is explained that at the request of the painters they are permitted to show their firm names and addresses at the bottom of the ad or elsewhere on the same page as the ad appears, as users of "Save the Surface" products, but they are not permitted to state the brands of paint or varnish which they are using. In the same way the committee would be entirely satisfied to have merchants or dealers in paints show their firm names and addresses at the bottom of the ad or on the same page where the 'Save the Surface' ad appears, advertising that they are dealers in 'Save the Surface' products—paints and varnishes.

"The painters in only a few places have availed themselves of this advantage. Hamilton and Toronto are the outstanding cities where they have done so, and at the Toronto "Save the Surface" convention referred to members of the Master Painters' Association referred to the fact that the hardware dealers had not as yet taken advantage of a similar opportunity .

"The committee fully realize that they have a responsibility not only to the manufacturing interests, which they represent, but to jobbers and retailers as well. The extension of the use of paints and varnishes will mean increased business to all, and it is to the advantage of everyone to co-operate to the greatest possible extent. It is also realized that while the great national campaign can be controlled by a central committee, it is necessary for the retailer, who is familiar with his local conditions, to carry on the work in his own district, and cash in on the splendid educational arguments put forward in this campaign."

Three Injured in Oil Tank Explosion

Toronto.—An explosion of a tank containing 100 gallons of turpentine at the Glidden Varnish Co., Wallace Avenue, resulted in three employees being severely burned about the hands and face. The explosion was caused by a fire started from the overheating of varnish in the company's reducing vat.

Paint for Neglected Barns

There are barns without number that have been neglected the last few years due to the war, lack of help and various other causes. Many of them have reached the point where they can't weather another year without serious loss to the owner. Thousands of farmers must paint this year.

This means big business for you

Provided you are in a position to take advantage of this opportunity *now*. Stock up at once with a complete line of Glidden Barn Paints and go after your share of this profitable farm business.

Not only barns have been neglected, but the homes and implements as well. Whatever the need, there's a Glidden product for every purpose.

Write to-day for complete plan and selling data.

Linseed Oil Situation More Favorable

Survey of Conditions Regarding Linseed Oil, White Lead, Zinc and Lithopone; Colors, Varnish Gums, Etc. — Transportation and Cartage Big Factors in Increased Cost.

AN interesting statement concerning market tendencies of linseed oil, white lead, zinc and lithopone, colors, varnish gums, etc., with particular regard to costs of fuel, labor, light, heat and power transportation is given by the vice-president and director of sales of a large U. S. paint firm to the sales staff. Conditions in Canada are so similar in these respects that this survey will be of interest to dealers in Canada. It is as follows:—

LINSEED OIL.—The situation is more favorable than it has been for some time past, but linseed oil has ceased to be an important factor, relatively speaking, in so far as it governs values of paint materials to-day. Were it not for the fact that linseed oil is on a more favorable level than it has been for some time, higher prices would be inevitable, as the increased cost of operating is so far in advance of anything that we have ever had to deal with that the problem is most difficult in dealing with anything like a reasonable selling cost or a reasonable cost of production. A brief review of the following facts will undoubtedly help to key your work and stimulate our efforts along broad and effective lines.

WHITE LEAD.—Labor at the lead mines has increased in the same proportion as the coal mines. The same labor condition exists at the smelters, costing more to produce pig lead. The same is true in the higher cost of corroding white lead, to say nothing of the finished product, including the higher cost of containers, re-handling, cartage, etc.

ZINC AND LITHOPONE.—Until both of these commodities can be produced at more reasonable costs there is little or no hope for other than present price levels.

COLORS.—Colors and chemical colors have increased in cost in sympathy with all other costs. Colors like umbers, siennas, etc., are also affected by the higher costs of trans-atlantic freight rates, insurance, dock and re-handling charges.

VARNISH GUMS.—The shortage of labor and the difficulty attending digging of varnish gums, together with the high cost of transportation, insurance, re-handling, storage and interest on investment are all important factors affecting higher costs. In addition to this the supply is limited, owing to the very much heavier demand at home and abroad for gums.

PACKAGES.—The costs of tin-plate, solder and bail wire is at the highest point. Lumber from which packing cases are made, as well as fibre and all other material entering into containers, have advanced, particularly lumber, from around $16 per thousand feet to $85 per thousand feet, and to this added cost must now be added the very much higher cost of transportation.

LIGHT, HEAT AND POWER. — The cost of fuel, power-house equipment and all operating expenses in this connection are among the most important factors in increasing the unit cost of power to a point where it is now a very important problem—one requiring much finer and closer supervision, owing to the difficulty in replacement of power-house equipment at the present time.

TRANSPORTATION AND CARTAGE.—These are probably among the leading factors of increased cost. An increase of 33 1-3 to 50 per cent. on the already unusually high costs makes an added increase in values which needs to be most carefully considered. There is no question but what the railroads need this added revenue and are entitled to it in order to not only maintain but build up their equipment and rolling stock, terminal facilities and all other important factors governing.

PAINT SHOULD NOT BE STAR BOARDER IN FALL AND WINTER

(Continued from page 60.)

Preservative Appeal Now Strong

With many other lines of finishes which had their big seasons in the spring of the year owing to the fact that the underlying idea concerning their use was their decorative qualities, attention can now be turned to the advisability of their application in the fall for preservative purposes. The educational campaign which has been in progress in Canada for some time has been harping on this point and it is by the co-operation of the dealer in pressing it home personally that the utmost good can be achieved.

Evidence of how advertising and the dealer's co-operation can mould public opinion is found in the manner in which the public have been educated to the use of ready mixed paints and varnishes. It is not so very long ago that the sale of ready mixed paint and varnish in the hardware stores was practically unknown. Buying mixed paint was then a novelty. Growth has been rapid since that time, but one trouble has arisen. Public opinion was not molded on a broad enough scale and the seasonable idea was allowed to get too much headway. Now it is largely up to the dealers to point out the fallacy of this idea and to create an all season demand.

One of the big drawbacks of the paint business is the fact that the turnover is not large enough. Development of the fall painting idea will help to increase the annual sales and thereby make this a more permanent, all year department.

Sound reasoning and shrewd business judgment brought about the ready mixed paint habit of earlier days without a tithe of the scientific knowledge that is possessed about the product to-day. The definite scientific knowledge possessed to-day concerning the greater service brought about by paint applied in the fall provides a stepping stone for advancement that none of the pioneers of ready mixed goods possessed, or at least, developed. The trade to-day, therefore, has the backing and assurance of scientific and even practical certainty that points the way to more business.

All Season Work Would Reduce Painters' Charges

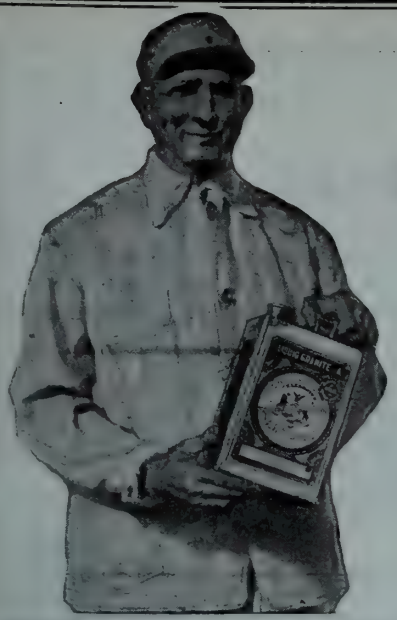
One point which can be emphasized to paint customers in connection with the fall painting idea is that one reason painters' charges are so high is largely because everyone wants them at one season of the year, and in that short season they have to make a sufficient income to tide them over slack seasons. It is at once apparent that, if painting was spread over a longer season of the year, doing exterior work all summer and fall, and interior work in the cold weather, painters' services would be required at all times of the year and costs of this service would be much less than under present circumstances. Another benefit of such a plan would be to get better results from painting than are achieved where amateurs apply the paint. It will easily be seen that such a plan would tend to encourage the wider use of paint and would make it more of an all season feature.

Increasing the Turnover

A concrete illustration featuring a quart of paint, a dollar and a section of shelf space, will best show the force of this argument. In November, or January, say, a paint dealer places his signature on an order which means that in exchange for a quart of paint he will part with a dollar on next April 1st, or 60 days thereafter (if he is wise he will let his dollar go in 15 days and claim his two per cent.). In March the quart arrives and is given shelf space costing rent, insurance and other overhead expense. In April or May it leaves the shelf and the cash register bulges a profit. A spring sorting order finds another quart taking its place, but the chances of this quart leaving that space lessen as the season advances. It may be a summer boarder or it may not. For our purpose, however, it goes forth at the end of May to be replaced by a third quart, which is more than likely to become a summer resorter.

The point is shall this quart become a star boarder for the fall and winter, eating its head off with overhead, or shall it not? The promotion of the fall

(Continued on page 68.)



The Luxeberry Painter Says:

"PREVENTION IS BETTER THAN CURE is an old saying I always think of when I see a job of finishing that has gone wrong. It costs a whole lot less to prevent varnish mistakes than to make them, but I always find Berry Brothers' finishes a sure preventive of varnish troubles."

It is the uniform dependability of "Berry" products that maintains the always growing demand for them.

Weekly Paint Markets

MONTREAL

MONTREAL, October 7. — The paint trade, at the present moment, is seasonably quiet. Manufacturers are engaged in filling sorting orders, and while these are satisfactory the quiet period still exists on current business. One thing of interest is manifest at the moment, and that is the large number of orders which are being received for spring shipment. One manufacturer informed Hardware and Metal that in some cases the response was phenomenal for this season of the year and it indicated, he said, that the trade is well disposed to view the future with confidence.

The feature of the week is that of a softening of the undertone on linseed oil, and while prices have not yet reach the $1.50 figure, some are quoting $1.55. For round quantities of oil it is understood that a somewhat lower price could be secured, but for single barrel lots $1.55 is the lowest figure quoted here.

Firm Basis Holds on All Varnishes

Montreal.

VARNISHES.—The varnish market remains very firm, and this is induced by a number of factors. In the first place, varnish has to be aged for a long period, and despite the fact that lower linseed and turpentine has been available recently it will take many months for this to reach the manufactured varnish. Meanwhile, gums, chinawood oil, containers, labor, and many other factors are maintaining a very strong basis generally.

Further Decline on Linseed Oil

Montreal.

LINSEED OIL.—The flax market experienced a big slump early this week and the price quoted was as low as $3 per bushel. It is a long time since so low a figure was obtainable, and this, ordinarily, would mean $1.50 oil. At the same time crushers state that when they go into the market to buy the price immediately advances, and they are, so to speak, between "the devil and the deep sea." There is very little movement of oil at the present time in a general sense, although one crusher reports that sales in single barrel lots have been surprisingly active. It is stated that very little English oil is now arriving on this market, in view of the fact that the price of the same is even higher than that on Canadian crushed seed.

	Imp. Gal.

1 to 4 barrels	1 55	1 60
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 58	1 60½
3 to 4 barrels	....	....

Turpentine Easier; Not Much Selling

Montreal.

TURPENTINE. — The movement of turpentine is restricted in the same sense as that of linseed oil. The market undertone is somewhat softer, and single barrel lots are being quoted at $2.30 per gallon. The usual differential charges are made for smaller quantities.

	Imp. Gal.	
Turpentine—		
Single barrels	2 30	2 35
Small lots	2 40	2 45
(Packages extra.)		

Putty Orders Steady; Price Basis Is Held

Montreal.

PUTTY.—There has been little change in the putty situation from last week. In view of the fact that the retail trade will be doing an increasing business in this line for some time to come, the movement has been seasonably active and quantities are ample to take care of present demand. Supplies of English whitening, so extensively used in the manufacture of this product, have been coming to hand much better in recent weeks than they were during the earlier summer months. No change in the basis is anticipated at the present moment.

While Pig Lead Down Lead in Oil Holds

Montreal.

WHITE LEAD IN OIL.—While the basic price of white lead in the United States has been on the down-grade for some time, it will take many weeks for this to reach corroded white lead. Manufacturers and corroders have to purchase their supplies several months in advance and the question as to whether lower prices on white lead in oil will prevail is entirely dependent on the extent of the present downward trend on pig lead. If the decline continues and is permanent, cheaper white lead in oil will be available at some future date, but corroders state that there will be no change during the present season in all probability. The present basis is to obtain, as has already been explained in Hardware and Metal, until December 15.

Prepared Paint Orders Are Promising Well

Montreal.

PREPARED PAINTS.—The present movement of prepared paints is limited although some sorting orders are coming to hand. The undertone is steady and manufacturers assert that there will be no possibility of any reductions of the bases.

Glass Sales Fair; No Price Changes

Montreal.

GLASS.—The demand for glass is fair, seasonably speaking, although the falling off in building activity has been a factor in restricting demand. In view of the fact that automobile manufacturers have been curtailing the manufacture of cars, there has been less demand for plate glass from that source, and the supply of plates is therefore an improved one. As deliveries require many weeks, it is thought in trade circles that there will be little change in the situation for some time—perhaps not this year.

TORONTO

TORONTO, October 7. — Very few changes of note are reported in paint circles this week. The decline in turpentine and linseed oil prices which has been in evidence for some time now is continued this week. Both are very much lower in price than they have been for a considerable time, but the demand, never very large at this time of the year, is said to be smaller than usual. White lead in oil and putty are quiet and unchanged except for slight alterations conforming to changes in freight rates. The window glass demand is strengthening a little, due apparently to the changes in the weather. Business in prepared paints and varnishes is fairly good with an improvement noted.

Demand Strengthens For Window Glass

Toronto.

WINDOW GLASS.—The demand for window glass during the past week has strengthened and it has been moving

The Agate Family

For Inside Home Beautifying

This is the popular family with special interest for the dealers who have wisely decided to hammer hard at the inside paint sales this Fall and Winter.

Mrs. Canadian Housewife is well sold on the Agate Family and she uses it all the year 'round. The cold weather season finds her doing no end of "touching-up" inside the home. Everything from the kitchen cabinet to the floors, chairs and tables comes in for "refurbishing."

The retailer who advertises, displays and sells Ramsay's Agate Family will get this business.

A. Ramsay & Son Company

more freely. With a continuance of cooler weather it is likely that a very good volume of business would be reported. Firmness is the note in American markets with deliveries promised in three to six months. The situation is unchanged with regard to prices and a little variation is noted in quotations from different sources.

Paints and Varnishes Unchanged; Brisker

Toronto.

PREPARED PAINTS AND VARNISHES.—Business is said to be a little more brisk in prepared paints and varnishes, and orders for next season are being received. Prices remain firm and no expectation of any change is apparent.

White Lead in Oil Movement Improved

Toronto.

WHITE LEAD IN OIL.—The demand for this product has been seasonable with a little improvement noted during the last few days. Prices are unchanged except that freight rates have caused a change in differentials. Base price remains the same and it is being quoted at $20.80 for pure in less than tons.

Putty Shows More Activity

Toronto.

PUTTY.—An increased demand is reported for putty. The coming of colder weather with the fixing up of storm windows usually calls for larger sales of this product. Quotations are for Standard in 100-lb. drums $8.45, and 25-lb. irons $8.80.

Linseed Oil Prices Still Declining

Toronto.

LINSEED OIL.—A further decline of five cents per gallon is reported this week on linseed oil. The demand for oil is said to be smaller than usual and it is never very heavy at this period of the year and prices being so variable little is ordered for future delivery. Not much movement is expected and consumers are holding back. Flaxseed is down to about $3 a bushel now, which is the lowest it has been for some months, and oil producers state that the seed has declined in sympathy with other grain and that the flax situation has not changed as the amount of the crop is well known. Quotations are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 55	1 58
3 to 5 barrels, gal.	1 54	1 57
6 to 9 barrels	1 52	1 55

Turpentine Declines Another Ten Cents

Toronto.

TURPENTINE. — Turpentine shows another decline this week, being ten cents per gallon lower than the last market quotations. But little movement of this commodity is expected at this time of the year. There seems to be a little more competition for business and that added to the fact that buyers are holding back is given as the reason for lower quotations. About sixty per cent. of the second crop is reported to be gathered and a fair idea of the yield can be had. While it is hardly expected to go much lower in price it is impossible to foresee what may happen, but producers are said to be holding for higher prices. Following are new quotations. In 5 gal. lots a charge of $1.25 is now made for wood jacket cans, these having advanced in price.

Turpentine—	Per Imp. Gal.
1 barrel lots	2 20
2 to 4 barrel lots	2 19
5 gal lots	2 35

PAINTS SHOULD NOT BE STAR BOARDER

(Continued from page 64.)

painting idea heightens the possibility that it will be ousted into profitable exchange and replaced by another which shall just as readily follow its course and be replaced by a quart which perhaps readily sells for indoor purposes. A dollar that will go and come with each quart and each time it comes bring a profit is infinitely more nimble in the production of bigger business than the one that sits tight on the shelf under a label. Shelf space means money. Fall painting will help to provide accommodation for more active roomers where otherwise only one sleepy boarder might rest, without profit, from early summer until next spring.

From both the scientific and the practical standpoints fall painting is beneficial. This being an established fact, the dealer who utilizes this information is the one who will make his paint department a live, all-year means of profit.

SELLS THE "IDEA" OF ELECTRICAL DEVICES

(Continued from page 40)

frame of mind and willing to spend time to look into the possibilities of each line. Many electrical lines require the outlay of a considerable amount of money and it is not always possible to secure the undivided attention of the customer in the store sufficiently long to convince him of the value of the article. At a fair it is different, for there people are looking for information and want to be interested, and when once interested it takes but a short time to convince them of the value of having up-to-date appliances in their home and buildings.

The standard of life on Canadian farms has improved considerably in the past few years, and with a bountiful crop this year the farmer will be better fixed than ever before to have city conveniences. Now that the crop has been harvested is the time to go after this business. Most Canadian communities are now served with electricity and the power is sufficiently cheap to allow of its use to circumvent the former drudgeries of farm life. Day by day new appliances are making the farm home an easier, happier and more comfortable place. Electric washers are big helpers on Monday, electric irons the chief helpers on Tuesday, electric cleaners reduce sewing machine enables the farm wife to the work of cleaning, while the electric do three times as much sewing as by the old method and with less fatigue. Electric lights eliminate oil lamps and the tiresome task of filling and cleaning lamps.

PITTSBURGH MARKETS

(Continued from page 59.)

nacemen were loudly predicting "pig iron is going to $50." It did go to that figure, in the case of foundry iron valley, Cleveland, Buffalo and Eastern Pennsylvania, but apparently the advance occurred chiefly because the furnacemen set out to get it. The furnacemen did not, however, get the orders. That was another matter. Consumers stopped buying. The trade has it that foundry iron at valley and Cleveland furnaces has now declined $3, to $47, furnace, but the decline rests upon even flimsier foundation than the preceding advance, as there was simply a small sale by a middle interest."

RETAILERS AND WHOLESALERS

(Continued from page 38)

subject to sales tax if such material is shipped to the foreign purchaser direct from the mill. If the material is shipped from the mill to a Canadian dealer and is exported by such dealer, the sale and delivery by the mill to the dealer is subject to the tax, but the delivery by the dealer to the foreign purchaser is exempt from tax; in this event, however, the tax paid on the sale and delivery by the mill to the dealer is subject to drawback upon furnishing proof of export and of payment of the tax."

The trade discounts which are regularly allowed under like condition of sale may be allowed for excise tax purposes if such discounts are allowed and deducted on the face of the invoice by the shipper. If the shipper grants to the purchaser the privilege of deducting from the gross invoice price a discount for cash payment in a stated period, and if the purchaser, when making settlement of the bill, avails himself of the condition under which the discount is allowable, the tax paid on the amount of such cash discount may be credited in the next succeeding tax return furnished by the shipper, providing that such next succeeding return is made within sixty days of the payment of the tax upon the amount of discount allowed. If the adjustment of the tax paid on the amount of the discount cannot be made within the sixty days, each adjustment can only be made by application for refund to the department.

DEALERS: DON'T OVERLOOK THIS LIVE LINE!

Penberthy Washing Machine Drainer

(Operates by Water Pressure)

The Old Way

Adapter—For use with smooth faucets. Order this also if your faucets are not threaded.

The New and Better Way

A Real Household Necessity

Frees the women folk for all time from the tiresome, mussy, old-fashioned way of filling or draining washing machines and tubs on wash day. Fits any faucet. Can be attached or detached in a moment. No tools needed.

To Empty

Take off cap "B" and turn on the water. This creates a suction through the hose and so drains the water into the sink.

To Fill

Simply attach Drainer to the faucet and screw on cap "B" and turn on the water.

The Adapter "A" converts smooth faucets into threaded ones. Simply slip it over plain faucet and attach to Drainer.

The Drainer is made of aluminum—will not rust—will last a life time.

Used by thousands of women all over the country. Can be used for a number of purposes and it saves many, many steps and all the heavy lifting.

The Penberthy Washing Machine Drainer

should be in every household, and you can sell every woman in your town, whether she has a washing machine or wash tub, or whether her washing is done in the basement or kitchen, providing she has water pressure for operating power.

Order From Your Jobber.

If he cannot supply you, write us direct and we will see that your order is given prompt attention.

We will furnish free on request attractive hangers, circulars, etc.

Manufactured by

Penberthy Injector Company, Limited

Windsor, Ont.

LITTLE VISITS

Beatty Bros. Limited Bulletin

With BT Dealers

C. C. Lee, Goderich, Ont.

A very successful demonstration was recently staged in the window of Mr. Lee's Goderich store.

Upper section shows Staff and Store taken during the Time-Saver demonstration.

Lower Section—The Sunset Hotel, a very large and successful summer hotel owned and operated by Mr. Lee.

Demonstrations Pay!

Mr. C. C. Lee of Goderich, Ontario, believes in demonstrating the goods he handles.

Our illustrations show a very successful demonstration of the Time Saver Washer recently put on in the window of his large store in Goderich.

We co-operated with Mr. Lee by sending one of our Special Washer Salesmen to put on the demonstration and loaned Show Cards, Signs, Etc. Previous to the demonstration, Mr. Lee advertised freely in the local papers, thus working up considerable interest.

This demonstration—like many others of a similar character—was a great success. The sale of six machines was directly traceable to the demonstration—several were actually sold while the demonstration was in progress. It is impossible to estimate what the actual returns will be in the end. Demonstrations bring in business for months afterwards.

BT TIME SAVER

The Time Saver
Electric Washer and Wringer

BT TIME SAVER

The Time Saver is a profitable machine for the dealer. It carries a good margin of profit, gives satisfaction and sells easily.

We co-operate with our dealers in every way in selling the Time Saver. Circulars, advertisements for the local paper, slides for the local movie, show cards, signs and the skilled assistance of specially trained salesmen are all available to the Time Saver dealer.

Our plans for selling the Time Saver do not stop with the dealer. We aim to see that every machine we send out is giving actual service and satisfaction in some customer's home.

If a high-grade machine, backed by this service, strikes you as a good proposition—write us for particulars.

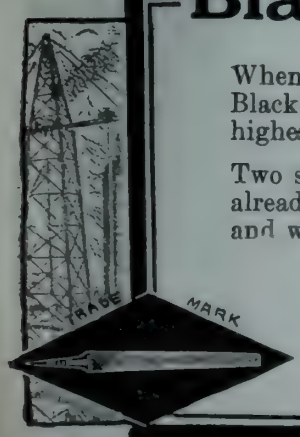
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

Stephens'

REGISTERED TRADE MARK

Silkstone Flat Wall Colours

For beautifying homes all the year round. Silkstone is not merely a "spring re-decorator," but an all-the-year staple that housewives are buying for the home whenever the spirit moves them to "do the walls."

The housewife is "sold" on Silkstone because she knows that it is cheaper than wall paper and can be washed without rubbing off. The soft, silky finish has an appeal for the home-lover. Silkstone out-wears all other wall coverings.

The economical side of Silkstone; its beauty and its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably—learn what's in it for you in an agency.

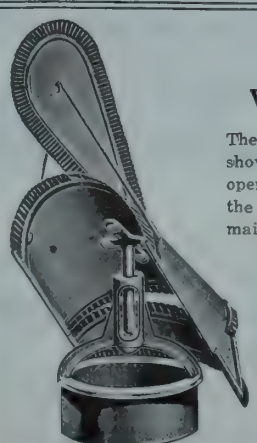
The Brett Mfg. Co., Limited
Winnipeg, Man.



O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Buckeye Incubator and Fittings

Sell on Merit and Make Great Sales

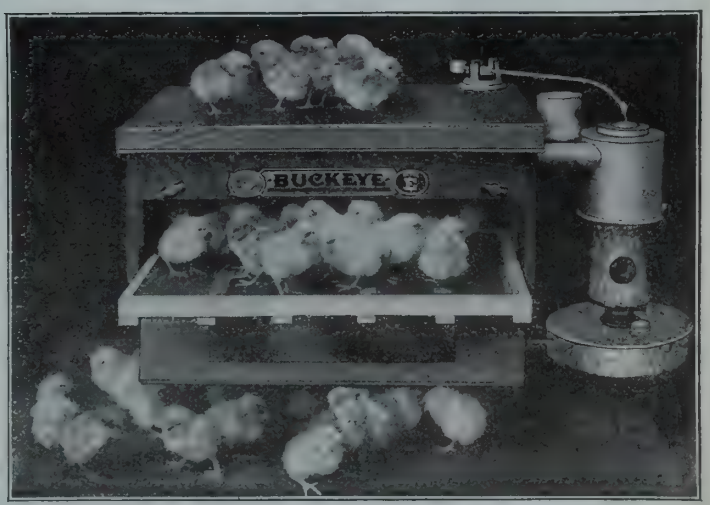
Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

Like all the lines handled by Ashdown's, they're good sellers. For fifty-one years Ashdown's has had the confidence of manufacturers of the best lines.

Let us put a Buckeye in your store to demonstrate and boost your trade.

Many Rural Prospects

The hardware dealer in rural districts will find much scope for many new sales by looking up farmers, poultry farmers, etc., and supply them with new machines or fittings. Many farmers will be preparing now to have their first brood off by January. Display Buckeye Incubators and Fittings in your window and where your customers will see them. Drop a casual remark about their flocks or their plans for 1921 breeding, and you will be surprised at the additional sales and profits you can make.



The J. H. Ashdown Hardware Co., Limited

Calgary Winnipeg Saskatoon

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

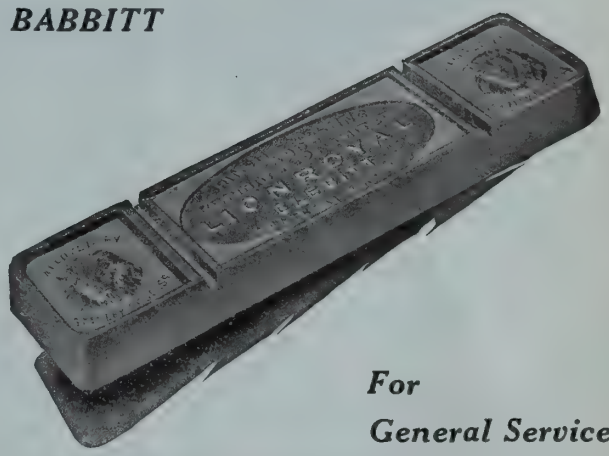
"Alloyed in Canada under the world-famed Stanley Process"

Lionroyal

We warrant that no other Babbitt at the price will perform as well in so many different classes of bearings, and are ready to prove this in any case by trial installations in competition with any metal of its type.

The Dependable BABBITT



For General Service

BRITISH SMELTING COMPANY & REFINING LIMITED

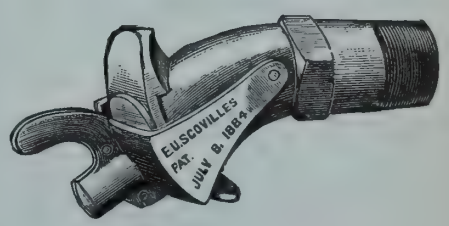
MONTREAL and LONDON, ENGLAND

An Adamson Product

Genuine Perfection

Oil and Molasses Gates

Made in ½ in., ¾ in., 1 in., 1¼ in., 1½ in., 2 in., 3in. Pipe and regular Wood Thread, all Iron Japanned. These gates are made entirely in our own factory, on machines designed and erected by ourselves for this special purpose, and the utmost care is exercised to provide against any defects in material and workmanship.



All gates are thoroughly tested before leaving our works and nothing but perfect goods are sent out.

Our Prices will save you money, and we can make prompt deliveries.

A Record You Can Equal

THE above photograph shows a shipment of "Miss Simplicity" Electric Washing Machines lined up outside the London Hydro Shop. These machines were received by them at 3.30 p.m. one afternoon and by 6 p.m. the same day all were installed in the homes of their respective purchasers. The demand for "Miss Simplicity" is just as brisk in your locality. Why not profit by it?

Immediate Shipment Guaranteed

AN electric washing machine is one of the most interesting propositions a dealer can handle to-day. The vast majority of housewives have long yearned for just such a boon as "Miss Simplicity" to do the heavy, backaching work of washing and wringing, and to give them more freedom. "Miss Simplicity" is an ideal typified—a dream come true.

You will find "Miss Simplicity" easy to sell because you can enthuse about it. It washes linens, curtains, laces—everything—with the same thoroughness and care as if done by hand. "Miss Simplicity" is well and strongly built, mechanically perfect and most simple to operate.

"Miss Simplicity" will increase your circle of friends because, while releasing the housewife from drudgery, saving time, energy and even dollars, these benefits will naturally be felt by the whole family.

You can repeat the experience of the London Hydro Shop in your community if you handle "Miss Simplicity." Our dealer offer will interest you. Keen prices. Good profits. Liberal guarantee. Write to-day and mention this advertisement.

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

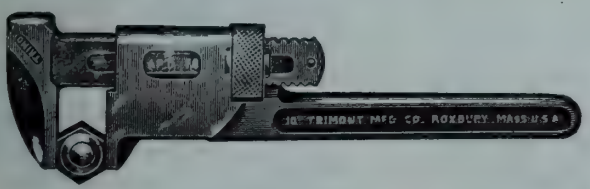
TRIMO

The Trimo Pipe Cutter can be converted into a one-wheel or three-wheel cutter by substituting wheels for rolls or rolls for wheels. When making changes care must be taken to replace cotter pins which must always be in place to give proper service.



The Trimo Monkey Wrench is built for strength, especially adapted for heavy work and railroad use.

Trimont Mfg. Company
Roxbury (Boston) Mass., U.S.A.

Its Handiness SELLS IT

The Imperial Folding Steel Auto Chair is built of best steel of oval section, finished in rich black japan; seat and back upholstered in black waterproof art leather.

This comfortable, strong chair is a boon where space is at a premium, folds to less space than any other chair — yet perfectly convenient. Adult size seat 16" high. Children's size, seat 12" high.

Imperial Bit & Snap COMPANY
RACINE - WISCONSIN

For Solidifying Sales and Preventing Lost Accounts

For solidifying sales, and preventing lost accounts by keeping the trade "lined up," a weekly message to the whole Canadian hardware trade through Hardware & Metal will prove productive and profitable.

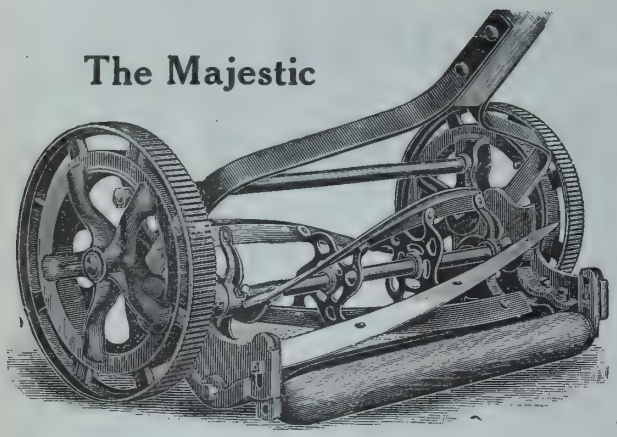
The Majestic



Speedy in Action Speedy in Sales

Before placing your order for mowers, it will pay you to investigate Eureka Machines. Our range consists of the following:

Rapid, Garland, Majestic, Speedy, Forest Glen and Federal.

Sizes: 14, 16, 18 and 20 in. cut.

The Speedy is one of the Eureka Famous Six, that has met with popular favor wherever used. Its reliable action, resulting from the high quality crucible steel blades, eliminates that fault found in many machines of pressing the grass in the earth, instead of cutting it. The Speedy is a quality machine built for service and it "delivers the goods." The hardware man will find the Speedy a machine he can sell with ease, customers recognizing quickly its superior advantages. It pays to sell Eureka Mowers. Why not be our sole agent in your district? Write to-day.

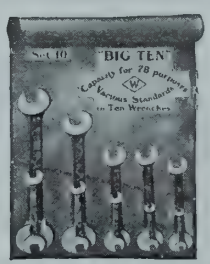
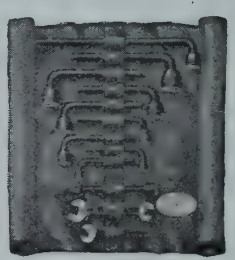
Williams' Superior Drop-Forged Wrenches in Sets

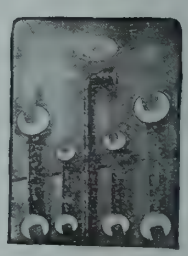
"Big Seven"



"Big Ten"



"Ford" Set "A"



"Ford" Set "B"

EVER since the automobile became popular J. H. Williams & Co. have been designing and manufacturing Sets of Superior Drop-Forged Wrenches so that the inevitable tinkering and repairing to the motor car may be made easier for both the motorist and the mechanic.

In our Wrench Set Book we describe and illustrate a complete line of these sets, into each of which nearly a half century's experience in the making of Superior Drop-Forged Wrenches has entered.

Four of these sets are illustrated above.

Send for this Book. It will open to you new fields of prospective wrench business.

THE HOTTEST FIRE MADE

The No. 71 C. & L. Fire Pot is the Hottest Fire made and it is Smokeless, Odorless and Noiseless. Every mechanic knows what that means. The tank is made of seamless drawn steel, with all fittings welded in, and is practically indestructible. It has a sub-flame so that the burner can be turned down low when not in use, thus saving fuel and time. The No. 71 will heat 12-lb. coppers as fast as two mechanics can use them. Jobbers supply at factory price. Send for catalog.

No. 71 Fire Pot.
List Price, Each, $27.20.

J. J. Turner & Sons Limited
PETERBOROUGH, ONT.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

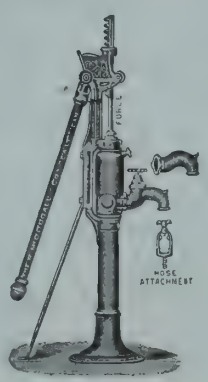

Fig. 117

"McDougall" Well Pumps

A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

Manufactured by

The R. McDougall Co., Ltd.
Galt, Canada

If interested tear out this page and place with letters to be answered.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

Makes quick sales
And covers well.
It surely pays
In various ways,
Like bringing in cash on business days.

"Save the surface and you save all" Paint & Varnish

"Paints and Varnishes for Every Purpose"

Inside Facts

About inside painting and finishing are points that every progressive hardware man and his clerks will be furnishing to customers about this time. Not only will the customers want inside facts on how to do various jobs inside the house, but they will want exactly the right O. P. W. Product to do the work. They have a pretty clear idea what they want, because the advertising copy in their favorite papers has been coaching them month by month.

The success of hardware store Paint and Varnish Departments this winter depends very largely, in the last analysis, on how well this department has sorted up its stock—everything else is ready. The demand is there and the consumer knows which O. P. W. Product should fill it. How's your own stock—is **your** store ready?

An O. P. W. Sign Over the Store Increases Sales.

Hints from Our Home Brightening Department

It's wonderful what a new coat of paint or varnish will do in brightening up the house. When you decide to freshen up the bathroom or kitchen with a coat of paint, or surprise that scratched chair and table with a sparkling coat of varnish, come in and see us. We have a complete line of paints, varnishes, brushes and everything for brightening up the home.

To keep the floors and furniture bright and glistening, we know of nothing better than the O-Cedar Polish Mop and

O-Cedar Polish

Dealer's Name

Send now for the Folder showing the complete list of cuts and advertisements. Or if you have already received one of the Folders, write and let us know which of the O-Cedar Advertisements or cuts you would like sent to you.

We Will Send You FREE an Assortment of These Business-Pulling Advertisements

They were designed especially for you. They feature the various articles of your stock in both pictures and words, and they come all ready for newspaper or printer, to appear over your own name and address.

This is part of the service we offer to dealers who handle O-Cedar Polish and the O-Cedar Polish Mop. We gladly co-operate with you in every way to create more business. Newspaper advertisements, window cards, show cards, or display stands, cuts for programmes or dodgers—all are free to you for the asking.

CHANNELL CHEMICAL CO., Limited

Play Safe

Safety Week is over, but every week should be safety week for the motorist. With winter coming and its attendant inclement weather, slippery pavement, 20 below zero weather, etc., the wise motorist who uses "motor sense" will be prepared for all emergencies.

You can help by reminding him when he comes to your store that he should prepare for the winter by getting his car in shape. The following winter accessories will interest him:

Weed and Rid-o-Skid Tire Chains

Cross pieces, hooks and missing links for their repair.

Mayall Motor Heater

Installed easily and quickly in the lower hose connection. Attached to lamp socket keeps motor and radiator warm in coldest weather.

Radiator Cement

A liquid added to water stops all radiator leaks in auto or house-heating system.

Carbon Remover

Saves laying up the car to have carbon scraped out; very effective.

Top Dressing

For the preservation of Mohair or Leather Tops and Upholstery.

Retouching Enamel

All bare spots should be touched up before the fall rains and snows start, to prevent rust.

Porcupine Boots

Will add thousands of miles of life to damaged tires. They absolutely do not slip but remain in the right spot.

Anti-Freeze

No radiator is safe during the winter months without the use of a good Anti-Freeze.

Hughes Foot Warmers

Make winter driving a pleasure; simple and inexpensive to operate; use charcoal.

Neatsfoot Compound

For clutch and brake linings. Cold weather is detrimental to these parts, but can be offset by the use of Neatsfoot Compound.

We carry a full line of the above and can make prompt delivery. Order from the "Rice Lewis" man when he calls or write direct.

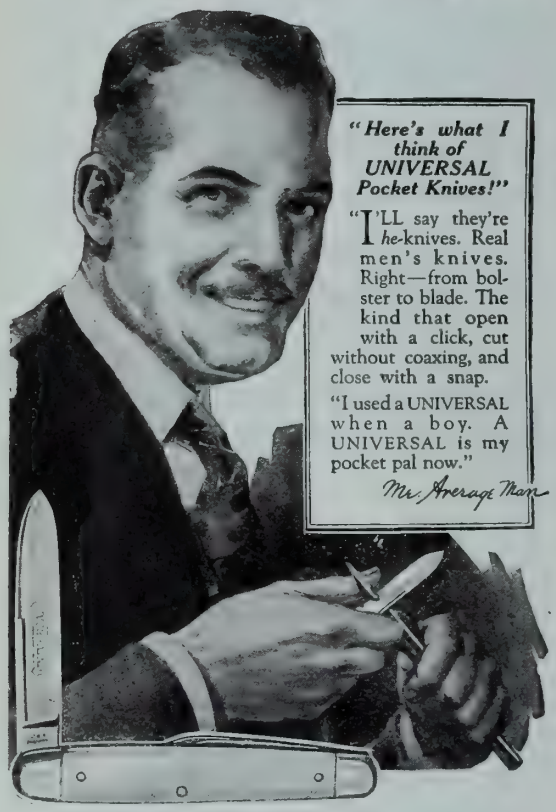
UNIVERSAL
POCKET CUTLERY



UNIVERSAL
Pocket Knife.
No. 73185

Always On Edge To Please Trade

UNIVERSAL Knives are sturdily built, properly balanced—edged to the sharpness that stays sharp. They cut straight and true into the good graces of buyers. That's why sales make friends—friends make sales.

EVERYBODY knows that high-grade cutlery cannot be made from low-grade materials any more than nightingales can be hatched from goose eggs. The quality grade of "Universal" Cutlery is always ascending and at a sharp angle. The pinnacle of perfection is always the goal.

There is nothing in handling cutlery that is too dull to cut anything except its price in order to make sales. When the tide of selling recedes the flotsam and jetsam of low-grade goods is always left over. Sell "Universal" Cutlery and none will be left over. It isn't that kind.

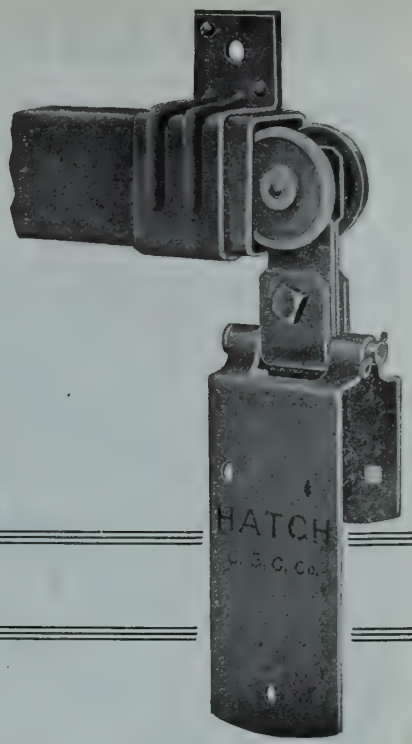
An Old Friend of the Trade

The Hatch
Trolley Hanger



Moderate Price — Quick Turnover

This perfect-action hanger sells extraordinarily well because it might be said to be "made to measure for the Canadian trade."

The Hatch Hanger is the result of a thorough investigation of the requirements of the hanger-users and the trade in general, and the hanger fills exactly the wants of the trade and consumers. This accounts for its splendid sales.

A smooth, easy-running hanger with apron 6 inches long and 3 inches wide. It moves with perfect action on roller bearings. Packed for shipment one pair in a box complete with bolts and end caps for track; 12 pairs in a case. Weight, per dozen pairs, 85 lbs.

Plymouth Rope

Native Filipino Stripping and Cleaning Manila Fiber

WHEN the Manila hemp plant reaches maturity the native Filipino cuts the stalk which is some 15 feet long and a foot or more in diameter, being composed of separate leaf stems growing compactly together in overlapping layers. The fiber, from eight to twelve feet in length, is contained in the outer bark of these leaf stems, which after being stripped are drawn under a knife hinged to a block of wood as shown in the picture, the edge of the knife being kept down on the block by a treadle, and released by a lever consisting of a bamboo pole. This cleaning operation which separates the fiber from its surrounding pulp is very crude and slow, resulting in limited production, more especially of the superior grades, for the better grades of hemp are really the result of care and labor both in the cultivation of the plant and in the processes of gathering the stalks and preparation of the fiber which quickly deteriorates under certain conditions.

Of the relatively small percentage of really first-class fiber thus produced, the Plymouth Cordage Company is always alert to secure suitable material to maintain its long-established standard of quality, and the buyer of Plymouth Manila Rope is assured of greater satisfaction in using the better article.

PLYMOUTH CORDAGE COMPANY

NORTH PLYMOUTH, MASS. WELLAND, CAN.

INDEPENDENT CORDAGE CO., LIMITED

TORONTO, CANADA CANADIAN SALES AGENTS

If interested tear out this page and place with letters to be answered.

Some Firms Hate to Admit Their Mistakes--But We Don't

For many years this company has been selling goods to as many dealers as possible in every town and city in Canada, irrespective of the size of the town or the number of dealers in it.

Although we have built up an enormous business under this system, the policy has been a wrong one—and we quite frankly admit it.

We have now adopted a system of selling which is just the opposite to that of the past and we are going to appoint exclusive agencies everywhere and back them up to the limit of our ability.

This will mean bigger business for us and big returns for our agents as they will be given the exclusive selling rights for our goods in their community.

We would like to hear from live hardware dealers who would be interested in securing the agency in their town for the famous SOUVENIR line of stoves and ranges and from tinsmiths for the handling of our Souvenir and New Idea Warm Air Furnaces.

Our stoves and furnaces are already well established with the public, having given excellent service for seventy-five years. Each one carries an unrestricted guarantee and we have hundreds upon hundreds of letters of praise from satisfied users, which in itself speaks for the high quality of our goods.

Souvenir stoves and ranges and Souvenir and New Idea Furnaces have many exclusive features—are very attractive in design and will attract many sales owing to their moderate cost.

Our salesmen are now on the road appointing agents and will call and talk the matter over with you if you would care to have them do so.

We have a big money-making proposition to offer you—write us at once for full particulars of our exclusive agency plan and information as to how we propose to cooperate with you.

WILT

Are Faster and More Accurate

Wilt High Speed and Carbon Twist Drills, Reamers and Milling Cutters are scientifically correct. They are quality tools made by specially trained, high-class workmen, skilled in the art of tool-making. Wilt tools cut faster, more accurately, and give longer service. Dealers find them profitable to sell, because of the increasing demand.

The reasonable profit with which we are content allows the dealer a splendid margin on his sale.

Ask your dealer or write direct for our Catalogue "C."

—*sell him the right Starrett Tool*

Fitting tools to your customer's needs is the best possible way to establish the friendship that leads to future sales.

If he wants a Starrett Surface Gage, for example, he has five kinds to choose from. Perhaps any of them will fit his work—maybe only one. It's up to you to find out the sort of work he does, and then sell him the gage he needs. If it fits his job, he won't haggle over the price. No one appreciates better than a mechanic the value of a fine tool.

The books of Starrett dealers show pretty plainly that the friendships they've formed through their Starrett Tool sales are paying them big dividends in increased profits and good-will.

"The Tools Mechanics Buy" tells you more about finding the tools your customers want. Write for free copies for yourself and your clerks.

Worthy of the Name

THE word "Quality" has been much abused in the past few years. It has been used right and left in advertising manufactured articles, while the articles themselves were not worthy of the name.

As a result, the word "Quality" has lost a lot of its punch through this wholesale use. The public isn't showing the respect it once gave the word.

But the word "Quality" has not lost any of its strength when applied to any one of the hundreds of articles carrying the trade mark SMP. Our Pearl Ware, Diamond Ware, SMP White Ware, SMP Hot Galvanized Ware, and all our other lines are rightfully known as "Quality" lines—because right through the process of manufacture—from the mills to the shipping rooms—the necessity of building quality into every article is never forgotten.

Through her constant, day by day use of our products in her home, the housewife knows them to be ***articles of real quality.*** They have stood all the tests the woman has imposed.

Wouldn't it be good business for you to handle this SMP line of quality? By so doing you would add appreciably to your sales, and you would be linking up with a house renowned throughout Canada for its prompt attention to orders, and its close co-operation with its agents and dealers.

The SMP Quality Lines:—

Pearl Ware — Diamond Ware
SMP White Ware — Beacon Lanterns
SMP Hot Galvanized Ware
Hot Blast Stoves and Heaters

THE RIGHT KEY WILL UNLOCK THAT DOOR

The average attempt to get out of the beaten path by calling on industries to sell them tools — ends with "could'nt get in" or "they were too busy to see me."

Most such visits fail because the merchant or his outside salesman pays too little attention to selling the *use* of the *tools* instead the tools themselves.

If the salesman will make it known that he has data and information about how the tools he is selling can *save money* or *time* to the prospective user — he can usually get orders. And the size of those orders is only limited by the amount of knowledge and skill he can use as a key to unlock that door.

GTD has accumulated data and information about threading tools which will be welcomed by industries in every line where threaded parts are being made or assembled. Use this data as a key — make it known that you have it and offer it to them, and manufacturers will send for you — instead of turning you away.

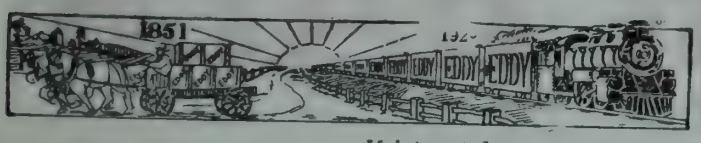
Story For Week Dated Oct. 16, 1920 **Being No. 27 in the Series**

Making the "Sulphite" for the Sulphite Pulp Process

CANADIAN limestone and the purest of spring water combine with Louisiana sulphur of the finest importation at the E. B. Eddy Plant to produce the bisulphite of lime required for use in the making of sulphite pulp. Looking across the Ottawa River from the heights on the Ottawa side you can see the yellow piles of sulphur in the grounds of the Eddy plant ready for use. As it takes some 250 to 300 pounds of sulphur to make a ton of air-dry pulp, and the Eddy Company turn out over a hundred tons of paper a day, you can realize that a good deal of sulphur is used. But the supply so far seems to be inexhaustible. It is brought up by steam pressure from deep wells in Louisiana, and the sulphur used by the Eddy Company is 99 per cent. pure.

In the process of making the bisulphite of lime the sulphur is burned in great ovens which develop terrific heat, and a very distinct sulphurous whiff when you come close to them. They are revolving ovens, and slowly turn while in operation, showing through the vent holes in their doors the lambent blue flames of the burning sulphur within. By an ingenious contrivance invented, built and patented by Eddy Company employees, the oven doors remain still, though the cylindrical ovens keep turning, and thus there is no risk of accident to the men who open them to replenish the supply of sulphur.

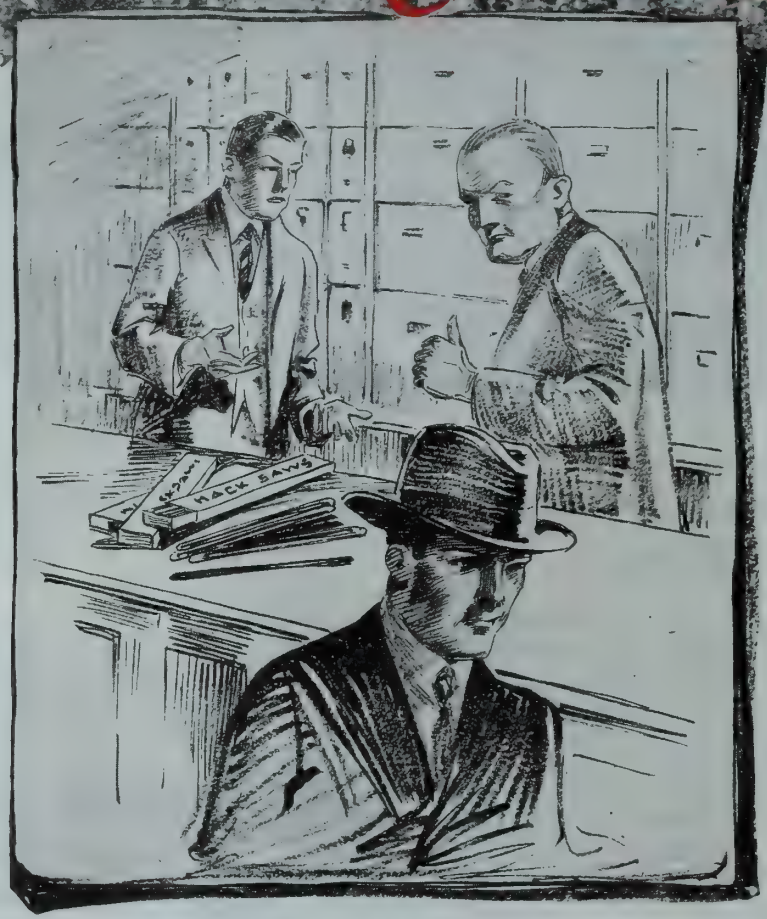
From the ovens the sulphur goes in the form of gas mingled with air, through great lead pipes which are doubled and tripled with many turns in a water cooling tank, and this sulphurous gas then finds its way into the bottom of the tall, brick-lined, concrete tower in which the bisulphite of lime is made. A glimpse of this tower was given in the illustration in an earlier article, showing where the logs first arrive at the Eddy plant. What happens inside the tower will be told in the next article.



Scene on the Du Moines River, 225 miles from the Eddy plant. Note logs on their way to become pulp, paper, or matches, illustrating the Eddy Motto:

"From the Tree to the Trade"

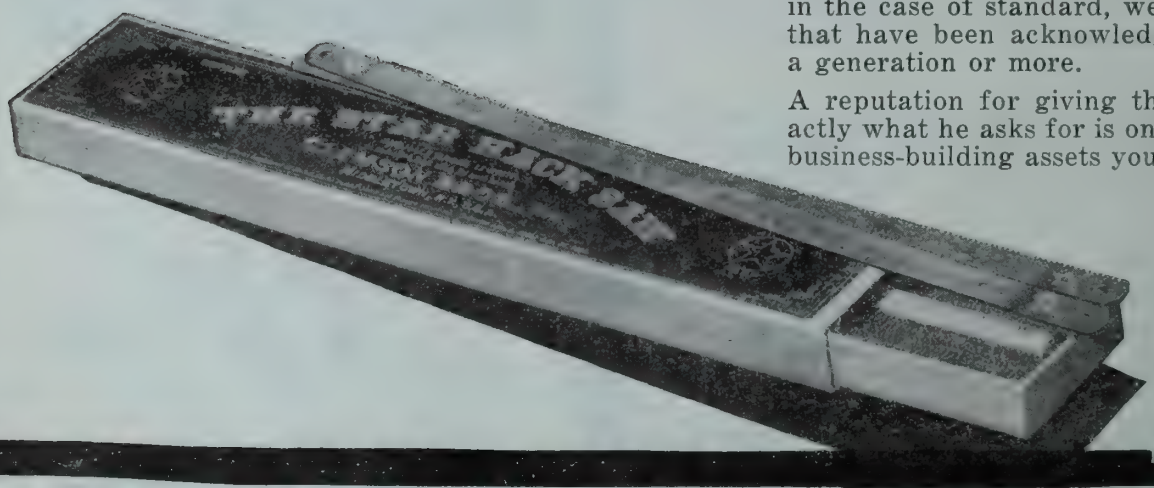
If interested tear out this page and place with letters to be answered.



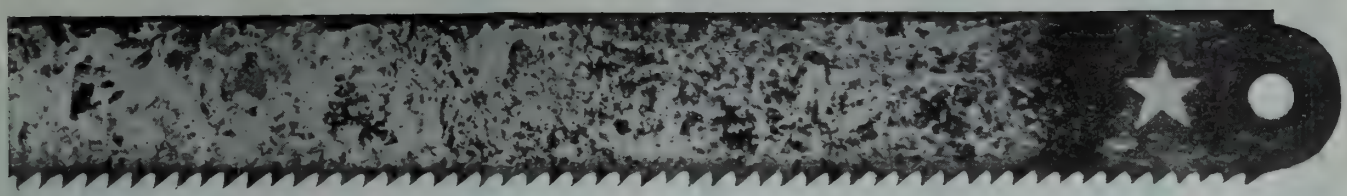
"He

People are getting more particular every day. If they find you can't supply just what they call for, they resent having a substitute offered. Especially is this true in the case of standard, well-known goods that have been acknowledged leaders for a generation or more.

A reputation for giving the customer exactly what he asks for is one of the biggest business-building assets you can have.



STAR HACK



wouldn't take anything but Star Hack Saw Blades"

And the better known the standard merchandise you carry and the higher its quality, the stronger that appeal will be.

Few items in your whole stock are better known than Star Hack Saws, which have been the standard since 1883. In city or country, large store or small, these famous saws in the green box are often the only brand carried, so much higher are they in quality and so much more readily do they sell than any others made.

Now Star Saws are sold by the factory that has made them since the beginning. And it goes without saying that the factory that makes an article is in the best position to tell you how it is made, how it should be used, and how to sell it.

Our Sales Promotion Department is at your service to help you push Star Hack Saws with factories or individuals in every way possible.

And our national advertising on Star Hack Saws, which has made them known to users everywhere, will be continued in a bigger way than ever the coming year.

In ordering through jobbers be sure you get "Star." Inquiries or direct orders should be sent to this office.

COMMUNITY PLATE

Made in Canada

The Joy of Seeing Her Set Grow

Nearly every woman has collected her COMMUNITY PLATE in the same way. Just the everyday table requirements bought—or given to her—first

Then a Berry Spoon, Tomato Server, or other CORRECT SERVICE piece added as the need comes and almost before she knows it, she is equipped with COMMUNITY

for every need of the family table and for entertaining.

The beauty of it is that it all happens so easily and inexpensively. CORRECT SERVICE pieces and sets, $1 to $10. Chests of COMMUNITY PLATE, $47.50 to $400—at the better shops.

Send for attractive booklet "Correct Service with COMMUNITY PLATE"

ONEIDA COMMUNITY, LIMITED
00 NOYES ROAD NIAGARA FALLS, ONT.

COMMUNITY PLATE

Made in Canada

A Desire that Grows

"To order her household more as it should be is the highest expression of life satisfied this desire of woman"—TAXAL.

No longer does the woman of today serve berries or preserved fruits with an ordinary tablespoon. She uses instead, a COMMUNITY Berry Spoon; or for sliced meat, the Cold Meat Fork. So these dainty CORRECT SERVICE pieces meet a distinguished approval that grows and grows.

And these pieces are so easy to collect—inexpensively. One simply buys a Berry Spoon at one time—a Tomato Server, Salad Set, Jelly Server, Iced Teaspoons, season by season as the need comes.

Correct Service pieces and sets—$1 to $10. Chests of COMMUNITY PLATE, $47.50 to $400—at the better shops.

Send for attractive booklet "Correct Service with COMMUNITY PLATE"

ONEIDA COMMUNITY, LIMITED
00 NOYES ROAD NIAGARA FALLS, ONT.

COMMUNITY PLATE

Made in Canada

A Pride that Endures

COMMUNITY PLATE completely satisfies a woman's desire to be proud of what she owns.

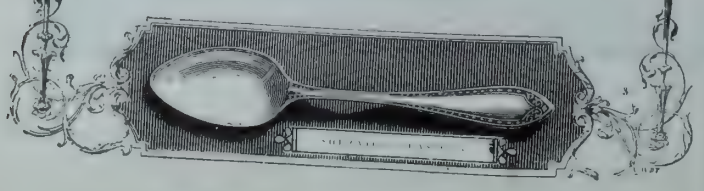
Silver plate was never better than COMMUNITY is today. Money cannot buy a better tableware.

The economy of COMMUNITY PLATE lies in its ability to give pleasing service for the longest period of time and to retain its inherent beauty during that service.

Whether you intend buying now or later, the beautiful patterns of COMMUNITY PLATE may be inspected at the better shops. A set may be started with even a single COMMUNITY server because the patterns are standard.

Send for the attractive booklet "Correct Service with COMMUNITY PLATE."

ONEIDA COMMUNITY, LIMITED
00 NOYES ROAD • NIAGARA FALLS, ONT



ONEIDA COMMUNITY PAR PLATE

Made in Canada

An Inexpensive Tableware In Patterns You Will Like

It is the purpose of PAR PLATE to fix the standard of wearing quality in the lower price ranges of silverware—and to make these standards just as unmistakable as the standard of COMMUNITY PLATE.

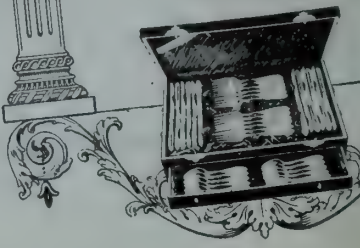
PAR PLATE bears the good, old-fashioned A 1 plate and assures 100 per cent value for each dollar you spend.

It combines exquisite charm of design, in a variety of attractive, standard patterns, which enable you to start your set with a single piece.

See this unusual value in tableware. The better shops will be glad to show you their stocks of Oneida Community PAR PLATE.

Ask us to send you our attractive booklet "Correct Service."

ONEIDA COMMUNITY, LIMITED
00 Noyes Road, Niagara Falls, Ontario
Makers of COMMUNITY PLATE



Some of the 1920 advertisements that are showing your customers why COMMUNITY PLATE is so much to be desired as the table setting supreme—the best tableware money will buy.

When you link your business with COMMUNITY PLATE, you are backed by the tremendous selling power of these advertisements, as well as by the COMMUNITY standard of excellence of quality.

You owe it to yourself to be associated with this powerful educational campaign. Can you afford to ignore the increased sales and the added prestige it represents? You get all the benefit of these and other COMMUNITY advertisements when you concentrate on selling COMMUNITY PLATE and PAR PLATE.

These advertisements are appearing—about five times larger than they appear here—in selected media that blanket the Dominion.

Feature COMMUNITY PLATE and PAR PLATE and you feature your own store.

$1,000 in Cash Prizes

GENCO WEEK

November 8 to 13

Enter your store in the window display contest to be held during Genco Week, November 8 to 13. Win one of the cash prizes and increase your razor sales. The window will mark your store as a place where any man can buy

"A Razor That Will Shave Him"

Genco Advertising is telling millions of readers that there is a "Genco Razor for every kind of beard and skin."

The full page advertisements in MacLean's for Nov. 1, and Grain Growers' Guide for Nov. 3, will call attention to the special display and demonstration that Genco Dealers will make during the week following (Nov. 8 to 13).

One thousand dollars in cash prizes will be awarded the best 46 window displays during that week.

Every dealer who enters the contest will receive attractive display material free. Dealer is not obliged to buy a Genco assortment or any other material in order to compete for the prizes.

It is not a condition that Genco Razors must be displayed in the competition and the displays in which Genco Razors do not appear will be given the same consideration as those in which they do appear.

Write for free display material and further information concerning the contest.

Be sure to have a Genco Display Assortment on your cutlery counter.

Each assortment contains razors for every kind of beard and skin.

Order one now and receive the handsome display cabinet. If your Jobber cannot supply you, write us.

The "Seafoam"

ELECTRIC POWER

Washing and Wringing Machine

Wrings While it Washes, Washes While it Wrings

is a common-sense washer and wringer that sells for a price that meets the popular demand. It is a Canadian-made machine that has been giving real satisfaction for ten years. Dealers who have not handled the Seafoam are missing much washing machine business. It can be readily sold to people who are keen buyers — who appreciate value, because they can secure a washing and wringing machine at a reasonable price that is not surpassed anywhere, at any price. The Seafoam does thoroughly all the washing and wringing by power without wear and tear on the clothes, and what machine will do more —even at double the price.

SEAFOAM FEATURES

Unsurpassed washing principle —Wooden dolley moving halfway around and back forces the hot suds through the clothes and thoroughly washes them in a few minutes.

Cypress tub—nothing to corrode or tear clothes—keeps water hot.

Reversible wringer with highest grade rolls—will start, stop or reverse instantly. Controlled by lever conveniently placed at side of tub.

Safe to operate—as being belt driven the motor is protected against overloading. All gears being covered the danger of accidents is removed. Safe for children to be around.

Simple in construction—does not easily get out of order.

Attractively and durably finished. Shipped complete ready to operate on ordinary house lighting service.

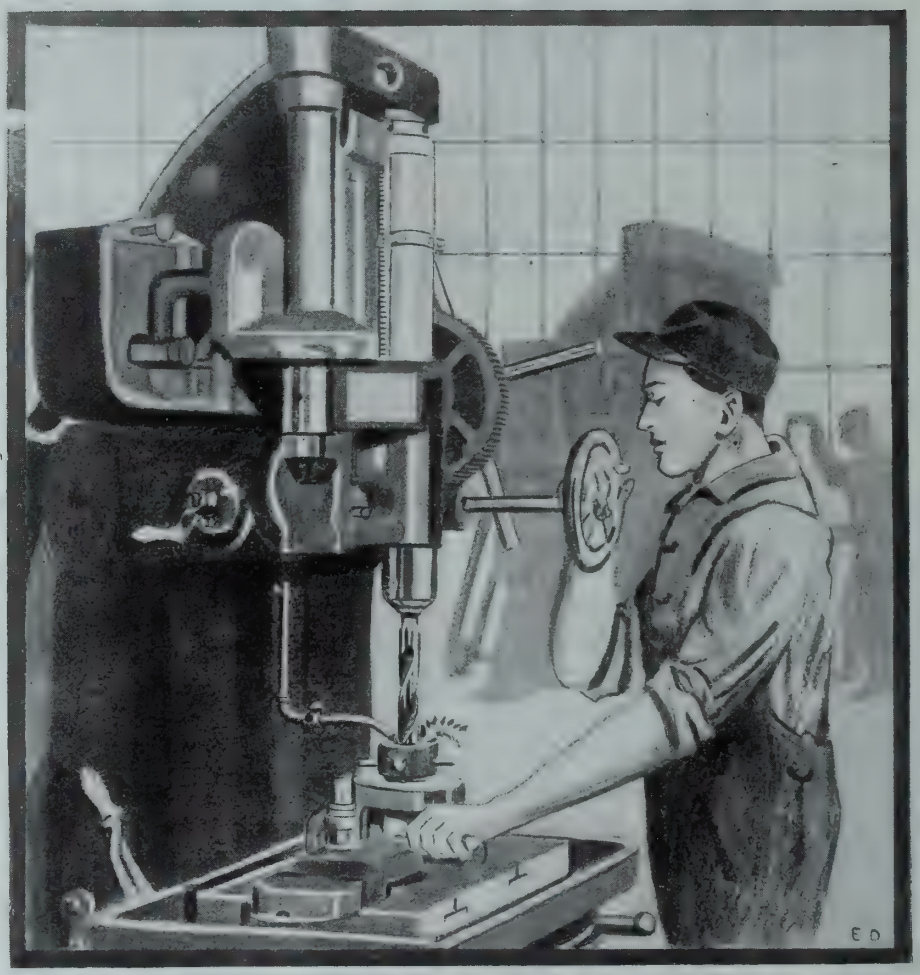
Butterfield Tools



The Name Machinists Look For

Butterfield's high speed and carbon twist drills, gear- and milling-cutters, reamers, taps, dies, and other tools, have always been the choice of the most experienced and discerning tool-buyers and machinists. To the machinist—especially the pieceworker—the extra production that Butterfields give means much in pay or promotion.

Their well established, strong hold with buyers and users of good tools has ever made them a welcome part of hardware tool departments. If you handle Butterfields the news soon spreads among buyers of good tools.

I-XL

Stainless Steel Knives

have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

Look for I-XL on the Blade.

An Economical Substitute FOR SHELLAC

THE well-nigh prohibitive price of shellacs has created a demand for a safe and economical substitute.

The largest organization of industrial chemists in the world has produced KWIC-LAC for this purpose. KWIC-LAC has proved that it is a safe and economical substitute for shellac on every type of surface, consisting of special gums, cut in denatured alcohol. It has all the characteristics of shellac in drying and when sanded will not gum-up.

Hardware Wholesalers' Annual Banquet

Splendid Representation of Hardware Interests from Canada and Some from United States—Col. J. A. Currie Speaks of Canada's Potential Wealth—A. Monro Grier, K.C., Makes Plea for Unity and Toleration of Racial and Other Differences.

A SPLENDID representation of wholesalers and manufacturers, with a number of guests representative of hardware and other interests both in Canada and the United States, was on hand at the annual banquet of the Canadian Wholesale Hardware Association held on Thursday evening, October 7, at the King Edward Hotel, Toronto, following the afternoon business session.

A splendid dinner was provided, and the spirit of friendliness encouraged by entertainers.

The proceedings following the dinner were introduced by the retiring president, C. A. Whitwam, who read communications expressing regret at inability to be present from the following: R. H. Tremaine, president of the National Hardware Association of the United States; the secretary of the same organization; A. E. Dykes, J. H. Ashdown Hardware Co., Winnipeg; secretary of the Maritime Wholesale Hardware Association; secretary of the Southern Hardware Association, and from J. C. Wanless, president of the Ontario Retail Hardware Association. Secretary W. F. Macpherson attended, representing the O. R. H. A.

Col. J. A. Currie Proposes Toast to Canada

A number of bright, interesting addresses were given in connection with the proposing and responding to toasts, first among which was the toast to the King, fittingly proposed by President Whitwam. The toast to Canada was proposed by Colonel J. A. Currie, M.P., Imperial Steel and Wire Company, who held a high command in Canada's overseas army. Col. Currie opened his address by stating that Canada was almost unknown when he first attended such a gathering in this country and that it was not expected that fame would come to it for some time. "But," he added, "through the Great War and the gallantry of the sons of our country the name of Canada is now written high and we have been granted a seat at the council of the nations. In all sincerity I might say there is one characteristic of the Canadian which may be a detriment to us, that is our modesty. We consider other nations superior to ourselves, but when it became necessary to do hard fighting it was found that our soldiers were the equal of any. Our men were among the first in the war, and throughout the whole period of the war we, of all nations in the war, were the only one who never lost a position or lost a gun. The manner in which we have treated the men who came back has reflected glory on Canada. The next thing is to see that this country achieves its proper place industrially among the nations. This is the last great country. Our resources are enormous and we have everything which should entitle us to become a great empire. We have 17½ per cent. of the coal deposits of the world on the slopes of the mountains of the Pacific. We have big resources of timber and ores, and we have all the elements that should go to make a country great as far as natural resources are concerned, and we have every reason to feel confident in our manhood. All that we require is the applied industry and understanding. We stand on the threshold to-day of what this country is going to be. Everything is open to the young man of Canada."

COL. ROBERT STARKE

of Starke-Seybold Co., Montreal, Que., elected president of the Canadian Wholesale Hardware Association.

Col. Currie then spoke of his recent meeting with a leading hardware merchant of London, England, who told him that in many lines of hardware Canada to-day controlled the world. In a final survey Col. Currie pointed out that Canada has nationally-owned railways which were only sink holes under private ownership. "These," he added, "will play a big part in building up the country industrially." In conclusion it was pointed out that there is room for millions of new population in Western and Northern Canada, and that therefore there is no limit to the possible extension of this country in any direction.

A. Monro Grier, K.C., Responds

An eloquent address was given by Mr. A. Monro Grier, K.C., in responding to the toast to Canada, as follows:

"So far as the merits of the subject matter of this toast are concerned there is no proper limit to be set in replying to it. As the toast has been proposed by Colonel Currie, who was of the band who went forward during the war, I should like to say, after the war, in part what I used to say during the war. Speaking for all sincere men who were left behind, I say in respect to those who went forward that if we put together all of the activities of those who were left behind they would not compare with the achievement of one solitary man who went forward to offer his life for his country.

"In responding to the toast to Canada I feel in a sense I am permitted to speak

more freely of the virtues of Canada than one who has been born here, and may I indicate something of my connection. Irish on my father's side, Scotch on my mother's side, brought up in England, and now residing in Canada.

"If you go away from Canada for a short time you are simply amazed when coming back at the wonders of the country. Its assets are beyond the imagination of any living man. The Dominion of Canada contains within its borders possible wealth such as never entered into any man's mind."

Referring to Canada's part in the Great War, Mr. Grier stated that hardly was the call made when Canada answered "I am ready," and she was ready until the end of the war. "And now," said Mr. Grier, "that being so, the question to those of us who contemplate the big things is, are we the same people who showed ourselves to be big in such an undertaking. That is the question we have to solve. Something of that fine spirit must still actuate us. The thought that each of us shall realize that each owes a duty to those who are dependent upon him and to the whole world. In my judgment there is an opportunity presented to Canada to-day which lies before no other country in the world and therefore I suggest to you that we see to it that to the extent we possibly can we keep alive that splendid spirit which actuated those men who went forward to battle. If a time shall come in my lifetime when I shall say the Great War is a thing of the past, I trust my life will come to an end, because I will realize I am quite unworthy to be a part of a country which took such a part in the world war. Let us become worthy of the men who fought."

Continuing, Mr. Grier pointed out that there were two views of life. "There is the view of the man on the street and of meeting our fellow men on the same plane on the one hand, and the other view is when from a high place you get some ideas of the right perspective of things. Life is not just one trifling humdrum but it is a wide, magnificent panorama in which those things you considered difficult are seen to be small compared with the whole life you have to tread."

Must Tolerate Racial and Other Differences

"Canada is a country not of one people but largely of two. Those of British extraction number 4,600,000; those of French extraction 2,500,000. We can perhaps best help our country by doing the very best we can to be tolerant of those things which are not agreeable to us. The objective view of the Frenchman is the same as ours. We should be tolerant and kind to each other. We are not wholly manufacturers or wholly farmers. He would be a poor judge of the situation who thought we should all be farmers or manufacturers, but we should in every possible way try to get the

C. A. WHITWAM

London, Ont., retiring president Canadian Wholesale Hardware Association.

point of view of the other man, and if we do the result will be good for all. We are not all employers, some of us are employees. A faithful employee is just as good as a fair and reasonable employer. How do we discharge our individual duty? The whole thing is that we take pains not so much to our rights but as to our duty.

"Canada occupies in the world the position she is really entitled to. Though I am British born I never met a man born in Canada who had a higher appreciation of its potentialities. Canada is a country so great that it might well afford to let its praises be sung by others."

Mr. Grier hereupon turned his reflections to the Old Country, pointing out that Britain's achievements in the war were almost incredible, and that from what he had seen on a recent visit home made him feel honored to belong to such an empire. "We sorrily discharge our duties as inheritors of the things which come to us from the Old Country," he added, pointing out that our concern is that we should be worthy of the men who went forward in battle.

"Canada is comparatively free from political troubles," said Mr. Grier, "and those troubles will not grow as long as we can keep those of British extraction in as large a proportion as at present. Canada represents one twenty-eighth of the whole of the British Empire, and is almost as large as the Continent of Europe. It has no right to say of anything: "It cannot be done." If Canada will set itself to work it will not need to be concerned with the views of others. If it will do so we will not only be worthy but there is no future that will be impossible to us.

"Shall the self-same mould bring forth the self-same men?"

Toast to Our Guests

Lt.-Col. Robert Starke, Montreal, vice-president of the association, proposed the toast to Our Guests, stating that he considered it an honor to propose such a toast and giving a hearty welcome on behalf of the association. The toast was drunk with Highland honors.

Tariff Enquiry Same Old Battle

MR. W. R. Yendall, Canadian Richards Wilcox Co., London, Ont., gave a brief address confirming the necessity of co-operation under present circumstances, as follows:

"There are tremendous possibilities before us if we can see eye to eye, and such gatherings as these help along this idea. If someone had asked me what I thought about the Steel Company of Canada before I heard Mr. Whitton, I would have said certain things which I would not say now. There are always two sides to the question. And now, when the country is being swept by a wave of distrust it is necessary for us to try to give the other fellow credit for being as honest as ourselves. I think most of us will agree that faith will be justified. It is a little singular that in this country we should have such a wave of clashing between various interests. This tariff enquiry is the same old fight and it is so tiresome to again face the possibility of splitting our country on the tariff question. A few years ago in the United States the tariff was the battle ground of the old parties, until finally they got a tariff board. We in Canada are threshing over old straw. I wish we could get at the politicians who are responsible, for there is no sense in this agitation for free trade."

Mr. Yendall spoke of the endeavor to make political capital of alleged strife between employer and employee, and the racial question, adding: "There is no real difference of opinion between the English-speaking people of Ontario and the French, and we should not let politicians bring it up. We need the get-together feeling and give the other fellow some of the credit."

The Guests

Those in attendance at the annual banquet of the Canadian Wholesale Hardware Association included the following:

H. S. Alexander, Wood, Alexander & James, Hamilton, Ont.; W. C. Allen, Western Wire & Nail Co., London, Ont.; Jas. Arnold, Canada Foundries & Forgings Ltd., Brockville, Ont.; F. Atkinson, Canadian Tube & Iron Co., Toronto, Ont.

H. J. Badden, James Hardy & Son, Toronto, Ont.; Chas. L. Baillie, Wm. Jessop & Sons, Toronto, Ont.; Thos. M. Birkett, Thos. Birkett & Son Co., Ottawa, Ont.; A. A. Bittues, Gillette Safety Razor Co., Montreal, Que.; C. E. Britton, Gananoque, Ont.

Geo. A. Childs, United States Steel Products Co., Montreal, Que.; W. H. Clark, Ontario Lantern & Stamp Co., Ltd., Hamilton, Ont.; D. P. Cotter, Gillette Safety Razor Co., Montreal, Que.; Col. J. A. Currie, Imperial Steel & Wire Co., Collingwood, Ont.

(Continued on page 48)

Slow Deflation in Iron and Steel Prices

Lines Employing Least Labor Will Decline First and to Greatest Extent—Iron and Steel Prices Represent 85% Labor Costs—No Rapid or Severe Cuts in Prices Can Be Expected—Hardware Lines Not Speculative Ones—Need More Commercial Patriotism—Buyers Must Not Lose Confidence.

THE first response to the toast to Our Guests was made by F. H. Whitton, of the Steel Company of Canada, Limited. Some one passed a witticism about Mr. Whitton's stature by asking him to stand up when he was already on his feet. This brought the sharp reply from Mr. Whitton to the effect that he was "born that way." Introducing his remarks Mr. Whitton stated that he had been among the members of the Association for many years and that sometimes he felt it was time for a new face, but that he would be much disappointed if he did not get an invitation to the banquet.

"I am asked to give our views in regard to business conditions and I take this as a compliment to the views of the company I represent. I regret Mr. Hobson, our genial president, could not be with us to-night.

"I am going to speak to you entirely from the position of iron and steel industry. Of course we know that readjustment has been before us for a long time. In January 1919 we thought that period had arrived. We made reductions of $4 to $6 a ton, business was depressed, some wanted to cancel orders, and there was a great curtailment of business up to June 1919. But that was a false sign because the demands of peace time requirements immediately caused a rebound in business and you all know the pressure which has taken place from that time to the present. Up until that time labor was very scarce, it was an era of wage upon wage increase, decreased production, general dislocation of business and restlessness among the men. The public were extravagant and there was a great indulgence in luxuries. Speculation has increased during the past eighteen months. But at last a halt has been called. Our war debts have to be paid, our Government has called upon us to be economical and is taking our money to pay interest and principal. On behalf of itself the Government has had to curtail expenditures. Banks have wisely curtailed credit. The object of our banks is to maintain the interests of the country and their action indicates that the time has arrived when the first steps should be taken to adjust business towards normal conditions. There is nothing to be feared if we show a few jolts but the lessening of industrial activity will not be sufficiently severe to be alarming and those who fear a depression will likely be wrong.

"There is much work in arrears, much construction work to be done. A large demand is assured to supply our own people and the whole world. A downward trend in prices is taking place and the market will find its normal level, but what is its normal level? No one knows. When the public take all the goods produced at high prices it is useless to argue for lower prices. Speaking of hardware, we must not allow our products to be classified in our minds or in the minds of our customers, in the same list as the more speculative commodities such as coal, sugar, cotton, silks, etc.

"Regarding general conditions there is no question about them whatever. In regard to crops this year we have a most bountiful harvest and the very immensity of it will probably bring to normal levels the prices of foodstuffs.

"Those lines which require employing the least labor will come down first and to the greatest extent. Iron and steel premium prices will probably disappear, but prices will not come down as rapidly as other lines and the new normal level of steel will probably be a surprise to most of us.

"Iron and steel in its many finished forms passes through so many processes and probably employs a larger percentage than any other general commodity. Going back to the fundamental articles we take ore. Ore in the ground is worth 10 to 20 cents a ton; coal in the ground is worth 20 to 30 cents a ton. These materials amount, with other alloys, to 15 per cent. while 85 per cent. of the value represents labor costs. You know the position of labor to-day. We may consider wages high but there is no rush downwards. There will be a recession in labor but only as conditions warrant. So we see that articles with the least labor will be affected the least.

Comparison of Prices

"I have compared prices of materials of a year ago with the present. These figures include 10 per cent. United States exchange in Canadian currency and exchange is figured on just that portion bought from the U.S. The prices are for the third quarter compared with 1919 and are as follows:—

Ore is 31 per cent. higher.
Coal 109 per cent. higher.
Coke 118 per cent. higher.
Fluxing stone 20 per cent. higher.
Alloys 49 per cent. higher.
Scrap 45 per cent. to 80 per cent. according to grade.
Fire brick 52 per cent. higher.
Ingot molds 57 per cent. higher.
Repair parts (iron) 42 per cent. higher.
Repair parts (steel) 20 per cent. higher.
Oils 32 per cent. higher.
Engine oil 90 per cent. higher.
Black oils 145 per cent. higher.

"Wages are the most important item," said Mr. Whitton, stating that all those present knew the increase in this line. He, however, advised that no undue pressure be brought to bear to bring down wages too suddenly.

Mr. Whitton pointed out that the above figures have greater significance when it is borne in mind that there are four or five tons of material in one ton of steel.

"There is a great shortage of iron and steel," said Mr. Whitton, "it being essential in so many different requirements such as machinery and production of other goods, in farming, mining, etc. The demand in Europe is also large and their production has been decreased."

Discrepancy in Steel Prices Causes Misapprehension

"Speaking of prices, there is a very great variation in the price of iron and steel between the largest corporation in the United States and the other makers and no one attempts to explain. I have no doubt that there are good and sufficient reasons for that position. Everyone concerned thinks that in Judge Gary there is one of the cleverest men in the iron and steel business. Of course we know they have advantages over any other iron and steel producer, when you take into account their costs, properties, ownership of railroads and boats, their large production. But

OFFICERS OF THE CANADIAN WHOLESALE HARDWARE ASSOCIATION FOR 1920-21

President, Robert Starke, Starke-Seybold, Ltd., Montreal, P.Q.

Vice - President, Thomas M. Birkett, Thos. Birkett & Son Co., Ltd., Ottawa, Ont.

Secretary - Treasurer, James Hardy & Son, Toronto, Ont.

Executive Committee, George C. Davis, Frothingham & Workman, Ltd., Montreal, P.Q.; Hector Prudhomme, A. Prudhomme & Fils, Ltd., Montreal, P.Q.; S. R. Kennedy, Kennedy Hardware Co., Ltd., Toronto, Ont.; S. Rae, D. H. Howden & Co., Ltd., London, Ont.

there is some motive other than this because their exports are at much higher prices than their domestic prices. There is that discrepancy and this is apt to cause misapprehension as to values in the minds of buyers.

"In the New York Times of October 5th Judge Gary, speaking as to the effect of the advance in freight rates on prices, said: 'I hope it will not cause the Corporation to advance prices; however, I am not certain as yet what the effect will be and prices may be affected to some extent. Rails should be slightly advanced.'

"This is interpreted to mean that the Corporation is at least more likely to advance their prices than to recede," said Mr. Witton. Continuing: "Take the case of the independents. Their costs of manufacture are very high and the difference in prices between the corporation and the independents does not mean that this is a margin of profit which the independents enjoy over the corporation. We must not expect too rapid or severe cuts in steel prices. There are only a few people who can wave the magic wand and reduce prices but too rapid reductions would cause unemployment and the lessening of purchasing power. Only steady production will bring values down.

Improvement in Labor

"Labor conditions are improving in efficiency. Men respect their jobs more than they did, they are willing to give you a little more labor in return for the prices that you are paying them. We have probably not reached the pinnacle by long odds, of the efficiency of labor. Wages are at the top notch and the men and the unions will fight reductions. On the other hand is the tendency to-day for the open shop. That is the only basis on which we should work.

Immigration

"Immigration is large and increasing. A great number of foreigners went back home after the armistice and when they get money again they will be back. There are many we do not want back and there are a number who will not be allowed to come back. But this immigration which is coming in at the present time is going to bring us a supply of labor and more efficient labor than we have had for some time. We have been very short of common labor. British subjects do not like common laboring any more. At the same time you must recognize that the unions will make strenuous efforts to restrict immigration as much as possible through politics and other ways.

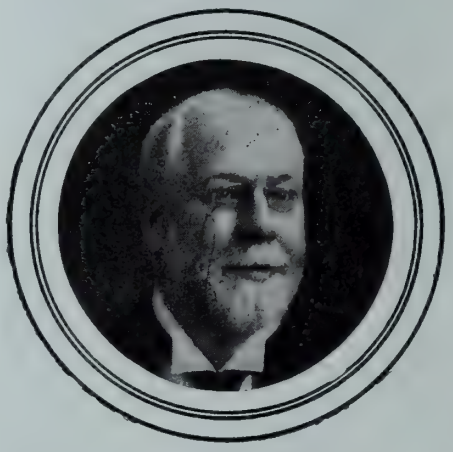
Must Keep More Trade at Home

"Another thing we can do in helping on the downward trend. Canadians have got to buy more Canadian goods and curtail purchases in other countries. Figures for August show that the United States bought from us $47,000,000 worth of goods this year, an increase of $3,000,000 over the previous year. In the same month we bought from the United States goods to the value of $85,000,000 which was $22,000,000 increase. We had an adverse trade balance in that month of $38,000,000.

"We must look after ourselves first as they do and which we must respect them for. This will apply to all of us in the coming year. One point you are apt to foret that when we pay over that $38,000,000 we have to send along another $3,800,000 to pay the exchange for one month on the increase alone without the exchange which had to be paid on the total value of goods purchased. In 1920 so far we have bought from the United States goods to the value of $445,000,000 as against $335,000,000 last year, or an increase of $110,000,000 up to the end of August.

More Commercial Patriotism Needed

"There is more value in the home market and it is more valuable to us to buy



JAMES HARDY

Toronto, secretary Canadian Wholesale Hardware Association.

here than the mere money difference in the cost of the articles we buy. While we should at all times study the interests of Canadianism do not forget that right now what we want is a great deal more commercial patriotism than we have had in this country. My impression is that business in Canada is going to be satisfactory and we have in our own hands largely the making of our own future. We have enough business to keep our industries going. Several outstanding men have recently spoken on the subject and I like to ponder over their statements. Sir Edmund Walker, President of the Bank of Commerce, questions the loss of purchasing power of the people and says that on the new and sounder level of prices an enormous volume of business should be possible, that prices will be high for a generation. Judge Gary, James Campbell, J. Topping, Charles M. Schwab and other leaders in the iron and steel industry, all express themselves as of the opinion that the steel industry is in a healthy condition, that high costs of materials and freights must keep prices up, the process of deflation will be slow. Steel is scarce in the markets of the world. Railroads use one-third of the production of the mills and during the past five years purchases by the railways have been much below normal. The deficit has to be made good. Construction needs of the present and future are very large. This is not a time for buyers to lose confidence. We knew how to go up, we knew how to meet our difficulties. We know how to come down and we have the ability to do it safely. All we have to do is keep our heads level, to instil in our men the idea that we have all still got to work, that all this theory that living is possible without work is wrong, and if we so order ourselves there is nothing in the way of disaster in any shape or form ahead of us."

Outlines the Work of O.R.H.A.

IN the absence of President Wanless of the Ontario Retail Hardware Association, Secretary W. F. Macpherson was in attendance and spoke as follows:

"I wish to thank the association for the courtesy of an invitation, showing that you have an interest in the Ontario Retail Hardware Association. In some trade and other newspapers we read that the middleman is non-essential in carrying on the business of the country. As a retailer I can only say that if it had not been for the wholesaler in the past few years, God help us retailers. The stocks which wholesalers carried and the forethought which they used enabled the retailer to get constant supplies of goods. The wholesaler has evidenced his usefulness more particularly in the last few years.

"A few months ago at a manufacturers' banquet in Hamilton, I outlined to you the possibility of what might happen in connection with our association. That we had got to a point when we had either to go ahead or quit. The executive committee has prevailed on me to devote my whole time to the work of the association, and in that position I expect to have closer connection with the wholesalers and manufacturers. I anticipate that the courtesy and ease with which I have had any adjustments made in my present business will be maintained. In carrying on the work of the association in the future we are going to develop along the lines of co-operation between the dealers. We are going to adopt certain lines of service and information to keep them posted on prices, figured down to net costs.

Don't Intend to Allow Gas to Be Shut Off

London, Ont.—Western Ontario municipalities are taking concerted action to prevent the gas companies from cutting off the gas supply in order to intimidate the consumers into paying the higher prices sought. Papers have been prepared for the municipalities of Belmont, Westminster, Dorchester, Dresden and Tilbury by J. M. McEvoy and an injunction will be issued, just as soon as it appears definite that the gas companies really intend to turn off the gas.

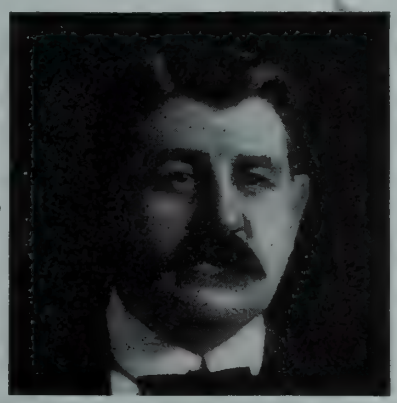
Dangerous Propaganda Being Spread re Market Tendencies

COLONEL ARTHUR HATCH, Canada Steel Goods Company, Hamilton, Ont., had retired from the banquet room to dress and attend to a few other little matters, the hour having been rather late, but he was recalled and gave a short address introduced with appeal for the strength born of union, through an organization of the kind he was addressing. Colonel Hatch continued as follows:

"The publicity given recently to the announcement of Henry Ford in reference to the reduction of prices on his automobiles, which has been heralded by the newspapers and trade papers, excusing perhaps Hardware and Metal, with reference to the effect that reduction would have on prices, is unwarranted. If you figure it out you will find that Henry Ford has reduced the price of his sedans $50 and advanced the price of his coupes $50 and he sells 160 coupes to 100 sedans. This is figuring the Canadian prices. This has been heralded as one of the reasons prices are going down. This matter of Henry Ford and the question of the reduction of prices is going to cause the very thing you do not want to cause, that is a reduction-in-price problem which will reduce the assets which you have in your warehouse. This idea has caused people to hesitate about placing orders and this means that many men are going to be thrown out of work. There is no manufacturer fool enough to manufacture unless he is assured he is going to have a market for his goods and if he does not produce it means there is going to be a shortage of goods and conditions will be worse than before. There would be a stampede and prices would go higher than ever. Now these things are all due to imagination. Everybody knows that the main thing which enters into the production of anything today is labor. The goods you manufacturers make and the goods you sell are principally labor.

"There was a comment in one of the papers recently about reductions in clothing prices. In a suit of clothes there is six pounds of raw wool at 12 cents per pound, 22 cents worth of cotton and 32 cents worth of jute. The rest is labor. Wages are not reduced, and if you reduce labor you will reduce the possibility for the sale of your goods.

"Some editors are not doing what they should be doing if they preach reductions. I don't believe there will be any reduction in price of hardware. I am certain there is not going to be any reduction in the price of labor and I recommend that every man pay attention to this, that he buys conservatively of what he wants but buys enough to supply his demand. He has got to supply the people with a sufficient quantity of hardware which will be necessary to build up this country. During the last two years the population of Canada has increased from 7,500,000 to 8,900,000. These people coming in must be housed. It is our obligation to see that these people have a place to live. You must supply the hardware and if you have not got the stuff to supply them you forego your obligation and you admit to the people who come here to make their home that you are not able to supply them with the necessary things to make a home."



G. C. DAVIS

Montreal, elected a member of the executive committee of the Canadian Wholesale Hardware Association.

President Whitwam, commenting on the address of Colonel Hatch, remarked that after such a plain talk as that no reduction in price of builders' hardware could be expected.

How U.S. Manufacturers Are Dealing With Readjustment Problems

UNITED STATES manufacturers were represented by E. S. Jackson, of the Miller Lock Company, Philadelphia, who spoke as follows:

"As a citizen of the United States I am very proud to be here, but just why you should call on a locksmith from my country for a general patriotic talk on Canada is a little incomprehensive. I would rather try to sell a bill of hardware to T. B. Williamson (H. S. Howland Sons & Co.) than to make a speech. Referring to that balance of trade between Canada and the United States, I would suggest that the solution of it is not in purchasing less goods from the United States, but to sell us $38,000,000 more of your products.

"I would be a coward to come to this dinner and yet not try to bring something which would be of some account, and I thought it might be interesting to you to understand some few of the difficulties with which the business men of the United States are at present confronted."

Mr. Jackson hereupon enumerated a number of headings, of which he had made a note, concerning ways of meeting the difficulties mentioned. These were as follows: 1. Avoid getting scared. Better to go out and get arrested than get scared. 2. Stand for Americanism. 3. Know our constitution. 4. Take a greater interest in governmental affairs even to the question of personal sacrifice. 5. Back our railroads to solve the problem and cure sluggishness in this regard. 6. Face the labor problem; keep open shop. 7. Live right and think right. 8. Devote attention to export trade. 9. Get the big profit idea out of our heads. 10. Look for better business after January 1, 1921. 11. Sell values and not terms.

A number of commandments as published by the Manufacturers' Association of Pennsylvania were very interesting as read by Mr. Jackson.

The first section addressed to organized labor commanded that the union card be not put before the country's flag; that denial shall not be given to the right to work and receive a fair wage; that the worker shall not demand a good day's wage in return for a bad day's service.

The section addressed to capital commanded that a fair living wage shall be paid to each worker; that a safe place shall be provided in which the employee shall work; that the business will be operated as efficiently as possible; that extortionate profits will not be demanded.

The section addressed to the general public commends that they shall willingly pay a fair price for all commodities; that they shall pay taxes cheerfully and thus assure the general welfare.

Mr. Jackson concluded with expressing the greetings of his associates in the local organization.

Advise Filling Up of Store Shelves

H. S. Alexander, of Wood, Alexander & James, Hamilton, Ont., gave a word of advice as follows:

"My advice to Canadian manufacturers is to get busy and give us some goods. We have lots of orders, but you will not give us the goods. A day or so ago we got a letter from our Winnipeg branch to fill up their shelves, and I believe that is sound advice. If manufacturers have no goods on their shelves and everyone wants goods, there can be little talk of lower prices. There is no reason why the level of prices should not be maintained for some time to come. Sane merchandising is what is required under present conditions."

Editorial Briefs

THE luxury tax has long been a much disliked means of revenue production in Canada, especially among retailers. It is therefore with some hopefulness that a report is received that it is likely to be eliminated and a general turnover tax substituted.

* * *

MANY employers of labor, whether on a small or large scale, can benefit from taking the advice outlined in an article in this issue entitled Walk Humbly, so that they can secure the utmost co-operation of employees.

* * *

WE are now undergoing the process of readjustment, facing conditions and making adjustments which some business men claim should have been made immediately following the armistice. One benefit to be derived is the greater return from money expended for labor. The hardware trade will probably be the last to feel any decided slump in business. Sudden sharp price declines have not been noticeable in hardware as in many other lines. Hardware merchants deal in necessities, not luxuries. While the hardware business may not have the gilt and glamor of some other lines of business, neither has it the nightmare of depression to worry about.

Probable Tendency of Steel Prices

THERE has been a great deal of groping in the dark recently in the attempts of those who are expected to know something, as to the probable trend of prices of hardware commodities. Conditions recently have been such as to render very difficult any intelligent forecast and this condition has been accentuated by the declining prices of many commodities, though excepting most hardware lines in this regard.

In considering this situation there is a tendency to bring in many side issues which only becloud the chief issue. Eliminating these, however, it is found that there are certain fundamental principles responsible for the present condition and with these in mind it is a little easier to form an opinion. Mr. F. H. Whitton, of the Steel Company of Canada, Ltd., outlined very concisely and clearly the main factors in the situation at the recent banquet of the Canadian Wholesale Hardware Association (reported elsewhere in this issue), when he said that labor represents about 85 per cent. of present steel prices and that there is little indication of any sudden decline in labor costs, nor is such desired in the best interests of manufacturers. He pointed out that hardware lines were not to be classed as speculative, such as coal, cotton, silk, etc., which have figured prominently in price reductions. He stated definitely that no rapid or severe cuts in steel prices could be expected.

The downward trend of prices in some lines to-day is described as the first movement towards a readjustment to normal business conditions. Undoubtedly the market will find its normal level, but just what that level will be is difficult to say. The advice to buyers to retain confidence and carry on business as usual in face of the present conditions is very sound, and some are carrying out this policy to the utmost at the present time by buying in sufficient quantities to meet the demands of trade.

Evil Propaganda

DURING the war there was a strict censorship of the press of Canada in order to guard against the publication of information which might form the basis of propaganda to be used against our interests. To-day the war is over and the censorship is lifted except insofar as editorial supervision is concerned, yet there is to-day being spread throughout Canada a very sinister influence in the form of information being given through some daily newspapers which gives a wrong perspective to the reader. There has been much talk recently of declining prices, of substantial cuts in prices of certain automobiles and other lines. Many newspaper editors without attempting to analyze the situation or confirm the information play up the reports boldly. Persons reading such reports get the idea that all prices are tumbling and they curtail purchasing. No one needs to be told what will happen in this country if its regular channels of business are to be stagnated by such unfounded information.

This is a time for buyers to have confidence. There is a big field for business in this country and abroad, during the readjustment period to normal conditions. The opinion of those at the head of affairs is that there will be no sudden or severe cuts in prices, with the possible exception of certain speculative lines whose present value is largely inflated. The market will find its normal level, but the downward tendency will be gradual in most lines. As one authority on the subject stated recently: "We knew how to go up and we know how to come down, and we have the ability to do so safely." Let the press do its part to maintain stability and not run to flights of imagination to the detriment of the country's business.

Watch the Markets Closely

NOW is the time, if ever, that the retail trade should watch closely the trend of prices. Daily newspapers have been featuring for some time the prospects of a drop in everything so that the public have got into the habit of thinking that everything is coming down to-morrow or the day after. This naturally curtails their purchases. The daily papers have overlooked entirely the fundamental principle of business—supply and demand. Supply is increasing in a great many cases compared with demand and naturally this tends to an easing off in prices. On the other hand there are cases where supply has not been increasing and higher prices are to be expected. At any rate, no sudden declines can develop for some time.

During the last few years the retail trade have had no difficulty in selling goods. People have come in and bought for future use, so that business has always been good. We are entering a period when the retail trade must exercise its selling ability and show the consumer the exact condition on the various articles. This necessitates a careful study of markets, so that the proper information can be passed on by the retailer to his customer, when the occasion arises.

Would This Solve Tax Problem?

Present System of Taxation Unpopular—Luxury Tax May Be Eliminated in Favor of General Turnover Tax—Small Tax on Turnover Would Spread Out So as to Be Scarcely Noticeable and Would Be Most Popular.

THERE is no doubt that the present system of taxation in Canada, with special regard to the latest regulations collecting both a luxury and turnover tax, is very unpopular. It is our opinion that the luxury tax, always cumbersome and unwieldy, will be eliminated and either some new form adopted or the substitution of a general turnover tax in place of the various existing methods as has been advocated in past issues of Hardware and Metal. A great deal of discussion has taken place on this subject and one of the latest interesting contributions is an article by Charles E. Lord, a member of Galey & Lord, Philadelphia, and a recognized authority on taxation, in "Forbes Magazine," as follows:

We are admonished that with all our getting, we get understanding. Surely, there is no branch of human knowledge in which this is more desirable than in the realm of the theory of taxation.

In a country where politicians seek to do the thinking for the people, it has been considered easy to convince the average citizen that the rich can be taxed and that the poor can escape the burden of sustaining the Government.

Newspapers of a certain class in commenting upon the annual reports of large industrial corporations, draw attention to the large dividends and raise the cry of extortionate profits.

The United States Steel Corporation, for example, in 1918, paid a Federal tax of $274,000,000. What is the sequel to this story? We find that, in 1919, the same organization paid only $52,000,000, which means that there was a loss of revenue of $222,000,000 from that source, which can only be partly accounted for by a difference in the rate of taxation.

The amateur analyst deduces that because the profits of a large corporation, such as the American Woolen Company, seem huge in 1919, that, therefore, they will continue to follow along at the same rate. The president of that company asserted recently that for every 75 cents in profit, the Government taxes were $1.50. Who is paying the tax? One journal raises the question: 'Are we paying taxes on profits in this country?'

Every business man, although he may not make high pretentions as a schooled-economist, realizes that our present system of taxation does not provide for a tax which rests where it falls. The burden is easily shifted from one shoulder to another, and in the last analysis it is the consumer who pays.

Amount of Tax Indefinite

The manufacturer, under the present system of taxation, is always choosing between two horns of a dilemma. It is certain that he cannot escape Federal taxation. He must think far in advance, as every business man must, and be able to predict, with tolerable certainty, that he will have the money wherewith to pay his obligations to his government.

There is no system of calculating, exactly, what he must pay. The manufacturer or merchant knows, months ahead, what his rent will be; what he will have to spend for labor (provided the unions keep faith with him); and what he shall charge off against depreciation and various factors incident to doing business.

When it comes to his relations with the Government, he must consider that he has to pay an indeterminate and indefinite tax, for the chances of the commercial world are such that no one can predict what his profits will be. If he has not sufficient vision or acumen to make enough profits to absorb his taxes and leave his net at least as great as before, he gives a very poor account of his stewardship to those interested with him. If he charges more than enough to provide for a fair profit, as well as for the payment of a heavy tax, he finds himself called a "profiteer."

Let us consider the case of a merchant who has been making a profit of $100,000 a year. He suddenly finds that he is to be taxed more than $30,000 upon it. In order to keep up his average income, he seeks to gain a larger percentage of profit than he has heretofore made. In other words, he aims to make a profit of, say $1.60, where he has been obtaining only $1, so that he may meet the accumulating surtaxes on the larger amount, and, at the same time, secure his normal profit. When he has made this allowance, he passes his products to the wholesaler or jobber and they to the retailer, all of whom repeat the process.

A government expert has estimated that merchandise is thus loaded with at least 25 per cent. increase in prices. Considering the advanced cost of many commodities and of the necessities of life, this is probably a conservative estimate.

Under the present system of taxation, therefore, there is a tendency on the part of corporations and of manufacturers to make moderately sure that they will not have to pay any excess profits tax to the detriment of their customary net profit. Some of them have also indulged in an orgy of spending. They have made extravagant expenditures in the conduct of their business, and these large sums also are saddled, eventually, upon the consumer.

Profits which are here to-day and there to-morrow, profits which may be juggled out of existence, are not things upon which one may base a sound and equitable system of taxation. Even assuming that human nature is always honest and upright, there are too many chances in the commercial world which will convert the profit of one year into the dead-loss of the next.

It is on this account that there has arisen in this country a strong sentiment in favor of a system of taxation which will have none of the undesirable features of the present method. The plan here suggested rests upon a foundation which has endured for all time, the buying and selling of commodities. Theories of taxation may come and go, but trade has existed since the day of Nineveh and Tyre.

A tax levied upon what a man spends rather than on what he saves offers the ideal solution to a vexed problem. If he spends little, his tax will be small. If he is able to pay large sums to maintain himself in accordance with a higher standard of living, he is the more able to support the institutions of his country. A tax on sales, say, of 1 per cent., which, considering the different hands through which merchandise passes, might be counted as at the maximum of a 3 per cent. tax, should meet all the requirements. Surely, a load of even 3 per cent., since the tax is paid by the ultimate consumer, is much easier to bear than the present one of 25 per cent. which represents a very conservative calculation.

William B. Colver, of the Federal Trade Commission, said recently in addressing the National Convention of the Wholesale Grocers' Association, that the crux of all prices was in the excess profits tax. This certainly holds good with regard to food of all classes, and many of us have demonstrated again and again that it also applies to shoes, apparel and all the necessities, comforts and even the luxuries of life.

The laboring man and the farmer is no longer to be deluded by the special pleader who would make it appear

News of Western Canada

People Can Best be Served Only Through Medium of Retail Merchant

Provincial Board of Manitoba Retail Merchants' Association Meet in Winnipeg—Matters Dealt with in the Interest of the Retailer—Resolutions Passed.

By Staff Correspondent Hardware and Metal.

A. G. BOX, of Pierson, Manitoba, president of the Manitoba branch of the Retail Merchants' Association, in presenting his report at the annual meeting of the provincial board in Winnipeg recently, referred to many questions of importance to the retail trade. The problems of merchandising, he said, had multiplied since the war. Present day institutions are the subject of criticism, analysis and examination. The world is searching for better methods in government, education, business, religion, better working and living conditions. As merchants we must do our part in assisting the public in getting at the basic facts in present day social and economic problems. We must be prepared as opportunities present themselves to show how the people can be served more advantageously through retail merchants than by any other method. The retail merchant has been singled out as the cause of the present high cost of living. The Board of Commerce, however, has made the statement that outside of a few rare exceptions, in all their examinations, there was no evidence of unfair profits (or profiteering) among retail merchants.

To-day we must organize as we never organized before. We can admire the progress made by farmers and labor through their organizations and the departments established by the Government. It is our duty to follow their lead and have a department for the retail trade of Canada within the department of Trades and Commerce at Ottawa, which shall be for the information, improvement and benefit, not only of retailers, but in the best interests of the people of Canada. The Government should recognize the importance of the retail trade of Canada and institute activities, which will improve the service in whatever ways are possible.

Secretary's Remarks

Referring to the action of the advisory committee on commercial education of the University of Manitoba, in conducting evening classes in commercial subjects during the fall and winter months, the secretary of the retail merchants, J. H. Curle, expressed approval, also drawing attention to the fact that extension work in merchandising has been established at the university in the form of short courses. As a part of the plan for the development of the department of business organization and research at the university, competent men will be placed in the field to analyze business methods, obtain information through interviews with business men and their employees, with a view to organizing classes in these subjects, which the demand suggests. Negotiations have been commenced to have the public schools undertake some instruction in merchandising. A good deal of the present day suspicion and distrust aimed against the retail trade has its foundation in ignorance of the principles of merchandising. The boy and girl do not know the meaning of cost.

The manner in which certain examinations and inquiries were conducted by the Board of Commerce revealed the fact that only qualified, experienced business men should have been called upon to examine, judge or control the affairs or activities of retail merchants. Through the Dominion officers of the association it was recommended to the Government that qualified, experienced business men be appointed on the Board of Commerce, as that body was expected to make decisions which could only be made satisfactorily by men who were capable, qualified, trained and experienced business men.

During the year the Retail Merchants Association was instrumental in securing legislation in regard to a number of resolutions passed at the last annual meeting. Among them was one in regard to half-holidays, also one in regard to the resolution on licenses respecting goods manufactured in Manitoba.

Some Resolutions Passed

A resolution asking that instead of placing the collection of the luxury tax on the retail trade that it be collected at the source of supply, namely, from the manufacturer and the importer, and in the same manner as all systems of taxations are absorbed, was unanimously carried.

Other resolutions passed were:

That whereas the Inland Revenue Department, ruling No. 3 B, dated Sept. 8, 1920, is asking retail merchants to wait for refunds until the end of each quarterly accounting period when vouchers would then be passed, it be strongly urged on the Government to change this ruling so as to permit merchants to make refunds to customers at the time of the return or exchange of goods.

That this meeting recommend to the executive that the fees be as follows: $15, $25, $35 and $50, and optional above that amount.

That your executive take such steps to have a department of community organization and development established under the direction of the Department of Education, so that the clubs so formed will be able to take advantage of the services of the various departments of the Provincial Government.

Whereas the Tax Commission appointed by the City of Winnipeg, and the Tax Commission appointed by the Province of Manitoba both recommend that the present system of collecting the business tax should be changed, in view of the inequalities which exist, it was resolved that the executive take this matter up with the Provincial Government with a view to having the recommendations of the commissions put into effect.

That this meeting endorse the action of the Winnipeg Board of Trade in deciding to appeal the question of freight rates.

Trimming the Fall Hunting Window

A good fall hunting window makes an attractive display at this time of the year, in those sections where hunting or shooting of any kind is a popular sport. This may embrace the hunting of game, trapshooting, etc. The above shows a window trimmed by A. Cole for the N. B. Vickers' Hardware of Drumheller, Alta. The store is very proud of its windows and local townspeople have come to take almost as keen an interest in what "Vickers' are showing to-day" as the management. One of the store salesmen, who has ability for such work, is absolutely responsible for keeping interest alive insofar as the windows are concerned.

In this window it will be noted game is shown through a background of evergreen branches to give the whole a realistic atmosphere. On shelves and on the floor of the display are arranged boxes of ammunition. Rifles, hunting garments, flashlights, thermos bottles, etc., are other lines which can be shown to advantage in such a display. It will be noted that window cards have also been made use of.

Mr. Vickers is a pioneer of the Drumheller district, having opened his store in 1911, at which time the railway tracks were first being laid to the town. A small stock of hardware, along with general lines, was at first stocked. Later he built a garage, which to-day is the largest in the town. He does a good auto accessory business at both the store and the garage. He believes Drumheller is in for big developments in the future and is proud of the fact that he is in on the ground floor with such a thriving business.

Western Notes

Swift Current, Sask.—Mr. and Mrs. W. R. Mitchell recently arrived here from Regina. Mr. Mitchell is local representative for Wood Vallance, Ltd., Winnipeg.

* * *

Winnipeg.—W. V. Goodwin, known as the "Electrical merchandizing wizard," is paying a visit to Winnipeg and will address a convention in the Royal Alexandria Hotel on October 14 and 15.

Mr. Goodwin is touring the country on a "co-operative" mission.

* * *

Calgary.—Nitroglycerin was used successfully by safe crackers to blow open the safe in the office of the Canadian Oil Company, Ninth Ave. and Tenth St. West. Two hundred and fifty dollars in cash and a package of Victory bonds, belonging to one of the company's travellers, worth $400, were secured, and a note was left containing two words, "Thanks, Submarine."

* * *

Darmody, Sask.—The village of Darmody was seriously damaged by fire when the hardware store of Brown Bros. and an adjoining building were destroyed. The damage was estimated at $13,000.

* * *

Fire at Grassy Lake Does $60,000 Damage

Grassy Lake, Alta.—Fire originating from an unknown cause wiped out the greater portion of the business section of this town last week. Swept by a strong southwest wind, all buildings between Watson's brick store on the west, and Larson's brick hardware building on the east, were destroyed by the flames in a short time. The loss is estimated to be between $50,000 and $60,000. The insurance, it is said, will not cover half of this amount.

* * *

British Columbia Steel Industry

Vancouver.—Establishment of an iron and steel industry in British Columbia can be expected shortly. The investigation committee sent to Chicago by the Provincial Government to report on the success of electrical furnaces there has returned and reported favorably. It is the intention first to advocate establishing an electric scrap mill in British Columbia to handle the large quantity of scrap iron and steel that is now sent every month to Seattle mills.

Events in the Trade

Business Changes

Exeter, Ont.—Hugh Spackman, hardware merchant, has sold his business to B. W. F. Beavers.

New Firms

Richmond Hill, Ont.—C. N. Cooper has opened a new hardware store here.

Personal

Toronto.—J. A. Henderson, Brampton, Ont., and J. Henry, of J. Henry & Sons, Orono, Ont., were among the visitors to Kennedy Hardware last week.

* * *

Toronto.—The following were among the visitors to H. S. Howland Sons & Co., Ltd., last week. R. Blain, Brampton; T. A. Binns, Newmarket; J. W. Perkin, Unionville; Aurora Hardware Co., Aurora; J. D. Rowland, Mount Albert; W. J. Simpson Strand, representative of Macdonald & Son, King; H. Spofford, Elmira; representative of Hood Bros., Duttonville; J. W. Stone, Bond Head; E. B. Brown, Victoria Square.

* * *

Montreal.—C. W. Monk, general sales manager, Canadian Explosives, Limited, Montreal, accompanied by W. Brainerd, vice-president, has returned from a tour of inspection of Western branches of the company, including Vancouver.

* * *

Montague, Que.—Charles Thompson, of Poole & Thompson, was married a few days ago and is spending part of his honeymoon in Montreal.

* * *

Lower Montague, Que.—George Poole, of this town, has returned from Montreal, where he has been for the past six weeks. While there Mr. Poole underwent an operation at the Montreal General Hospital and is feeling quite recovered from the effects of this, since leaving the institution.

* * *

Montreal. — Col. Robert Starke, of Starke Seybold, Limited, left on Friday to attend the hardware convention at Atlantic City.

* * *

Montreal. — Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Ltd., spent a few days in Montreal.

* * *

Montreal.—S. F. Wood, general manager, the Hobbs Manufacturing Co., Ltd., was in Montreal for a few days visiting the company's branch here.

Montreal.—Harry M. Patterson, president, the Stratford Brass Company, Ltd., Stratford, Ont., was in Montreal for a few days this week.

* * *

Montreal.—T. R. Coates, sales department, Henry Disston & Sons, Ltd., Toronto, called on the Montreal trade this week. W. W. Plankinton, of Luther Grinder Manufacturing Company, Milwaukee, was a Montreal visitor during the week. Mr. Mason, of the Dolphin Chemical Company, Ltd., Chicago, was in Montreal this week.

* * *

Montreal.—Th. de Schryder, general manager and director of C. H. de Schryder, Limited, Auckland, New Zealand, was a caller at the Montreal office of Hardware and Metal last week. Mr. de Schryder is on his way home after an extensive visit to Canadian centres and is returning by way of New York.

Baseball Scores Attract The Crowd

St. John, N.B.—W. H. Thorne & Co., Ltd., hardware, adopted the novel scheme of showing the baseball scores of the world series between Brooklyn and Cleveland each day of the games. A large crowd was attracted. (A picture showing the crowds will be shown in next issue of Hardware and Metal.)

Hardware Stores Feature Flashlights, Etc., During "Safety Week"

The past week has been known as Safety Week throughout the country and it is to be an annual event having for its object the prevention, as far as possible, of accidents. It is realized that the number of deaths from accident in Canada are assuming large proportions and some such concerted action is necessary. Some Toronto hardware dealers took advantage of the occasion to use a window trim of flashlights and such lines which play a part in avoiding accident as part of their usefulness.

British Firm to Erect Match Factory in Quebec

Montreal.—With the intention of considering the erection of a match factory in the province of Quebec, Sir Alexander H. Maguire and Mr. D. P. Maguire, of London, England, have returned to Montreal after a trip to England in connection with the enterprise. They are accompanied by Mr. S. Bylander, consulting engineer for Maguire, Paterson & Palmer, Ltd., who control a number of match manufacturing establishments in England. Mr. Bylander has had to do with some important building construction in this country. His services are to be engaged, in an advisory capacity, in relation to the carrying out of the company's enterprise in Quebec, arrangements for which Sir Alexander is now here to complete.

Adams and Vandusen Moving Into New Building

Picton.—Adams and Vandusen, a well-known local hardware firm, are moving into their new store which has just been completed.

The building consists of two stories and a basement and is a cement block structure.

The main floor will be used as a salesroom and office, with a workroom at the rear.

The second storey will be used for showroom purposes, displaying a list of stoves, ranges, etc.

Plan Big Industry for Quebec Province

Montreal.—It is reported that Lord Burnham and Lord Desborough, who came to Canada to attend the congress of the Chambers of Commerce in Toronto, have a great industrial project in view.

The project elaborated comprises the creation of a great steel works at Chicoutimi and at Quebec, which will become great steel manufacturing centres; the construction of a railway from Hudson's Bay to Seven Islands and the establishment of pulp and paper mills at Seven Islands and at all places along the new line where water power is available.

Broom Activity Restricted

Montreal.—The situation on broom corn is more favorable than it was a few months ago and demand has lessened considerably. Prices have also eased off somewhat and it is doubtful whether there will be any further advances as prices have become very high and are much above normal. Stocks available of various grades at the present time are reported to be much more abundant than for a long time past. The same conditions apply with regard to whisk brooms.

Addition for K. & S. Plant

Toronto.—A permit has been granted the K. & S. Tire and Rubber Co. to make an addition to their factory at a cost of approximately $5,500.

To Make Pliers, Saw Sets, Chisels, Etc., in Canada

St. Catharines, Ont.—The Walton-Carlson Co., Ltd., St. Catharines, Ont., which was incorporated Feb. 15th, has built a new factory on a three-acre plot on Woodburn Ave., installed board drop and trip hammers, presses and all necessary machinery for manufacturing a line of high-grade tools.

These lines will comprise engineers' D.H. and "S" wrenches, cold chisels and punches, auto pliers and lever saw sets. Most of these tools will be on the market within the next few weeks and new lines will be added from time to time.

This company will be represented in the West by Bissett & Webb, Limited, while John R. Anderson, of Montreal, will take care of their interests from Montreal to Newfoundland. The Ontario jobber will be looked after by the St. Catharines office.

Coleman Company Make Lanterns and Lamps in Canada

The Coleman Lamp Company, manufacturers and wholesalers of gasoline and kerosene table lamps and lanterns, have established a branch factory and office in the city of Toronto, to manufacture and distribute their products throughout the Dominion of Canada.

W. C. Coleman, president of the company, and inventor of the "Quick-Lite" device, who has put out all these goods, has been in Toronto and established the company, and they have erected a factory at Queen and Davies Streets. E. D. Ranck, secretary and treasurer, formerly of Johannesburg, South Africa, who comes from the Coleman office in Wichita, has charge of the Toronto office and sales. H. H. Minard, vice-president, formerly of Calgary, Alta., coming here from the Wichita factory, will be in charge of the manufacturing of the products of the company.

The parent company and American factory of the Coleman Lamp Company, Ltd., is located at Wichita, Kansas. It has branches in Toledo, Chicago, Dallas, Los Angeles and Atlanta.

Ordered to Stop Using Electric Heaters

St. Thomas.—The local Hydro-electric Commission has issued an order prohibiting the use of all types of electrical heating apparatus in the city until further notice. The acute power shortage in the city, coupled with the demands for energy made by the Canadian Edison Phonographs, Limited, the new industry, has necessitated this action.

The citizens of St. Catharines have also been asked to do this on account of insufficient power for street lighting.

Exports of Structural Iron and Steel from U.S. to Canada

During August, 1920, there were 11,904 tons of structural iron and steel exported from United States to Canada valued at $692,698 being much more than to any other country in the world.

Fire at New Glasgow, N.S.

New Glasgow, N.S.—Fire broke out in a shack at the plant of the Nova Scotia Steel & Coal Co. in Trenton, N.S. Several barrels of varnish were stored in the shack, and when these caught, the fire was spectacular, the flames shooting high in the air. The Trenton firemen were promptly on the scene, and soon extinguished the blaze. No persons were hurt, and the loss is comparatively small.

Great Britain's Exports to Canada of Pig Lead

Great Britain during the month of August exported 80 tons of pig lead to Canada; during July, 40 tons, and during June, 228 tons.

Imports from Canada of refined and G. O. B. spelter in August amounted to 103 tons; in July to 125 tons, and in June to 50 tons.

Canada Continues to Be Best Customer of U.S. in Sporting Goods

Canada again, as for the eight months past, is the leading customer of United States in the purchase of sporting and athletic goods, measured by the dollar value, receiving such goods to the value of $63,251, being more than double the value received by any other country.

In loaded cartridges, also there were exported from United States to Canada more than to any other country, Canada having purchased $128,787 worth.

As to revolvers and pistols Canada was fifth having received $6,441 worth.

Canada again was the leading customer as to rifles and shotguns, having imported from United States in the month of July rifles and shotguns to the value of $75,755.

Customs Dept. Confirms Value for Duty

Details of the new regulations of the Inland Revenue Department providing that the rate of duty is to be calculated on the estimated gold value of goods imported were outlined in the October 2 issue of Hardware and Metal. Advice was received from a Pacific Coast point that the local customs official had no such instructions and that what advice he did have was that the basis of value for duty was the part value.

The Customs Department supported the statement made in Hardware and Metal and give as authority Appraisers' Bulletin No. 2213, which says: "This regulation applies to all countries having a standard currency and parties exporting goods from such countries to Canada should show in the value column for home consumption the value of the goods in the standard currency of the country, that is, gold sovereigns for Britain, gold francs for France, etc. The standard currency is the basic value on which duty will be levied."

To Make Power Supply Suffice

London, Ont..—In order to make the supply of Hydro go around the coming winter, General Manager Buchanan of the Public Utilities Commission is working on a plan of the Ontario Hydro-Electric Commission to penalize those who use more than a certain amount of electricity. The scheme is to be submitted to the commission at its next meeting for ratification.

Hydro to Check Use of Heaters in Toronto

Toronto.—"There has been a great rush to get heaters during the last twelve months. Some time ago the local Hydro stores were asked to discontinue selling heaters. As many as 100,000 electric heaters are being used by the power consumers taking power from Niagara Falls. That means the use of from fifty to one hundred thousand horse-power," says Sir Adam Beck.

Fuel Oil Supply Increased

Montreal.—The fuel oil situation, compared with that of several weeks ago, is greatly improved. Supplies have come to hand freely of late, and this has had the effect of increasing the surplus and prices have slumped very considerably. It is understood that those using the commodity extensively as a means of power have, in some cases, been oversupplied with the product, so that there is not the outlet at present that there formerly was. Prices are now around 17 to 17¼ cents per gallon and this is a sheer drop of 5 to 7 cents within a short time. As transportation improves the situation, both as to price and supply, should be easier.

Returns of Inland Revenue and Customs for September

Ottawa.—There was a net increase of $7,218,367.99 in the Inland Revenue returns for the month of September, according to the statement for the month issued from the office of the deputy minister of the department.

The total inland revenue collected for the month was $11,921,287.57, a gross increase of $7,455,481.75 over the revenue for the corresponding month of 1919. The chief increase came from war tax, which brought in $8,709,416.21, an increase of $7,455,298.25 over the war tax returns for the month of September, 1919.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

SHINGLE MILLS

Dennis Myatt, Grand Desert, Halifax Co., N.S.—Can you give me names of cedar shingle mills in New Brunswick?

Answer.—The following are shingle manufacturers in this province:

Babbitt Lumber Co., Devon, N.B.
Bathurst Lumber Co., Bathurst, N.B.
Geo. Burchill & Sons, Nelson, N.B.
The Dalhousie Lumber Co., Ltd., Dalhousie, N.B.
The Fraser Companies, Ltd., Plaster Rock, N.B.
Gloucester Lumbering & Trading Co., Ltd., Bathurst, N.B.
Lea Paul Co., Ltd., Moncton, N.B.
Louison Lumber Co., Ltd., Jacquet River, N.B.
Murray & Gregory, Ltd., St. John, N.B.
River Valley Lumber Co., Ltd., Oromocto, N.B.
F. E. Sayre & Co., Ltd., St. John, N.B.
Shives Lumber Co., Ltd., Campbellton, N.B.
The J. H. Snowball Co., Ltd., Chatham, N.B.
Stetson Cutler Co., St. John, N.B.
York & Sunbury Milling Co., Devon, N.B.

MALLEABLE CARRIAGE CASTINGS

Stewart & Armour, Woodstock, N.B.—Can you put us in touch with factories making malleable carriage castings?

Answer:—

The Galt Malleable Iron Co., Ltd., Galt, Ont.
Hartley Foundry Co., Brantford, Ont.
Kyles Malleable Castings Co., Ltd., Merrickville, Ont.
Mount Royal Foundry Co., Ltd., Montreal, Que.
McKinnon Dash Co., Ltd., St. Catharines, Ont.
The C. Norsworthy Co., Ltd., St. Thomas, Ont.
The Ontario Malleable Iron Co., Ltd., Oshawa, Ont.
Pratt & Letchford, Ltd., Brantford, Ont.
Pouleau, Ltd., Mont-Joli, St. Flavie Station, Que.
P. E. Shantz, Preston, Ont.
Smiths Falls Malleable Castings Co., Ltd., Smiths Falls, Ont.

WALKER HOT BLAST HEATER

W. C. Auld, Youngstown, Alberta.—Kindly say who makes the Walker Hot Blast No. 114.

Answer.—The Hall, Zryd Foundry Co., Ltd., Hespeler, Ont., have taken over the stoves formerly made by the Walker Steel Range Co.

GLAZIERS POINTS DRIVER

Kent, Garvin & Co., Ltd., Hamilton, Ont.—Kindly advise us of makers of machines for driving glaziers points.

Answer.—Hubbard & McClary, Windsor, Vt., U.S.A., are makers of a machine to drive glaziers points and it can be procured in two sizes from A. Ramsey & Son Co., Ltd., 48 Colborne St., Toronto.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

DURO ALUMINUM WARE

W. D. Shambrook & Co., Hamilton, Ont., have just published a folder of the "Duro" line of aluminum ware made by this firm. The folder shows sixty items, comprising over twenty different articles of aluminum kitchen ware. The list has been carefully selected and it can safely be said that they are all popular sellers, and with the constantly increasing demand for this ware no dealer who handles cooking utensils can afford to be without a stock of aluminum ware. Every piece of "Duro" ware is guaranteed by the makers. The makers of "Duro" ware state that they will be pleased to mail a copy of the folder to all who are interested.

ENTERPRISE "BLAZER" PIPELESS FURNACE

The Enterprise Foundry Co., Ltd., Sackville, N.B., have issued a booklet describing their new "Blazer" pipeless furnace. The various advantages of this principle of pipeless heating are fully pointed out and the theory and the processes of hot air circulation are thoroughly and yet simply illustrated with cuts and diagrams.

This furnace is made in three sizes, with 18, 20, and 23 inch fire pots.

The makers claim that the furnace has been thoroughly tested out under all sorts of conditions and with the air-tight construction this furnace will heat a house with the same or less fuel than stoves require to heat a few rooms.

It is stated that the "Blazer" can be easily installed in a short time and with a minimum of trouble or mess.

The trade and all interested in heating problems are invited to write for a copy.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2067. **Wire.**—An established firm of manufacturers' representatives in Barbados wish to secure a Canadian agency for barbed and mesh wire.

Twenty Years Ago

Items of interest reprinted from the Hardware and Metal files of twenty years ago.

The following items are taken from Hardware and Metal of October 20, 1900:

"Young and Paulen, hardware dealers, Wingham, Ont., have sold out.

* * *

R. W. Ross & Co., hardware dealers, Prescott, Ont., have been burned out.

* * *

D. McGill, hardware dealer, Springfield, Ont., has sold out to Angus Moore.

* * *

Henry Filsinger, stove and tinware dealer, Goderich, has sold out to Lee and Shepherd.

* * *

W. S. Fisher, of Emmerson & Fisher, St. John, N.B., was a visitor in Toronto this week.

* * *

Kerr & Foss, hardware and crockery dealers, Sherbrooke, Que., have registered partnership.

* * *

Mistele Bros. & Co., Rodney, Ont., have moved into their new store and are being congratulated on its striking appearance.

* * *

A movement is on foot for the affiliation of the Montreal Manufacturers' Association with the Canadian Manufacturers' Association.

* * *

The second annual meeting of the Thos. Davidson Mfg. Co. Employees' Benefit Society was held the other evening, with J. Williams presiding.

* * *

The mining companies have acceded to the coal strikers' demands and resumption of work will take place in a few weeks. Retail price in Toronto is now $6.50 per ton.

* * *

A conference was held in Montreal Tuesday by men representing the two organizations. The Canadian Manufacturers' Association was represented by P. W. Ellis, president; T. A. Russell, secretary, and Lieut.-Col. J. B. Maclean. The representatives of the Montreal Association were: W. McMaster, John Macfarlane, Frank Paul, Col. Burland, Edward McDougall, George Sadler, C. C. Ballantyne. Although the Montreal organization has yet to pronounce upon the matter, affiliation is practically assured as the committee which represented that body will report in favor of it. Every province in the Dominion, except Prince Edward Island is now represented in the C. M. A.

"Walk Humbly"

THE last suggestion contest held by the National Cash Register Company was marked by the giving of 1,178 prizes. The suggestion contest prize distribution was held in an open air theatre built for the occasion. There were comfortable seats for everyone. A large motion picture screen was erected on the stage.

The origin and plan followed in these suggestion contests held by the N.C.R. have often been discussed by business men and the statement made by President Patterson in connection with this last contest is therefore interesting. After welcoming the guests to his home the president praised the splendid work done by the prize winners and thanked them for their interest in the progress of the company. This was followed by the interesting account of how the suggestion system was started.

"I heard a minister preach a sermon, using the text "Do justly, love mercy, walk humbly," said Mr. Patterson. "I asked him what I should do to walk humbly. He replied, 'First tell me what is your greatest trouble.' My answer was, 'Getting the people at the factory to co-operate with me in improving conditions.'

"The minister then told me I should walk humbly and ask the people to help me. He pointed out that 3,000 brains, 6,000 eyes and 6,000 ears were much better than one brain, two eyes and two ears in finding things that were wrong and ways to make them better.

"I followed this advice and offered prizes to the employees for criticisms and suggestions. I asked for their advice. This was the beginning of our suggestion system. Tonight we have the largest number of prize winners in the history of the company. It is impossible to estimate the good done by this plan. It has helped all of us. We have decided to increase the amount of money to be paid for suggestions in the present contest which ends December 31. Instead of $6,000 we will pay $10,000 for good suggestions. We want to get more and better ideas from our people."

Here is a splendid idea for business men in all walks of life to follow.

Waiting to Hear from Judge Gary

WALL STREET looks forward to Judge Gary's speech before the American Iron and Steel Institute on October 22 at the Hotel Commodore for a cue as to the true situation in the steel industry. Judge Gary has reiterated his declaration to give no hint of his views before making that speech. Charles M. Schwab, at his country home in Loretto, Pa., declared that the steel industry was in a good, healthy state. "The conditions which make necessary a reduction in prices in certain lines and with certain companies will also tend to lower costs and increase production and will make for stability and normal operations," he declared. "The railroads of the country in normal times and under normal conditions consume about one-third of all the steel produced. Railroads during the past five years have ordered nothing like their usual amount and this deficiency of past years will have to be made up, which, added to their usual consumption, will keep the steel business steady and normal. The same conditions apply to building requirements and other lines of trade."

Canadian buyers are leaving the premium steel mills, and prices of these rollers will likely sag in accordance. It is reported that sheets from some of the corporation mills are arriving freely now, and in some cases there are applications for cancellations.

There is nothing to indicate that anything approaching a crash or even a sudden drop is coming in the steel market. There is a lot of business on the books of the mills, especially the corporations'.

It is much better that prices should step down little by little than that there should be a sudden drop. Steel prices, apart from the schedule of the premium mills, have not been high.

We are approaching a stage in the markets where it may be possible to once more do business on the basis of value, taking as a definition of value the following:

"The price arrived at between the least urgent buyer and the least urgent seller."

For years now in many lines of steel, iron and machine tools there have been only a few months when there were any "least urgent buyers." The market has been full of buyers and urgency has been one of their outstanding, rather than absent, qualities.

When we get to the stage, and we are now very close to it, where two or three men present the claims of an article of equal merit, the matter of price is bound to enter into the sale to a greater extent than it has since 1914. There have been years when it can truly be said that price was one of the least considerations. It should never be allowed to dominate the situation, but in the natural course of events it will become a greater factor from now on than it has been for many years and months past.

No More Gas for Hamilton Factories

Hamilton.—All permits for the use of natural gas by manufacturing concerns will be cancelled on October 31, according to official notice served by the Gas Commissioner.

CHEMICAL ENGINEERS, CONSULTING CHEMISTS.

REPORTS, ANALYSES, ASSAYS, TESTS.
INSPECTION.

313 LAGAUCHETIERE STREET WEST.
CORNER BEAVER HALL

MONTREAL, November 30.1917.

Messrs Brandram-Henderson, Ltd.,
St. Urbain St.,
Montreal.

Dear Sirs:-

We purchased tins of your Brandram-Henderson " English " White Paint in different parts of the city and mixed the same into one sample. We then submitted this composite sample to analysis. We find:-

I. Vehicle 30.90%
Pigment 69.10%

II. The dry pigment gave on analysis:-
White Lead 68.12%
Zinc Oxide 30.90%

III. The Vehicle is found to consist of:-
Linseed Oil, Turpentine and Liquid Dryer.

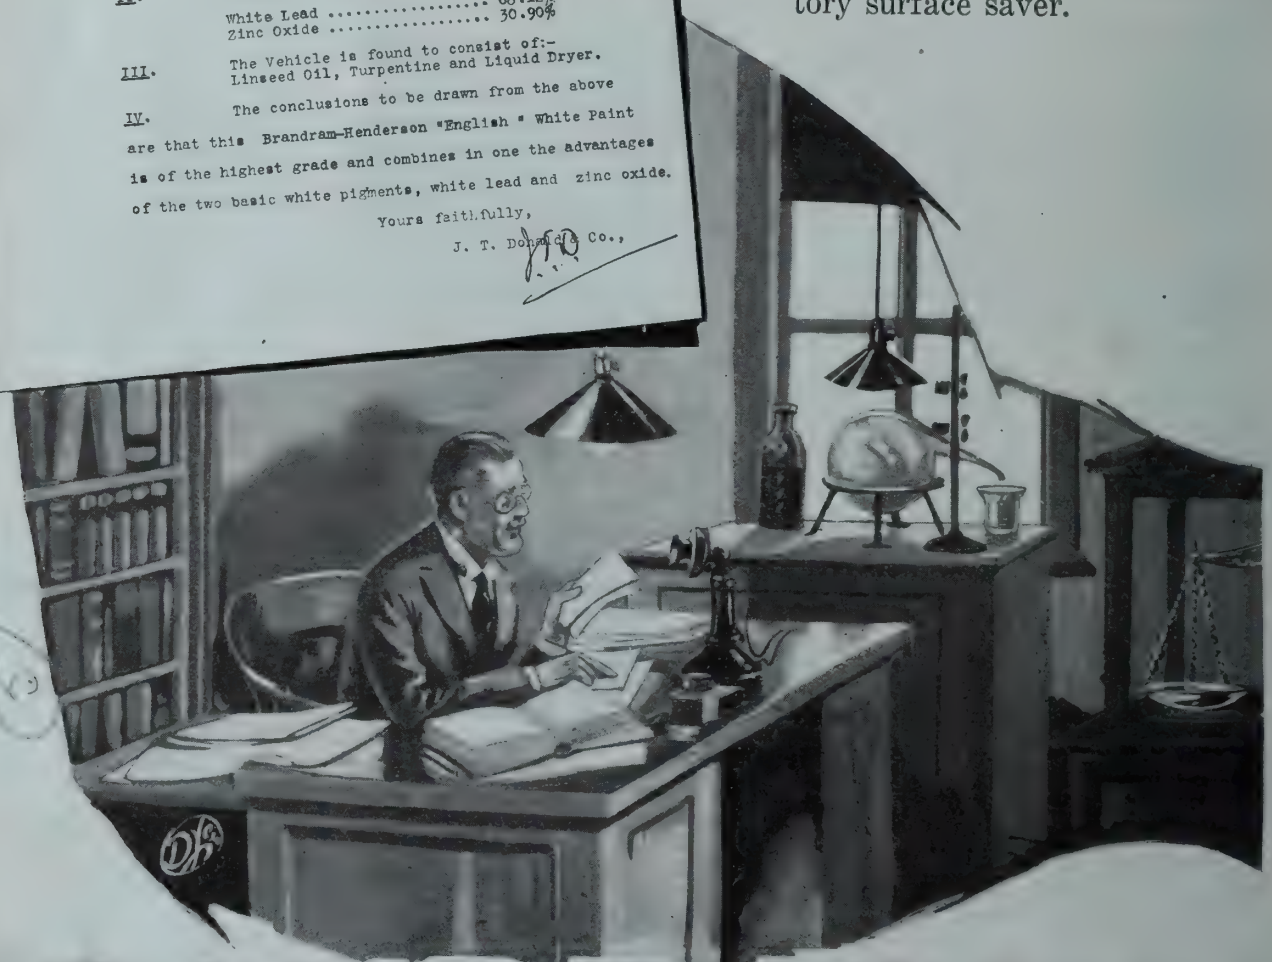
IV. The conclusions to be drawn from the above are that this Brandram-Henderson "English " White Paint is of the highest grade and combines in one the advantages of the two basic white pigments, white lead and zinc oxide.

Yours faithfully,
J. T. Donald & Co.,

For a can of B-H bought haphazard in the open market to "conform fully to the guarantee given on the label" is proof enough of its consistency as regards quality.

This official document also speaks of the B-H formula as "excellent" and confirms every word of our guarantee of quality and durability.

We consider this opinion is a fine testimony to the efficiency of B-H as a sure and satisfactory surface saver.



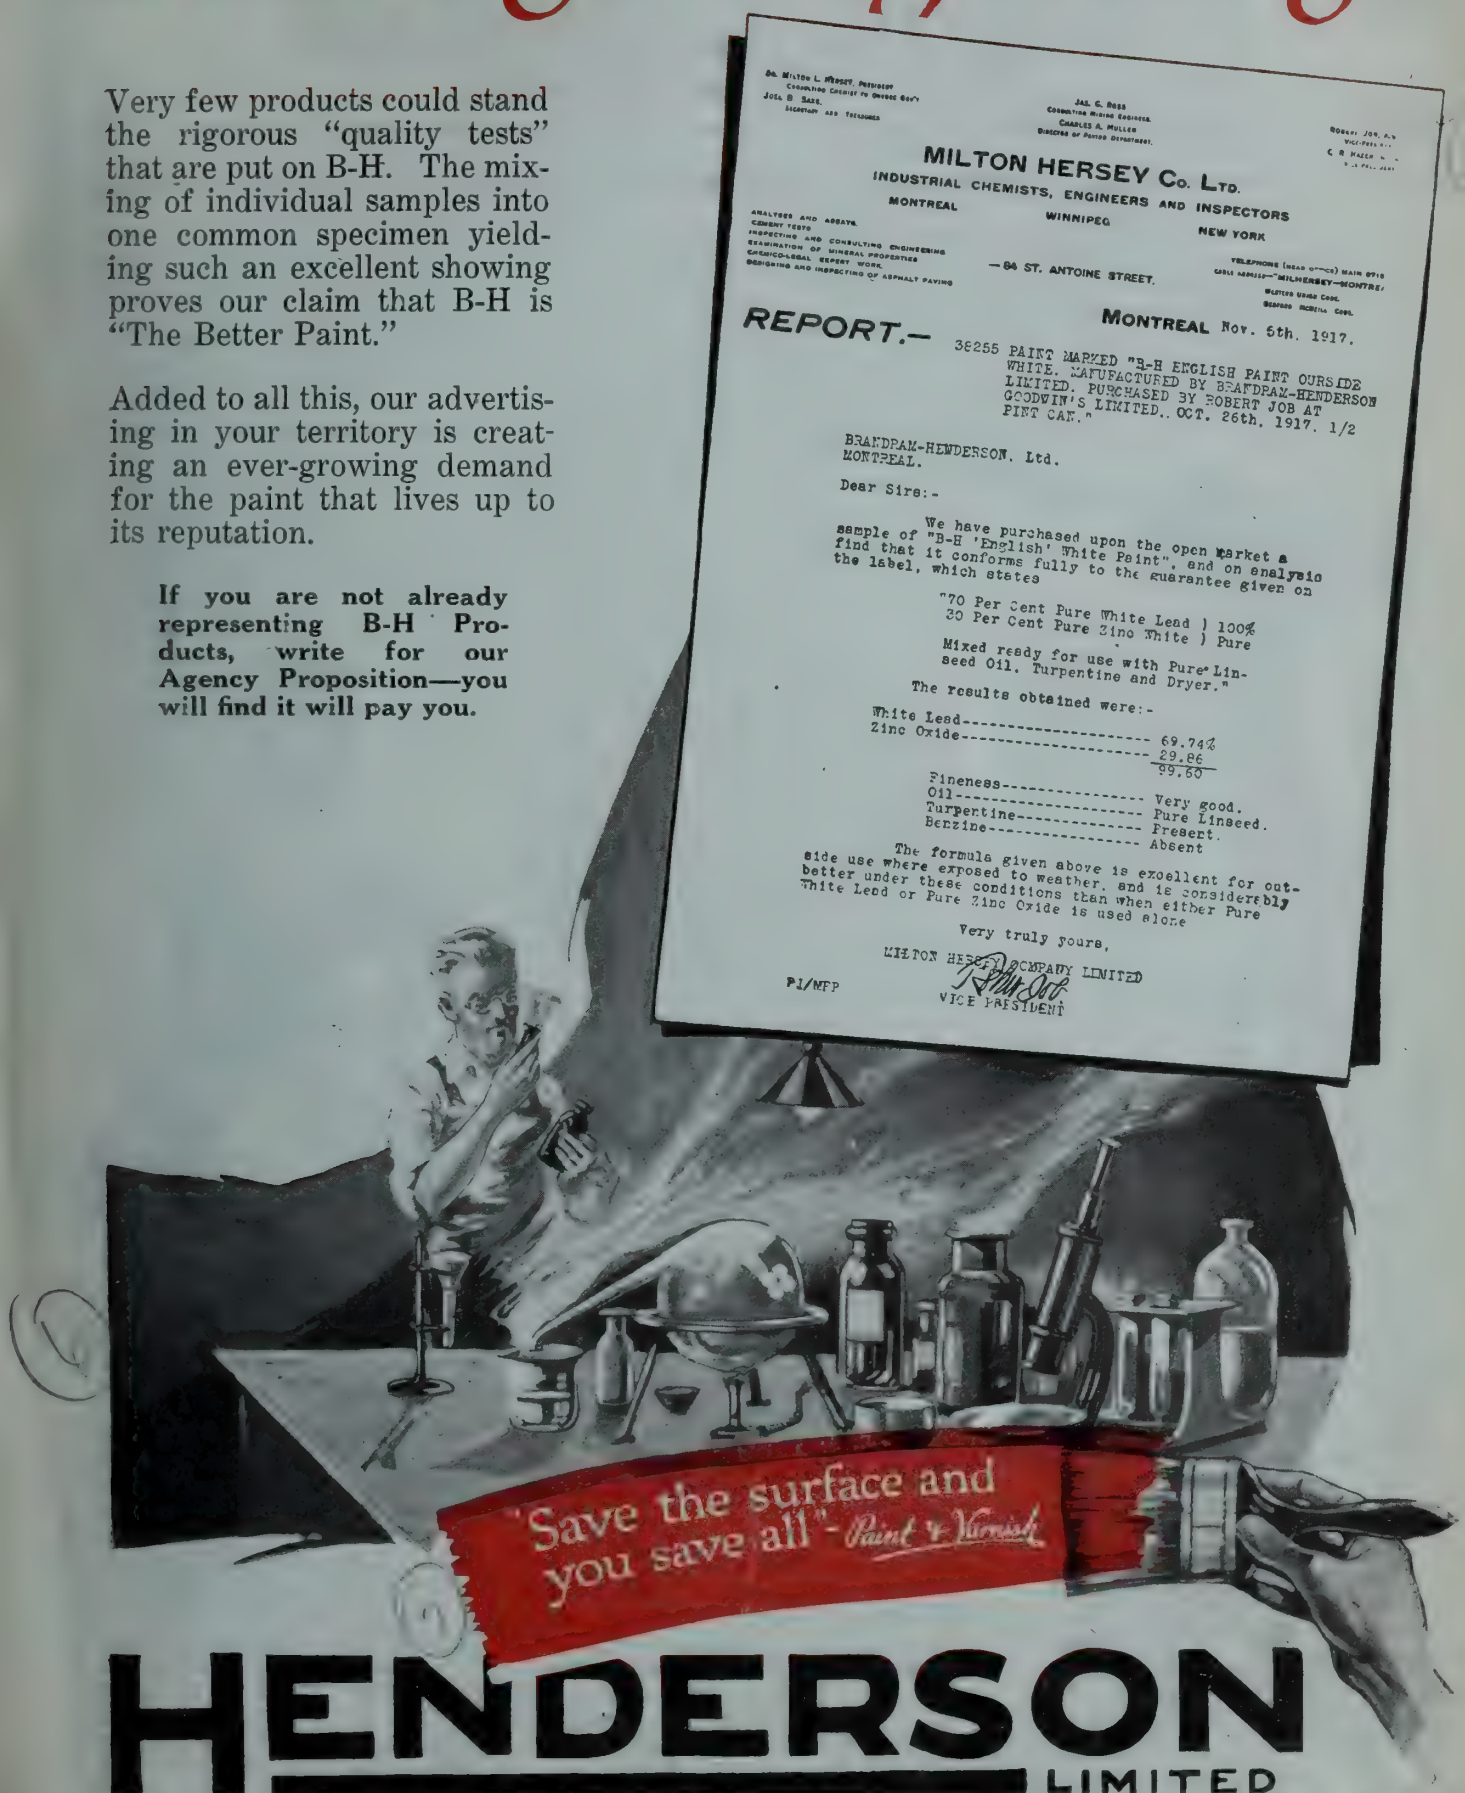
BRANDRAM -

Leading Analysts Say

Very few products could stand the rigorous "quality tests" that are put on B-H. The mixing of individual samples into one common specimen yielding such an excellent showing proves our claim that B-H is "The Better Paint."

Added to all this, our advertising in your territory is creating an ever-growing demand for the paint that lives up to its reputation.

If you are not already representing B-H Products, write for our Agency Proposition—you will find it will pay you.



New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW LINE OF ALUMINUMWARE

E. T. Wright Co., Ltd., Hamilton, Ont., has acquired the plant of the Wentworth Manufacturing Company for the purpose of specializing in the manufacture of high-grade aluminumware.

Previous to its absorption by E. T. Wright Co., the Wentworth Manufacturing Co. made copper nickel plated tea kettles and pots, casseroles, fern pots, etc.; such lines will continue to be made under the new management. To this line has been added, under the trade mark of "Wentworth Wellworth" a full line of aluminum cooking utensils.

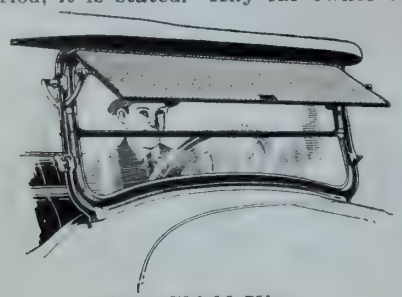
"Wentworth Wellworth" fry pan.

The makers claim that this new line of aluminumware is modern and up to date in every respect and that it has several new features. An illustrated catalog and price list of all "Wentworth Wellworth" lines will be mailed on request.

DOTY SHIELD VISOR

The Auto Radiator Shutter Co., Dayton, Ohio, are putting out a shield visor which attaches to top of windshield of auto and is stated to relieve the eyes of strain in driving in the day time, from the glare of sky and the sun's rays, and in night riding its use prevents the driver from being blinded by the glare of approaching head lights, which is said to be the cause of many accidents.

The frame is constructed of spruce bound with steel, making a substantial foundation, is covered with long grain black top material, which gives it the appearance of being an original part of the car on which it is placed; the material used to cover the underside is recognized as a shade of green that relieves eye strain. The shield will retain its original shape for an indefinite period, it is stated. Any car owner can attach to open car in five minutes without drilling any holes or interfering with any other attachments.



Doty Shield Visor

THE ENTERPRISE BLAZER FIRELESS FURNACE

The Enterprise Foundry Co., Ltd., Sackville, N.B., in introducing the Enterprise Blazer point out some of the advantages of this type of furnace. These are: No hot air pipes are required to convey the heat it generates to the various rooms, there is no tearing up of walls and no unsightly pipes to disfigure rooms, and it takes up very little room in the cellar, there being no pipes to have to dodge under.

The Enterprise Blazer pipeless furnace has three complete casings, the outer and middle ones of galvanized iron with space in between forming the return or cold air passage. The inner casings consist of sheet asbestos and corrugated tin with an air space in between forming an insulator. This inner casing set at a distance from the heater forms the hot air passage, and the air space formed by the corrugations of the tin together with the sheet asbestos form, it is stated, a perfect insulator and heat generated is not allowed to escape into the cellar where it is not needed, but ascends up through a radiator into the rooms upstairs.

The firepot of the Enterprise Blazer is extra large and heavy, and is made in two sections, the coal grate is a triangular anti-clinker grate. For wood a grate is furnished which can readily be put in and taken out. The combustion chamber of cast iron is fitted with an extra large feed door and the furnace has a deep and roomy ash-pit, and a large cast iron water pan.

The Enterprise Blazer pipeless furnace is made in three sizes, No. 2500K has a firepot 18-in. in diameter, No. 3500K one of 20-in., and No. 4500K one of 23-in. The rating capacity of the furnaces are estimated from 8,000 to 35,000 cubic feet.

SAMMIE CAR

The Western Toy Co., of Niles, Mich., are offering the trade a new wheeled toy, and have supplied the following description of it. The Sammie Car is a new idea in wheel toys. The novelty of the toy appeals immediately to parents. It is painted in red, white and blue silk lustre enamel finish.

As a handcar, the Sammie Car has an easy rowing action that gains speed without increased effort — it has full driving power from any position of the handle. No dead centre, no lost motion. It provides the right kind of exercise, a rowing action developing chest, arm and shoulder muscles properly. No foot action is necessary, thus saving shoe leather. The Sammie Car can be used as a coaster at will, as the driving mechanism automatically disengages when child stops pumping, and wheel runs free. The handle remains stationary when coasting.

Sammie Cars are built sturdily throughout, with hard maple wheels, brass bushings and all steel axle. Packed six in a box, knocked down, they are easily set up. Sammie Cars are easily converted to any size from two to eight years by adjusting seat, thus growing with the child.

Sammie Car

AUTOMATIC DOOR STRIP

The Atlas Iron, Wire and General Metal Works, 815 Queen Street West, Toronto, Ont., are putting on the market an automatic door strip which they claim will keep out all draught and dust.

The automatic door strip is a rubber attachment made in different lengths to fit any doors and works automatically. The door strip lifts and closes when the door opens and closes. There is stated to be no friction and it cannot wear out. Two screws are all the adjustment it needs. This door strip is said to have passed the severest tests and is sold under a positive guarantee of satisfaction.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

CHANGES in hardware prices are not as numerous this week. The main feature among the advances is the new list on wire gauge "extras," with higher prices on all wires, says Hardware and Metal.

Higher prices are in effect on washing machines and wringers, barrel churns and step ladders. Lamp chimneys are advanced in price.

Lower quotations are made on poultry netting, solders, some ingot metals, and on lead wool and turpentine.

Portland cement appears to have a lower tendency and also cotton waste.

Some scrap metals have declined in price.

A little improvement is noted in some lines that have been scarce for some time, but there is still a pronounced shortage of smaller sizes in pipe and in lighter gauges of sheets.

Business continues fair, but a tendency to buy in smaller quantities is noted.

MONTREAL MARKETS

MONTREAL, October 14.—Hardware prices are maintained for the most part, but there have been advances on stove pipe dampers, and wire "extras" are revised. Among the several declines are poultry netting, solders, ingot metals and lead wool. Portland cement and cotton waste are tending downward. Country trade is good; city demand restricted.

Coal Oil Is Steady; Gasoline Unchanged

Montreal.

COAL OIL, GASOLINE.—Prices are steady and unchanged on gasoline and coal oil. Motor grade gasoline is quoted at 43 1-2 cents and lighting grades at 48 1-2 cents. Coal oil is 31 cents per gallon. It is not anticipated that there will be any change on either in the near future.

Plenty of Wire Material But Transport Is Slow

Montreal.

WIRE PRODUCTS.—There appears to be ample wire at points of production, according to authorities here, but the difficulty is that of transportation. This applies to various lines of fencing, etc., for which there is a fairly seasonable demand. The tendencies will be easier, and probably they will be if delivery can be improved, and this is now being looked for.

Stove Trade Active; Stock Quite Scarce

Montreal.

STOVES.—The movement of stoves has continued brisk right along, and manufacturers state that there has been more sale for certain lines than they expected. This has severely taxed the facilities of the makers, and they are, in some cases, unable to entertain new orders for stock wanted in the immediate future. All lines are very firm, production costs and material scarcity being two items of outstanding importance in maintaining the market.

Stove Pipe Scarcer; Elbow Sales Are Good

Toronto.

STOVE PIPE, ELBOWS.—There is still a great scarcity of stove pipes and jobbers are beginning to find the shortage rather acute. The trade is naturally ordering freely these days in view of the early approach of cold weather and it is doubtful if there will be enough of these to go around.

ELBOWS.—These are in fair supply and the scarcity does not seem as acute as on stove pipes although stocks are not excessive. There is a good demand for them.

Rope Holds at Recent Decline

Montreal.

ROPE.—The rope situation is unchanged this week at the reduction announced in last issue. Pure Manilla is now selling on a base price of 33 1-2 cents per pound, British Manilla and New Zealand grades at 26 cents, sisal and lathyarn at 21 1-2 cents. there is not a very brisk demand for the product but the lower prices will doubtless help create a somewhat better demand from now forward.

Wire "Extras" Are Revised Again

Montreal.

WIRE.—New extras have been announced by the jobbing trade on iron and steel wire. These, for bright and annealed are as follows: No. 0-8, base price; No. 9, add 10 cents; No. 10, 15 cents; No. 11, 25 cents; No. 12, 30 cents; No. 13, 50 cents; No. 14, 60 cents; No. 15, 85 cents; No. 16, $1.30. There is, in addition to these extras, a straight advance of 25 cents for annealing and for coppered wire the additional charge over the named extras is 70 cents per 100 pounds.

Cast S.P. Dampers Are Advanced Here

Montreal.

STOVE PIPE DAMPERS—Prices are higher this week on cast stove pipe dampers, 6 inch selling at $21.60 per gross and 7 inch at $29.20 per gross.

Stamped Ware Sells; Will They be Easier?

Montreal.

WARES.—Thus far there has been much activity in the movement of various wares to the trade. Prices have been well maintained. If the supply of raw material should be greatly augmented this fall, the price basis may be somewhat easier, but until that time it would seem that prices cannot decline greatly. The discounts on various lines remain unchanged.

Poultry Netting on Lower Basis

Montreal.

POULTRY NETTING.—Prices on the regular line of poultry netting for 1921 have been announced and the Canadian list will be subject to an advance of 10

per cent. Orders are now being taken for these products.

Ammunition Steady With Fair Supplies

Montreal.

AMMUNITION.—There is an active demand for various kinds of ammunition, including cartridges and shells. Supplies have been fair although not excessive, and prices remain unchanged.

Waste Prices May Soon be Lower

Montreal.

COTTON WASTE.—There is but a limited demand for cotton waste and the tendency is downward. Prices on the raw materials in New York have softened materially in the last few weeks and doubtless there will be a revision of prices on the manufactured product in the not distant future.

Premium on Sheets Is Easily Obtained

Montreal.

SHEETS AND PLATES.—The local price basis on 28-gauge galvanized iron, with a number of jobbers, seems to be hovering around 15 cents per pound. This is above the quoted basis, but it goes to show that supplies are so short as to create a nominal price situation. Supplies that arrive from time to time, are quickly distributed to the trade and there seems to be little chance of accumulating a surplus.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Polishes Sell Well at Maintained Prices

Montreal.

POLISHES.—There is a fairly active demand for various lines of furniture polish and prices are holding without change for the most part although the market is quite strong. O'Cedar oil is selling as follows: 4 oz. per dozen, $2.40; 12 oz., $4.80; 1 quart, $12.00; 1-2 gallon, $20.00; 1 gallon, $28.00. The mops are selling at $18.00 per dozen and No. 10 dusters at $8.00.

Buy Auto Accessories in Small Quantities

Montreal.

AUTO ACCESSORIES. —The demand for auto accessories is fair, but jobbers state that the trade is buying from hand to mouth and that for the most part they are buying only in very limited quantities. There has been no indication of lower prices becoming effective soon, and staple lines are those selling most freely.

Ash Cans and Ash Sifters Move Well

Montreal.

ASH CANS, SIFTERS.—There is an active sale at present for ash cans and sifters and also for garbage cans. These are available in fair quantities although the brisk demand steadily depletes supply. Prices are holding firm and unchanged.

Scoops and Shovels Move Out Freely

Montreal.

SHOVELS AND SCOOPS.—There is still some scarcity of these products, and jobbers state that there will be little if any surplus this fall. Just now there is an active inquiry for coal and grain scoops and supplies are going forward to the trade every day.

Tendency Is Easier on Portland Cement

Montreal.

CEMENT.—There is a fair demand for Portland cement although in a large way the building restrictions applied at the present time prevent the use of this. Prices are inclined to soften somewhat and it is reported that quotations will be lower in the near future.

Alarm Clock Trade Could Absorb More

Montreal.

CLOCKS. — There is little improvement in the supply of alarm clocks which have been scarce for many weeks. The jobbers have continued inquiry for these and an augmentation of supply would be gladly welcomed.

Snare Wire Scarce; Held Without Change

Montreal.

SNARE WIRE.—There has been a scarcity of snare wire and this continues. The price is naturally high and No. 2 is quoted at 65 cents per pound and No. 24 at 70 cents. It is doubtful if the supply will be greatly augmented at a later date.

Scarcity Still of Metal Lath

Montreal.

METAL LATH.—The building trade, while not abnormally active, is absorbing more metal laths than can be supplied by the manufacturers. In discussing the situation with one this week, he claimed there was a considerable shortage and that his firm had back orders on file for 250,000 yards which could not be supplied.

Quiet and Softer Are Old Materials

Montreal.

OLD MATERIAL.—Of outstanding interest this week there is little. The dealers report a quiet condition of trading, and this accounts for the gradual falling of prices on nearly all lines. Copper, brass, lead and zinc, as well as old rubber stock, are all easing off, and the only line that is fairly well mantained is that of the heavier cast iron materials.

DEALER'S BUYING PRICES

Automobile tires	....	0 01

Boiler plate	17 00	18 00

Cutlery Still Short; Orders at "Firm" Prices

Montreal.

CUTLERY.—The arrival of cutlery from the Old Country is still restricted although it is said that Canada is getting a full share. There is one feature of the situation which is of interest to the trade, and that is that many are now booking at "firm prices." It is doubtful whether all the supplies desired will be forthcoming this fall. There is a good demand for pocket cutlery, table cutlery and for carvers.

Ready Roofing Firm; Sales Are Active

Montreal.

ROOFING.—Prepared roofing is in fairly active demand at the present time and prices remain firm. There is a larger demand for the product than jobbers are able to supply in all cases, and the demand seems to be fair from all parts of the country and particularly good from some.

Little Improvement in Iron Pipe Supply

Montreal.

IRON PIPE.—There is an active demand for most sizes of iron pipes and both galvanized and black, in the smaller sizes, continue to be scarce. Prices remain unchanged but under the present conditions it is doubtful if any early improvement can be looked for.

Weather Strip Sales Are Now Active

Montreal.

WEATHER STRIP.—The demand for weather strip is very active at present and jobbers are receiving many orders. Prices are steady.

Steady Sales Iron and Steel; Scarce

Montreal.

IRON AND STEEL.—There is a scarcity of certain sizes of iron and steel bars, and this is due to the fact that rolling mills were not operating for several months during the summer. The mills are again operating, but the trade finds a shortage of certain sizes, which will take some time to overcome. The undertone continues firm.

IRON AND STEEL

Common bar iron, 100 lbs.	5 15
Refinish iron	6 15
Iron finish machinery steel	5 25
Mild steel	5 30
Band steel	5 50
Single reeled machinery steel	6 80
Spring steel	6 00

Tire steel	5 50
Toe calk steel	6 20
Harrow Tooth Steel	5 45
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined Iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Steady and Fair Sale For Babbitt Metals

Montreal.

BABBITT METALS.—There is a fair demand for babbitt metals which remain quite unchanged and the price range is from 8 cents to 75 cents per pound according to quality.

Lead Products Have Gone Lower

Montreal.

LEAD PRODUCTS.—There has been a softening of the undertone of some items in the list, notably on wire solder, lead wool, and bar solder. Number 40-60 wire solder is selling at 33 3-4 cents per pound; 44-55, 36 cents; 50-50, 38 1-4 cents. Lead wool is now down 1 cent at 15 cents per pound, while guaranteed solder is selling at 31 1-2 cents, "strictly" 29 1-2 cents, and wiping, 26¼ cents. This is due to the steady downward trend of pig lead and tin.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%

40-60	0 33¾
45-55	0 36
50-50	0 38¼
Zinc sheets, casks	0 16½
Do., broken lots	0 17

Ingot Metals Quiet and Easier

Montreal.

INGOT METALS.—There is still some softness of undertone on the market and prices are shaded in some cases.

COPPER.—A price of 22 1-2 cents for electrolytic and of 22 cents for casting grade is quoted here.

TIN.—A price of 52 cents is being quoted by the Montreal trade on tin and there is a free supply with trading light.

SPELTER.—This is selling at 10 cents per pound and there is not much doing.

ANTIMONY.—This is not in active demand and the price is 8 3-4 cents.

LEAD.—The movement of pig lead is fair and the price has been tending downward, local quotations being 8 3-4 to 9 cents per pound.

TORONTO MARKETS

TORONTO, Oct. 14.—The chief feature of the week in hardware markets is the new list of gauge extras on wire, which advances bright and annealed wires in price and the new prices on poultry netting for next season's bookings.

Some lower prices are noted in lead and solder prices and in some ingot metals.

The scrap metal market is weaker with some lower quotations. Higher prices are in effect on lamp chimneys.

But little improvement is reported in deliveries of pipe and fittings, or in sheets and plates. Light gauges of galvanized sheets are especially scarce.

Business is said to be a little quieter with a tendency to buy in smaller quantities.

Fall and winter goods are in fair demand.

Changes in Prices of Washers and Wringers

Toronto.

WASHERS AND WRINGERS.—A revision has taken place in the prices of some lines of washing machines and wringers.

Present quotations of goods affected are given below:

WASHING MACHINES—	Each, List.
Patriot	$23 75
Jubilee	12 50
Perfection Electric	124 00
Perfection, Gasoline power	65 00
Beaver Power	28 50

Do., 512	124 00
Do., 514	145 00
Ottawa No. 331E	115 00
Do., bench, No. 341EB	162 00
Royal Canadian No. 151	102 00

List less 20% on washers and wringers.

Poultry Netting Prices For Next Spring

Toronto.

POULTRY NETTING.—An alteration in the price of poultry netting has taken place and instead of list plus 25 per cent. the quotation for next spring booking is list plus 10 per cent. for Canadian 1-inch and 2-inch mesh and for American netting.

Stoves and Ranges Demand Larger Than Supply

Toronto.

STOVES AND RANGES.—The demand is very good for stoves and ranges and manufacturers are finding it difficult to cope with it. Orders in many cases are behind and supplies of steel sheets, pig iron and other materials have been very scarce for some time and difficult to obtain in sufficient quantities. One stove manufacturer informed Hardware and Metal that only the fact that his firm had bought heavily at the beginning of the year enabled them to keep production nearly abreast of the demand.

Gasoline and Coal Oil Firm and Unchanged

Toronto.

COAL OIL AND GASOLINE.—The demand for these two products does not seem to abate to any extent and sales are heavier than usual at this season. Prices are unchanged and appear firm. Royalite is quoted at 29½ cents and motor grade gasoline at 42 cents per gallon, net.

Wire Nails Supplies Still Limited

Toronto.

WIRE AND CUT NAILS.—Sales of wire nails continue very heavy and there is only a limited supply of certain sizes. Prices are unchanged and wire nails are quoted at $6.40 base, and cut at $7.35.

Wire Extras Advanced in Price

Toronto.

WIRE EXTRAS.—New wire extras applying to all wires excepting galvanized wire are in effect and the increases range from 30 to 40 cents per 100 pounds. All wire and wire products have been scarce for a considerable time and little surprise is felt at these advances. The base prices are unchanged and remain $6 for bright and $6.25 for annealed. The new list is reproduced.

Another Cent Off Fuel Oil Prices

Toronto.

FUEL OIL.—Slightly lower prices are quoted this week on fuel oil, which is 1 cent per gallon cheaper. Prices on barrels are 19 cents per gallon net, and 17 cents on tank cars.

Iron and Steel Pipe Continues Scarce

Toronto.

PIPE.—The demand continues good for pipe, but jobbers and dealers are unable to meet it. The smaller sizes especially seem very short, and ½ inch and ¾ inch, the two sizes most ofter called for in the plumbing trade, are particularly short. The mills report the same difficulty in getting skelp, with the car shortage another factor in the situation. The outlook appears to be firm as regards prices and it is pointed out that owing to the prolonged shortage stocks are so low that it will be a considerable time even when supplies improve, before the demand is satisfied. Prices are unchanged as per list No. 46 as follows:

LIST NO. 46

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Galv.

No Change in Fittings; Shortage Still Felt

Toronto.

PIPE FITTINGS.—Very little improvement has taken place in deliveries of pipe fittings, and there is still a big shortage in these articles, particularly in malleable fittings. There is a very active demand and with stocks in poor shape this is likely to continue for some time. Prices are unchanged and quotations are as under:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%

Class C	0 20	0 30

Higher Prices on Lamp Chimneys

Toronto.

LAMP CHIMNEYS.—An advance of approximately from 20 to 25 per cent. has been made in the common lamp chimneys and these goods are now quoted as follows:

Lamp chimneys—Size O, $10.50 per case of 6 doz.; size A, $14.25 per case of 8 doz.; Size B, $12 per case of 6 doz.

New Quotations on Pump Leathers

Toronto.

PUMP LEATHERS AND VALVES.—New prices are quoted on pump leathers and valves, and the principal selling sizes are now quoted as under:

Cup Pump Leathers—2½ in., $2.65 per doz.; 3 in., $3.35; 3½ in., $4.20.

Valve and Plunger Leathers—3 1-4 in., $2.40 doz.; 3¾ in., $3.15; 4 in., $3.60.

Range Boilers in Good Demand

Toronto.

RANGE BOILERS.—No changes have taken place in prices of range boilers and demand continues to be very fair. Stocks are in medium shape and material for heavier boilers is now more available. Quotations are as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30-gallon	$15 00	$18 00
35-gallon	18 00	21 00
40-gallon	20 00	23 00
52-gallon	25 00	29 00
66-gallon	35 00	40 00
82-gallon	42 00	48 00
100-gallon	55 00	65 00
120-gallon	70 00	80 00

Valves and Bibbs Holding Unchanged

Toronto.

COMPRESSION GOODS AND VALVES.—A good demand for these goods is noticed. Stocks are said to be in fair shape and prices, though firm, are unchanged. Quotations on princpal lines are as follows:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard..	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%

Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%
Radiator valves, standard	23%

Black and Galvanized Sheets Still Scarce

Toronto.

SHEETS AND PLATES.—The demand for black and galvanized sheets appears to be slackening, although there are sufficient back orders on hand to make up for any curtailment of present orders. The opinion in the trade is that there is but little likelihood of prices changing for the present though buyers appear to be holding back expecting a decline. The lighter gauges of sheets are especially scarce and hard to obtain. Prices are largely nominal and quotations are as under:

BLACK SHEETS

14 gauge	$10 15
16 gauge	10 25
18-20 gauge	10 70
22-24 gauge	10 75
26 gauge	10 80
28 gauge	10 50
3-16 inch plate	7 00
¼-inch boiler plate	6 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo
10¾ oz.	$12 50	13 25	$15 00
U.S. 28	12 70	12 85	14 75
U.S. 26	12 40	12 55	14 25
22 and 24	12 25	12 40	14 00
18 and 20	11 95	12 10	13 75
16	11 95	12 10	13 50
12 and 14	11 20	11 95	....

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Bird Cages Are Selling Higher

Toronto.

BIRD CAGES.—Higher prices are in effect on wire bird cages and the cheaper lines of enamelled wire cages usually bought by the dealer in sets are approximately 25 per cent. higher.

Lead Products Show Some Declines

Toronto.

LEAD AND ZINC PRODUCTS.—Easier tendencies are noted in primary markets in pig lead, but lead pipe, traps and bends, etc., remain unchanged. Some lines of solder are easier with slightly lower quotations. Trade is reported to be dull, and buying is said to be in smaller quantities. Prices are the following:

Lead pipe, list, per lb.	....	0 17
Lead waste pipe, list, per lb.	....	0 18
Do., over 8 in., list, per lb.	....	0 19
Lead traps and bends	....	add 30%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	....	0 12¼
Cut sheets ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, lb.	....	0 41
Solder, strictly, lb.	0 35	0 36
Solder, commercial, lb.	0 31	0 33
Solder, guaranteed, lb.	....	0 37
Solder, wiping, lb.	....	0 30½
Zinc sheets, per lb.	....	0 19

Iron and Steel Bars Deliveries Improve

Toronto.

IRON AND STEEL.—There is said to be little improvement in deliveries of iron and steel, and supplies are coming round better than they have for some time past. The mills in the past having resumed operations after the strikes is also helping to relieve the situation. The transportation question, too, is believed

to be in better shape and cars seem more available with shipments not taking so long in delivery as they have been doing. There is an apparent slackening of demand but stocks are very much below normal in most cases. Quotations are holding firm and are as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	6 00
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 60
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	6 00
Hoop steel	7 50

Rope Quiet; New Prices Holding

Toronto.

ROPE.—The trade is a little quiet but normal for the season. The reductions announced last week still hold without change. Quotations are as follows:

Pure Manila, basis	0 33½
Beaver Manila, base	0 26
New Zealand hemp, base	0 26
Sisal, base	0 21½
Single lath varn	0 21½
Double Lath Yarn	0 22

Soil Pipe and Fittings Unchanged; Quieter

Toronto.

SOIL PIPE AND FITTINGS.—Business in these goods is reported a little quieter with stocks in a rather better condition. At the present there seems to be no indication of any downward trend in prices though buyers are said to be holding off. Prices are unchanged.

Cotton Waste Prices Lower, But Firming

Toronto.

COTTON WASTE.—An easier tendency seems to be expected in cotton products and though a slight shading has taken place in some lines of cotton waste prices are still holding fairly firm with no indication of a decline of any size, and with the demand continuing good, dealers say any possible change will be gradual. Quotations are the following:

WASTE—WHITE

XXX	0 23
XX, grad.	0 21½
XLCR	0 20
X Empire	0 18½
X Press	0 16½
XC	0 18½

Above lines subject to trade discount for quantity.

Scrap Metals and Old Materials Dull

Toronto.

WASTE MATERIALS.—The market in waste materials is reported to be precarious at the present time. Quotations are largely nominal and the demand for some metals just now is so dull that dealers are not eager for these particular lines. Copper and lead are softening but heavy steel is firming. Trading has been quiet. Quotations are as follows:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, pe rton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00

Tea lead	0 03
Automobile tires	0 02½

Ingot Metals Some Lower Prices

Toronto.

INGOT METALS.—The ingot metal market is reported as reactionary with general dullness and very little trading. There is a hold off attitude towards most metals and spelter is the only one showing activity.

TIN.—This metal is said to be very dull with prices easing. It is very weak on English markets where the decline still continues. Present quotations locally are from 50 to 53 cents.

LEAD.—Easier tendencies are continued in lead markets, though prices are yet higher than they were this time last year. It is being quoted at 9 cents per pound.

COPPER.—The copper market is reported unsettled with very little buying, in fact dead is the term being used. Because of the dulness the output is being curtailed and the production for September is estimated at ten million pounds less than the previous month. Quotations for casting copper are unchanged at 24 cents.

SPELTER.—This has been the most active of the ingot metals and it is slightly lower. Present quotations are 10 cents per pound.

ANTIMONY.—Very little demand is noted for this metal and market is dull. Quotations are from 10 to 14 cents according to grade.

ALUMINUM.—No new feature is recorded in aluminum, which remains inactive. Prices are unchanged from 37 to 39 cents.

LONDON MARKETS

LONDON, Ont., Oct. 14.—Business in the hardware stores of London and district has been excellent this week. All fall lines were good sellers. Merchants are also placing orders for spring delivery. Many lines are still expected to be scarce for the spring of 1921.

Prices on most lines are firm. Linseed oil, turpentine, shellac and rope are quoted a little lower. Collections continue good.

Linseed Oil Prices Are Again Lower

London, Ont.

LINSEED OIL.—There is another new price on linseed oil, this product having declined 7 cents during the week. New quotations are as follows:

1 to 2 barrels, gal.	1 55	1 58
3 to 5 barrels, gal.	1 54	1 57
6 to 9 barrels, gal.	1 52	1 55

Less barrels, add 15c gal.

"Comfort" Gasoline Iron Costing More

London, Ont.

GASOLINE IRONS.—A new higher price is effective on the "Comfort" gasoline iron and this line now sells for $6.25 each.

Turpentine Shows a Slight Decline

London, Ont.

TURPENTINE.—A further decline of 10 cents per gallon has taken place in the price of turpentine this week and new prices are the following:

1 barrel lots, Imp. gal.	2 20
2 to 4 barrels, Imp. gal.	2 19
5 gal. lots	2 35

Nails Are Scarce; But Demand Good

London, Ont.

NAILS.—The demand for nails continues very good, but there is still a pronounced shortage, although supplies are now coming around a little better. The prices for wire are $6.25 per keg, base, and for cut nails $7.50, base.

New Prices on Poultry Netting

London, Ont.

POULTRY NETTING.—New prices are in effect on poultry netting. These prices go into effect now, although the jobbers are booking at the new price for next season's delivery. Two-inch and 1-inch mesh are quoted at list plus 10 per cent.

Flashlight Bulbs Higher in Price

London, Ont.

EVEREADY DAYLO BULBS. — An advance has taken place on Eveready Daylo bulbs and the new list price is 30 cents each, being an increase of 3 cents on list price. Quotations are 35 per cent. off list on boxes of ten of one size.

Screen Wire Cloth Next Season's Prices

London, Ont.

SCREEN WIRE CLOTH.—The black painted screen wire cloth is being booked for 1921 delivery at $3.50 per 100 square feet. This is very slightly under this season's prices.

Rope Prices Lower; New Quotations

London, Ont.

ROPE.—Small reductions have been made in the prices of rope, which are down 2 cents per pound in the case of pure manila and New Zealand hemp and 1 cent per pound in sisal and lathyarns. Following are new quotations:

Pure Manila, down 2c lb., new price, 33½c lb. base.
Beaver Manila and New Zealand Hemp, down 2c lb., new price, 26c base.
Sisal, down 1c lb., new price 21½c base.
Lath Yarn, down 1c lb., new price, 21½c lb. base.

Lower Prices on White and Orange Shellacs

London, Ont.

SHELLACS.—An easier tone is evident on white and orange shellacs with lower quotations being offered. Following are the new prices:

	Orange	White
	gal.	gal.
1 gals.	7 80	8 30
½ gals.	7 90	8 40
¼ gals.	8 10	8 60
	doz.	doz.
Pints	13 25	13 55
½ pints	6 80	7 15
¼ pints	3 80	4 00
⅛ pints	2 30	2 40

Wrought Clinch Nails New Quotations

London, Ont.

WROUGHT CLINCH NAILS.—The new higher prices on wrought clinch nails in 50-lb. boxes figured on the new advance are as follows:

	Per 100 lbs.
1½ in. to 1¾ in.	9 85
2 in. to 2¼ in.	9 65
2½ in. to 2¾ in.	9 50
3 in.	9 35

Sharp Pressed Nails Are Advanced in Price

London, Ont.

SHARP PRESSED NAILS. — Higher prices are in effect on sharp pressed nails and new quotations on chief selling sizes are the following:

	Per 100 lbs.
2 in. to 2¼ in.	10 15
2½ in. to 2¾ in.	10 00
3 in.	9 85

In 50-lb. boxes.

Stove Boards Selling Well Now

London, Ont.

STOVE BOARDS.—There is a very good demand at present for stove boards, and the wood lined variety are selling at list plus 10 per cent.

Stove Pipes and Elbows Demand Good; Stocks Low

London, Ont.

STOVE PIPES AND ELBOWS.—The present demand for stove pipes and stove pipe elbows is very large and the difficulty is the filling of orders as with the especially low stocks of Canada plate it is proving very hard to cope with the demand. Supplies of made-up pipes and elbows are very scarce. Quotations are as follows:

Made Up Stove Pipes, per 100 lengths, bright, 6 in., $29.45; 7 in., $31.22; common, 6 in., $23.57; 7 in., $26.09.
Easy Lock Stove Pipes—6 in., $25.46 per 100 lengths; 7 in., $27.28 per 100 lengths.
Stove Pipe Elbows, light pattern, 6 in., $3.20 doz.; 7 in., $3,50 doz.; heavy pattern, 6 in., $3.65 doz.; 7 in., $4.09 doz.

Winter Sporting Goods Moving Out Well

London, Ont.

SKATES AND HOCKEY STICKS.—The movement of booked orders for winter sporting goods is very brisk and skates, hockey sticks, skate straps, etc., are being shipped out in good quantities. Following are some of the quotations:

Starr Make Skates—30% off list.
Hockey Sticks—Youth's White, $2.90 doz.; Special 2nds, $4.25 doz.; Dominion Special, $5.50 doz.; Hespeler Special, $7.80 doz.; Hand Made, $10.80 doz.
Skate Straps—Solid Leather, 21 in., $1.60 doz.; 24 in., $1.90 doz.; 29 in., $2.20 doz.

Ammunition Having Good Demand

London, Ont.

AMMUNITION.—The demand is keeping up for shot shells and metallic cartridges and this should be a record season for these and for firearms. Dominion make ammunition is being sold at 37½% off Canadian list and Winchester and Savage cartridges at 27½ per cent. advance on American list.

Putty Sales Good; Increased Prices

London, Ont.

PUTTY.—Higher quotations are in effect on putty to the extent of 25 cents per 100 lbs., caused by increased freight rates. The demand continues fairly good. Present prices are the following:

Standard, 100-lb. drums, $8.55 per 100 lbs.; 25-lb. drums, $8.80. Pure, 100-lb. drums, $11.05; 25-lb. drums, $11.30.

Glass Sales Are Keeping Up

London, Ont.

GLASS.—Window glass keeps in very good demand. Discounts are unchanged. At this period of the year there is usually good sale for storm sashes and repair work.

WINNIPEG MARKETS

WINNIPEG, Oct. 14.—In spite of the fact that many have been looking for lower prices on numerous lines of hardware, there are still quite a few advances recorded this week for regular and special lines. The nail situation is still very bad and stocks are exceedingly low. Curry combs are also very scarce. Wrapping paper has again advanced. Barrel churns have also received an increase in price and are considerably higher. Step ladders and extension ladders are up. Cotton twine and sash cord have dropped in price.

Very little improvement is recorded in staple lines which have been noted from time to time as being hard to obtain, and stocks of iron and steel, sheets and plates, pipe and pipe fittings, nails and wire are low, in some cases there is very little or no stock at all.

Cotton Twine Prices Show a Decrease

Winnipeg.

COTTON TWINE.—A little reduction has been made in the prices of cotton twine in both balls and cones.

In balls—3-ply, 80c per lb.; 4-ply, 88c, per lb.
In cones—3-ply, 78c per lb.; 4-ply, 84c per lb.

"Reach" Baseball Goods Decline Slightly

Winnipeg.

BASEBALL GOODS.—A new price list has been issued on Reach baseball goods. There has been a good demand for these products all through the summer months and the slight decline which has been made in this revised list will be received gladly by the trade.

Slight Declines in Sash Cord Prices

Winnipeg.

SASH CORD.—There has been a slight decline in the prices of sash cord. The easing condition on cotton markets is probably due to lower prices on cotton products. Following are the quotations:

Sash Cord—In hanks, No. 6, $1 per lb.; No. 7, 98c; No. 8, 98c; No. 9, 98c. In coils, No. 8, 96c per lb.; No. 10, 96c; No. 12, 96c.

Linseed Oil Down Another Cent.

Winnipeg.

LINSEED OIL.—There seems to be a gradual decline in the price of linseed oil for the past few weeks, but it is thought that the price has reached its low level now and orders are being booked at present prices for future delivery. Quotations this week are as follows: Raw, $1.75 per gallon; boiled, $1.78 per gallon.

Wrapping Paper Now Costing More

Winnipeg.

WRAPPING PAPER.—A slight advance has been made this week on the price of hardware kraft wrapping paper and it is now quoted at 16 cents per lb.

Carpenters' Chalk Has Advanced in Price

Winnipeg.

CHALK.—The price on carpenters' chalk in bulk has been advanced slightly this week and is now quoted as follows: White, $2.40 per gross; red, $3; blue, $3.

Higher Prices on Hand Saw Handles

Winnipeg.

HAND SAW HANDLES.—An advance has been made in two lines of hand saw handles. No. 3 is now quoted at $5 per dozen and No. 4 at $5.

Prices Sharply Advanced Step, Extension Ladders

Winnipeg.

STEP AND EXTENSION LADDERS.—A sharp advance has been made on the prices of step ladders and extension ladders. Approximately 50 per cent. has been added to the price of step ladders and about 15 to 20 per cent. on extension ladders. Following are this week's prices:

Step Ladders—Common, 3 ft., $1.30 each; 4 ft., $1.85; 5 ft., $2.15; 6 ft., $2.55; 7 ft., $3; 8 ft., $3.50; 10 ft., $4.75.

Extension Ladders—20 ft., $7.50 each; 24 ft., $9; 28 ft, $10.50; 32 ft., $12; 36 ft., $14.75; 40 ft., $16.50.

Wire Cloth Prices Three-fifty Per Square

Winnipeg.

WIRE CLOTH.—The price for wire cloth has been fixed for the season of 1921 and is quoted at $3.50 per 100 square feet. This is somewhat less than the price charged last season and will be pleasant news to the trade.

Light Gauges in Sheets Are Very Scarce

Winnipeg.

SHEET, BLACK AND GALVANIZED.—There is still a very great shortage of black and galvanized sheets in the lighter weights and there is very little to be had in the heavier weights. The lighter gauges are absorbed as quickly as they appear on the market. Prices are firm and are for the most part nominal. Quotations are here below:

	Black sheets	Galv. sheets
14 gauge	$10 00	$....
16 gauge	10 35	12 35
18 gauge	10 40	12 50
20 gauge	10 40	12 50
22 gauge	10 45	12 65
24 gauge	10 45	12 65
26 gauge	10 50	12 80
28 gauge	10 50	13 40
10¾ oz.	....	13 80

NEW GAUGE 'EXTRAS' ON WIRE

A new list of gauge extras on wire is announced with increases of from 30 to 60 cents according to gauge.

These extras apply to all wires except galvanized, for which special net prices are quoted for each size.

Gauge	Per 100 lbs. over base
9 to 8	Base
9	0 10
10	0 15
11	0 25
12	0 30
13	0 50
14	0 60
15	0 85
16	1 30

Canada Plate Demand Big, But Scarce

Winnipeg.

CANADA PLATE.—The trade need not expect any improvement in the situation as regards the supply of this line as the importers continually report that they will have little or nothing to offer in the way of supplies this fall. At the present time there is a growing demand for stove pipes and this will certainly increase as the colder weather approaches. Prices are nominal under the decided scarcity.

Over 25% Advance on Barrel Churns

Winnipeg.

BARREL CHURNS.—A sharp advance of over 25 per cent. has been made in prices of both hand and power barrel churns and present quotations are as follows:

Hand Drive—No. 0, $11.48 each; No. 1, $11.48; No. 2, $12.75; No. 3, $14.03; No. 4, $16.58.

Power—No. 0, $14.03; No. 1, $14.03; No. 2, $15.30; No. 3, $16.58; No. 4, $21.68.

Lower Prices on Rope and Cordage

Winnipeg.

ROPE.—Lower quotations are in effect on rope and reductions amount to 2 cents per pound on pure manila and New Zealand hemp and 1¼ cents per pound on sisal. Lathyarn is ½ cent per pound cheaper. New base prices are as follows:

Plymouth pure manila, 36¾c base; Plymouth sisal, 24¼c base; Plymouth New Zealand, 28¾c base; lathyarn, single, 24¼c base.

PITTSBURGH MARKETS

PITTSBURGH, Oct. 14.—While the iron and steel market is in process of readjustment not much change occurs from week to week. The various stages of readjustment are likely to be passed through in much the same manner that has been exhibited at various times in the past when a buying movement was ended and a period of slack operation and declining prices had to intervene before business was ready to go ahead again. There is one difference of some consequence, however, that being that the present readjustment in prices and decline in industrial activity is a general one in all lines of business, and may even be less marked in steel than in other commodities, whereas in the past the steel market has undergone wider swings than commodities in general. For instance, after the panic of October, 1907, the iron and steel industry was very much depressed for about a year and a half, whereas business in general decreased much less. This time the iron and steel industry may get off more easily than other industries, for everyone is now talking about price declines and heavy declines, in all sorts of commodities.

The fact that steel prices have not declined in any important way thus far, except for the disappearance of the particularly high prices, involving premiums for very early shipment, does not, of course, mean that the steel industry will get through this period without any price readjustment. The market is simply slow in responding to the disappearance of aggressive buying, this being for the reason that the mills, with occasional exceptions, are very well supplied with contracts, and to reduce prices would be to jeopardize the contracts. By price cutting the mills would lose much more in contract business, through cancellations and postponements, than they would gain by securing new orders.

It still remains the prospect, according to the judgment of nearly everyone in the trade, that the Steel Corporation's prices will not yield, the readjustment being confined to the independents. It is considered certain that the independent prices will recede to the Steel Corporation levels, and a common view is that if they go as far as that they will go somewhat farther, the independents cutting under the Steel Corporation prices, in order to buy their way into the market again, for patrons of independents who have had to pay higher prices for months than patrons of the Steel Corporation are not likely to be anxious to place orders with independents at Steel Corporation prices when they have a wide latitude of choice as to where they will place their orders.

There is even a little talk of the Steel Corporation advancing its own prices a trifle, for the double reason that the corporation suffers a loss of several tens of millions of dollars a year by reason of the freight rate advances last August, and may feel that it should recoup, while the independents might be more ready to adopt Steel Corporation prices if a little concession were made to the independents by way of advances of say $3 or $4 a ton. The independent decline would in that case be much greater than the Steel Corporation advance, but the thing would look somewhat like a compromise, and would be less distasteful to the independents, most of whom have been preaching more or less constantly for a year or so that the Steel Corporation would be forced to advance its prices.

Production

Production of steel ingots in the United States in 1919 is officially reported at 33,694,795 gross tons, against the record of 43,619,200 tons made in 1917. Capacity lies somewhere between 50,000,000 and 55,000,000 tons, given fair manufacturing conditions, so that operations in 1919 barely averaged two-thirds of capacity. For this defection lack of orders was chiefly responsible. The strike that began September 22 restricted output considerably, but it is doubtful whether if there had been no strike, the industry would have operated at capacity, though capacity operations either late last year or early this year.

An interesting point in the statistics is that the Steel Corporation produced 51.0 per cent. of the steel ingot output in 1919, against a proportion of 45.5 per cent. in 1918. The lower percentage is representative of the Steel Corporation's relative capacity, rather than the higher percentage. In the fore part of 1919 the Steel Corporation had much less restriction of output than the independents, due to the fact that the Steel Corporation late in the period of hostilities forecast the future properly, and quietly booked business at prices attractive to the buyer, on the understanding that shipment would be made some time after the war. During the period of Government regulation such orders would fall in Class D, the steel that could be shipped after all priorities and preferences had been taken care of, and of course practically no Class D was shipped as long as the war requirements lasted. The independents either failed to consider the matter at all, or thought they would be able to secure higher prices when the war restrictions were removed. The strike was probably another cause for the Steel Corporation making more than its normal proportion of the 1919 steel output, through the corporation being slightly less affected by the strike than the independents, even though the strike leaders acted as though they were directing the strike particularly against the independents.

Other production items for 1919 were: Steel castings, 976,437 tons; rolled iron, 1,059,451 tons; rolled steel, 24,042,000 tons.

The report of steel ingot production in September shows that the same rate obtained as in August, about 42,700,000 tons a year. There had been rather a sharp increase from July to August, and the failure of September to show a further increase was probably due to some of the mills being under less pressure from their customers for deliveries, since manufacturing conditions were improved and some mills, well enough supplied with orders, increased their production. The cases of mill operations being restricted by the state of order books are still exceptional, and it remains the prediction that this month will show an increase in tonnage output. This month will probably be the turning point in output, with declining production afterward until the general industrial readjustment is completed and business starts growing more active again.

Whether the readjustment will require three months or six months or a longer period is thus far only a matter of conjecture.

Pig Iron

The pig iron market has been so extremely quiet that new price levels have not been clearly developed. Everyone recognizes that the prices to which the market advanced in August, $48.50, valley, for Bessemer and basic, and $50 for foundry and malleable, and which were maintained fairly well through September, are booked to yield to much lower prices, but it requires actual transactions to show where values really stand. It is reported that a middle interest bought 3,000 tons of basic iron from a valley furnace at $45, selling 1,000 tons to a valley consumer at $46, and selling the other 2,000 tons in the east. Other buyers, however, expect to do much lower prices, possibly as low as $40. As noted in last report, foundry iron became quotable at $47, valley, instead of $50, on a small transaction, but nobody else seems willing to pay as much as $47.

Would This Solve Tax Problem?

(Continued from page 43.)

that the present legislation imposes the burden upon the rich alone. They know that they are heavily taxed, though indirectly, upon the prices they pay for tools, supplies, food and clothing, and that these prices are being pyramided by the operation of the peaks formed by the taxing of profits.

Upon the operation of a tax of 1 per cent. on sales, the farmer should buy his implements, clothing, etc., for much less than at present. His food, of his own producing, would not even come under the operation of the tax. When he sells his wheat or his cotton or whatever his product may be, he will sell it at the market price at the time of sale, and add one per cent. tax to the bill. Under such a system, instead of the producer being taxed he is relieved of most of present burden, which, up to now, he mistakenly believed was placed on some other man's shoulders.

The proposed tax would be levied upon each and every business carrying a sale of any commodity or merchandise produced, manufactured, or purchased by the vendor for sale, a tax equal to one per cent. of the gross sales of such business, collectible monthly from the vendor, who would be compelled, under penalty, to keep a true record of his sales. We have thus a new method of Federal taxation now under consideration which provides for an equitable adjustment between the two principles of consumption taxation and income taxation.

Would Meet Government Requirements

In the case of a sales tax, a small consumption tax is levied, resting equitably and fairly upon all, each paying upon what he consumes—the small consumer little, and the large consumer and buyer of luxuries much.

The income tax principle is recognized by a straight normal tax upon all incomes of individuals and corporations beyond an exemption which relieves the man of small income of all taxes except the operation of the sales tax.

Authorities have calculated that this method of taxation, together with certain excise taxes, such as the present tobacco tax, Custom House duties on imports (which are now growing), and possibly surtaxes on certain classes of incomes that can be defined as unearned income, would provide a revenue of more than $4,000,000,000 a year, sufficient to meet the needs of the Government if a reasonable degree of economy is exercised at Washington.

Its advocates believe that the people of the United States will approve a method that (1) places a definite normal tax on all incomes above exemption; (2) an additional and increasing tax upon unearned income; and (3) a small tax of one per cent. on the turnover of commodities from producer to consumer, which will spread out so thin that its effect upon the cost of any one article will be scarcely noticeable, thus placing the heavy load of post-war taxation so that it will fall equitably; avoid dislocating industry; tend to deflate prices; define definitely the taxpayer's liability; promote thrift in contrast to present extravagance; lift the burden of back debt from the taxpayer, and stop much of the necessity for borrowing by the Government.

Such taxes will be what they appear to be, will rest where they are intended to rest, will not lend themselves to concealment or loading, and will turn into the treasury the amount collected from the people, not as at present a percentage of the amount collected from the consumer while the rest goes to increase profits of various individuals and corporations.

Little Hope of Improvement in Exchange Indicated by August Trade

NO reason for expecting substantial improvement in exchange between Canada and the United States in the near future is held out by preliminary figures of the Dominion's trade in August. Canadians during that month bought in the United States to the extent of nearly eighty-six million dollars, as compared with sixty-two and a half millions in August, 1919. They exported to the United States goods to the value of forty-six and a half millions, as compared with $40,250,000 in August, 1919. The balance against Canada in trade with the United States was thus thirty-nine million dollars in August, 1920, as compared with twenty-two millions in August, 1919. In spite of adverse exchange rates thus Canadians have materially increased their purchases in the United States and tended to aggravate the condition, causing depreciation of the Canadian dollar south of the International boundary line. In trade with Great Britain Canada still enjoys a favorable balance. That balance, however, in August, was only about eleven and a quarter million dollars, as compared with forty-four and three-quarter millions in the same month last year. Canadian imports from Great Britain in August were valued at twenty-one and a half million dollars, as compared with seven and a half millions in August, 1919, but Canadian exports to Britain were only $36,748,689 last month, as compared with $52,238,338 in August, 1919. Exchange rates greatly in favor of Canada doubtless operated both to increase imports from Britain and to decrease exports.

During the month Canada's total imports were valued at $124,318,014, as compared with $81,357,305 in August, 1919. Total exports amounted to $112,000,000 approximately, as compared with $116,000,000 in August, 1919.

In earlier months of the present year Canada on the whole enjoyed a favorable trade balance. The movement of the wheat crop will make itself felt in the present and succeeding months of the year. It will swell exports to Great Britain, and if any considerable quantity goes to the United States under the arrangement for reciprocal free trade in wheat and wheat products between the two countries it may serve to reduce Canada's adverse trade balance in the Republic, and to improve exchange conditions.

English Trade is "Coming Back"

THAT England is making a wonderful economic and industrial recovery and will soon be back in leadership in manufacturing was the general impression of the country gathered by Herbert Swallow, of the Ingersoll File Company, who has just returned from a brief business trip in that country. Although he spent but six days altogether in England, Mr. Swallow travelled from one end of it to the other by train and automobile, visiting the chief manufacturing centres, holding conferences with manufacturers, labor leaders and business men and made a close observation of business, living conditions and industrial matters during that period.

Speaking of the steel industry, Mr. Swallow said it was in very good condition, and that England was coming to the front again. In the old days of cheap living and low operating costs, the manufacturers were content to follow their old slow methods, and turn out goods without any thought of properly organized production. The coming of higher living costs and bigger wages has changed all that, and the English steel concerns have now installed the most modern machinery for speeding up production to the maximum, while still retaining the proverbial English quality in their goods. A striking fact about these companies is that large numbers of young men are now in control, and that they are real live wires who are revolutionizing affairs. The finest production methods known are being adopted, and, as workmen are skilled mechanics who have been born with the knowledge of steel working in them, England is particularly well fitted to take the lead in this industry. In some places old fashioned production methods are still being used, but these are rapidly being replaced by more up-to-date plans.

Canadian Iron and Steel Output in 1919

THE total production of pig iron in Canada in 1919, excluding ferro-alloys, was 917,346 short tons of 2,000 pounds, as compared with 1,195,551 short tons in 1918. Of the 1919 total, 910,080 tons were made in blast furnaces and 7,266 tons in electric furnaces from scrap, chiefly shell turnings. In 1918 the blast furnace production was 1,163,510 tons and the electric furnace production from scrap steel was 32,031 tons. By grades the 1919 production included: Basic, 580,426 tons; Bessemer. 7,637 tons; foundry and malleable, etc., 322,017 tons; low-phosphorus iron (electric furnace), 7,266 tons. The corresponding figures for 1918 were: Basic, 966,409 tons; Bessemer, 15,415 tons; foundry and malleable, etc., 181,696 tons; low-phosphorus iron (electric furnace), 32,031 tons.

The production of ferro-alloys in 1919 was about 48,579 tons, as against 44,704 tons in 1918. Over one-half the tonnage made in 1918 was spiegeleisen, made by the Algoma Steel Corporation for its own use.

The exports of pig-iron during 1919 were 63,605, and of ferro-alloys 22,449 tons. The imports during 1919 included 35,800 tons of pig-iron and 16,221 tons of ferro-alloys.

The total production of steel ingots and direct steel castings in 1919 was 1,031,329 short tons, of which 994,349 tons were ingots and 36,980 tons direct steel castings. The total production in 1918 was 1,873,708 short tons, of which 1,800,171 tons were ingots and 73,537 tons were castings. The 1919 production included: open hearth steel, 1,008,540 tons; electric steel, 15,467 tons; crucible and converter steels, 7,322 tons. The 1918 production included: Open hearth steel, 1,746,334 tons; electric steel, 119,130 tons; crucible and converter steels, 8,244 tons.

The total production of pig-iron, ferro-alloys and steel in electric furnaces was about 43,540 tons in 1919, as compared with 191,869 tons in 1918 and 101,031 tons in 1917.

The production of rolled iron and steel products in 1919 included: Steel rails, 316,304 short tons; plates and sheets, 25,408 short tons; and structural shapes, 29,295 short tons; besides a large tonnage of bars, rods, etc., for which returns are not yet complete. The total production in 1918 of finished rolled products was 1,164,610 short tons, which included steel rails, 162,747 tons; wire rods, 154,789 tons; merchant bars and rods and structural shapes, 435,017 tons; plates and sheets, 26,413 tons; rolled blooms and billets for forging purposes and rolled blooms, billets or slabs sold for export. 395,644 tons.

New Rubber Process

A recent demonstration in India of a new process for the vulcanization of rubber took place at the Manchester College of Technology. Vulcanization of crude rubber mixed with a large proportion of waste material like leather shavings or sawdust was proved by this method to be chemically possible, as well as a saving in time and cost compared with existing methods. It is claimed that this process will produce a material which will stand the test of wear and weather.

Windsor in Danger of Winter Gas Famine

Windsor.—This city on the tail end of the natural gas lines from the fields at Tilbury, according to F. W. James, manager of the Union Gas Company, is in danger of being without gas the coming winter even for cooking purposes.

Suggest New Fall Uses For Paint and Varnish

One Dealer Gives a Stencil of Name of the Farm With Purchase of Barn Paint—Window Trim for Hallowe'en—Women's Trade Bigger Factor Since the War—How One Dealer Keeps His Paint Salesmen Well Informed.

THE development of the fall painting idea is an interesting tribute to the power of publicity directed along proper channels and indicates the tremendous possibilities which lie in the direction of advertising paints and varnishes for every month on the calendar.

As each October rolls around the autumn leaves begin to drop, the merchant dusts off his set of reasons why painting should be done in the fall and prepares for business in seasonable lines. Undoubtedly some merchants have misgivings about the efficacy of some of the arguments which are advanced for fall painting, but nevertheless the fundamental principles of the idea are quite sound. The more settled weather, the fact that during the heat of summer the wood has had a chance to season, the absence of flies and insects, and the approach of winter make fall a most desirable time to paint.

Paint specialties for interior use also have a big sale at this time of the year but sales do not come from merely hanging up a sign that you sell floor paints and bath tub enamel and varnish for the parlor, but by suggesting new and unsuspected uses and advantages, by stimulating the imagination of the home owner and convincing him that the investment of a few dollars in decorative materials will bring back dividends in improved and more cheerful surroundings and by delaying the natural deterioration of buildings.

Readjustment of Incomes

Another important point which dealers can remember in connection with the sale of paint is the fact that in recent years the income of what has been known as the middle classes has increased greatly. There has been a marked redistribution of income. If in the past the merchant has been catering to the banker or the business man or the retired group, thinking that that was the class that possessed the most elastic pocketbook, remember that the income of the industrial classes — the mechanic, the electrician, the laborer— has increased tremendously and it is them to whom an appeal can well be directed to spend at least a part of their bigger wages in the improvement and protection of their properties. Many of them have probably purchased better grades of homes and larger premises, since they have been enjoying a larger income, and perhaps they are still applying the old principles which suited the properties they owned in less prosperous days gone by. Should there be signs that the present prosperity of this class shall not continue then it is more important than ever that they take steps to conserve what they now hold.

Gives Stencil With Purchase of Barn Paint

An interesting factor used by one dealer to develop business in farm districts is to take advantage of the increasing tendency on the part of farmers to designate their premises by some distinctive name. The merchant has developed a selling argument by offering to cut free a stencil pattern of the name of the farm, which will be given with every purchase of barn paint. Often a little stunt like this will arouse local pride in the appearance of the community's barns and equipment, and when this stage is reached it is a splendid stimulant to paint sales.

Why Paint Knowledge is Necessary to Salesman

A good knowledge of paint and the requirements to make a good painting job is required by the efficient salesman, to get away from the bad effects of such a situation as is described in the other article in this section. This reminds the writer of a story overheard in the paint department of a hardware store recently. A customer entered the store and going up to the paint counter announced to the salesman that he was going to paint his dog kennel. "Gimme something good and cheap," he said.

"I certainly will," said the clerk, "but surely you're going to wait a day or so" (for outside it was raining heavily).

"Great Scott, no. This shower won't last and I'll clean up the job by two p.m," was the response.

This is typical of instances which happen every day in the paint and varnish department of most stores, and indicates the necessity of giving sound advice.

Keeping the Salesman Informed

Hardware store owners have a variety of ways of teaching the paint salesman what he should know about paints in order to best satisfy customers. One dealer adopts the plan of home tests. Whenever the manufacturer markets a new product each one of the boys in the department takes home a can. A week or so later at one of their get-together meetings the clerk must tell the others how he prepared the sur-

Two Very Different Types of Paint Salesmen

The Editor,
Hardware and Metal, Toronto.

Dear Sir:—

While in ——— yesterday I dropped into a big departmental store to get some white paint, as my wife wished to do over the bathroom from the natural dull wood finish to a pure white. She had seen Mrs. Jones last week and while admiring the white finish of her bathroom had been informed that it was also so much easier to keep clean.

I asked for a quart of white paint as I wished to paint my bathroom. The clerk, without displaying any evidence of interest, handed me out a quart of a recognized quality brand of "Outside White." Upon remonstrating that the paint was for inside use I was informed that the only difference in "outside" and "inside" paint was that one was made for the outside and the other was made for the inside, but, leaning over the counter and in a lowered confidential tone, the clerk informed me that "really there was no difference." His sincerity impressed me as being anxious only to sell a quart of paint and not the success of the job in my bathroom. Not having been sold, or satisfied, I decided to call on Blank's Hardware on my way home which by the way, was in my own community. I was immediately impressed by the warmth of my reception. I was recognized and received sympathetic attention. I informed the salesman that I wished to turn the dark wood of my bathroom into a nice white.

"Oh," he said, "I presume Mr. Smith, that you want to have a white enamel finish." "Yes," I said, "I guess that is what I want."

"Now," he said, "you will have to first apply two or three coats of our flat white to cover the dark wood and make a good base for the last coat of our white enamel. While talking he was laying the cans out in front of me in such a confident way that I could already see a beautiful white bathroom.

With the sale of the proper style and grade of brush, a few more instructions as to the proper application, and finally a parting sincere wish for the success of my job, I departed less several dollars, but with an armload of goods, the vision of a bathroom much better than Mrs. Jones' and a wholesome respect for Blank's Hardware store, which in future will be "My Hardware Store."

Yours truly,

A SANITARY
SANI-FLAT
FLAT OIL PAINT

A Profitable Line to Sell

For a service-giving and a surface-covering interior paint sell Sani-Flat.

Sani-Flat is absolutely non-poisonous, as it contains no lead and is especially adapted for walls where a soft velvet finish is desired. It works easily and sets slowly, showing no laps or brush marks and is of great body and covering qualities, two coats covering perfectly. Non-changeable, the White positively will not turn yellow with age. Washable and can be cleaned with water without injury, and presents a perfect undercoat for enamel.

Only properly prepared and treated oil is used as a binder.

Sani-Flat sells.

The Brush Department

Legislation to Enforce Brush Sterilizing

Emphasis Laid on Spread of Anthrax from Imported Hair and Bristles at American Brush Manufacturers' Meeting—Suggest Standardization of Household Brushes.

THE semi-annual convention of the American Brush Manufacturers' Association was recently held and a number of points of interest to dealers handling brushes were considered. Advisability of agitating national legislation to enforce sterilization of imported hair and bristles came in for considerable discussion, particularly in view of recent discoveries of anthrax infection from this source. The handle and ferrule situation, including the present difficulty of securing suitable handles for brushes was considered. Recent foreign competition in household brushes, the advantages of a standardization of such brushes and the importance of price maintenance were also points of importance.

The closing general session was given over to a discussion of the prevention of anthrax, a disease that has spread rapidly since the war because of the importation of brushes from China and Japan, largely horse hair. It was shown that the germ is largely found in this type of material, and the infection comes from a slight cut, or bruise, on the hand of the worker in bristles, shaving, paint, white washing and other types of brushes. An ulcer soon forms and in many cases death results. In England the disease has become so serious that the importation of shaving brushes from Japan has been prohibited. It was stated that 34 cases have developed in New York within the past few months, 10 of which have proved fatal. Some of these cases, it was stated, come from shaving brushes and some from the use of other types or the handling of raw materials.

Many of the facts were outlined by papers read by P. A. Surgeon and H. E. Hasseltine of the United States Public Health Service, and Dr. S. Dana Hubbard, of the New York Department of Public Health. Dr. Hubbard said that in New York the raw material and all kinds of brushes should be sterilized. He advised that anyone buying shaving, hair or other brushes handled promiscuously, sterilize them before using, by dipping them into boiling water.

SELLING MORE PAINT SPECIALTIES

Dealers know there is good profit to be made in the sale of paint specialties but it requires some little ingenuity to establish a steady large-volume trade in the specialties. Most people never think of using some of the best paying lines unless the dealer suggests it to them by advertising or some other way.

Take, for instance, metal lacquers. People store their trunks in cellars, garrets and damp closets. The locks, hinges and trimmings soon rust and then break. A few cents worth of lacquer is the stitch in time that saves nine, but while lacquer costs but a few cents, suppose hundreds of packages of it were being sold to all trunk owners; would not the aggregate profit be well worth while?

Take the couch hammocks found on hundreds of porches in every dealer's territory and now being put away for the winter. They have been exposed to outdoor conditions; the enamel is rubbed or scratched off the frames; the frames are exposed to rust. A coat of ordinary porch chair enamel would prevent damage. A suggestion from the dealer will sell the enamel.

Thousands of dollars are spent annually by home owners in replacing water and gas pipes exposed to dampness in cellars and elsewhere and consequently, rusted out. A coat of anti-rust paint once a year would stop this rust. A suggestion from the dealer will sell many a can of paint and relieve the owner of the expense of many a costly and unnecessary plumbing and gas fitting job.

Suggest New Fall Uses

(Continued from page 62)

face, how the paint was applied and the results it gave. Then everyone starts to ask questions. "In a few minutes every salesman can tell more about that particular product than the manufacturer himself," said this dealer.

A Window Trim for Hallowe'en

The use of timely events as the motive of a display in the window or store interior is often used to good advantage in the paint department. Towards the end of this month comes Hallowe'en. The conventional window display for this occasion has been the hollow pumpkin, corn stalks and other things suggestive of the harvest. There is such a sameness about such arrangements, however, that the dealer who shows some initiative in getting up something new would be well rewarded. Why wouldn't it be a clever hunch for the dealer to use half a dozen empty paint cans, with eyes, nose and mouth cut out, and string them across the window with a little electric light in each can. A sign placed below reading something like this would complete the display:

"Hallowe'en need have no terrors if your house is painted with ————'s paints."

Women Now Do More Buying

The war has brought a tremendous change in merchandising methods. During the war, while half a million Canadian men were engaged in military work, the strings of the family purse passed over to the opposite sex. Statements to substantiate this are given by dealers in all parts of the country. Women were forced to extend their range of shopping and even now, when peace has again been established, it is found that a return of old conditions is slower in taking effect than was the first change. During and since the war dealers have found that women have purchased an increasing amount of paint in small quantities over the counter, and this is a branch of trade which is well worth attention.

It has even been suggested that women are quicker to see the economy

BOECKH TRADE MARK EST^BD 1856 TORONTO

BOECKH'S

Rubber Set Paint and Varnish

BRUSHES

The bristles can't come out

Perfect for Sales and Service

Practical painters as well as amateurs appreciate Boeckh Brushes because of their superior quality and design. Experience in using these excellent brushes has proved the advantages of their perfect balance; easy, comfortable handles; strong, well-finished ferrules, that are neat in appearance as well as providing the exact scientific support that the brush requires. The flexible bristles give that soft, velvety and elastic contact so much appreciated by experienced painters.

These advantages are combined by skillful workmanship to produce Boeckh's—the perfect brush—the most satisfactory on the market to use or sell.

Naturally, Boeckh dealers have no "kicks" or "comebacks"; their circle of permanent, satisfied customers is ever growing.

Every Brush Guaranteed

of painting for preservation. If so their ideas should be encouraged for at this time when building construction is very inactive due to high costs, it is more than ever necessary to protect existing buildings.

Paint business in Canada has been in goodly proportions this year, and this fact, taken in view of the lack of new building construction, is significant of the business which is to be expected when building returns to normal. It is reported that many people have been postponing building until next spring to see if prices will decline, as they have done on many other products. If prices do drop there will be much building started, and if they don't people will likely build anyway, for their requirements will then be more pressing, and they will then know that building costs will not likely drop for some time. The housing question also promises to be taken up actively by various organizations next spring. In the meantime fall painting is the big idea, and many of the above suggestions can be used by the trade to good advantage at this time.

Varnish Market Still Rules Strong

Montreal.—In discussing the varnish situation with W. W. Ingersoll, vice-president and secretary of the Dougall Varnish Company, Ltd., Montreal, the very strong tendencies of the market at the present time were referred to.

Despite the declines for linseed oil and turpentine, Mr. Ingersoll states that the situation as confronting the varnish manufacturer is little improved over that of several weeks ago. "Varnish makers are still working on high-priced materials, and while there has been a drop in turpentine and linseed oil the effects of this will not be felt by the varnish makers for nine months to a year. As a matter of fact prices should be advanced on many lines. Some of these are selling on a very close margin and there is an extremely small profit for the makers."

Mr. Ingersoll pointed out that while advances would be justified and should be made on a number of grades of varnish, to do so would entirely upset the plans of those dependent on varnish to fill contracts which they had in hand, and this was one of the reasons why revised prices had not been made effective.

Among the factors which are important ones at the present time are those of the scarcity of chinawood oil and gums. Prices on these have been firmly held and a number of them have been very scarce. There is an absolute shortage of gums and rosin, though lower in price, is not to be had when wanted. The same condition applies with regard to turpentine, and Mr. Ingersoll states that producers are not turning out either of these products in necessary quantities, so that when a manufacturer goes into the market for his requirements he is likely to be delayed in getting what he requires.

"Containers also are very hard to get delivery of, even on contract placed some time ago. They are often to be had only at higher prices, and the shortage is still severe," said Mr. Ingersoll.

With regard to demand, this has been very active all through the season, and Mr. Ingersoll anticipates the future with much optimism.

How Hardwaremen Advertise Paints--No. 26

WITH the approach of cold weather the basis of the paint advertisement may be frequently varied. There are certain lines of paint specialties for indoor use which the dealer may push to good advantage in the late fall and winter months. One of these is finish for furniture woodwork. This line is dealt with in this ad. by McGowan's Hardware, Teeswater, Ont., which points out that woodwork will depreciate more in one year than it would cost to paint it twice. This is apart from the improved appearance to be had from the application of the necessary finish.

It Pays to Paint.

If your woodwork is not protected with a suitable covering of Paint, it will depreciate more in *one* year than it will cost to paint it *twice* and in the end it will have to be painted.

And compare the appearance of the painted and the unpainted building, you cannot be too painstaking about this matter. It is the most vital to everyone who owns property, keep the house and other buildings safe, keep the furniture, floors, doors and all woodwork as good as new.

LOWE BROTHERS HIGH STANDARD is the line we sell.

The Majestic

Speedy in Action Speedy in Sales

Before placing your order for mowers, it will pay you to investigate Eureka Machines. Our range consists of the following:

Rapid, Garland, Majestic, Speedy, Forest Glen and Federal.

Sizes: 14, 16, 18 and 20 in. cut.

The Speedy is one of the Eureka Famous Six, that has met with popular favor wherever used. Its reliable action, resulting from the high quality crucible steel blades, eliminates that fault found in many machines of pressing the grass in the earth, instead of cutting it. The Speedy is a quality machine built for service and it "delivers the goods." The hardware man will find the Speedy a machine he can sell with ease, customers recognizing quickly its superior advantages. It pays to sell Eureka Mowers. Why not be our sole agent in your district? Write to-day.

Weekly Paint Markets

MONTREAL

MONTREAL, October 14.—Paint markets are quiet. There are few new features. Linseed oil and turpentine are moving slowly at practically unchanged prices. White lead in oil and dry is being exported quite extensively. Varnishes are firm. Box glass is selling fairly well and the discount is now 20 per cent. instead of 15 per cent. as formerly. This is due, in part, to the importation of supplies of Belgian glass.

Few New Features; Linseed Oil Quiet

Montreal.

LINSEED OIL.—Prices are ruling without change to speak of, excepting that tendencies are undefined. No jobber or crusher desires to make a forecast and the market is up and down from day to day. One comment reflected the feeling that the farmer will not market, extensively, his seed. That is, if prices continue falling he will hold off selling. Meanwhile there is not much trading, the hand to mouth buying policy applying here.

	Imp. Gal.	
Raw—		
1 to 4 barrels	1 55	1 60
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 58	1 60½
3 to 4 barrels	....	....

Turpentine Held; Undertone Soft

Montreal.

TURPENTINE.—There has been little new in the situation since last week. Prices have been tending downward, though actual reductions have not been made. At the gallon price of $2.30 there is little interest manifest in trade circles, and small lots only are reported to be selling. Producers, according to the reports emanating from importers, are not anxious to increase production much beyond the market requirements, this to keep prices up.

	Imp. Gal.	
Turpentine—		
Single barrels	2 30	2 35
Small lots	2 40	2 45
(Packages extra.)		

Putty Holding; Sales Are Active

Montreal.

PUTTY.—There is much activity in putty, the movement being seasonable. Prices are steady, but unchanged, and the existing schedules are expected to rule until December 15th. Supplies are quite ample for the needs of the trade.

Commercial Putty	5 tons	1 ton	Less than ton
Bulk Barrels, 800 lbs.	$6 50	$6 75	$7 10
Bulk Drums, 100 lbs.	7 50	7 75	8 10
Do., or tins, loose 25 lbs.	7 75	8 00	8 35
Bulk Tins, cased 25 lbs.	8 50	8 75	9 10
Bulk Drums or tins, loose 12½ lbs.	8 00	8 25	8 60
Bulk Tins, cased 12½ lbs.	8 75	9 00	9 35
Bladder Barrels, 400 lbs.	8 75	9 00	9 35
Do., Cases, 100 lbs.	9 00	9 25	9 60
Tins, 1 lb.	11 10	11 35	11 70

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Export Active on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have been maintained without change on lead in oil, and the local demands, while light, are seasonable. Export trade is active, however, and the jobbers are well satisfied with this feature of the trade. While pig lead has been easing for some time past, it is expected that the cost of containers, and the difficulty of maintaining stocks of these and of wood cases will offset for the time being any favorable tendencies on this score.

Box Glass Now Selling at 20% Off

Montreal.

GLASS.—Due to the arrival and sale of certain quantities of Belgian glass, the immediate situation is affected and prices are somewhat more favorable on box glass, the discount being 20 per cent. instead of 15 per cent. The jobbers state that there is a fair amount of business being transacted and the stocks are not excessive. Some jobbers believe that any change of the basis will come only gradually.

Paints Are Slow; Varnishes Holding

Montreal.

PAINTS, VARNISHES.—Prices are steady and unchanged on paints and specialties. The demand is now a quiet one, but the outlook is satisfactory. Varnishes are steadily firm and there is no indication of any lower price basis for a long while to come. The scarcity of certain raw materials still is manifest.

TORONTO

TORONTO, October 14.—Conditions in the paint and varnish trade continue normal with but little change in prices. Business is reported to be a little better than average for this period of the year. White lead in oil and putty remain firm and unchanged with no indication of any alteration for the present. Shellacs are a little easier with a small reduction in prices. Glues are nominal and have a firming tendency. Glass is in fair demand with moderate sized sales and prices unchanged from last week. Turpentine continues a little easier and linseed oil appears to be stiffening somewhat.

Turpentine Shows Another Decline

Toronto.

TURPENTINE.—A further decline of 5 cents per gallon has been recorded in turpentine prices as we go to press. The present prices bring turpentine very close to cost at the present time, and it does not seem that very much more change in a downward direction can be possible. Sales are said to be rather light. The new quotations are as follows:

	Per Imp. Gal.
Turpentine—	
1 barrel lots	2 15
2 to 4 barrel lots	2 14
5 gal. lots	2 30

Linseed Oil Prices Unchanged; Small Sales

Toronto.

LINSEED OIL.—No further change in the price of linseed oil is reported this week but an apparent stiffening is noted. The demand is stated to be slightly below the normal and jobbers do not seem to expect any great change. Whether the bottom has been reached is not known. Latest quotations are follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 55	1 58
3 to 5 barrels, gal.	1 54	1 57
6 to 9 barrels	1 52	1 55

Prepared Paints and Varnishes Holding Firm

Toronto.

PREPARED PAINTS AND VARNISHES.—Business in these lines continues fairly good and the fall painting it is said, is apparently well beyond the average. Floor paints and varnish stains for interior decorations are reported to be moving well and the de-

Paint That Repeats

It's often easy to make first sales.

But first sales are not the most profitable sales. You find your greatest profit in repeat sales—the business that comes to you without effort—the results of good goods that have given satisfaction.

It is just this kind of profitable repeat business that Glidden reputation brings. While it is selling painting materials for you it is selling other products. Glidden reputation will be a real asset for your business.

If you were in business for a month or two any kind of paint might do. But you're in business to stay. So are we. Let's get together and get a firm hold on the paint business in your territory.

Write to-day for prices and plans.

THE GLIDDEN COMPANY, Limited
Toronto, Ontario

***Branches* at Montreal and Winnipeg**

"Save the surface and you save all" *Paint & Varnish*

mand for the latter appears to be increasing all the time.

As has been pointed out previously prices on paints and varnishes are expected to hold without change for the present.

Glue Quotations Inclined to be Firmer

Toronto.

GLUES.—Prices on glues are reported as being fairly nominal and firm. A shipment of French glue which has just arrived is costing 3 cents a pound more than it did last July, and this in the face of new customs valuations would make it 4 cents higher in price than three months back.

Shellac Prices Are Easing

Toronto.

SHELLACS.—Lower quotations are made on shellacs and prices on standard lines are 50 cents per gallon less. New quotations are as follows:

Pure White, per bbl. $7.75; gal. jugs, $8.25.
Pure Orange, per bbl., $7; gal. jugs, $7.50.

Bronzing Liquid Firm and Unchanged

Toronto.

BRONZING LIQUID.—The prices on bronzing liquids remain firm, and No. 1 is being quoted at $2.25 per gallon. The demand is said to be only normal.

Glass Less Active; Prices Easier

Toronto.

GLASS.—The demand for window glass is reported by jobbers to be less than it should be at this time of the year, and it would appear that lower prices have not increased business to the extent that might have been expected. With deliveries from American factories taking three months and over, it does not look as if the market is overloaded, and with light stocks firm prices may be expected from U. S. sources. Supplies from Belgium are yet of a small nature and until larger shipments come, not much change is expected. Prevailing quotations are 25 per cent. off list for case lots and 30 per cent. for orders of over 25 boxes.

White Lead in Oil Demand Good; Firm

Toronto.

WHITE LEAD IN OIL.—Prices continue firm and unchanged for white lead in oil and no alterations are expected for the present. It has been pointed out that it would take a steady and lasting decline in lead to affect the price of the corroded article. The process of corroding is not a speedy one and supplies for the purpose have to be bought some months ahead, so that it would be some time before white lead prices became affected.

Putty Prices Firm; Sales Active

Toronto.

PUTTY.—There has been an advance of 25 cents per 100 pounds in the price of putty due to the freight rate differentials being increased. The demand for this product continues to be fairly good and no evidence is given of any lowering of prices. The ingredients with the exception of oil remain firm, and costs of production are said to be advancing. Containers have been on the up grade for some time with a scarcity of same. Present quotations are as below:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80
Do., less quantities	10 05
Pure, in 100-lb. drums	11 05
Do., 25-lb. irons	11 30
Do., bladders in bbls.	12 30
Do., less quantities	12 55

Glass May Be Easier Next Year

THE glass situation has some interesting aspects at the present time. This has developed owing to a peculiar series of circumstances in Europe, and the results have reflected and may continue to reflect more on the Canadian market in due time.

Belgian glass, as already explained in several articles appearing in Hardware and Metal during the past two or three months, has been coming into Canada in increasing quantities. This seemed to be unusual in face of the destruction that was wrought during the war, plants being put out of business there and the destruction of the war requiring the replacement of whole cities and centres with glass.

In discussing the matter with the manager of a prominent glass company this week, he made some observations that are particularly timely. It appears that, under the present conditions existing in Europe, there is a closed market in several countries that ordinarily purchase glass from the Belgian factories. Russia, Germany to an extent, the Balkan States, and even China—always sources of considerable business for the Belgian makers, have been closed for the time being to these supplies. China is obtaining her supplies, it is said, largely from Japan at the present time.

Rapid Recovery

The recovery of the Belgian glass makers has been very rapid, it is pointed out. Not only have they been able to overtake the demand at home to a very great extent, but they have, as is quite natural, been exporting as freely as possible in order to help the country get on its feet again. Surplus supplies therefore found their way to Canada and even into the United States. And, with the usual sources nearer home closed for the time being, and with credits impaired on the part of several or all of those countries mentioned, it was but natural that fair supplies, at fair prices, should be offered this market. And such has been the case.

It would seem that, while there has been improvement in stocks available in the hands of Canadian importers within recent weeks, there was much need of this improvement, for supplies had run very low, especially on double strength glass. Considerable relief has been afforded, although importations have been made at fairly high prices, and until this glass is liquidated there may be no easing of prices.

One of Two Things

With declines on many lines now becoming more probable, the question is asked: "Will glass not be lower?" In time it doubtless will be purchasable for less money, but the condition cannot be definitely forecast for these reasons:

A survey of the situation reveals the fact that there has been some easing of the basis in Belgium, due to the conditions already outlined. Here, there has been some cutting of prices by jobbers and others, and for glass in quantities favorable prices have, it is understood, been obtainable. On the other hand several importers state that there are by no means heavy stocks carried by the trade and that there will be little likelihood of a heavy stocking this fall. By spring, therefore, it may be that the other markets in Europe, now shut off, will be buyers on an increasing scale. Added to this the demand in this country, in both Canada and the States, will be greater in the spring, and importers everywhere will then be stocking up. Any easing off in the basis may then experience a reaction, due to this heavier buying from many sources. In any case the situation in the minds of local glass men, does not promise drastic price changes in the near future. By spring a more favorable condition may have developed as regards both supplies and prices. Time alone will reveal this.

Fire at British America Paint Company

Calgary.—Fire starting on the ground floor of the British America Paint Company last week did heavy damage to the large stock of varnishes, paints and wall paper. The amount of loss has not been appraised yet but the insurance is believed adequate.

Imports of Paint, Varnish, Zinc Oxide from United States

Exports of paint, varnish and zinc oxide from the United States to Canada during July, 1920, were as follows:

White lead, 40,708 lbs., valued at $4,681.

Ready mixed paint, 10,822 gallons, valued at $21,631.

Varnish, 5,257 gallons, valued at $11,092.

Zinc oxide, 1,052,635 lbs., valued at $101,746.

Make Your Window Displays of Skates Early

DON'T let people wait to see if this is going to be a hard, cold winter.

Get them thinking about skates—talking about skates—enquiring about skates—in advance of actual skating weather.

Make attractive window displays of Automobile Skates earlier this season than you've ever done before.

The earlier you get after the skate business the more skates you will sell. A good, hard drive for trade, started early, will net you more profits and assure a more thorough clean-up of your skate stock.

Right now is none too early to start making plans.

CANADA CYCLE & MOTOR CO. LIMITED · C·C·M · WESTON MONTREAL · WINNIPEG VANCOUVER

MADE of the same special steels as used in highest grade automobiles. Given the C.C.M. heat treatment, which produces the unusual combination of a glass-hard running edge over a tough core, making the blades practically unbreakable. Also heavily nickel-plated over copper to prevent rust.

Have You Met Tommy and Betsy?

SURELY you know this charming couple. If you don't recognize them at first sight, look again. You've seen them in one of the leading magazines. Perhaps it was in Everywoman's World, MacLean's, Canadian Courier, Toronto Saturday Night, American, Cosmopolitan, Pictorial Review, Woman's Home Companion, Good Housekeeping, or House Beautiful.

Their pictures have been appearing to the number of some six million copies from month to month for more than a year. Look for them! Each time they tell a different story — a different domestic drama. They are always making their home additionally happy by doing over an old piece of furniture with "61" Floor Varnish; made in eight lustrous, semi-transparent wood-stain colors.

How about the Tommies and Betsies in your town — will they buy their "61" and other Pratt & Lambert Varnish Products of you?

Fill the Fall Demand

Registered **Floglaze**

The Finish That Endures

Will Please Your Most Particular Customers

It gives a brilliant, glossy, hard-wearing surface to wood, metal or concrete.

It is equally good indoors or out.

It has innumerable uses in the home—from cellar to the garret.

Its worth has long been proved on the farm as the standard finish for use in the dairy and implement shed.

It is a particularly good-selling proposition because it has so many different uses.

Floglaze is an excellent line to develop "indoor month" painting, keeping your paint department a profit-producer during the late fall and winter.

If you are not now selling Floglaze write for our dealer proposition.

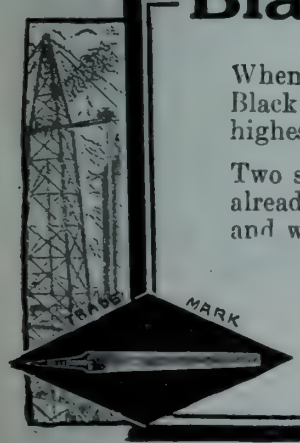
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

Durability

Barn **Paint**

Permanence

"Save the surface and you save all" *Paint & Varnish*

Spreading

The Four Cardinal Points

of the many selling features of **STEPHENS** Barn Paint are shown above. The farmer to-day is not only painting to save the material but he wants his buildings to reflect credit on him.

The modern farmer is efficient and successful, and determined to have his building look efficient. He wants **STEPHENS** Barn Paint because it is reasonable in cost, durable under weather attacks, permanent in color and spreads easily, covering well. It stamps the barn owner as an alert, progressive farmer. There are many other selling points that help to close your sales.

An Agency will pay you—Ask about it

The Largest Wholesale Hardware Dealers in Canada

PYREX
Transparent OVEN-WARE

PIE PLATE—SIX-SIDED

CUSTARD CUPS

Saves Fuel, Food and Labor

INDIVIDUAL BAKER—ROUND (RAMEKIN)

PYREX saves about one-half the fuel usually required, because it absorbs nearly all the oven heat and bakes food quickly.

PYREX saves labor—it is always free from grease and odors, for nothing can penetrate the hard, smooth surface.

PYREX saves food in many ways. Meats, vegetables, etc., when cooked in PYREX, retain their natural color and flavor to such a degree that economy may be practised in buying the less expensive kinds and yet have delicious food. Most foods usually cooked on top of the stove can be better prepared in the oven.

Every practical shape and size for baking is made in PYREX. It is ready for immediate use and never discolors, rusts, crazes, dents or chips.

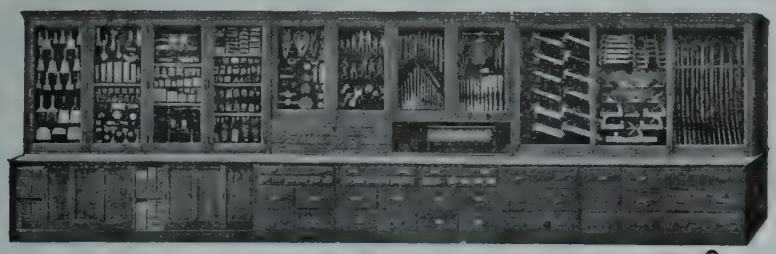
"DULUTH"

Sectional Hardware Store Equipment



Well-Displayed Goods Make Sales Easy

The display doors used in Duluth Cabinets are not ordinary doors, hung with ordinary hinges, to ordinary open shelving—they are far more than that. They are constructed so carefully and well, and are so substantially hung, that when the samples are all in place on the green felt-covered panels in the rear, the doors will not sag or bind. When one considers the number of times each day in the year these display doors are opened and shut, one can quickly see how important it is that they be properly made. This is only one of the many features of Duluth Sectional Hardware Store Equipment that is carefully and thoroughly planned and constructed.

Write to-day.

Painters and Householders

Are Both Big Buyers of

TRADE SIMMS SET IN RUBBER MARK

PAINT AND VARNISH BRUSHES

Your paint brush sales are not limited to your painter customers. Every householder has some small painting or varnishing jobs that he does himself.

The Painter KNOWS that SIMMS are the best brushes for painting and varnishing, and he knows the right brush for each job.

The average householder does not know which is the correct brush for his job, and you can advise him.

There is a SIMMS brush for every need. Insure yourself the good will of your customer by recommending the correct one. A satisfied customer means repeat orders. **SELL HIM A SIMMS.**

T. S. SIMMS & CO., LIMITED

"Here's My Store" —*Winthrop Wise*

Only one dealer to a locality—and the full power of our whole campaign is directed right at his store. Bigger and better than ever are the plans we have devised for our Exclusive Agents this year.

Kyanize
KY-AN-IZE

VARNISHES and ENAMELS

A line of quality products that will build up a long line of satisfied customers. *Kyanize* has doubled and tripled the business of many hustling dealers. Backed by the most aggressive, original and powerful advertising ever devised on an Exclusive Agency Proposition. Big space in the leading magazines, signs, cut-outs, and smashing window displays, including Winthrop Wise, the twenty-four-hour-a-day salesman. A live-wire proposition all through.

PROGRESSIVE MERCHANTS—WRITE US

There's a real opportunity open to one aggressive merchant in localities where there is now no Agent. If there is no *Kyanize* Agent in your town write us to-day. Our proposition will interest you.

Barrett Roofings, Cements Industrial Paints etc.

Barrett *Everlastic "Rubber" Roofing*

THIS popular priced roll roofing is the biggest value for the money of any prepared roofing on the Canadian market. It is easy to lay, thoroughly weatherproof and very durable.

Do not overlook the fact that your customers are preparing their barns, outbuildings, and other structures for winter, and that Everlastic "Rubber" Roofing will help them do it. Don't disappoint them by not being able to meet their needs.

Everlastic "Rubber" Roofing comes in light (1-ply), medium (2-ply), heavy (3-ply) weights, in rolls containing 108 square feet. Nails and cement are packed in each roll.

Barrett

Everlastic Liquid Roofing Cement

THE big demand this fall for "rubber" roofings and roofing felts make them high in price and hard to get. As a result, many old roofs are being repaired.

Everlastic Liquid Roofing Cement is without an equal for resurfacing and renewing the life of all kinds of prepared and "rubber" roofings.

Don't miss this big sales opportunity.

It is sold in all sized packages from 1-pint cans (as in rolls of our Everlastic Roofing) to barrels containing 40 gallons.

Barrett

Elastigum Plastic Patching Cement

HERE is another roof-repair material which is supreme in its field. A tough, elastic, adhesive, waterproof, plastic cement for patching holes and leaks in roofs of all kinds, and for repairing flashings, relining gutters, stuffing cornices, etc.

Easy to apply and sticks tenaciously to either a dry or wet surface. It comes ready for use—requires no heating or mixing. Put up as follows: 1 lb. Tins (cases of 24 Cans), 5 lb. Packages (12 to the Case), 25 lb. Packages, 100 lb. Packages, ½ Barrels of about 300 lbs., and Barrels of about 600 lbs.

The Barrett Company
LIMITED

MONTREAL TORONTO WINNIPEG VANCOUVER
ST. JOHN, N.B. SYDNEY, N.S. HALIFAX, N.S.

Model chicken house and (at right) an up-to-date hog house, both covered with Everlastic "Rubber" Roofing.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian Woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.

There's a reason.

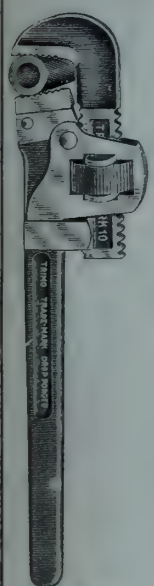
Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.

It pays to sell **STILL'S.**

J. H. Still Mfg. Company
ST. THOMAS -:- ONTARIO

TRIMO

THE WORD TRIMO



Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

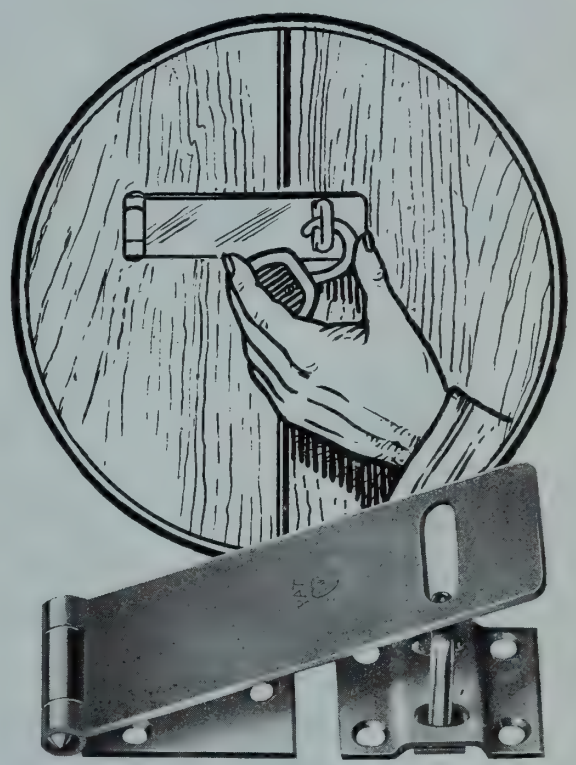
The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

Pipe Wrench Nut Wrench

TRIMONT MFG. COMPANY
ROXBURY (BOSTON), MASS.
MANUFACTURERS

Safety Padlock Hasp No. 915

Positive Security



WHEN closed all the screw holes are covered, making this Hasp as nearly burglar proof as possible.

Made in Wrought Steel in sizes 3-4½-6 inches.

No. 915½ is the same as No. 915 except being extra heavy and made in 7 inch size.

Send for Booklet R 101.

The Montreal Rolling Mills Co.

MONTREAL, CANADA

If interested tear out this page and place with letters to be answered.

Over one hundred thousand people saw the Westco Tankless Water System demonstrated at the Canadian National Exhibition, Toronto.

Large numbers saw it operating at the Western Fair, London. And it has been demonstrated at almost all the rural and county fairs throughout Canada.

The people who saw the Westco Tankless Water System in action are good prospects; many of them, no doubt, live in your territory. We will be glad to have your name on our list of dealers and could give you some prospects to go after.

Westco Pumps, Ltd.
707 Yonge Street,
Toronto, Ont.

MAPLE LEAF HAND SAWS

are the Canadian Standard

No. 1914
The newest in up-to-date saws. Combines keen cutting qualities with improved features.

Unbreakable Handle

Our saws are made on a high standard basis that wins satisfactory sales for the dealer.

You can sell **Maple Leaf Hand Saws** in full confidence that "worth while" prestige for your store will be the logical result.

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

Practically all good buyers of hardware in Canada are readers of HARDWARE AND METAL.

If interested tear out this page and place with letters to be answered.

Increasing Consumption of Your Product Through Dealers' Influence on Customers

When your reputation is thoroughly established, when the value of your organization is fully appreciated by the trade, when your product and its use are fully understood, when distribution seems ideal, the day has come to skillfully direct your continuous advertising on increased consumption of your product through the dealers' influence on customers and sales.

A weekly message through Hardware and Metal—where the whole hardware trade of Canada seeks its business news—will supply the dealer and his clerks with the selling points of your product, the sales plans you have evolved, and furnish the means and inspiration for increasing consumption of your product to your pleasure and profit

"SURE THING"

This Canadian Cattle Knife is real Sheffield goods—built for business. Keen, well-tempered blade, solid Stag handle—a knife for tough work. You're on the right stuff with this line—mail us your order direct and save middlemen's profits. Immediate shipment.

T. E. Rowbotham & Son

Globe Works, Penistone Rd.

SHEFFIELD, ENGLAND

Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.

For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade, paving the way for the salesmen, lubricating your whole distribution system and creating friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

This is a "Q" Foot Valve

And it Just *CAN'T* Leak

There are more pump troubles caused by "leaky" valves than from all the wear and tear which occurs in the average life of a pump.

The "Q" valve will overcome all priming troubles, and water once raised above it, through the suction line, will not leak out.

If you want the pumps you instal to give maximum, you will require to use the only valve on the market that JUST CAN'T LEAK.

Made in sizes from 1 to 8-inch.

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

You Have Very Little "Selling" to Do in Connection With

Champion

Dependable Spark Plugs

EVERY engine owner knows that with a Champion in each cylinder he is assured of dependable, efficient spark plug service, even under the most unusual conditions.

Spark plug buyers are ALREADY sold; all you have to do is to supply the demand that we have created for Champions.

Our advertising is telling your customers of Champion dependability, so why not make sure you have on hand a full line of Champions, and be certain the word "Champion" is on each insulator and the "World" trademark on each box?

Champions help to sell your other lines, because users feel that the dealer who sells Champions MUST sell other dependable lines of automotive equipment.

Order from your jobber to-day.

Champion "Heavy Duty"

Millions Have Bought It
—millions more need it!

Millions of SHALER 5-Minute Vulcanizers have been sold to motorists.

Millions of other motorists are being induced, through our large advertising campaign, to want the SHALER 5-Minute Vulcanizer.

The dealers who sell it make the profits.

Dealers predict larger sales of SHALER 5-Minute Vulcanizers for the future than during the past. Larger repeat-sales—and profits for dealers—must follow.

SHALER 5-MINUTE VULCANIZER

Every sale of a SHALER 5-Minute Vulcanizer is *not* one sale and one profit alone—it means that more sales will follow from the same customer, because he needs to buy the Patch-and-Heat Units regularly for use with the SHALER.

This repeat business comes to you—and brings you regular profits—in addition to your profits from selling the SHALER Vulcanizer—and without any effort on your part.

Get Your Share of This Big Business—Order from Your Jobber Today!

Keep a good stock of SHALER 5-Minute Vulcanizers and SHALER Patch-and-Heat Units. Display them prominently in your windows and on your counters, so that motorists know you sell them. Our advertising will bring customers to your store—the SHALER sells itself. Order from your jobber today or write us at once for full information and catalog of the complete SHALER Line.

These time-shattering road records, established by three Essex cars, are further evidence of the matchless dependability of AC Spark Plugs. The AC Plugs that fired the engines of these cars were unfailingly reliable in their service. In the two transcontinental runs of 3,347 miles each, every driving condition was encountered, yet the AC's functioned perfectly. They were equal to the exacting demands of high speed, mountain climbing and long, tortuous pulls through sand and mud. Like the manufacturers of the record-smashing Essex and other fine makes of passenger cars that use AC Plugs as standard equipment, dealers who sell AC's can be sure that AC's will do all that is asked of them. AC's have proved this time and again in the most punishing tests. If you do not stock the full AC line and are not profiting from AC achievement, write today for dealer information.

COLT'S
FIRE ARMS

A COLT Automatic Pistol or Colt Revolver is the only reason strong enough to convince this intruder that it does not pay to break the law.

You are aiding in the good work of maintaining law and order every time you sell essential home protection—a Colt Automatic Pistol or a Colt Revolver.

Every householder is entitled to the best protection that he can buy, and when you sell a Colt you are giving him the best.

If every household could meet unlawful intrusion with the authority of a Colt Automatic Pistol or Colt Revolver, there would not be so much heard about midnight burglaries.

Three Reasons Why

Partridge Tires

Are the Choice of Many Dealers

1st: —Every user gets a square deal on adjustments.

2nd:—They are recognized by the Canadian public as the tire that gives most mileage for the money.

3rd:—They are advertised in a large way, from coast to coast, which helps dealers to make quick sales.

Game as their Name.

Will carry the load on any road.

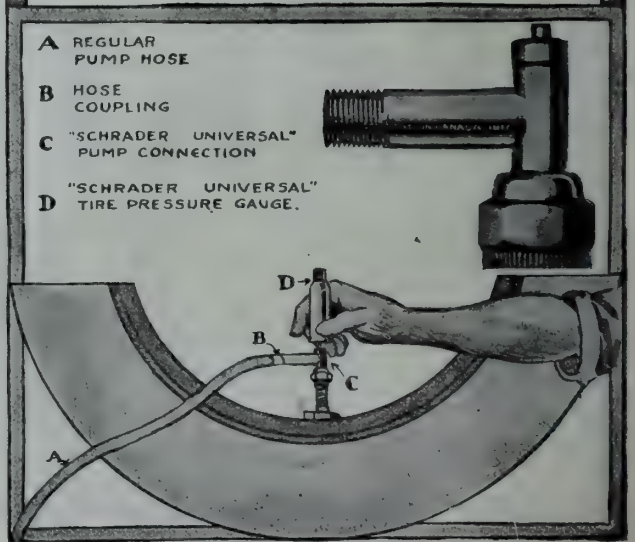
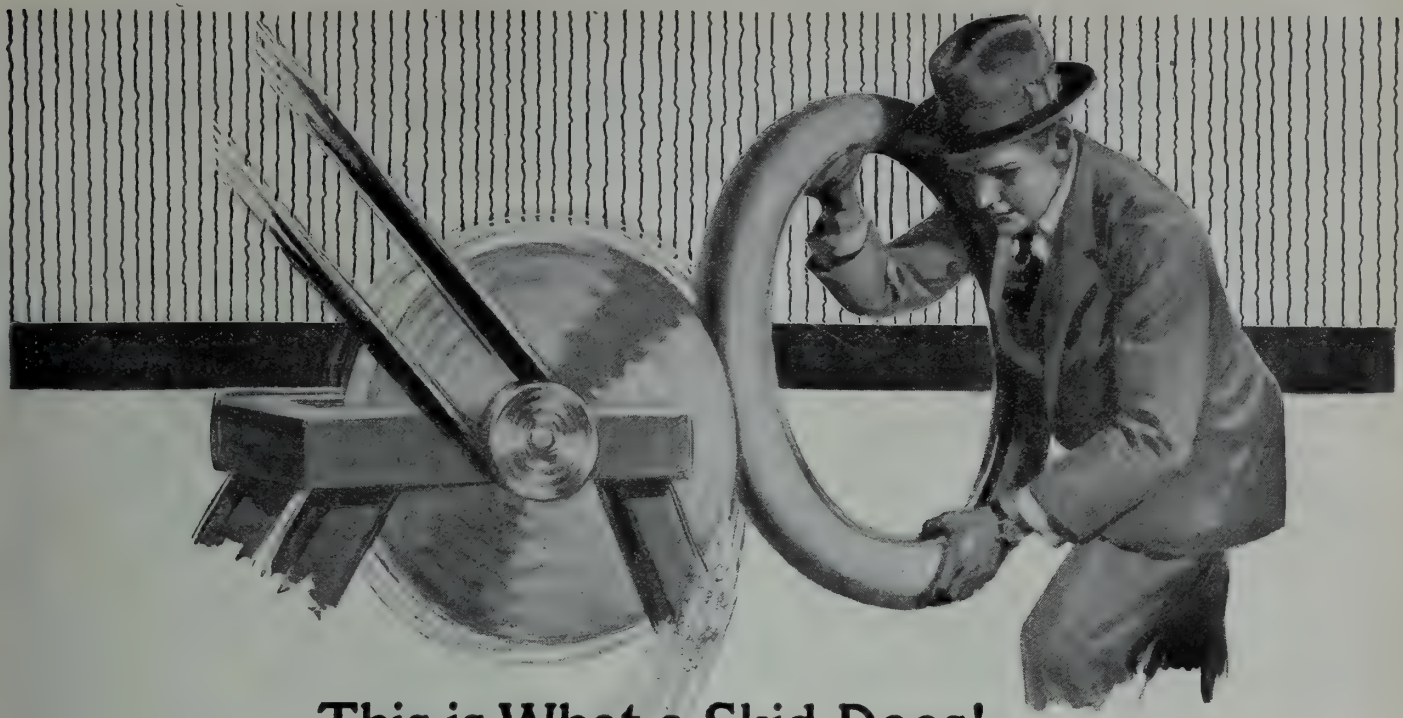
Test Tire Pressure With Pump Hose Connected

SCREW the Schrader Universal Pump Connection to the regular hose-coupling of either hand or power pump, and you can use the Pressure Gauge without removing hose from valve. This saves you a lot of time and trouble. You simply place your pressure gauge over deflating pin. This handy little device costs only 65 cents, but it adds greatly to your convenience.

SCHRADER UNIVERSAL PUMP CONNECTION

Made in Canada by
A. Schrader's Son, Inc.
334 East King Street, Toronto
London, Eng., New York, Chicago





This is What a Skid Does!

It actually grinds away the tire's tread—stretches and weakens the fabric—causes inevitable punctures and blowouts.

Every time you skid you grind off miles and miles of tire service and no matter how careful a driver you may be, when roads are wet and slippery it is next to impossible to avoid skidding unless your tires are equipped with

Weed Anti-Skid Chains

For Protection and Preservation

Weed Chains insure safety, economy and tire protection—Always put them on "At the First Drop of Rain."

MR. DEALER: Write us for advertising material, also for names and addresses of nearest jobbers stocking Weed Tire Chains.

Dominion Chain Company, Ltd.

Niagara Falls, Ontario, Canada.

We manufacture a complete line of welded and weldless chains—all types, sizes and finishes—and every link will hold for the purpose intended.

How Many Fords in Your Town?

Are there 100? 300? 700? or—Well, never mind, there is a flock of them, isn't there?

And practically every blessed one of them needs the wonderful

ADAMSON

Foot Accelerator

It affords perfect throttle control with the foot. Other cars have this convenience. Why not Fords?

Just one moving part, so there is nothing to get out of kilter.

Attached with a wrench and in a jiffy. And it won't rattle, not even one little bit.

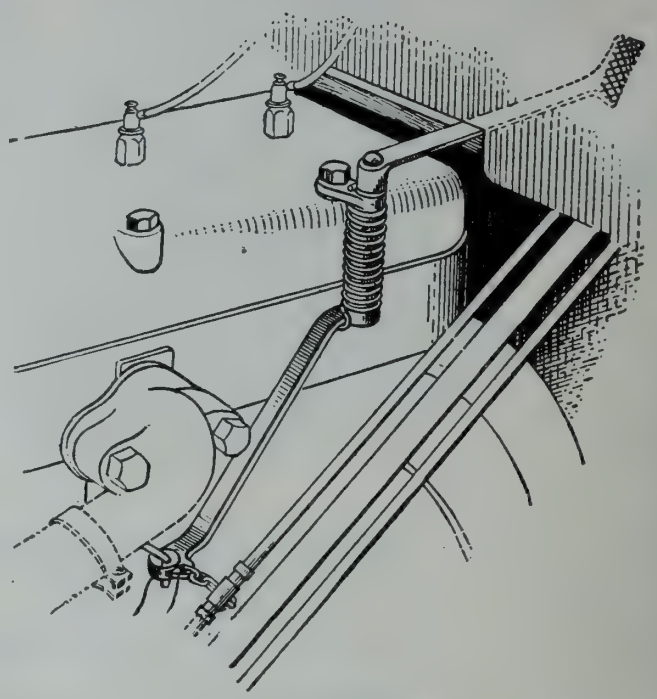
Sells for $2.00.

You can sell—well how many Fords did you say were in your town—well, you can sell just about that many.

Manufactured by

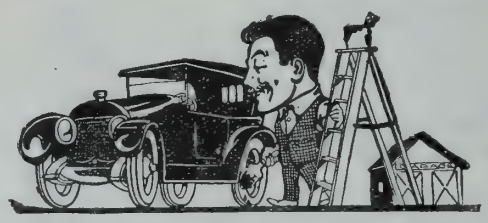
Adamson Manufacturing Co.
Hamilton, Canada

Our prices will save you money, and we can make prompt deliveries.



Accelerator for Fords

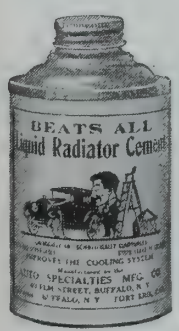
It's Easy BEATS-ALL Way



Supply your trade with either

BEATS-ALL Liquid or Powder RADIATOR CEMENT

Two Sizes—Liquid 50c. and 75c.—Powder 35c. and 50c.



Why resort to a soldering iron?—Use BEATS-ALL.

It is safe and dependable. When left in radiator acts as a preventive for new leaks.

Guaranteed to repair leaks quickly and permanently.

Dealers—write to-day for our remarkable proposition. It will pay you.

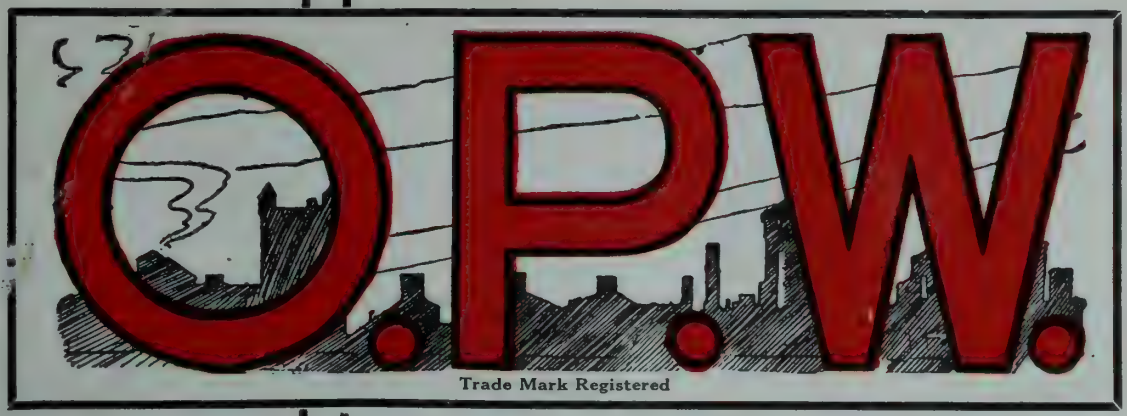
THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.



Trade Mark Registered

"Paints and Varnishes for Every Purpose"

Your Sales Are Inside Now

Hardware stores used to look upon painting and paint sales as a "seasonable" business. But the well-informed hardware merchant to-day runs through his calendar and his stock to make sure that he has all the required stock for whatever season it is, that's all. Your customers have been reading in their favorite papers about the right O. P. W. Product to suit the job they wished to do each month from January to December. They expect O. P. W. dealers to have the goods.

Just now, consumers are planning and executing the inside jobs: the floors, the hardwood trim, shelves, closets, doors, kitchen and pantry furniture; radiators, stove-pipes and a long list of furniture to be "done over."

These customers are interested in inside work and certain to make inquiries—it's "up to you" to have the stock of O. P. W. Paints and Varnishes that will turn these inquiries into orders!

O.P.W. Makes Paint Departments Grow

O. P. W. for every use
That makes things last
Needs no excuse;
So people see
And all agree
That its results the best will be!

View of interior of Russill Hardware Co.'s Store, Toronto, showing Dayton Hardware Scales recently installed

In Canada's Biggest and Busiest Stores You'll See

DAYTON SERVICE

THERE is a reason why the live, progressive merchants prefer the Dayton Hardware Scale. For instance—

Aniline dye was selling at 25 cents an ounce. A Dayton salesman strolled in. "Try it on my machine," he suggested. The old scale had just been wheezing in its old-fashioned way: "One ounce." The Dayton said: "42 cents!"

The minute hand hadn't travelled far before the Dayton salesman was obeying Mr. Russill's summons: "Come up to my office!" And this is what he heard: "I don't want one of your machines. I want TWO."

Let the lesson of successful business men guide you.

The Dayton is the real, high power machine of modern merchandising.

"The Greatest Shaving Mileage at any price"

The Razor that Boosts Your Blade Business

GETTING the business of the self-shaver is one thing, but holding it is another. And that's what counts in the razor business—*blade sales.*

The sale of every Durham-Duplex Razor means a regular blade customer—Durham-Duplex blades make friends at the very first stroke, and *keep* them! The shaving comfort and shaving satisfaction that your customer gets out of these wonderful, two-edged, extra long, extra sharp, oil-tempered blades bring him back again and again.

This means that it is to your advantage to impress on every razor prospect the exclusive advantages of Durham-Duplex blades. Boost the razor that will boost your blade business.

Standard Set $2.00 complete. Razor with attractive white handle, safety guard, stropping attachment and package of five Durham-Duplex double-edged blades (10 shaving edges) all in a handsome leather kit. Other sets up to $12.

Additional blades 60 cents for a package of 5.

"The Disappearing Act"

Every merchant favors merchandise that does "the Disappearing Act" or, in other words, has a quick turnover.

The fast moving line is undoubtedly most profitable from every standpoint. It means large profits, more working capital, and attracts customers to the store.

The rapid disappearance of

Aladdin Dye Soap

from the dealer's stock is a feature that has made it immensely popular with the Trade. Its **constant disappearance** is assured by large space advertisements appearing in leading publications; combined with Aladdin's outstanding ability to make repeat sales.

Order a gross of Aladdin Dye Soap from your Jobber and ask for the handsome revolving Display Stand—FREE. It's a silent salesman that plays a big part in "the Disappearing Act."

CHANNELL CHEMICAL CO., LIMITED
TORONTO

Distributors of Aladdin Dye Soap **Makers of O-Cedar Products**

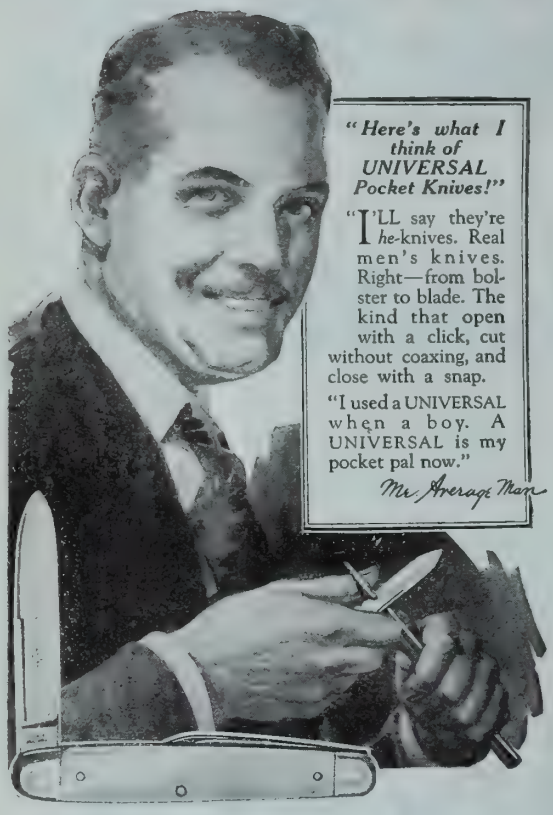
UNIVERSAL

POCKET CUTLERY



UNIVERSAL
Pocket Knife.
No. 73185

Always On Edge To Please Trade

UNIVERSAL Knives are sturdily built, properly balanced---edged to the sharpness that stays sharp. They cut straight and true into the good graces of buyers. That's why sales make friends---friends make sales.

EVERYBODY knows that high-grade cutlery cannot be made from low-grade materials any more than nightingales can be hatched from goose eggs. The quality grade of "Universal" Cutlery is always ascending and at a sharp angle. The pinnacle of perfection is always the goal.

There is nothing in handling cutlery that is too dull to cut anything except its price in order to make sales. When the tide of selling recedes the flotsam and jetsam of low-grade goods is always left over. Sell "Universal" Cutlery and none will be left over. It isn't that kind.

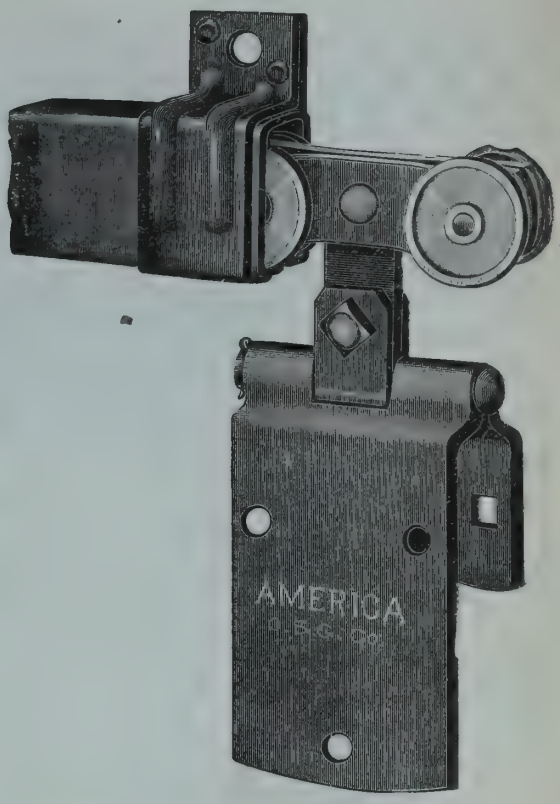
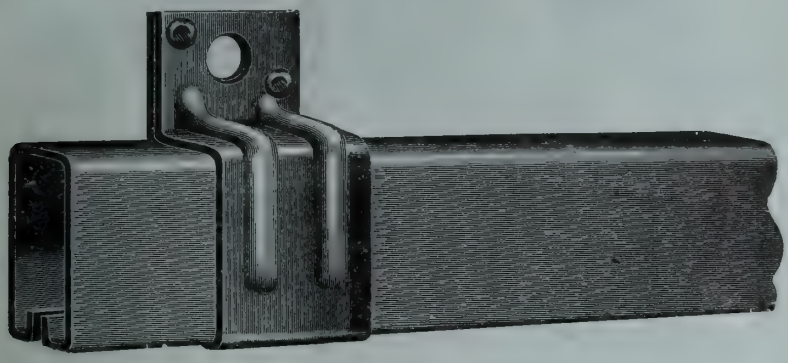
"America"
Trolley Hangers
The Dealers' Friend





Steel Trolley Track

The "America" operates in the Hatch Trolley track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary, plain track brackets.

The Largest Sales of any Trolley Hanger in the Dominion

If you are not now sharing in the sales of this "best seller" and others of the popular Canada Steel Goods Line, you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

It Pays You to Handle the C. S. G. Co. Line—Ask Us About It.

We Will Appoint You Our Exclusive Agent in Your Town

YOU may not have noticed our announcement in Hardware and Metal, Oct. 16th, to the effect that our salesmen are now on the road appointing exclusive agencies in every town and city for our lines and for that reason we are bringing the matter to your attention now.

Our exclusive agency plan is exceedingly attractive. It points a way to big profits and quick returns.

Remember—our goods are fully guaranteed and are already well known to the public, having been on the market for seventy-five years, during which time they have given entire satisfaction from every angle.

In addition to our national advertising, which has already created a demand for our goods and from which our agents will derive a benefit, we will share the cost of any advertising you will do in your local papers. That shows we are willing to back you up, doesn't it?

If you are in the hardware business to make money—take advantage of this offer to become the agent in your town for the famous "Souvenir" line of stoves and ranges.

Tinsmiths should write us regarding the "Souvenir" and "New Idea" Warm Air Furnaces which burn coal or wood.

Write us at once and our salesman will call and see you.

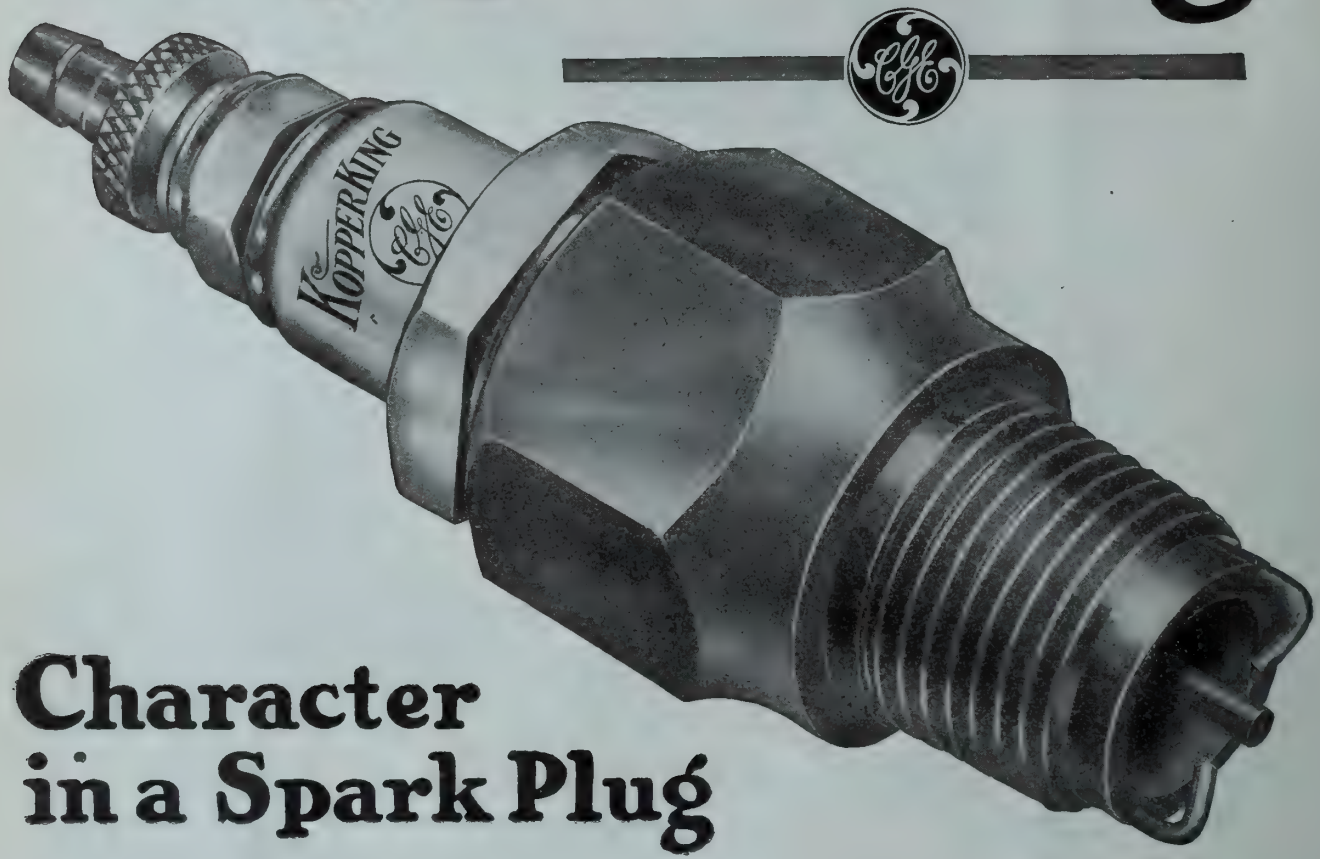
Kopper King



Character in a Spark Plug

FIRING the gas vapor, driving down the piston-head hour after hour with an exploding sheet of flame, demands character—not mere metal and insulation—character expressed in design, in construction methods and workmanship.

The Kopper King is a prestige builder. Incidentally, it shows the Dealer a greater margin of profit than any competing plug. The Rust-proof Copper Surface prevents Carbon deposits; carbon will not adhere to copper under Electrical Heat. The Kopper King is without a peer among Spark Plugs. It is a quality plug from first to last.

SOVEREIGN IRONS

SELLING an electric iron may be a commonplace occurrence—but, there are still plenty of housewives who have yet to break away from the traditions of their ancestors, and discard the old sad-irons.

To a woman who has never owned an electric iron it is a specialty—and should be sold as such. Selling a "Sovereign" Iron paves the way for a series of sales. In fact, it is a typical C.G.E. electric appliance, in which you can place explicit confidence.

Backed by Forty Years of Success

Dealers that sell Butterfield Tools are selling Butterfield Service. Tool Buyers are buying Butterfield Tools because they know that Butterfield Tools have given only the most desirable kind of service for forty years.

It is sound, logical and perfectly reasonable to suppose that Butterfield Tools will give the same, or even better, fast-cutting, accurate service now, that they have given for forty years—and sell as well now, or better, because they have sold well for forty years on merit.

Story for Week Dated Oct. 23, 1920 Being No. 28 in the Series

Making Eddy Sulphite Pulp: Pure Acid and Spring Water.

VAPOR from the hot ovens described in last week's article enters the acid-making tower in the form of sulphur-dioxide gas. Entering the tall tower at its base, this gas rises through a great mass of limestone blocks, and meets amongst them a steady trickle of the purest water available anywhere in Canada. This water is obtained right on the grounds of the E. B. Eddy Company's plant from a deep well which is bored 508 feet down into the solid rock directly below the pump-house which stands close by the acid-making tower.

Besides being of absolute purity, this Eddy Company Spring water possesses the advantage of having an absolutely even temperature all the year round of 52 degrees Fahrenheit. In combination with the sulphur vapor, and the limestone, it trickles forth at the bottom of the tower as a solution of bisulphite of lime, and this is what produces the sulphite pulp from the fine wood chips in the great digesters when the steam is applied. Until required for this purpose the acid is stored in lead-lined tanks.

When you visit the E. B. Eddy plant, and discover there, as E. B. Eddy discovered, the abundance of the clean limestone required for this process, and the inexhaustible supply of pure spring water so perfect for its purpose, it seems as if some prophetic power had guided E. B. Eddy to this spot when he came to Canada to establish his vast industry. Certainly the developments of over half a century have justified his choice of a location. The lumber, the limestone, the pure water, and the water-power are being used to their full capacity in the many industrial activities of this great Canadian firm. Every day busy minds are at work perfecting the various processes so that E. B. Eddy products of all kinds known to the retail trade and the consumer, are absolutely the last word in value for their price and utility for their purposes.

THE illustration above shows an exhibit by the members of The E. B. Eddy Company Sulphite Department, forming part of the procession on Labor Day, 1915, at Hull. The snow-white, exquisitely pure sulphite pulp is seen in the float, and with it are shown rolls of E. B. Eddy Co. Famous Impervious Sheathing which is manufactured at the Sulphite Plant, and which is a beautifully clean, warm, and damp-proof lining for the walls of buildings. The white garments of the members of the Eddy Staff taking charge of this float are in keeping with the purity of their product. On the float in English and French are advertisements for Eddy's Impervious Sheathing, best for Houses, Churches, Silos, Barns, and Stables. Keeps out the Cold, and Keeps in the Heat. With all the other employees of the Eddy Plant the members of the Sulphite Department Staff are proud of the goods they manufacture.

"—store, fixtures, and—*good-will.*"

How often you see that in a bill of sale. Good-will—one of the most valuable business assets.

Starrett dealers can trace a big proportion of the good-will they've built up to their Starrett Tool sales. The toolmaker, for example, who buys, say, a Starrett Micrometer Depth Gauge will always have a friendly feeling for the store that sold him that tool.

The easy way of adjusting this Starrett Gauge to take up wear—the one-inch and half-inch collars for taking measurements up to 2½ inches—the fine workmanship, and above all the Starrett name—these are points that make a strong appeal to the expert mechanic.

Building new business by fitting Starrett Tools to your customers' jobs—that's what "The Tools Mechanics Buy" tells about. Write for free copies for yourself and your clerks.

—*and now* Blades *as well as* Frame *are made with Millers Falls thoroughness*

DID you read the full page advertisement in the August 28th issue of The Saturday Evening Post announcing Millers Falls Hack Saw Blades? If you didn't, read the reproduction on the opposite page.

It is surprising the interest this advertisement created. Already evidence is piling up that Millers Falls Hack Saw Blades are fast movers —a quick turn-over item for hardware stores.

Every time you sell a box of Millers Falls Hack Saw Blades you make a permanent Millers Falls customer. Why? Because every one of the twelve blades in a Millers Falls Box is alike. Each blade receives the same heat treatment, every tooth is finished accurately. Result—the same quality of blades throughout, the same even temper —none too hard, none too soft. The same cutting sharpness the entire length of the blade—no heavy strain points at the ends, therefore less breakage.

The Millers Falls Hack Saw Blade Box is a simple, compact and convenient container. It fits on your counter, in your window, or in your show case very nicely. It is a good *display* box. Give it prominence so that it can make steady Millers Falls customers for you—and add to your profits.

MILLERS FALLS COMPANY, *Millers Falls, Massachusetts*

HACK SAWS

The New Product of a Famous Old Company

TIME has built for the Millers Falls Company a staunch reputation. For fifty-three years Millers Falls mechanics' tools have set a standard for precision, honesty, and fine design.

Generations of skilled tool makers have wrought daily at the forges and machines with the same care for the reputation of Millers Falls tools.

Each year has seen new tools added to the line—but not before each has met the same standard on which the Millers Falls reputation has been built. The maintenance of this standard for over half a century has, we believe, established a bond of confidence in the Millers Falls Company on the part of those distributors who feel their own reputation is reflected in the product they sell.

To our friends in the trade and our customers, we offer a new product of the Millers Falls Company.

Universal Hack Saw Blades have been made by the West Haven Manufacturing Company at West Haven, Connecticut, for over twenty-four years. This production is now brought under the complete control and direction of the Millers Falls Company. We believe no better hack saw blades are made than the ones which bear the name "Millers Falls" or "Universal". These hack saw blades are another of the Millers Falls tools. They are backed by Millers Falls service and our reputation as skilled tool makers maintained for over half a century.

Theodore Brewster *President*

MILLERS FALLS COMPANY

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

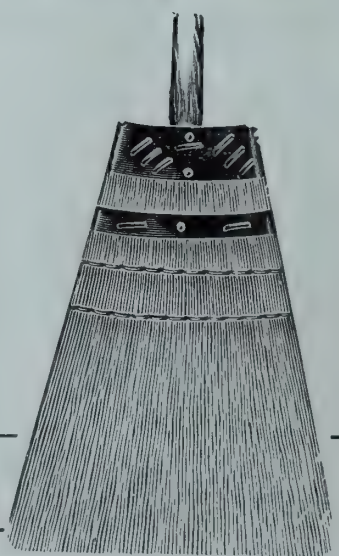
Have You Overlooked the Factory Trade?

Where do your local factories, garages, mills, warehouses and stables buy all the brooms they use?

Think of the profit to be made in this one line! Isn't this trade worth getting after?

For the heavy sweeping required in these places, brooms have to be especially designed and manufactured.

The Keystone Stapled Metal Case Broom will enable you to secure this business easily against all competition.



Note the metal case which binds the corn securely to the heavy maple handle. The broom cannot be pulled from the handle, nor can the corn be cut or broken at the shoulder of the broom. Made of all corn, or corn and bamboo in various weights.

Order a supply to-day. Make this factory trade your own.

Write for prices.

Big Business Revival Early in New Year

Better Business Than Any Time Since the War Expected to Start Next February—Basic Business in Canada is Good—No Radical Declines—Better Business to Follow U.S. Elections—Advise Keeping Well Sorted, But Not Too Heavy Stocks—Hardware Lines Not Speculative

A NUMBER of expressions of opinion dealing with present and prospective conditions as they affect various lines sold through the hardware trade, have been secured by Hardware and Metal, and these will provide much useful information to the trade. That the decline which has already been noted on some lines represents about the full extent of any such movement for some time, is one opinion. Better business in the United States, with its likely reflection in Canada is also expected after the election. The consensus of opinion seems to be that the best advice under the circumstances is to have confidence in the market to buy sufficient to maintain a well sorted stock but not too heavily.

Prices on Galvanized Sheets May Sag a Little More

"In connection with the present and future possibilities of galvanized sheets," said Mr. A. T. Enlow, president of the Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., "we might summarize the situation as follows; present supply, none; immediate prospective supply, fair; next spring, usual rush.

"It is evident therefore that the wise buyer will order before January 1 and as prices are declining somewhat and may sag a little lower he will lose nothing by so doing.

"The 'Gary Dinner,' that being the common name for the meeting of the American Iron and Steel Institute, New York, will sound the note in iron and steel circles which will dominate for the first and fourth quarters following.

"There will not be any radical decline, in fact the decline already made is possibly the limit in this swing.

"Underlying basic business is good, especially in Canada, and with the election in the U. S. over on November 2 and the Republican candidate elected as now seems very probable, business there will also be stimulated and Canada will get the usual reflex glow.

Little Possibility of Price Changes on Small Tools

"Your present request for our opinion of the business outlook for the immediate future is rather difficult to answer, but we will begin by saying that we are optimistic," said Mr. L. H. Laythe, sales manager Butterfield & Co., Rock Island, Que.

"We can see nothing in the present situation to cause undue alarm. That we have reached the crest of the long-extended high price movement and are now beginning the descent on the other side cannot be questioned.

"It was all expected, however, by clear thinking business men, and they have only been fooled in that it took longer to reach the peak than was anticipated."

"The law of supply and demand is inexorable, and was bound to bring about a readjustment of values sooner or later, and as long as the condition thus brought about is looked upon sanely and all steps and actions in business ventures governed and carried out accordingly, we can see no cause for worry.

"From our own standpoint as manufacturers of small tools, we can see little possibility of any change in prices for the present at least. Radical increases in freight rates, coupled with the fact that raw material in the shape of tool steel and malleable castings shows no reduction, make it impossible for us to reduce our prices now.

"Our advice to jobbers and large users is to buy what they need to keep their stocks well sorted, but not more than can be turned over in a reasonable length of time.

Progressive Swing Next February

"Finally it is our opinion that with the presidential election over in the United States, the crops moved in the Canadian West, a highly satisfactory holiday season at Christmas time, and the usual January first inventories out of the way, that about the first of February of the new year will see things on the progressive swing again, and in a much more healthy condition than at any time since the war began."

Good Steady Business for Next Nine Months at Least

"In reference to the business outlook, we may say briefly that it is our opinion that in the hardware trade we may look forward to good steady business for at least the next nine months with maintenance of the present prices," said D. R. Fowler, Canada Foundries and Forgings, Ltd., Brockville, Ont. "At the present time there does not appear to be any reduction of buying and it is most evident that the shortage of iron and steel products throughout Canada and the United States still exists."

This Firm Has Done no Spring Booking on Rope Yet

Cordage trade is slack at the present time, and so uncertain is the outlook that bookings are not being made yet for next spring as has been the case at this time in other years, according to Mr. Hubbard, Independent Cordage Company, Toronto. Mr. Hubbard points out that the recent slight decline in cordage was not a part of any general tendency originating with the sources of supply, but was merely a local revision. Some importations now coming into the country may have some effect on the rope situation in future. The future, it is said, will depend to some extent upon the trend of prices in the United States. Supplies are quite adequate to meet all current demands.

Longer Buyers Hold Off Greater Will be Rush

That there is not much prospect of any immediate declines in prices of sheets and metals is the opinion of Mr. Pepall, of Samuel Benjamin & Co., Toronto,

who points to the fact that metals are necessities and therefore unlike some of the lines which have recently been dropping in price. Mr. Pepall states that metal supplies are needed and that the longer buyers hold off the greater will be the rush later. He indicated that metal comes in for a wider use to-day than ever before, it taking the place of woodenware in some cases and there being new uses found for metal products each day, apart from the increasing use of metal in automobiles, agricultural implements, etc. In face of this prospect Mr. Pepall can see little prospect of lower prices on these lines.

Metal Buyers Holding Off

Business is rather dull with buyers holding off, according to Mr. David, of Baines & David, Toronto, who points to the fact that there can be no revision in steel prices, if any, before the meeting of the American Iron and Steel Institute next week.

Capacity Output of Metal Products

The Sheet Metal Products Company, Toronto, is enjoying one of the busiest seasons it has experienced for a long time. It was stated to Hardware and Metal that this company is operating two nights a week in addition to the regular day operations, and that all the help available is being used. This activity is to a large extent said to be necessary to catch up with back orders, there having been a considerable scarcity of such lines for some time past. Stove business is rather light on account of the continuance of warm weather.

Stove Rush Postponed

Mr. Gibson, Gurney Foundry Company, Toronto, confirms the statement that stove business is light owing to the weather conditions, and he is of the opinion that the weather is likely to hold up the stove rush until well on toward the end of the year.

Hardware Not Speculative

"There is nothing to be feared if we show confidence and courage. There will be a few jolts but the lessening of industrial activity will not be sufficiently severe to be alarming, and those who fear a depression will likely be wrong," said F. H. Whitton, Steel Company of Canada, Ltd.

"There is much work in arrears, much construction work to be done. A large demand is assured to supply our own people and the whole world. A downward trend in prices is taking place and the market will find its normal level, but what is its normal level? No one knows. When the public take all the goods produced at high prices it is useless to argue for lower prices. Speaking of hardware, we must not allow our products to be classified in our minds or in the minds of our customers in the same list as the more speculative commodities such as coal, sugar, cotton, silks, etc.

"Those lines which employ the least labor will come down first and to the greatest extent. Iron and steel premium prices will probably disappear, but prices will not come down as rapidly as other lines and the new normal level of steel will probably be a surprise to most of us.

"Wages are the most important item," said Mr. Whitton, stating that all those present knew the increase in this line. He, however, advised that no undue pressure be brought to bear to bring down wages too suddenly.

President of Stamped Ware Company Reviews the Situation

In discussing the price and business outlook with James Davidson, president of the Thomas Davidson Manufacturing Co., Ltd., Montreal, a representative of Hardware and Metal was given the following comprehensive review of the situation as it appears to-day:

Lines That Have Declined

"Sugar, hides, wool and copper prices have come down. One naturally asks, Are goods of which steel is the principal component also to be reduced in price? The first thing to consider is, Why did sugar, hides, etc., fall in price?

"Sugar is the product of few countries, and the crop, under ordinary conditions, regulates the price. During the war it was largely 'controlled,' and consequently the law of supply and demand did not exist. Then the bankers of the United States, to encourage larger supplies in Cuba, loaned immense sums to supposedly increase the production, but instead of this being the case the money was used to hold the sugar in store for further rises, and the paper profits of the holders were so immense that a state of false prosperity took such a hold on Cuba that the whole people went crazy, and a dollar would only buy what a cent should have bought, but the bubble broke, and the banks of Cuba had to stop payment. They have now slackened a little, to allow people with money on deposit, to withdraw a portion of it, to pay wages only. Sugar has to be sold to realize outside money, with the usual consequences.

"Hides and leather. Animals increase without any subsidies, and the warring countries stopped buying harness and other equipment, but not until they had supplies to harness every horse and mule for twenty years. In South America hides are piled up by the acre rotting in the sun and rain.

"Copper is an article in which wages bear a very small portion of the finished value up to the ingots; sheets are about as high as ever as the wages then become the great factor.

"Wool grows without government help and the release of shipping put four years of New Zealand, Australia and Argentine wool on the world's markets.

"Cotton was substituted for wool during the war and now has to compete with the 15-cent wool.

Products of Steel

"These are in a different position from the others; they are composed of wages Coal is all wages and freight; iron ore is all wages and freight; freight is all wages.

"The product of the above, pig iron, is all wages and freight. Billets, the product of pig iron, are all wages and freight. Bars for rolling into sheets, are all wages and freight. Sheets and plates are all wages and freight.

"The railway wages in the States are fixed by the government, and freight rates are fixed accordingly, so that if you take the freight from the mines of iron and coal, the freight from mill to mill, in the different processes, and to destination (our cost per 100 lbs. from mill to mill has gone up from 17 cents to 50 cents) you can realize where the present cost comes in.

"The nominal price of black sheets by the United States Steel Company is $5.35 per 100 lbs. and $8 per box for the tinplate, but the actual prices at which new material could be bought for the last six months has been $6.75 to $8 for the black sheets, and $8.50 to $9.50 per box for tinplate. These advances have not been taken advantage of by the Canadian manufacturers of stamped and enamelled wares.

"Tinplate, as you will notice, was not affected to the same extent as black sheets, and there is a rumor that black sheets will be fixed a little higher than the nominal price of $5.35, and tinplates fixed to correspond. So that the prospect of buying our raw materials at less than what our selling prices for the goods is based on is very slight, and while we do not look for a necessity to increase prices, it might happen."

No Slump in Electrical Business

"There will be no serious slump in the electrical business," said John A. Burns, manager of the electrical department of Munderloh & Company, Victoria Square, Montreal. "I say this after thirty-one years' experience in this line of work and during which we have passed through many periods similar to the present. We have educated the public into the uses of electrical appliances, and often times a housewife or her husband will do without a suit of clothes in order to purchase a good coffee percolator. There is a ready demand for these products and there will be no serious let-up in purchasing, in my opinion."

Mr. Burns stated that with the building of many hundreds of new houses throughout the country this would naturally stimulate and maintain present good demand for electrical appliances of all kinds. He does feel that there will be a quiet period for heavy electrical machinery, but that for the average household appliances and for the smaller elec-

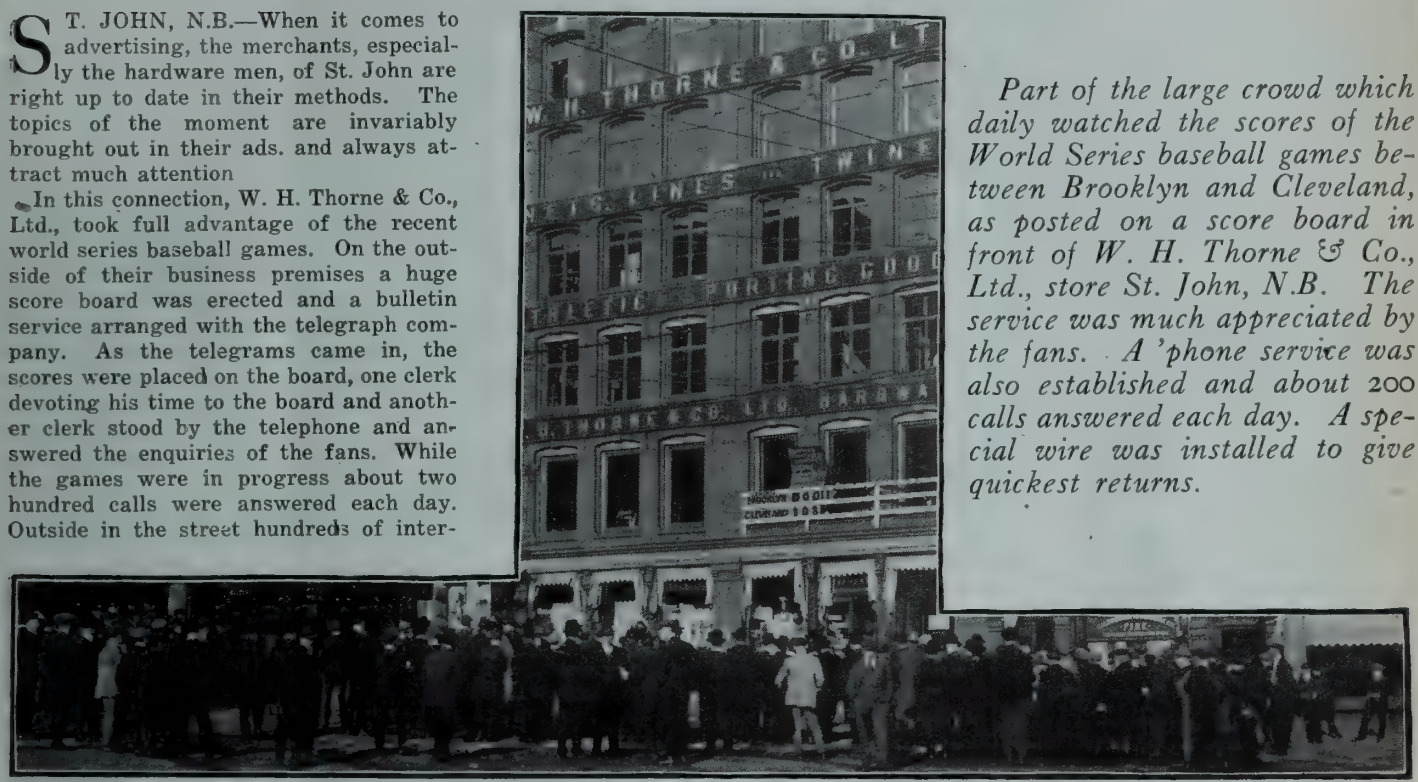
Putting a "Punch" in Store Advertising

St. John Hardware Merchants Use Local Topics of Interest as Basis of Store Advertising—Attracting Large Crowds to See Baseball Scores—One Dealer Supplied Blankets for Horses in the Circus Parade—Making Seasonable Advertising Forceful.

ST. JOHN, N.B.—When it comes to advertising, the merchants, especially the hardware men, of St. John are right up to date in their methods. The topics of the moment are invariably brought out in their ads. and always attract much attention

In this connection, W. H. Thorne & Co., Ltd., took full advantage of the recent world series baseball games. On the outside of their business premises a huge score board was erected and a bulletin service arranged with the telegraph company. As the telegrams came in, the scores were placed on the board, one clerk devoting his time to the board and another clerk stood by the telephone and answered the enquiries of the fans. While the games were in progress about two hundred calls were answered each day. Outside in the street hundreds of interested spectators stood watching the scores until the end of the game.



Part of the large crowd which daily watched the scores of the World Series baseball games between Brooklyn and Cleveland, as posted on a score board in front of W. H. Thorne & Co., Ltd., store St. John, N.B. The service was much appreciated by the fans. A 'phone service was also established and about 200 calls answered each day. A special wire was installed to give quickest returns.

The score board was facing the market square and many of the old St. John citizens said that the crowd reminded them of the days when the market used to be held in the open, before the market building was erected.

Flypaper and Prohibition

When St. John was voted dry and inspectors appointed to enforce the law, Robertson, Foster & Smith, Ltd., hardware merchants, seized the chance to bring this subject into their advertising of fly papers. The inspector's name was Wilson, and one of their advertisements read, "Say, Bill, where do you buy your Tanglefoot?" "Sh! Sh! Here comes Wilson." "Oh, not that kind, what I want is for catching flies." "You can get it from Robertson, Foster & Smith, Ltd., St. John, N.B." This ad. caused a good deal of amusement and comment, and became a kind of a byword amongst many of the citizens, giving the firm a great deal of publicity.

Substitute Ad. for Old Established Time Piece

Outside the store of Messrs. T. McAvity & Sons, Ltd., there stands a large clock on the edge of the pavement, lighted by electric light at night. Recently the clock had to be taken out of the stand in order to be cleaned. This clock has stood in this same position for many years and everybody passing up and down the street has developed the habit of looking up and comparing their watch with the time given by the clock. As soon as the clock was taken down, an enterprising clerk pasted up on each side where the dials formerly were two advertisements. Every day thousands of passersby looked up and read this advertising. A less enterprising firm would

"SAY, BILL,

Where do you buy your Tanglefoot?"
"Sh! Sh—Here comes Wilson."
"Oh, not that kind; what I want is for catching flies."
"You can get it from

Robertson, Foster & Smith, Ltd.
St. John, N.B.

A St. John hardware store's advertisement of fly paper linking up this line with a topic of local interest dealing with the enforcement of the prohibition law. This novel idea caused much local comment and much advertising for the store.

Advertising Fall Hardware Lines

Some Suggestions from Other Dealers on Effective Publicity for Lines Now Seasonable—Far-sighted Dealers Are Continuing Local Advertising Despite Present Market Conditions—"Special Housekeepers' Sale" Announced.

Herewith is shown an attractive, well-illustrated advertisement of fall hardware lines by Weed & Co., Buffalo, N.Y. A number of lessons in effective layout of newspaper ads. can be learned from this copy.

This ad. shows an electric washer in operation, and gives some sound argument for the use of such machines. An ad. from the tool department shows many seasonable lines, each illustrated, and prices plainly marked. A special housekeepers' sale is given prominence, illustrating oil stoves, electric irons, kitchenware, lamps, preserving lines, etc. Lines of finishes for fall painting and cleaning are mentioned, followed with a section devoted to fall automotive equipment. The vacuum cleaner ad. is linked up with the autumn bride idea. Announcement is made of the opening of the shooting season along with which is a mention of shot guns, cleaning rods, hunting garments and licenses. Household hardware for fall is also an important item, embracing a number of lines, and many lines of cutlery, clocks, thermos bottles, etc., can also be featured in addition to furnaces and stoves which form an important part of any fall advertisement. Illustrations used in conjunction with a brief description and prices are important points in such advertising.

A great many seasonable hardware lines lend themselves to effective advertising in the fall of the year, and despite the fact that the trade in Canada is having little difficulty disposing of all the goods which can be secured, progressive dealers are not overlooking the effect of maintaining a persistent advertising campaign to prepare for future trade.

A Lively Washing Machine Campaign

Some Novel Advertising Ideas Worked Out by Cowan Hardware Company, London, Ont., in Recent Washing Machine Sale—Linking Up the Appeal With Local Theatrical Productions—Demonstration Machines in Theatre Lobbies—Woman Demonstrator to Explain Advantages in the Household

LONDON, ONT.—The Cowan Hardware Co., on Monday, Tuesday and Wednesday of last week inaugurated a big "drive" in connection with the sale of washing machines. A woman demonstrator was brought specially from the factory in order that women might talk more intimately and ask questions which they might hesitate to ask a man. One advantage of this plan also was the knowledge the woman had of fabrics and the best ways to wash them.

It has frequently been mentioned in Hardware and Metal that the Cowan Hardware Co. is a thorough believer in the virtues of printers' ink. True to the firm's policy the women in London and district were acquainted through most attractive advertising matter over the week-end that the demonstration of washing machines was going to take place. It was impressed on them that this was going to mean a big event and be something worth while and that if they were interested in getting away from the drudgery of the wash tub and in learning just what a high grade washing machine could do Monday, Tuesday and Wednesday were the days to come to Cowan's and see the machine at work and ask all the questions they wanted to.

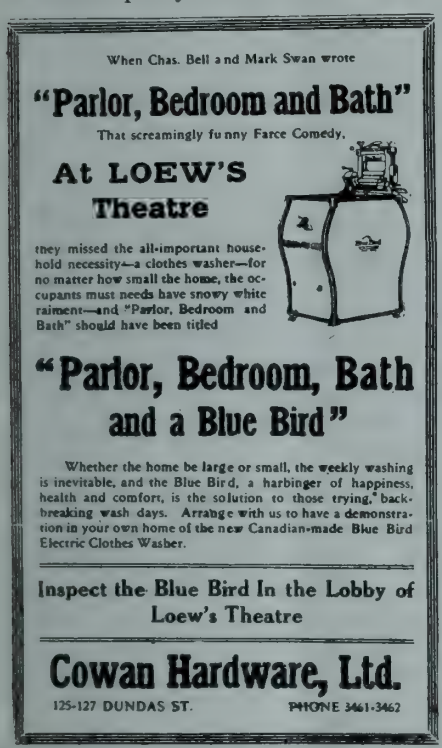
Interesting Reading in Ads

In its advertisement, which was three columns wide and ten and a half inches deep, the firm used half the space to feature the specifications of the machine and they made most attractive and interesting reading and in addition had the advantage of answering about 75 per cent. of the questions most women wanted to know first hand. In addition it got them interested and to cinch the impression thus made the advertisement contained a splendid illustration of the machine. Just a simple direct appeal and above and below in big display type "Cowan's Hardware" so that there was no possible chance of prospective buyers being mistaken about where they could see the machine working.

Large Crowd on Hand

The crowd of women that turned out for the demonstration was a revelation regarding the possibilities of washing machine sales. It showed also just how keenly women are interested in solving the question of getting away from the backbreaking job of standing over a

(Continued on page 56.)



Here is another ad. by the same firm dealing with the same topic, linking up the appeal for washing machines with a play at another local theatre. The title of the play was "Parlor, Bedroom and Bath." The ad. points out that in the play they missed an all-important household necessity—the washing machine—and it goes on to suggest that the title of the play should have been "Parlor, Bedroom, Bath and ——— (washing machine)." A machine was also on demonstration in the lobby of this theatre.

A somewhat novel procedure is followed out in this advertisement on washing machines by Cowan Hardware Co., London, Ont. The idea is to make the ad. of current interest by linking up with the title of a photoplay which was appearing in London at the time. The picture was peculiarly applicable in this case, it dealing with the drudgery of washing in the home which lacked such conveniences. The ad. is headed "Don't be a washing machine, buy one." It continues, "See Mary Pickford as a poor little laundry drudge and then resolve to have a ——— washing machine." A picture of the film star is shown as an illustration, to lend greater effect to the comparison, thus drawing much attention from those who at first glance wondered at the connection between the picture and washing machine. Announcement is also made in the ad. that a machine is on display in the lobby of the theatre at which that picture is being shown.

LUXURY taxes are beginning to get a large share of abuse owing to the fact that merchants are realizing it is too cumbersome a method of revenue production. Hamilton retailers are the latest to oppose the measure, suggesting a larger sales tax instead.

* * *

THOSE "in the know," figure there will be a great business revival early in the new year with better business than any time since the war. There is no reason for pessimism at the outlook and buying can largely be maintained by the dealer passing on some enthusiasm to his trade.

Confidence in Business Outlook

THERE is reason for the greatest confidence and optimism in the outlook as far as the hardware trade is concerned, according to the opinions expressed by manufacturers and wholesalers and which are outlined in this issue. The consensus of opinion is that there is little possibility of further price reductions for some time, that there will be a big revival of business at present price levels when the buyers find that the market has regained some stability, and that therefore the merchant is well advised to keep a well-sorted stock, but not too heavy a stock, at the present time.

There is no doubting the fact that large quantities of hardware are in demand, and some factories are working night shifts to catch up with back orders, despite the fact that they have temporarily cancelled a number of lines in their catalogs in order to concentrate on those in greatest demand. Present conditions, while temporarily curtailing buying, do not lessen the volume of materials required and the longer buyers hold off the greater will be the rush later. Underlying, basic business in Canada is good and the present situation calls for continued confidence in order to maintain a normal volume of trade. Good business is expected to follow the election in the United States early in November and that condition will also be reflected in Canada to some extent.

Mail Order Houses in Difficulty

RETAIL merchants will be interested in noting the changes in merchandising methods now being adopted by at least one large mail order house as evidence that even this medium of distribution which has long been looked upon by many in the trade as a formidable competitor is having its difficulties at the present time. Conditions are somewhat different to-day than at any time in the past; new situations have to be faced and there is little precedent to follow. A process of deflation is taking place as part of a readjustment of business to a more normal level and this condition is causing much unrest in trade, which has evidently extended to the mail order method of distribution.

There is little doubt that the retailer has had the advantage over the mail order house in the past in many respects, and while some dealers who suffered much from the inroads of such business had about decided that the only way to compete with catalogue houses was by the use of a catalogue itself, it is significant that the mail order houses are now adopting new elements which the retailer has employed right along and which he will continue to use with greatest effect. Among these elements is a more rapid delivery right to the customer's door, decreased transportation charges, and the opening of "outlet" stores. One of the changes made by the mail order houses referred to is the plan to deliver to the customer's home and to reduce freight costs by wiping out the 100 lb. minimum rate.

The local retail merchant has a much better proposition as far as delivery is concerned, apart from his other advantages of showing the goods themselves, his personal guarantee behind the goods sold, his subsequent interest in them, and his personal connection with local people. The mail order house realizes that it must get closer to its customers and facilitate ordering and delivery in order to hold its business. In all these elements the retailer stands supreme, and he is therefore at no disadvantage in such competition providing he makes the best use of the means at his disposal for fostering local interest.

May Expect Building Revival

THERE is no doubt that much building construction has been postponed owing to prevailing high costs of building materials, and the publicity given the prospect of lower prices within the next few months. This tendency has had its effect upon sales of builders' hardware and in some cases during the past few years of quietness in the building industry some dealers have given the premier display space formerly occupied by this line over to some other class of goods.

A declining market in many other commodities has curtailed buying of some lines, and meanwhile both the trade and customers are awaiting information as to the probable trend of the market. As to the building industry it is therefore interesting to note that the consensus of opinion among several leading authorities is that building costs are not likely to suffer any appreciable drop for some time to come, in fact, some state that it may be years. It is pointed out that while there has been a depression in the building industry since the first of September, this depression has brought, if anything, higher prices on building materials. Architects who recently were advising clients to postpone building are now advising them to accept modern costs and go ahead with building. Even the possibility of an increase in unemployment during the coming winter is not held to be likely to cause a drop in building costs owing to the fact that the number of skilled tradesmen in the building line is limited. Labor represents one of the big factors in the situation and a process of deflation of wages will necessarily be slow.

This survey of the situation gives some of the fundamental reasons why a revival of building may be expected and dealers can best plan their builders' hardware trade when possessing such data.

Some New Mail Order Merchandising Methods

Large Chicago Mail Order House Adopts New Methods Which Make Possible Closer Relation to Consumer—Adopting Retail Methods to Compete with Retail Stores—Retailers Have the Advantage If They Make Best Use of Their Opportunity

THAT the old established distribution methods of mail order houses are due for a rearrangement in order to allow them to give greater competition to retail store trade is evidenced in the new methods being adopted by Montgomery Ward & Co., Chicago, which is now adopting a plan to deliver goods "from the store to the door" and an arrangement for lowering transportation costs. It is evident that the mail order houses are having difficulties of their own these days and the methods they adopt to overcome such difficulties are particularly interesting to the retailers, particularly in view of the fact that the mail order houses are introducing a number of the elements of retail store merchandising in an effort to establish closer relationship with their customers. In this field the retail store stands supreme providing the retailer makes the best of his opportunity. An interesting article on this subject in Printers' Ink is as follows:

"For some time it has been a commonly accepted fact that the up-to-date retail store—with the emphasis upon up-to-date—no longer need fear retail mail order competition. Manufacturers and jobbers, working through their service departments, have finally convinced the retailer that the catalogue house is by no means the all-devouring monster that it has been pictured. It has been pointed out, properly enough, that the mail order selling scheme has certain inherent weaknesses which will forever prevent it from cornering the country's retail trade.

"All of this is very good. Nevertheless manufacturers, jobbers and retailers will be making a costly mistake if they think that the mail order houses are not striving mightily all the while to overcome their handicap. They don't expect to run the retailer out of business, of course. But they are fully alive to their deficiencies in the distributing scheme and will leave nothing undone to correct them.

"This is well exemplified in the recent activities of Montgomery Ward & Company. When this concern was taken over by the United Retail Stores Corporation interests, advertising and merchandising experts shook their heads and wondered what the answer could possibly be.

"The answer now is becoming apparent.

"Montgomery Ward & Company are adapting retail store methods. They are getting closer to the people both in advertising and distribution.

"Chicago retailers were surprised a short time ago to hear that Montgomery Ward had opened "The Outlet Store" in a crowded retail district on the northwest side. Through this store the company will sell directly to the public surplus supplies of its regular mail order stocks. Advertisements announcing the opening said that the prices would be considerably below the catalogue quotations. The goods will be sold on the cash and carry basis.

"It is said this mail order house expects to establish similar retail stores in every city where it has a distributing branch and eventually the same system will be employed in good-sized towns generally. Naturally there is no way of confirming such a statement and it is being presented here for what it is worth.

"So much for what Mr. Whelan and his associates expect to accomplish in a retail way in the larger cities. And now for the smaller towns.

Delivery to the Door

"Customers of the house in various communities received circulars recently, stating that Montgomery Ward & Company had completed arrangements to deliver goods 'from the store to the door.'

"This plan not only gives quicker and better service, but lessens the freight charge materially. All the freight orders destined for a certain town in one day are shipped in one lot in charge of a local transfer company. Instead of being charged on the customary 100-pound minimum for freight, as generally is the case, the customer has to pay freight only on what his goods actually weigh. The transfer company then delivers the goods to the house for a small cartage fee, which is smaller than the customer would have to pay if he arranged for the delivery himself. Delivery service on packages up to 20 pounds costs 30 cents; up to 50 pounds, 35 cents, and up to 100 pounds, 40 cents.

"In making this readjustment of things, Montgomery Ward does much to eliminate delay and expense. The mail order people themselves have been foremost in admitting that it is tiresome to wait for shipments and a nuisance to have to arrange for their delivery. In the smaller towns especially this latter consideration is of moment. In some towns it is embarrassing for people to go or send to the station for goods sent in by a mail order house. They are perfectly within their rights and are doing nothing to be ashamed of. But they fear the criticism that comes from the 'buy-at-home' boosters. Ward's new scheme suits them much better. It is practically the same as ordering goods from a local store if one wants to forget about the unavoidable delay. And the delay is not so bad when one saves enough on the order to more than pay for that inconvenience.

Outlet Stores

"With 'outlet stores' in the larger communities and the home delivery system in the others Montgomery Ward seems to be going a good way toward meeting the retailer on his own ground. This is adopting retail store methods to fight the retail store. It bears out an assertion made several times to the general effect that it is folly for the retail store to try to compete with the mail order house by using a catalogue—that a retailer can win as long as he uses his store to fight mail order, but will lose just as soon as he gets into the catalogue end.

"Speaking of catalogues and their distribution, Ward has adopted some forward methods in this direction also. Instead of sending recent midsummer price lists through

(Continued on page 66.)

News of Western Canada

Simpler Reports from Hardware Dealers

Members of New Board of Commerce at Regina Show Desire for Closer Co-operation with Merchants — Educational Campaign re High Prices Advised.

SASKATOON, SASK.—That the attitude of the new Board of Commerce towards the retail trade is vastly more reasonable than that of the old body is thought to be evident from the greater measure of co-operation which has thus far been evident. At a recent meeting of the Board of Commerce in Regina a delegation of retail merchants was invited, and they presented their case in the form of resolutions as follows:

"Resolved: That we reaffirm our contention that the fixing of profits is unfair.

"If, however, this practice of fixing profits is to be continued, consideration should be given to declining margins, due to ever-increasing overhead costs, and moreover the principle should start from the source of production and consideration be given to the cost of doing business in the varying localities.

"Resolved: That we as retail merchants desire to express our appreciation of the action of the Board of Commerce in modifying the questionnaire required from retail grocers and of their action in having this work centralized under the Bureau of Statistics to avoid duplication, and if not already done, would ask that similar action be taken in connection with the return required from other sections of trade, including hardware merchants and others.

"We also desire to express our willingness to co-operate with the board in the work they have undertaken to do, and with this object in view, would request that any matter affecting retail merchants be referred to the Dominion Board of our association for consideration.

"Resolved: That the Board of Commerce be requested to undertake an educational campaign with a view to placing before the public the facts as they exist with regard to causes of the high cost of necessities and to counteract the prevailing belief that there is going to be an immediate great reduction in the cost of such necessities, our firm conviction being that as most lines of merchandise are being quoted by manufacturers and wholesalers at greatly advanced prices for future delivery, no reduction can be looked for until the public itself reverts to a more ecenomical standard of living."

Board Finds Questionnaires Unnecessary

Commissioner Auckland replied to the resolutions for the board by stating with regard to the report of the hardware merchants and others, that the board had decided just as soon as possible to have them suspended, and more simple ones prepared and sent out by the Bureau of Statistics.

Commissioner White expressed his appreciation of the desire of the R. M. A. to co-operate with the board, and said that the board would be only too pleased to accept it, as it was only by co-operation with the different interests for the good of all that any good could be accomplished.

Nominee of R.M.A. for Advisory Committee

The question of having a representative of the R. M. A. on the board had been broached at Winnipeg, and the board had replied by quoting that part of the Board of Commerce Act which gave them power to appoint an advisor or advisory committee of experts in their particular lines. As soon as they returned to Ottawa it was their intention to immediately seek permission of the Government to appoint that advisor or advisory committee and it was the board's opinion that this would result in assuring the R. M. A. an opportunity of expressing their approval or disapproval of any order the board might feel called upon to put into effect. Also that this advisor should be appointed at the instance of the R. M. A.

Western Canada Notes

Southey, Sask.—H. Sandomirskey advises that, owing tc the fire which destroyed his buildings and stock, he would appreciate all firms with whom he previously did business to forward him copies of their catalogues.

A hardware store has been opened at St. Boswells by G. W. Williams.

* * *

Belaus Bros. are discontinuing their hardware business at Saskatoon and moving their stock to Humboldt and Lancer.

* * *

Regina.—Twelve stores, half the business section of Wadena, Sask., are reported in ashes as the result of a fire that caused $300,000 damages to this town.

Railway Material to be Sold

Railway material amounting to 30,000 tons, ordered by the Russian Government and which has been lying for years in the Canadian Pacific yards at Coquitlam, B.C., awaiting shipment to Siberia, will be sold by the British Government to the highest bidder.

Do Not Approve of Half Holiday the Year Round

Brandon, Man. — As the result of a petition circulated among the merchants of this city by W. E. Crawford, president of the Retail Merchants' Association, it is not probable that the retail stores in this city will adopt the Thursday half-holiday plan the year around. The petition was circulated for the purpose of finding out how many merchants were in favor of the half-holiday being granted, and 35 merchants voted "No," and only three favored the plan.

Accordingly it looks very much as if the merchants of Brandon will reject the scheme.

Hardware Clerk Comes Into Large Fortune

Calgary.—Fred James, an employee of the cutlery department of Wood, Vallance & Adams' Hardware Company, in Calgary, has been notified by a firm of solicitors in England that he is heir to something like a million dollars, left him by his brother.

James, who worked for a time in Hamilton, is leaving with his wife in a few days for the Old Country, where he will enter into possession of the bequest.

The father of James had made considerable sums of money in South Africa, and on his death the fortune was left to the eldest son. This son was badly wounded during the war, and has since died as a result.

Iron and Steel Bookings Very Light

FURTHER tapering off of both new business and plant operations more clearly has marked the progress of the readjustment movement in iron and steel, says the Iron Trade Review. Fresh bookings are the lightest in many weeks as buyers are wholly indifferent to offerings of tonnage which only a few weeks back would have been most attractive to them. Added to this, cancellations and suspensions have been large and still are flowing in upon producers. More mill capacity is being offered to suspend or go on a part time basis. Under these conditions competition has grown keener and prices in a number of lines show increasing unsettlement. Reflecting the listlessness of the market, some independent companies have manifested a willingness to reduce their prices to the level being quotted by the steel corporation but have refrained from doing so since they are convinced this would not stimulate buying at this time.

Renewed interest has been centred upon the price policies of the Steel corporation with the appearance of widespread reports, as yet without official weight, that important announcements by the leading producer are near at hand. Some of these reports are to the effect that an advance of $2 to $3 per ton in plates, shapes and bars applying from Jan. 1, may be adopted.

Decreased Output of Iron and Steel

The movement toward lower prices for pig iron and the products of independent steel mills is more rapid and there are more shutdowns and curtailments of production. Signs now point to a decline in both pig iron and steel ingot output in October, though an increase was indicated as the month came in, says the Iron Age.

An Eastern steel company has just blown out four blast furnaces, and at a Western Pennsylvania independent steel plant operations are at 60 per cent., as against 80 per cent. only recently.

The belief that activity will succeed the present hesitation early in the new year is prompting the policy in some cases of adjusting operations for the time being to the limited demand, without pressing for new business. Meanwhile concessions are largely confined to the smaller mills.

Purchasing Agents Consider Market Tendencies

A NUMBER of interesting observations were made in regard to the probable trend of the market at the convention of 3,000 United States and Canadian purchasing agents in Chicago. The delegates represented a combined buying power of billions of dollars, and the conclusions arrived at therefore have special interest.

Prices, everybody agreed, have reached the peak, and sales resistance has crystallized because of the present tremendous cost of raw materials. The only exceptions in what the purchasing agents believed is an impending general decline are coal, and possibly paper. There is a possibility, they believe, for a general price decline so rapid and precipitous as to even hurt the general consumer.

Transportation problems were held to be extremely acute on both sides of the border. From their knowledge of costs and charges the delegates were convinced, however, that the recent increase in transportation charges is being utilized as a pretext for holding up prices.

Motor Industry Quiet

Discussions along various lines of industry revealed that the motor industry is quiet. Unemployment is reaching serious proportions in the large steel centres. Further reductions in the prices of motor cars, therefore, the delegates concluded, are to be expected. Incidentally, a drop in the price of glass, they say, is to be expected.

Oil men at the convention made the alarming declaration that at the present rate of gasoline consumption there is barely enough crude material in sight to supply the world's motor cars for from seven to ten years hence. Indications, therefore, were for continually mounting gasoline prices.

Questioned regarding the possibility of a reduction in wages with a reduction in the prices of commodities, officials of local labor organizations declare that a decrease in prices would have to be much greater than some of the recent drops before a cut in wages could be considered. There was still a great difference, they claimed, between current wage rates and the cost of living.

Meeting of Association of Canadian Advertisers

Toronto.—The annual meeting of the Association of Canadian Advertisers takes place in the Prince George Hotel on Wednesday and Thursday, October 20 and 21. On Wednesday evening the association has arranged for a "smoker." The president of the organization is D. George Clark, McClary Manufacturing Company, London, Ont.

Secure Canadian Agency

Montreal. — Hyndman, Smith, Company, 248 St. James Street, Montreal, have been appointed Canadian representatives for S. Smith & Sons, Inc., exporters and importers, 154 Nassau Street, New York. This firm manufactures extensively various lines of automobile accessories which are now being introduced to the Canadian trade as above, and is a branch of the parent house in Great Britain.

Good Business in Hunting Equipment

A number of hardware dealers throughout Ontario report a good volume of business in anticipation of the shooting season. Many large parties are said to be organizing. Quite a number of parties are expected over from the United States.

The fact that the season is a little longer this year is expected to overcome the difficulties of the past due to a last minute rush. A spell of sharp cold weather will make ideal shooting in the north, according to travellers from that section.

On Monday, October 25, the hunting season opens for deer and moose in Ontario, with the exception of that part lying south of the French and Mattawa rivers, where the opening is delayed until November 5. The few days of cold which was experienced a week or so ago aroused the hunting instincts to some extent and now is a good time for dealers to plan some attractive displays and other sales methods to get their share of this business.

Ontario Now Has 176,000 Motors

The number of automobiles of all kinds in Ontario has increased by over 30,000 during the past year. Official figures have not been published, but it is understood that the total registration at the Department of Highways of passenger cars this year numbers 155,000; of motor trucks and commercial vehicles, 15,000; of motor-cycles, 6,000; or a total registration for Ontario of all kinds of motor vehicles of 176,000.

Last year the figures were; Passenger cars, 127,860; motor trucks, 11,428; motor-cycles, 5,516; total, 144,804.

Assuming the population of Ontario to be about 2,750,000, the Province has one automobile to every 15 persons.

It is anticipated that the Ontario Government's revenue this year from motor vehicle fees will be almost $2,000,000.

Hamilton Merchants Oppose Luxury Tax

Hamilton, Ont.—Local retail merchants at a recent meeting went on record as favoring the immediate abolition of the luxury tax of 10 per cent. And increasing the sales tax to retailers to a degree that would recompense the Government for any consequent loss of revenue. It was pointed out that total collections of the luxury tax so far had amounted to only about 20 per cent. of the collections of the sales tax. Copies of a resolution are being sent broadcast with the object of giving the movement enough force to bring action at Ottawa.

Events in the Trade

Business Changes

Valparaiso, Sask.—W. J. Newsome has sold out his hardware business here.

Toronto.—J. W. Hopkins, hardware merchant, has been succeeded by Robert Ovens.

Taber, Alberta.—R. D. Shiell, proprietor of Shiell's Hardware, has sold his business to Shiells Hardware Ltd.

New Firms

Mindenoya, Ont.—Cushing & Jackson have commenced a new hardware business here.

Birch Cliff, Ont.—Harold Williamson has opened a hardware business at Stop 23, Kingston Road, having sold out his garage and accessories business at 1615 Queen Street E., Toronto.

Obituary

Montreal.—George M. Webster, of the contractors' supply firm of Hyde and Webster, died on Tuesday last at his home in Montreal.

Personal

Montreal—F. J. Manheimer was in the city this week representing Kaufman Bros. & Bondy.

Montreal.—Herbert C. Seybold, of Starke, Seybold, Ltd., attended the hardware convention, held in Atlantic City.

Montreal.—A. J. R. Curtis, of Chicago, assistant to the United States' Senate committee on reconstruction, addressed the Montreal Publicity Association on the cement industry.

Ottawa.—T. H. Price, formerly in charge of the advertising department of Ottawa Paint Works, Ltd., has left the service of that company.

Montreal.—Walter B. Ramsay, president, and Arthur G. Brown, general manager, A. Ramsay & Son, Co., Ltd., Montreal, returned from a trip to Western Canada.

Montreal.—A. T. Black, general manager, Martin-Senour Co., Ltd., was this week a visitor to Toronto; W. C. McCutcheon, of the purchasing department, Caverhill, Learmont & Co., attended the hardware convention at Atlantic City; Arthur E. Smith, H. L. Judd Co., Boston, was a Montreal visitor this week.

Montreal.—R. L. Hornidge, for the past two years manager of the automobile accessory department of Lewis Brothers, Ltd., Montreal, has joined the staff of Motor Sundries Ltd., Toronto. For ten years Mr. Hornidge has been associated with the automobile business in various respects. He assumes his new duties in Motor Sundries Limited, on the first of November.

Montreal.—Thomas F. McCrae, American Lead Pencil Company, New York, called in the Montreal trade this week; O. A. DeGraw, Western Clock Company, Limited, was in Montreal during the week; George A. Paine, of A. J. Reid & Company, Philadelphia, was a trade visitor to Montreal this week.

Western Ontario News

C. G. Davis, manager of the Maple Leaf Harvest Tool Company's plant at Tillsonburg, Ont., sailed on Tuesday for England. He has been granted a year's leave of absence by the firm, and prior to his departure was pleasantly surprised by the employees, who gathered and presented him with a diamond pin. During the absence of Mr. Davis, W. H. Hill will be manager.

* * *

The show window of J. H. Slater, hardware merchant at Ridgetown, Ont., was most attractively arranged during the three day fair. The basis of the decorative scheme was a woodland scene featuring hunting and was cleverly worked out. It not only hit fair visitors in the eye from an attractive standpoint, but was a business producer as well. Mr. Slater backed his window display by some seasonable advertising, directing attention to the duck shooting season, the shells and rifles he handles, and closed with the timely hint to "Have your stove put in shape NOW before the cold and the rush."

* * *

George A. Sills, hardware merchant at Seaforth, Ont., has returned after spending two months' holidays with relatives in Saskatchewan.

* * *

R. Grass, of St. Catharines, Ont., has taken a position with the Maple Leaf Harvest Tool Co., at Tillsonburg, as bookkeeper.

* * *

H. Edge, of "The Big Hardware," Seaforth, Ont., has been making a big "drive" on roofing, heating systems and new bathrooms, and has enough work on hand to keep him going for some time as a result of his efforts. Mr. Edge has always been a consistent and steady advertiser, and this has brought him in business from a wide radius around Seaforth.

Reeve B. W. F. Beavers, of Exeter, Ont., hardware merchant, is a great booster for good roads and for maintaining bridges, and during the week has been very busy in the northern part of Huron County looking after improvements.

* * *

Russell Beattie, of the Russell Beattie Hardware, London, Ont., and his bride, have returned after spending their honeymoon in the Adirondacks.

* * *

David Crombie, who has just been appointed assistant transportation manager for the Canadian National Railways, with headquarters at Toronto, was for many years in the hardware business at Chatham, Ont., with D. H. Douglas and the late George Stephens.

* * *

Heaters that will burn coal, wood, or gas without changing are being featured this week in the store and window displays and also the advertising matter of Conn's Hardware at Tillsonburg, Ont. In view of the fuel situation this appeal is particularly timely, and Mr. Conn reports excellent results in the way of sales.

* * *

A three day "Cash Sale," during which ten per cent. off on all shelf goods, and five per cent. off on all stoves, churns and washing machines was offered, resulted in a considerable increase in turnover at H. R. Carter's store at Clifford, Ont. Incidentally room was made for new goods that were coming in, and both merchant and customers were satisfied with the results of the sale.

* * *

Building continues very active in London, Ont., and a large number of new homes will be proceeded with to take care of workmen coming in for new factories. There is not a house to be had for rent at the present time, and many of the larger dwellings are being made into duplex houses and apartments.

New Factory Extension

The Dyer Company, of Cambridge, Mass., makers of special garage equipment and large manufacturers of pistons, are completing a new and large addition to their plant. It is planned to have the new plant equipped with the most modern machinery within a few weeks, in order to begin production for the trade of 1921.

Convention of N.H.A. at Atlantic City

The twenty-sixth annual convention of the National Hardware Association of the United States was held at Atlantic City October 19 to 22.

Stratford Brass Co. Appoint New Representative

Montreal.—The Imperial Electric and Hardware Co., 210 St. Lawrence Boulevard, Montreal, has been appointed Montreal representative of the Stratford Brass Co., Stratford, Ont. They will handle, particularly, the various lines of builders' hardware made by this firm.

Montreal Firm Changes Name

Montreal.—Forrest, Jackson & Forrest, Craig Street West, Montreal, have reorganized and will conduct business at the above address as Sheffield Engineering & Supplies, Limited. They will handle "Dormer" high speed twist drills, high speed drill, milling cutters and reamers, lines made by the Sheffield Twist Drill & Steel Company. Hack saw blades and files will also be carried. The officers of the firm are: President, E. Jackson; vice-president, Capt. H. H. Pinch; and secretary-treasurer, E. B. Forrest.

New Furnace in Operation

McIntyre & Taylor, Ltd., 501 Queen Street W., Toronto, have installed and commenced operating this week their new furnace for turning out castings and stove repairs and linings. McIntyre & Taylor now carry repairs for almost every stove and range manufactured in Canada and with the new foundry in operation expect to be able to take care of all demands.

Asks Bounty of $1 a Ton for Steel

Sault Ste. Marie, Ont.—The steel men asked for protection on steel rails and the Board of Trade of this city asked for a bounty of $1 a ton on iron ore produced in Canada for fifteen years at the recent sitting of the Tariff Commission here.

Canadian Delegates at Motor Conference

London, Eng.—Canadian delegates representing Ontario, British Columbia, Nova Scotia, Quebec and Newfoundland, will, together with representatives of every department of the British Government, discuss Empire problems, road improvements, motor transport, and motor fuels at the important Imperial Motor Transport conference in London.

Fulton Motors Take Over Plant of Marathon Tire Co.

St. Catharines.—Fulton Motors, Ltd., have announced that they will take over the Marathon Tire Company factory at St. Catharines. The parent organization is the Fulton Company of Farmingdale, N.Y.

Wins Silver Trophy

R. T. Coleman again wins the cup awarded by Beatty Bros., Ltd., of Fergus, to the salesman selling the greatest volume of hardware business during the business year. Beatty Bros.' business year ends August 31, and Mr. Coleman not only excelled his own record of the previous year, but also beat the previous

R. T. COLEMAN
Beatty Bros., Ltd.

sales record for the whole firm. The cup become the property of the salesman who wins it three years in succession, and judging from Mr. Coleman's previous record, it is quite likely that by this time next year he will be the proud possessor of a silver cup.

Electric Irons in Big Demand

Approximately 2,500,000 electric flatirons, valued at $17,500,000, and 60,000 electric ironing machines worth $10,000,000 at retail, will be manufactured in the United States in 1920, trade estimates predict.

Atkins Salesman Hurt in Fall

Harvey Avery, E. C. Atkins & Co.'s oldest salesman, being eighty-one years young, very nearly lost his life recently when he ascended in an aeroplane at a county fair, to distribute advertising matter. When Mr. Avery wrote the advertising department that he desired some advertising matter for this purpose, he was told that he was too valuable for such a performance and that he had better not try it. He ascended however, and the pilot tried to loop the loop but was not high enough from the ground and they crashed into the earth, hurting both very badly.

Fire Loss

Hamilton, Ont.—The Equator Manufacturing Co., manufacturers of electric stoves, report a loss by fire.

Beaver Company Opens Plant at Ottawa

Ottawa.—A completely equipped roofing plant has recently been built at Ottawa for the manufacture of vulcanite asphalt roofing.

The Beaver Company, Limited, which has brought this industry to Canada, is to offer vulcanite asphalt roofing as a Beaver quality product.

Simonds Company Opens English Branch

Montreal.—Simonds Canada Company, Ltd., has just secured a charter and established a new company in Great Britain, to be known as Simonds Saws, Ltd. An office and shop has been opened at 53 Bayham, Camdentown, London, N.W., where a full line of Simonds saw steel products as is demanded in Great Britain will be carried. The shop will provide for maintenance and repairs of saws, machine knives, and other edge tools produced by the Simonds Company.

Guy A. Eaves, formerly connected with the Fitchburg, Mass., plant of the company, has assumed the duties as office manager, and Leon E. Wilbur, a Simonds man, who has covered the Great Britain territory since his discharge from the army in France, will be associated with him.

Hardware Exhibits at Kingston Fair

Kingston, Ont.—Among the many interesting exhibits to be seen at the Kingston fair recently was that of McKelvey and Birch, hardware dealers, of this city.

Cutlery, stoves, tinware, aluminumware, paints and oils, and an exhibition of plumbing fixtures comprised the bigger part of the exhibit.

W. H. Cockburn, hardware merchant of Princess Street, had a fine exhibit of cutlery, paints, oils, roofing materials,

Agents for Mephisto Bits

Montreal.—Richardson & Bureau, 55 St. Francois Xavier Street, Montreal, have been appointed sole Canadian agents for the Mephisto line of auger bits, made by the W. A. Ives Mfg. Co., Ltd.

Personal

Toronto.—Mr. David, of Baines & David, is leaving the city for some weeks.

Toronto.—Mr. Thomas, of Sherwin-Williams Co., will attend the salesmen's convention to be held in Montreal.

Toronto.—Wilson Sheridan, of W. & J. Sheridan, Brockville, was a visitor to McClary Manufacturing Co. last week.

Toronto.—A. T. Choate, of Warsaw, Ont., and H. D. McInnis, of Kirkfield, Ont., were visitors to H. S. Howland Sons & Co. this week.

Toronto.—T. B. Williamson, of H. S. Howland Sons & Co., attended the convention of the National Hardware Association of the United States in Atlantic City.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

OIL BURNERS FOR STOVES AND RANGES

Otto Knechtel, Waterloo, Ont.—Can you tell me who make oil burners for stoves, ranges and furnaces?

Answer—The Acme Burner & Heating Co., 3 Wellington St. W., Toronto, Ont.; the Canada Oil Burner Co., 35 Adelaide St. W., Toronto, Ont.

DAHL MASTER SLIDE RULES

R. Chestnut & Sons, Ltd., Fredericton, N.B.—Kindly advise us of the manufacturer of Dahl master slide rules.

Answer—These are made by the Dahl Mfg. Co., 51 East 42nd St., New York City, N.Y.

APEX VACUUM CLEANER

J. Hammer, Neustadt, Ont.—Can you inform us who makes the Apex Vacuum Cleaner?

Answer—This is made by the Apex Electrical Appliance Co., Cleveland, Ohio, and Ontario distributors are McDonald & Willson, 347 Yonge St., Toronto, Ont.

OAKLAND COOK STOVE

Patterson & Park, Dummer, Sask.—Kindly advise us where we can obtain repairs for the Oakland Cook Stove.

Answer—McIntyre & Taylor, Ltd., 501 Queen St. W., Toronto, Ont., state they have repairs for this stove.

WOOD TURNERS' CHISELS

The Schultz Bros. Co., Ltd., Brantford, Ont.—Kindly advise us of manufacturers or wholesalers of wood turners' chisels.

Answer—The following make wood chisels and you can also procure these from any wholesale hardware firm. Chisel manufacturers—Canadian: The Quality Tool Works, Montreal, Que.; The Josiah Fowler Co., Ltd., St. John, N.B.; Gilmour Bros. & Co., Montreal, Que.; The Canadian Foundries & Forgings, Ltd., Brockville, Ont. American: C. E. Jennings & Co., New York, N.Y.; Peck, Stow & Wilcox Co., Cleveland, Ohio; L. & I. J. White Co., Buffalo, N.Y.; Union Hardware Co., Torrington, Conn.; Bridgeport Hardware Mfg. Corp., Bridgeport, Conn.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

"REGO" WELDING AND CUTTING APPARATUS

The Bastian-Blessing Co., West Austin Ave., at La Salle St., Chicago, Ill., have just received off the press their new catalog, No. 20, descriptive of the "Rego Welding and Cutting Equipment." The catalog which is well illustrated shows the various styles of torches and cutting apparatus manufactured by this firm.

The makers point out that the Rego apparatus, while reasonably priced, does not, however, compete with cheap equipment. It is essentially a quality line and all the torches and regulators illustrated have been examined and approved by Underwriters Laboratories and National Board of Fire Underwriters.

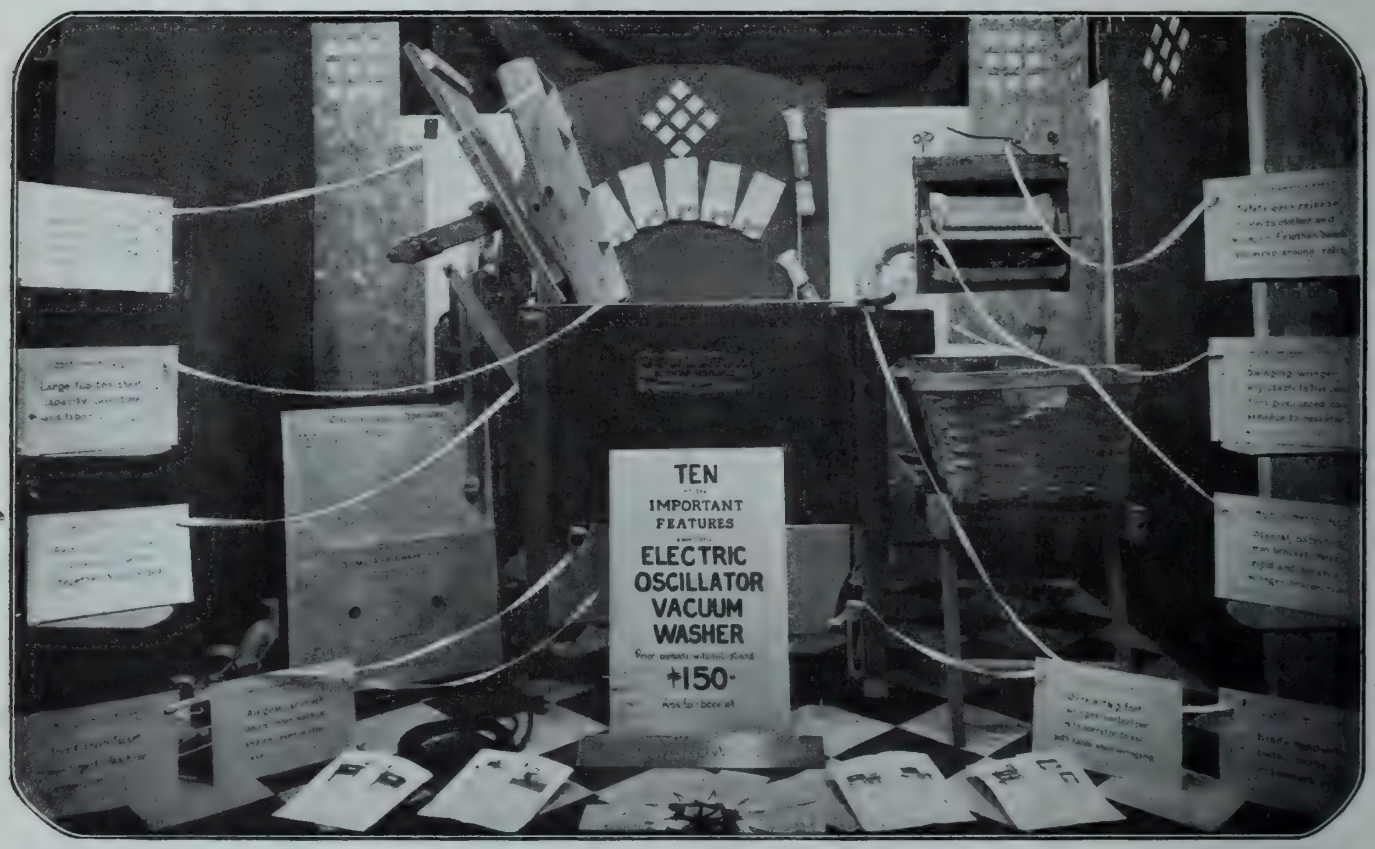
The torches and cutting apparatus listed are suitable for all different classes of sheet metal work, and for plumbers and tinsmiths, auto repair work and for jewelry manufacturing and repairs, and for use with oxygen and acetylene, hydrogen or any kind of compressed combustible gas as well as natural gas.

The "Rego" principle is said to eliminate "flashback" under all operating conditions. A few of the "Rego" details claimed are: one-piece nickel-copper tip; renewable mixing chamber; all valves outside; long leverage on oxygen control; positive locking device operated without strain; no flashback; economy; sturdy construction; simplicity; balance pressures; soft welding flame.

The special features of the "Rego" diaphragm regulator are fully described and illustrated with diagram.

An eight-page booklet, entitled, "A New Principle in Welding and Cutting Apparatus," is enclosed with catalog.

Each article listed is guaranteed by the makers who have twelve years' gas apparatus manufacturing experience. Catalog will be mailed upon request.



Comparatively cheap motive power makes the use of electric labor-saving devices in Canada an economy. The winter season is approaching, when heavy clothes will again form the bulk of the washing, and now is therefore a good time to emphasize the labor-saving element involved in the use of an electric machine. Herewith is shown a good way of demonstrating a washer. Place the machine in the window with all its parts visible and a card explaining the function of each with a cord or ribbon connecting the two. Getting action into the display is also effective so the machine might therefore be put in motion. Some dealers show a neatly dressed housewife supervising the washing by this method compared with the drudgery of the old method.

Twenty Years Ago

Items of interest reprinted from the Hardware and Metal files of twenty years ago.

The following items are taken from Hardware and Metal of October 27, 1900.

In September, 1898, linseed oil could be bought at 43½ cents per gallon by the paint makers; to-day it is worth a little over 80 cents per gallon to lay down in Montreal. This is an advance of 84 per cent.

* * *

No one who knows anything about the industrial development of Canada would ever dream of terming the exhibits at the Toronto Fair representative of the manufacturing industries of this country.

* * *

Ground has been broken at Newark, N.J., for building a plant for the Sherwin-Williams Co.

* * *

The McClary Mfg. Co. are putting a new stove on the market this season called "McClary's Hot Blast Heater," which is especially adapted for this country.

* * *

R. Buchanan and Wm. Penstone, late of J. Henderson's hardware store, Barrie, Ont., have opened a new store in the same town.

* * *

As the necessary $450,000 bonds have been subscribed for the Toronto Hotel Company, it is likely the contracts for the Palace Hotel which is proposed to be built at the foot of Victoria Street on King will be let in a short time. The plan calls for 42 bathrooms, some of which will be fitted with showers and be up to date in every respect.

* * *

J. Hillhouse & Co., Clifford, Ont., increased the capacity and improved the appearance of their store.

* * *

Following are a few quotations taken from Hardware and Metal's market reports: Barbed wire, $3; galvanized, No. 9, $2.90; wire nails, $2.85 keg; cut nails, $2.35 keg; sisal rope, 8½c base; manila rope, 12½c base; cotton twine, 22c lb.; bar iron, $1.65 base; tinned sheets, 9c lb.; galvanized sheets, English, $4.85; American, $4.50; Canada plates, dull, $3.15; half polished, $3.25; all bright, $3.85; lead pipe, 7c lb. less 15 per cent.; half and half solder, 21c lb.; putty, bladders in bbls., $2.10 hd.; plaster of Paris, $1.90 barrel; pure mixed paints, $1.20 to $1.30 gallon; linseed oil, raw, ¼ barrels, 84c; turpentine, single barrels, 61c gallon; glass, star, 50 ft. boxes, $2.10, terms, 4 months or 3 per cent. 30 days; pure white lead in oil, $6.62½.

Confidence

MONTREAL.—In speaking with a Montreal retailer a few days ago he related the following incident:

He was speaking with a wholesaler who, evidently, has some misgivings regarding the future of prices. This retailer said to him:

"Did you ever know of prices on hardware declining as quickly as they advance?"

"No, I do not know that I have."

"Well, it took five years or more for prices to advance to their present levels, and I think it will take a long time for them to decline to the levels they started from."

This dealer believes in buying in small quantities and selling as much as possible, but he has every faith in the future of hardware products and has no misgivings about a precipitate drop coming in these lines.

The Next Move of the Steel Market?

LATEST advices are that some of the independent steel mills may be expected to reduce some prices to somewhat nearer the level of the U. S. Steel Corporation prices. The Corporation price on rails is now $47.50 while the independent's price is $65. It is reported that the corporation may advance rail prices $10 per ton. This was forecast in Hardware and Metal in a recent issue in connection with a report of an address made by F. H. Whitton, Steel Company of Canada, Ltd. As a general rule, however, the independent mills are holding to their prices and extensive cutting is not anticipated. Steel business is reported to be good. While the demands of the automobile industry have fallen off somewhat, it is pointed out that this class of business represents only 3 per cent. of the total tonnage produced and is therefore a very small factor.

Pittsburgh openly admits that the steel market there has developed more than usual flatness and that there is a falling off in consumption. While this may be so, yet it is not reflected to any great extent in Canada. In fact some of the merchants in the steel and iron business claim that the situation has become stronger during the last week. A few days ago, they claim, there was a feeling that the bottom might fall out of the market, but it has become fairly well established since then that there is not going to be any sharp reduction in prices.

Some of the material that has been turned loose by the cancellations of the automobile plants is being taken up by other concerns, and there are cases where coisiderable relief has been afforded by this action.

Downward Trend of Prices is Not a Recent Development Only

THE downward revision of prices continues to be the factor dominating the general business outlook. The movement is a natural and inevitable corrective of the unstable condition created in the previous period of rising prices, reckless public buying and widespread speculation. Falling prices are not a recent development. Before the close of 1919 the prices of a number of important commodities had begun to decline. By the spring of 1920 a definite downward trend had been established. Since then the movement has been accelerated, until within recent weeks it has forced general recognition that the period of excessive buying at rising prices has definitely ended. Business must now go forward on a lower price level. This readjustment cannot be effected without embarrassment in individual cases. It will be effected, however, without serious general results by reason of the inherent strength of the credit situation and the assured co-operation of the banks with business, says the National Bank of Commerce.

The banks are amply prepared to finance business while it is working out a more normal basis of operation and a stable level of prices. This process will require the employment of a large volume of credit. Inventories cannot be disposed of abruptly. In many lines, owing to general indisposition to buy, their liquidation must be effected very gradually. Meanwhile, they must be financed. The long run effect of the downward price movement, however, will be to ease the credit situation. The freedom from disturbance with which the readjustment is effected depends largely on the willingness of business to recognize the changed conditions.

Stabilization on a new price basis does not involve a return to the prewar price level. For nearly two decades prior to the war, prices had been rising steadily. On economic grounds this rise might reasonably have been expected to continue, had there been no war. The actual level at which prices will be stabilized can only be worked out gradually on the basis of actual transactions over an extended period.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

COLEMAN TABLE LAMP

There is no necessity nowadays to pass the hours of darkness in semi-gloom. The Coleman table lamp, No. CQ-329, is said to develop 300 candle power and it should appeal specially to rural districts and places where electricity is not available. This lamp will burn either coal oil or gasoline by changing the tips and one filling will last for twenty hours, it is stated. There are no wicks to be regulated or renewed. It lights with a match, and further claims for it are that it throws no shadow, makes no odor, and is thoroughly safe.

The makers are the Coleman Lamp Co., Toronto, Ont.

Coleman Table Lamp and Lantern

THE COLEMAN LANTERN

The Coleman Lantern, No. LQ-327, is especially suitable for use on farms, around barns or stables, in summer camps or cottages or wherever a good, strong and safe light is required.

It can be used with either kerosene or gasoline, special tips being provided for each, and will burn continuously for fifteen hours, it is said, on one filling. A special feature claimed for it is that it will not spill or explode even if knocked over, and another feature making for safety is that it cannot be filled while lighted.

It is said to burn steadily in wind or in rain and can be lighted with a match.

It is made by the Coleman Lamp Co., Toronto, Ont.

KIT—HAXAW—SET

A new tool has made its appearance in the form of a small rigid hack saw, designed to do the work where the present hack saw fails. It is claimed to be particularly adaptable for the tool kit for an automobile, for the carpenter who wants to cut away a nail or renew a screw slot, for the plumber whose work in repairs is almost always in cramped quarters, for the electrician whose work on small sections and close quarters requires a free end saw. For the household it is complete for numerous uses. The jewelry trade have taken to it instantly and its value as a practical tool has been instantly recognized by the mechanical world.

The saw blades are stated to be made of the highest quality of tungsten hack

"Kit Haxaw" Set

saw steel. The straight edge of the saws has 32 points to the inch left unset; this side is used to start a cut or used as an edge file. The lower edge has 18-20 or 24 points to the inch with enough set to the teeth to assure free cutting.

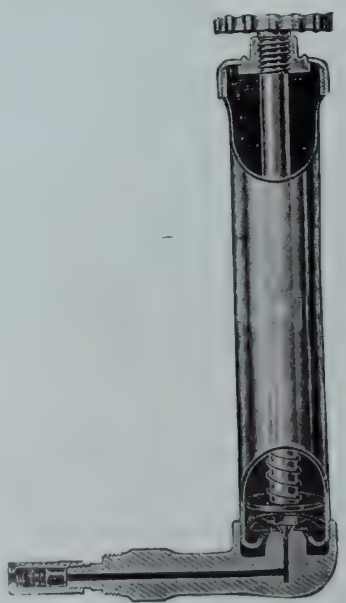
The saw handle is made of tool steel in a form that permits of the greatest variety of grips. Adjustment of new blades is made with single screw.

The saw was designed and patent applied for by H. C. Pittman, vice-president of the Alston Saw & Steel Co., Folcroft, Pa., Wiebusch & Hilger, Ltd., sole sales representatives, 110 Lafayette St., New York, N.Y.

"NEVER LEAK" TORCH PUMP

The new "Never Leak" pump is used on all torches, furnaces and brasiers now being made by the Otto Bernz Co., Newark, N.J.

The special feature claimed for this



"Never Leak" Torch Pump

pump is that it is so constructed that the plunger "A" can be screwed down and out of the way, preventing it becoming bent or broken. The needle "B" at the bottom of the plunger acts as a double check, for if the internal check "C" gets out of order through the use of dirty fuel, etc., the torch can still be used by screwing down the plunger. Top of cylinder being flared enables user to insert plunger without injuring the washer.

GASOLINE FIRE POT No. 71

It is claimed by the Clayton & Lambert Mfg. Co., Detroit, Mich, that the No. 71 Gasoline Fire Pot is the hottest fire pot made and the several improvements in construction make it the most desirable, economical and efficient fire pot for such work as heating soldering coppers, melting lead or solder, and all

Gasoline Fire Pot, No. 71

other work where a high degree of heat is required. The important features that the makers point out are as follows: A specially constructed burner which causes perfect combustion of the fuel, and is noiseless, smokeless and odorless in its operation. The flames from the burner burn from both sides of the centre and there is a sub-flame so that the heating flames can be turned low, thus saving fuel expenses, which can be turned on instantly to produce the maximum heat. The tank is made of heavy gauge steel, tinned inside and out, making it rust proof, and it is fitted with patented cushion protection band which prevents injury to the base of the fire pot. The dust proof cap keeps the gasoline perfectly clean. A patented improved automatic pump supplies ample air pressure quickly. This fire pot is equally satisfactory for use in wind or storm, as the flames are protected with a hood with cover. Every part of the fire pot is made strong and durable to withstand hard service.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

HARDWARE markets this week have been fairly steady. The chief advances have been in some lines of pumps and woodenware. Among the declines are ingot metals, copper, tin and lead, says Hardware and Metal

Linseed oil shows a further decline due to fall in price of flaxseed in sympathy with other grain.

Business on the whole is fair though the bulk of it is stated to be on orders other than recent ones. Present buying is generally in smaller quantities.

Pittsburgh markets in pig iron and in unfinished iron and steel show a weakening with little buying.

A few lines show an improvement in deliveries but there are still many shortages.

Montreal Markets

MONTREAL, October 21.—Hardware prices have been holding fairly steady for the most part, the advances of the week being confined to some lines of cistern pumps and lamp chimneys, step ladders, wash boards, with an advance for horse shoes in prospect. Old material and ingot metals are weaker and some are marked down. Pipe and fittings and iron and steel bars are in short supply. Country orders are still well assorted and are received in good numbers.

Higher Prices Here on Lamp Chimneys

Montreal.

LAMP CHIMNEYS.—A very stiff advance has been made in the price of lamp chimneys which are now selling as follows: No. "A" $14.00 per case of 8 dozen; No. "C" $12.00 per case of 6 dozen; No. 2, $2.50 per dozen; No. 3, $3.75 per dozen and "Rayo" No. 2, $2.50 per dozen.

Iron and Steel Not Plentiful Yet

Montreal.

IRON AND STEEL. — Jobbers assert that, while they are able to obtain certain supplies of iron and steel bars, they are temporarily unable to get all the staple sizes they require. The mills have quite a task on their hands in overtaking orders in hand, there being an accumulation of orders from midsummer, when the strikes were on.

IRON AND STEEL

Common bar iron, 100 lbs.	5 15
Refinish iron	6 15
Iron finish machinery steel	5 25
Mild steel	5 30
Band steel	5 50
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	5 20
Tire steel	5 50
Toe calk steel	6 20
Harrow Tooth Steel	5 45
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE Refined Iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Rope Is Steady; No Price Changes

Montreal.

ROPE, CORDAGE.—Prices have held unchanged on all hard fibre rope. Pure manila is selling at 33 1-2 cents per pound; New Zealand and Beaver manila at 26 cents and sisal at 21 1-2 cents per pound. The condition of trade is not very active, but the sales are frequent and of small tonnage.

Prices Go Higher on Cistern Pumps

Montreal.

PUMPS.—Cistern and well pumps advanced recently and a number of these are selling as follows: Figure 1, less 10 per cent.; figure 2, less 10 per cent.; figure 5, less 10 per cent.; figure 45, plus 20 per cent.; figure 303, plus 5 per cent; cottage, No. 1,006, $7.75 each net; figure 1,005, $7.00 each.

Deferred Orders on Alarm Clocks

Montreal.

CLOCKS.—There has been a seasonably good demand for alarm clocks, but there has been difficulty in obtaining delivery. One jobber stated to Hardware and Metal this week that their orders are just one year behind and that they were not sure of obtaining delivery of stock ordered a year ago.

Horse Shoes May Go Up Slightly

Montreal.

HORSE SHOES.—In view of the higher railway rates, manufacturers of horse shoes, it is understood, will advance the price to take care of this increase. New list will doubtless be issued to the trade within the next few days.

Some Improvement; Ammunition Delivery

Montreal.

AMMUNITION.—Manufacturers of ammunition have had their own difficulties in securing necessary supplies of raw material. Jobbers have been very anxious to secure completion of their book orders, many of which, placed months ago, could only be filled gradually. It is understood that delivery is now better than it was and that jobbers are receiving supplies from the manufacturers which have been much desired for a long time.

Heater Trade Has Been Active One

Montreal.

PUMPS.—Cistern and well pumps adment of heaters to the trade has been very brisk this fall, so much so that some manufacturers have found themselves in receipt of more orders than they are able to fill. Those who ordered early will be able to get delivery of what they require, but in some cases it is feared there will be a shortage. This is due to difficulty in obtaining steel material for the bodies of heaters and also to a general shortage of other raw materials. Prices are steadily firm.

Wares Are Moving; Prices Maintained

Montreal.

WARES.—The movement of various wares continues active and stocks are packed quite severely in filling the de-

mands of retailers. The prices have remained unchanged but there is no indication at present of reductions being made.

Cut Nails Scarce; Wire Nails Active

Montreal.

NAILS.—The price of $6.90 per keg of cut nails is quoted here although one jobber states it is impossible to get any of the product. Wire nails are quoted at $6.40 per keg and are still very scarce.

Fittings Are Still in Limited Supply

Montreal.

FITTINGS.—There is a scarcity of some kinds and sizes of malleable fittings and also of cast goods. It would seem that it will be some weeks yet before the shortage is overtaken and while prices are steady and firm there has been no quotable change.

Bigger Demand Than Supply Iron Pipe

Montreal.

GALVANIZED IRON PIPE.—The demand for galvanized iron pipe is greater than that for black pipe and jobbers are having difficulty in securing what they require. The shortage is manifest particularly in sizes from 1-2-inch to 1 1-2-inches and there is little indication of earlier relief. The market is firm but unchanged. Outside sources have been endeavoring to buy from this market, but the local shortage does not permit of supplies going forward to any but nearby points.

Sales Maintained on Electric Goods

Montreal.

ELECTRICAL APPLIANCES.—There is a good demand for vacuum cleaners, coffee percolators and other electrical supplies so extensively used by the Canadian housewife. The market undertone is quite firm and it is not expected that prices will decline to any extent, if at all, in the immediate future. It is said that surplus stocks are very small and in some cases there is no surplus whatever.

Coal Oil and "Gas" Are Moving Freely

Montreal.

OILS, GASOLINE.—There is a good demand for coal oil which is still selling at 31 cents per gallon while motor grade gasoline is quoted at 43 1-2 cents. The undertone is unchanged.

FUEL OIL.—There is still quite a good demand for fuel oil and the price, while fluctuating from day to day, is now quoted at $0.18.20 per gallon. Supplies are said to be fair and demand is satisfactory.

Jobbers Trade Fair For Lead Products

Montreal.

LEAD PRODUCTS.—Prices are fairly well maintained on lead products, for while the ingot list is generally soft, the tendencies on pig lead have been somewhat better than on other ingots. Building activity, though restricted, has been such as to absorb a fair amount of stock. Solder prices are unchanged at the levels quoted last week.

Lead pipe, per 100 lbs.	....	17 00

Expected and Hoped Sheet Outlook Better

Montreal.

SHEETS AND PLATES.—Prices, while still nominal, some hope to be easier before many weeks have passed. For the time being there is no change, however, and the tendencies are that until there is improvement in the volume of sheets available, there can and will be no recession of price. Meanwhile certain gauges are scarce and premiums are obtained now and then for supplies wanted.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Quieter Than Ever Are Old Metals

Montreal.

OLD MATERIAL.—Prices have been easing off on the whole list, and there is really a duller market for all lines at the present moment than for many months. While rolling mills have again started operations, they have accumulated supplies during the recent strike period and are not minded to pay any price for the scrap above that which they decide, in their own minds, they want to pay. As a consequence there is little trading and the situation is not promising in any respect.

Common Stepladders Are Up Five Cents

Montreal.

STEP LADDERS.—An advance of five cents a foot is registered this week on step ladders. The present price on the common, per foot, is 40 cents.

Higher Prices on Various Wash Boards

Montreal.

WASH BOARDS. — Prices are increased on wash boards. The following quotations are made to the trade: Diamond King, glass, per dozen, $8.75; Imperial Globe, $6.50, Jubilee Perforated, $7.15, Pony, $3.00.

Ingot List Is Weak and Trading Limited

Montreal.

INGOT METALS.—The week has brought quite a number of changes. Strike trouble in Great Britain has been viewed ominously among sections of the trade, and while tin had a big slump there was a recovery by Wednesday of this week.

TIN.—The market has been fluctuating and lower levels have been promising to result. Quotations here this week are down to 50 cents per pound.

COPPER.—Electrolytic is easier at 21 3-4 cents and casting at 21 1-2 cents. The market undertone is weak and lower quotations are probable.

SPELTER.—This, too, is easier this week, the price being 9 3-4 cents per lb., with trading light.

ANTIMONY.—A price of 8 3-4 cents per pound is quoted. The metal is quiet.

ALUMINUM.—Little new, with prices ranging around 35 to 37 cents per lb.

LEAD.—This is the firmest item in the list and prices are held around 9 cents.

Toronto Markets

TORONTO, Oct. 21—A quieter tone is in evidence in local markets with fewer price changes than are usually recorded. An easier tendency is reported in some ingot metals and solder and lead and zinc products are slightly reduced. Iron and steel and goods manufactured from these metals continue to show firmness though, and the scarcity in many lines including pipe, galvanized sheets and Canada plate is not relieved at all. While the shortage continues to exist, little change in prices one way or the other is expected. Some cotton goods and black oils are lower in price. Fall and winter goods generally are in good demand but there is falling off noted in the demand for many basic lines with a continued tendency to buy from "hand to mouth."

Gasoline and Coal Oil Holding Steady

Toronto.

GASOLINE AND COAL OIL. — Both of these products are holding firm with prices unchanged. The demand continues large and prices of gasoline are 42 cents per gallon net, and coal oil 29 1-2 to 32 1-2 cents per gallon, according to grade.

Rope and Cordage Hold at Recent Decline

Toronto.

ROPE.—This is the 'off' season for rope and sales are smaller. Prices are holding firm at recent declines and quotations are the following:

Pure Manila, basis	0 33½
Beaver Manila, base	0 26
New Zealand hemp, base	0 26
Sisal, base	0 21½
Single lath varn	0 21½
Double Lath Yarn	0 22

Wire Nails Supplies Now a Little Easier

Toronto.

NAILS.—Supplies of wire nails are said to be coming round more plentifully than has been the case for a long while. Stocks in hand have been low and there is good sorting up orders from many merchants.

Prices continue very firm though unchanged.

The base price for wire nails is $6.40 and for cut nails $7.35 per keg.

No Change in Pipe; Conditions or Prices

Toronto.

PIPE.—There has been no change in black or galvanized pipe. The wrought and steel are still very scarce and deliveries continue to be very slow.

The demand has been large this season and with present stocks so depleted it does not appear that there will be any falling off of the demand for a considerable time.

No changes in prices are expected. Quotations are as follows:

Class B	0 30	0 40
Class C	0 20	0 30

Black Oils Are Down Two Cents Per Gallon

Toronto.

BLACK OIL.—There has been a decline in the price of black oil of two cents per gallon. This decline leaves it at price it was selling at the end of last month.

Present quotations are for summer oil, $0.31.60 and winter oil $0.32.10, less 15 per cent.

Demand For Iron and Steel Bars Slackening

Toronto.

IRON AND STEEL.—Jobbers report a lessened demand for iron and steel bars and angles. It is believed that buyers are holding off as they seem to be expecting a decline in prices. Opinion seems divided whether such a course is justified.

Prices at the present continue very firm and with the recent shortage of material not yet overcome there is believed to be little prospect of any great change in iron and steel prices.

Present quotations are as under:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25

Toe caulk iron	6 70
Sleigh shoe steel	6 00
Hoop steel	7 50

Plaster Paris at Higher Levels

Toronto.

PLASTER PARIS.—Freight rate advances and higher producing costs are said to be responsible for higher prices on this commodity and it is now being quoted from $6.50 to $7.00 per barrel.

Compression Goods and Valves Hold Firm

Toronto.

COMPRESSION GOODS AND VALVES.—No change in price of these goods is noted this week. The demand is reported fair with no particular shortage. Quotations on principal lines are:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%

Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%
Radiator valves, standard	23%

Weather Stripping in Good Demand

Toronto.

WEATHER STRIP.—There is a very good demand for weather strip and the

different makes of felt, wood and felt, metal and rubber are all having good sales with prices continuing unchanged.

Cotton Waste Prices Unchanged; Easier

Toronto.

COTTON WASTE. — No further changes are reported in prices of cotton waste, but with falling cotton markets there is apt to be an uncertainty for the future.

Present quotations are the following:

WASTE—WHITE

Above lines subject to trade discount for quantity.

Mop Cloths Lower by About Ten Per Cent.

Toronto.

MOP CLOTHS.—Cotton mop cloths for the self wringing mops are reduced about ten per cent. This decline is following the drop in the cotton market.

Easier Feeling in Lead and Zinc Products

Toronto.

LEAD AND ZINC PRODUCTS. — Some lines of solder are marked lower and an easier tone is reflected in lead and zinc products generally although there has been no alteration in the price of these.

The primary markets in lead continue to trend downward.

Quotations are the following:

Lead pipe, list, per lb.		0 17
Lead waste pipe, list, per lb.		0 18
Do., over 8 in., list, per lb.		0 19
Lead traps and bends		add 30%

Zinc sheets, per lb.		0 19

Leather Belting Demand Good; Price Unchanged

Toronto.

BELTING.—The demand for leather belting continues very good, with prices unchanged and firm.

No changes are looked for. Stocks are not very large and belting leather requires a long preparation. Labor and other costs are said to be increasing and it is pointed out that belting did not advance in price when shoe leather and harness leather did and therefore remained unaffected when hides declined.

Galvanized Sheets Still Very Short

Toronto.

BLACK AND GALVANIZED SHEETS.—The situation has not improved at all in galvanized sheets. The lighter sheets especially are very scarce and hard to procure. Prices are apt to vary under the circumstances and though quotations are nominally unchanged there is said to be very little changing hands at those prices.

The mills are reported to be in better shape to make deliveries, but up to the present promises have not been fulfilled.

Stocks of galvanized sheets are very low and it will take a considerable time to replenish stocks in the market, and quotations are not likely to be much changed until supplies become more plentiful is the opinion held by the jobbing trade. Prices are largely nominal.

BLACK SHEETS

¼-inch boiler plate	6 50
3-16 inch plate	7 00
14 gauge	$10 15
16 gauge	10 25
18-20 gauge	10 70

16	11 95	12 10	13 50
12 and 14	11 20	11 95	....

An extra is now charged on galvanized sheets. **10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.**

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Oakum Prices Unchanged; Demand Smaller

Toronto.

OAKUM.—The demand for this product is a little quiet. Prices are holding firm without any change. Plumber's oakum is quoted at $9.50.

Stove Pipes and Elbows Firm and Scarce

Toronto.

STOVE PIPES AND ELBOWS.—The continued scarcity of Canada plate is causing great difficulty to be felt in obtaining supplies of these and little hope is given of any great improvement this season. Prices remain very firm.

Electric Washing Machines Selling Well

Toronto.

ELECTRIC WASHERS.—Makers and jobbers of these machines report good business and sales of these lines have been very large this season.

There has been quite a large number of new makes placed on the market this year and the majority appear to be finding a good demand. Prices are expected to remain firm with present costs of material, lumber and wages at present high levels.

Corn Brooms Are Holding Firm

Toronto.

BROOMS.—There does not seem to be any reason to expect much change in the prices of corn brooms. The present price of the broom corn is holding firm in markets of the middle states and though there is a difference of about two hundred dollars a ton between the highest and the lowest quotations, the better qualities are no cheaper than last season and the lumber for handles and manufacturing costs are still high.

Woodenware Holding Very Firm

Toronto.

WOODENWARE. — The price of all goods of which wood forms the principal part show no signs of a decline. The costs of lumber have been on the up grade for a long while with no indications of going back to former levels.

Washing machines, churns, wash boards, clothes pins and all articles of woodenware continue to be very firm with recent increases in prices.

Tin and Enamel Wares Firm and in Demand

Toronto.

WARES.—Manufacturers of tin and enameled ware report a busy time with a good demand for all classes of wares. Owing to scarcity of sheets many lines have been short for some time and there is a considerable leeway to make up.

Galvanized ware has been short on the market. Prices of all wares are holding very firm.

English Cutlery Arriving But Stocks Small

Toronto.

CUTLERY.—There are shipments of English table and pocket cutlery arriving, including some stocks of rustless steel, but importations are not very large and are quickly sold out. Prices are ruling very firm and are higher than formerly.

Electric Heaters Have Ready Sale

Toronto.

ELECTRIC HEATERS.—The demand for electric heaters is continuing very good and the concave radiator type is proving a popular seller. Prices are 27 1-2 per cent. off list for Majestic make and 25 per cent. off list for the Glower and Heatray.

Scrap Materials; Prices Are Weaker

Toronto.

WASTE MATERIALS.—The market for scrap metals and old materials is a

little weaker. Machinery steel is a trifle higher, but most lines are inclined to be lower in prices. The quieter tone in general business is reflected in old materials, and prices on old rubber and on copper and brass are inclined to decline.

Quotations are as follows:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00

More Activity in Ingot Metal Market

Toronto.

INGOT METALS.—There is more activity reported in ingot metal markets this week than has been the case for some time. Tin has been erratic and lead and spelter are still declining.

TIN.—A fair amount of buying is reported in this metal, but it has been erratic in price with declines and recoveries. Present local quotations are from 48 to 50 cents.

LEAD.—Trading has been dull in ingot lead. This metal has been declining on outside markets and reached the lowest point since last December on United States markets. Present quotations here are round 9 cents per pound.

COPPER.—The market is reported stagnant with no strength at all. Consumers are of the opinion that lower prices yet will prevail and are holding off. Casting copper is quoted at 22 cents.

SPELTER.—This metal is still declining and present quotations are at 9 3-4 cents.

ANTIMONY.—Little demand is reported for this and prices are unchanged at 10 to 14 cents according to grade.

ALUMINUM.—There is said to be very little demand for this metal with trading dull. Quotations remain at 37 to 39 cents per pound.

London Markets

LONDON, Ont., Oct 21—Prices of hardware commodities are holding firm on most lines and the budget of changes this week is fairly light. Business here has been good, although the exceptionally warm weather is retarding the sale of many cold weather lines. Merchants are anticipating a very good trade this fall, and up to the present their expectations have been realized and the demand for hardware has been brisk. Collections are good.

Linseed Oil Down Another Eight Cents

London, Ont.

LINSEED OIL.—A further decline in the price of linseed oil has taken place and new quotations are 8 cents a gallon below those of last week. Present prices are the following:

	Raw	Boiled
1 to 2 barrels, gal.	$1 47	$1 50
3 to 5 barrels, gal.	1 46	1 49
6 to 9 barrels, gal.	1 44	1 47

Less barrels, add 15c gal.

Turpentine Lower; Near Two-dollar Mark

London, Ont.

TURPENTINE.—The price quoted on turpentine here last week was $2.20 per imperial gallon. A decline of 15 cents per gallon has taken place this week and present quotations are at $2.05 for single barrels.

	Imp. gal.
1 barrel lots	2 05
2 to 4 barrel lots	2 04
5 gal. lots	2 20

Nail Supplies Are Freer; Continued Good Sales

London, Ont.

NAILS.—There is a continued good demand for nails, and supplies of wire nails are coming a little more freely than has been the case for some time past. The price of both wire and cut nails remains unchanged. Wire nails, $6.25 base; cut nails, $7.50 base.

Putty Prices Firm; Demand Is Good

London, Ont.

PUTTY.—The sale of putty at the present time is very good and prices are holding firm. Latest quotations are as follows:

Putty—Standard—100-lb. drums, $8.55 per 100 lbs.; 25-lb. drums, $8.80. Pure 100-lb. drums, $11.05; 25-lb. drums, $11.30.

White Lead in Oil; Sales Lighter; Unchanged

London, Ont.

WHITE LEAD IN OIL.—The demand for white lead in oil has fallen off a little and sales at present are lighter. Prices are ruling firm and unchanged. Quotations are as below.

	Tons	Less Tons
Pure, per 100 lbs.	$20 45	$20 80
Elephant, per 100 lbs.	20 95	21 30

New Higher Prices on Lamp Chimneys

London, Ont.

LAMP CHIMNEYS. — New higher prices are in effect on lamp chimneys. The advance approximates from 20 to 25 per cent., and is due to higher costs of raw materials, labor, etc. The following are the new prices:

No. O, 6 doz to case, $11 case; No. A, 8 doz. to case, $14.50 case; No. B, 6 doz. to case, $12 case.

Cattle Chains Now Sell at List Plus 40%

London, Ont.

CATTLE CHAINS AND STALL FIXTURES.—An increase has been made in the price of cattle chains, and they are now quoted at list plus 40 per cent. Hollow stall fixtures are now selling at $2.50 per dozen net.

Advance on Flexible Steel Door Mats

London, Ont.

FLEXIBLE STEEL DOOR MATS.—A new higher price is effective on steel door mats. New quotations are: No. 1, 16 in. by 24 in., $1.60 each; No. 2, 18 in. by 30 in., $2.25 each.

Fetlock, Toilet Clippers Now Quoted Higher

London, Ont.

FETLOCK AND TOILET CLIPPERS.—An advance has been made in the price of Chicago fetlock and also of toilet clippers, and new prices are as under: Fetlock, No. A 2, $1.90 each; toilet, No. A1, $1.90 each.

Ash Sifters Selling Well; Present Quotations

London, Ont.

ASH SIFTERS.—The demand keeps up for ash sifters and sales are brisk. Prices of the better known lines are the following:

Common wood sides, $3.75 doz.; Banner rocker, $3.65 each; No. 1 rocker, $6.25 each.

Good Demand For Weather Stripping

London, Ont.

WEATHER STRIP.—There is a very good demand right now for weather strip, and the following are present prices on these lines.

Storm King-Felt, $5.75 per doz. packages.
Wood and Felt—No. 60, 5c ft.; No. 61, 5c; No. 61½, 7c; No. 62, 8c; No. 64, 10c. Less 55-5%.

Silver Flatware Moving Well; Prices Hold Firm

London, Ont.

SILVERWARE.—The demand at present for 1847 Rogers and for Community silver flatware is very good and prices remain firm without any sign of decline. Last season saw a decided shortage in many of these lines.

Bucksaws in Good Demand at Present Quotations

London, Ont.

BUCKSAWS. — These articles are meeting with a very good sale at the

present time and latest prices are as below.

Happy Medium, $11.50 doz.; Whiting Pride, $12; Arrow Head (lance tooth), $15.30; Prince Rupert (lance tooth), $15.30; Disston (lance tooth), $15.30.

Furnace Scoops Are Moving Out Well

London, Ont.

FURNACE SCOOPS. — The demand for furnace scoops is very large and the light pattern is selling for $10 per dozen, and the heavy for $12.50 per dozen. D and long handles at the same prices.

Electric Heaters Are Having Good Sales

London, Ont.

ELECTRIC HEATERS. — This has been a very good season for electric heaters and they are meeting with a ready sale at the present time. Prices remain steady. Majestic No. 7, $11.50 each; Majestic No. 8, $17.50 each. List less 27½ per cent.

Roofing Supplies More Plentiful; Prices Firm

London, Ont.

ROOFING. — The supplies of ready roofing and tarred and dry sheetings are now coming round more freely. The prices are holding firm and sales are very good.

Quotations are the following:

Tecumseh, 1 ply, $2.65 sq.; 2 ply, $3.05 sq.; 3 ply, $3.55 sq. Sterling—1 ply, $3 sq.; 2 ply, $3.50 sq.; 3 ply, $4 sq. Plain Fibre, D2, $1.50 roll; Tarred Fibre, E2, $1.70 roll; Tarred Felt, $6.05 per 100 lbs.; Carpet Felt, $9 per 100 lbs.

Pyrex Ovenware in Good Demand

London, Ont.

PYREX OVENWARE. — This make of glass ovenware is having good sale at present, and the Canadian list is the selling price, less 30 per cent.

Electric Appliances Have a Ready Sale

London, Ont.

ELECTRIC APPLIANCES. — This season has seen a big demand for electric appliances and toasters, irons, grills, percolators, etc., are moving very well.

The "Canadian Beauty" make is quoted at list, less 27 per cent. and the "Superior" make at list less 25 per cent.

Alarm Clocks in Demand; Some Makes Scarce

London, Ont.

ALARM CLOCKS. — The demand is very good for alarm clocks and some makes have been particularly scarce for some time. Prices on some of the better known lines are as follows:

Big Ben, $4 each; Lookout, $2.35; Sleepmeter, $2.50; Jump, $2.50; Twilite, $5; Winlite, $6; Moonlite, $6.

English Cutlery Arriving in Small Quantities

London, Ont.

ENGLISH CUTLERY. — Shipments of English cutlery—pocket knives, razors and carvers, are arriving from time to time but not in very large quantities, and prices continue very firm. The demand for same is good and stocks are readily absorbed.

Game Traps Are Having Good Demand

London, Ont.

GAME TRAPS. — The demand for game traps is opening up extremely well and there are good sales for almost all sizes. Prices continue very firm and quotations on Oneida traps are as follows:

Victor—No. 0, $2.20 doz.; No. 1, $2.65 doz.; No. 1½, $4 doz.; No. 2, $5.50 doz.; No. 3, $9.35 doz.; No. 4, $11.25 doz.

Oneida Jump—No. 0, $3 doz.; No. 1, $3.50 doz.; No. 1½, $5.25 doz.; No. 2, $8.40 doz.

Newhouse—No. 1, $7.50 doz.; No. 1½, $11.35 doz.; No. 2, $16.75 doz.; No. 3, $22.35 doz.; No. 4, $26.35 doz.

Winnipeg Markets

WINNIPEG, Oct. 21—Many prices have been revised this week on hardware commodities and with the exception of rope and various cotton goods handled by the trade, the changes are higher. Pure manila and sisal rope are marked lower, also cotton rope, twine and clothes lines, due to declines in the cotton markets. Some metals, including lead, are easing up and declines in some of these are expected soon. Some lines of builders' hardware have been advanced in price and higher prices prevail on braziers' copper and some lines of valves, steam cocks, injectors, oilers, grease cups, lubricators, etc. There has been an increase in the prices of some cutlery lines and sporting goods. Business continues good in the Western provinces and a great deal of spring booking is now being received.

Braziers' Sheet Copper Advanced About 8%

Winnipeg.

SHEET COPPER.—The price on braziers' sheet copper has been raised this week about 8 per cent. and is due to higher costs of raw material and higher freight rates. Following are the quotations:

Braziers' Copper—28 gauge, 52c lb.; 26 ga., 48c; 24 ga., 47c; 22 ga., 47c; 20 ga., 47c; 18 ga., 47c; 16 ga., 47c; 14 ga., 47c; 12 ga., 47c; 10 ga., 47c.

Stencil Copper—30 gauge, 57c lb.; 28 ga., 51c; 26 ga., 50c; 24 ga., 48c.

Manila and Sisal Rope Quoted Lower

Winnipeg.

ROPE.—A reduction has been made in the price of pure manila and sisal rope due to lower costs of raw material. The following are the prevailing prices:

Sisal—¼ and 5-16 in., 26¼c per lb.; ⅜ in., 25¾c; 7-16, ½ and 9-16 in., 25¼c; ⅝ in., 24¾c; ¾ in. and larger, 24¼c.

British Manila or African Hemp—¼ and 5-16 in., 30¾c lb.; ⅜ in., 30¼c; 7-16, ½ and 9-16 in., 29¾c; ⅝ in., 29¼c; ¾ in. and larger, 28¾c.

Pure Manila—¼ and 5-16 in., 38¾c lb.; ⅜ in., 38¼c; 7-16 and ½ in., 37¾c; ⅝ in., 37¼c; ¾ in. and larger, 36¾c.

Sisal Lariat—3 x 7-16 in., 29¼c lb.; 4 x 7-16 in., 30¼c.

Manila Lariat—3 x 7-16 in., 41¾c lb.; 4 x 7-16 in., 42¾c.

Lath yarn, 22¼c.

Carriage Makers' Clamps Are Up in Price

Winnipeg.

CLAMPS.—The price has been revised on carriage makers' clamps and new quotations are as follows: No. 104, per dozen, $14.75; No. 105, per dozen, $18.60; No. 106, per dozen, $24; No. 108, per dozen, $36.

Machine and Dowel Bits Are Priced Higher

Winnipeg.

BITS.—The discount on Irwin machine bits and Irwin dowell bits has been advanced and machine bits are now quoted at 25 per cent. advance and dowell bits 35 per cent. advance on list prices.

Advanced Prices For Moulders' Bellows

Winnipeg.

BELLOWS.—The price has been raised on molders' bellows and 12-inch is now selling at $2.50 each and 14-inch at $3.10.

Screw and Awning Pulleys at Higher Prices

Winnipeg.

PULLEYS. — Advanced prices have been recorded this week on all lines of screw pulleys, awning pulleys, hot house pulleys and clothes line pulleys. Following are the present prices:

Screw Pulleys, No. 45—1 in., 78c; 1¼ in., 85c; 1½ in., $1.03; 1¾ in., $1.20; 2 in., $1.55; 2¼ in., $1.95; 2½ in., $2.10; 3 in., $3.25.

No. 44—1½ in., $1.95; 2 in., $2.27.

Hot House Pulleys—No. 85, $3.80; No. 87, $6.

Awning Pulleys, Galvanized, No. 174—¾ in., $1.30; 1 in., $1.63; 1¼ in., $2.10; 1½ in., $3; 1¾ in., $4.23; 2 in., $6.48.

No. 173—1 in., $2.27; 1¼ in., $3; 1½ in., $4.23; 2 in., $8.43.

No. 176—¾ in., $2.13; 1 in., $2.50; 1¼ in., $2.93; 1½ in., $4.80; 1¾ in., $7.95; 2 in., $9.57.

Awning Pulleys, Japanned, No. 74—¾ in., 95c; 1 in., $1.08; 1¼ in., $1.30; 1½ in., $1.63; 1¾ in., $2.27; 2 in., $3.25.

No. 76—¾ in., $1.40; 1 in., $1.63; 1¼ in., $1.95; 1½ in., $2.75; 1¾ in., $3.90.

No. 75—2 in., $3.08; 2½ in., $4.37; 3 in., $6.

No. 77—2 in., $4.87; 2½ in., $6.48; 3 in., $8.75.

Advanced Prices on Clothes Line Pulleys

Winnipeg.

CLOTHES LINE PULLEYS. — New higher prices are out on clothes line pul-

leys and upright pulleys, and following are new quotations:

Clothes Line Pulleys—165 x 2½, $3.20; 3, $4.83.
Upright Pulleys—55 x 2, $1.87; 2½, $2.68. 25 x 1½, $1.43; 1¾, $1.87; 2, $2.12; 2½, $3.25; 3, $4.87.
Wagon Brake Pulleys—79 x 2½, $9.50.

Small Staples Are Costing More

Winnipeg.

STAPLES.—The price has been advanced on blind, electric and bed staples, due to higher costs of raw material and these goods are quoted as follows:

Blind Staples—½ in., 28½c per lb.; ⅝ in., 27½c; ¾ in., 26½c.
Electric Staples—½ in., 27c per lb.; ⅝ in., 22½c; ¾ in., 22c; 1 in., 21c.
Bed Staples—¾ in., 22c per lb.; ⅞ in., 21c; 1 in., 21c.

New Higher Prices For Turnbuckles

Winnipeg.

TURNBUCKLES.—These goods have been advanced in price and present quotations are the following:

Turn Buckles—½ in., 75c; ⅝ in., 85c; ¾ in., $1.10; ⅞ in., $1.30; 1 in., $1.50; 1⅛ in., $2.35; 1¼ in., $2.80; 1½ in., $3.45.

New Higher Prices For O-Cedar Polish

Winnipeg.

O-CEDAR POLISH. — New higher prices are recorded on O-Cedar Polish and are as follows:

4 oz., $2.40; 12 oz., $4.80; Quarts, $12; ½ gals., $20; Gals., $28.

Pittsburgh Markets

PITTSBURGH, Oct. 21.—The iron and steel markets continue stagnant.

Strip steel shows particular weakening; cold finished steel bars and sheets are easier. Structural steel is lower and plates have declined and pig iron is slumping.

The attitude of buyers is indifference. Consumption has decreased but little, but deliveries are being made on previous purchases and demand is so light that real selling prices are not readily available.

Expectations are that prices will continue weakening until the independents' prices are down to the Steel Corporation's level, and whether they will hold together is considered doubtful.

PITTSBURGH, October 21.—The iron and steel markets continue stagnant, as is naturally to be expected. When dull times have prevailed for some time there is necessarily some business being done, but in the early part of a generally dull period there is particularly little business because buyers are getting deliveries on previous purchases. Conditions to-day show that buyers have done what they usually do in an active period when material appears scarce, they have overbought. It looks as though consumption had greatly decreased, because the same buyers who a couple of months and more ago were importuning producers for heavier shipments are now acting as if they were receiving too much material. Consumption, however, has decreased very little. The main change is a change in the mental attitude of buyers. Such changes frequently occur almost overnight.

Pig Iron Slumping

Whatever may have been true of the advances in pig iron prior to the sharp advancing movement of last August, there was no difficulty in seeing last August that the advances made in that month were ill-timed. The volume of buying was very small, much less than is usually required to send prices upwards, and it looked very much as if the advances were based upon little more than a whim of the furnacemen to get pig iron up to the interesting objective of $50. The course of affairs now in the pig iron market reflects the artificial character of the latest of the advances, for pig iron instead of declining is slumping. A difficulty is that inquiry is so light that sometimes the prices at which producers would really be willing to sell are not disclosed. Thus Bessemer iron is still quotable nominally at $48.50, valley, the price to which it advanced in August, although it is certain that furnaces would sell at less. It requires a precise quotation, or an actual sale, to develop the price at which furnaces really would sell.

In the case of basic iron there are clear cut developments. Basic had also advanced in August to $48.50, valley, and during September the market remained, nominally at least, at that figure. Since the beginning of this month it has been clear that some furnaces would be glad to sell at less. A couple of weeks ago a middle interest was understood to have bought 3,000 tons at $45, valley, then selling 1,000 tons to a consumer at $46. Since then there has been further weakening. It is thoroughly established that several sellers have quoted $42, valley, without effecting sales. In the case of one consumer at least, the reason they did not sell was that the consumer got the iron he needed, 1,500 tons, from a middleman at $40, valley, and the middleman had offered 3,500 tons, so that it looks as though there is 2,000 tons ready for some one to buy at $40. According to common practice in quoting the pig iron market, transactions in which a middle interest figures are not regarded as setting market prices, hence the quotable market to-day on basic iron is $42, valley, a price at which iron has been offered, with no takers, representing a decline of $6.50. It was early last February, on the advancing market, that basic got up to $42, and thus the market has declined as much in about three weeks as it had advanced in six or seven months. Usually the market declines at about the same rate as that at which it had previously advanced, and the more rapid decline this time confirms views entertained previously by many in the trade that the advance was partly artificial, and not well based.

As to foundry iron, it is in the same class, marketwise, as Bessemer, not enough business having been done to show where values really stand. The trade calls the foundry iron market nominal at $47, valley, or $3 under the price attained in the August advance. Doubtless on an attractive inquiry furnaces would quote considerably less than $47.

Attitude of Steel Producers

In past times when the steel market became quiet the mills would hold together in the matter of prices, keeping up their quotations until they had delivered most of their contract tonnage. There was no advantage in reducing prices to effect a few fresh sales if thereby cancellation of existing contracts would be invited. At those times, however, the independents and the Steel Corporation were together. Now the independents have to play their game alone, and it is a question whether they will hold together. Some steel makers profess confidence that they will do so, and that production will be allowed to decline and decline again before mills reduce their quotations to the Steel Corporation level, which common opinion has it is the ultimate objective. Not a few observers expect prices to continue to weaken as they have been doing in the past few weeks, and if they continue the pace set thus far it will be only a few weeks, or two or three months at most, until the independents with few exceptions are down to the Steel Corporation level. Some observers even profess doubt whether, even if the independents adhered to their present quotations, the demands on their contracts would be sufficient to enable them to keep above a 60 per cent. rate of operation in the winter.

Steel Prices

There has been particular weakening in strip steel. While the automobile industry does not consume any large part of the steel output as a whole, say 4 or 5 per cent., averaging the year as a whole, they do use a great deal of strip steel and thus their light operation at this time is reflected in the strip market. Last August, when independent prices were well established at 5.50c for hot rolled and 8.50c for cold rolled, there were predictions that the market would go up half a cent, but instead of doing so it has been declining, and it is probable that one could buy now at about 5c

for hot rolled and 8c for cold rolled. Cold finished steel bars are easier, there being little difficulty in buying at 4.25c, while a few weeks ago sales at 4.25c were rare. In plates 3.25c is now the top of the market instead of the bottom, single carloads being available at that figure, while attractive inquiries bring out quotations down to 3.10c, and 3c has been done in at least one case. In structural shapes there is conflicting testimony. The independent price had been 3.10c, against the Steel Corporation's 2.45c. Some interests claim 3.10c is being adhered to, while others report transactions at 3c and under, down possibly to 2.70c.

The sheet market is easier. Independent quotations generally are 6.75c to 7.25c on common black, but it is said that one mill has sold at 6.50c. It is known positively that a mill "married" contracts by selling to a customer at 6.50c when the customer wanted to cancel a contract placed some time ago at 7.50c. Galvanized run from 8.25c to 9.75c and blue annealed from 5c to 5.25c.

BIG BUSINESS REVIVAL

(Continued from page 36)

trical goods there will be a continued good demand. At the present time there is little surplus of stock.

Effect of High Sterling Exchange

Mr. John Irwin, vice-president and managing director of the McArthur Irwin, Limited, said: "The English strike is a big factor owing to the effect that it has on sterling exchange. I don't see any reason for a decline of prices in the immediate future, however. We based deductions on our sales and these have kept up very satisfactorily and have shown considerable increases. Some lines are slack but we are very busy in the paint section of our business, and conditions are particularly active. Export lead business has been good as well as local trade. The only reason why there is talk of any let-up in paint prices is because of the lead market in the United States. At the same time there is a shortage there at the present time of 52,000 tons and lead is being brought in from England. This can be imported, due to the exchange situation, and laid down in the States for less money than the home product. If exchange to-day were around, say $4.20, there would be a far different situation on lead than that which exists under present exchange rates."

Mr. Irwin feels that perhaps the most serious condition at the present time is that of the English coal strike, which, if settled soon, will remove one of the most unsettling situations that has arisen thus far.

Volume of Trade Is Satisfactory

Mr. George C. Davis, manager Frotheringham & Workman, Ltd., feels that the outlook is satisfactory, and states that business at the present time is very satisfactory. Orders are coming to hand in reasonably large numbers, and the volume of trade at the present time is pleasing. Collections are also good and there is no complaint on this score.

With regard to the tendency of the market, Mr. Davis is of the opinion that there is little to indicate a decline in prices on the average hardware commodity in the immediate future. The fact that steel products, so extensively making up the average stock, are still short of the demand from the trade, indicates that price tendencies will not ease very much until the shortages are overtaken.

Hard to Forecast Trend of Ammunition Prices

"There has been a shortage of material for some time and this has hampered the manufacturer of ammunition," said E. H. Johonnot, director of sales Dominion Cartridge Company. "These supplies must be produced a long while ahead of the time when they are required by the trade. Some materials have arrived for the manufacture of supplies that will be required in the distant future, while other raw materials needed for the completion of the manufactured product are still scarce and hard to obtain. The difficulty of getting supplies has affected deliveries of the manufactured product, and for some time past jobbers have been anxious to know when they could get goods delivered on their orders.

"Jobbers bought extensively some months ago and are sold out as a general thing. Retailers' stocks are understood to be fair, but the present outgo of ammunition to the trade is a healthy one and every good day means that thousands of rounds of ammunition are being used up. If the good weather should continue for a while it will mean a reduction to normal or even to a small compass, of the stocks in retailers' hands. The biggest question at the present time is that of delivery of material, and this will possibly continue for some time to come."

With regard to the future of prices, Mr. Johonnot stated that this is not a matter which has given them much concern up to the present time. The jobber is naturally anxious to know what the basis will be for next year, but there has been so much difficulty in getting delivery of supplies that it is absolutely impossible, as yet, to forecast the trend of prices. At the same time, the difficulty of obtaining material and the fact that this must be bought six months or more in advance of actual sale, means that it is more than difficult to forecast the future. As far as Mr. Johonnot's firm is concerned, they hope to be able to improve deliveries when they have further consolidated new plants which they have acquired for the manufacture of some of their raw and manufactured materials entering into completed shells and cartridges.

STORE ADVERTISING

(Continued from page 37)

have left the space empty and lost a splendid opportunity of taking advantage of a habit of the public.

Horse Blankets in Circus Parade

Another store made good advertising out of the visit of a large wild animal show. The circus had advertised a big parade through the streets, so this firm got in touch with the manager and supplied a blanket for each of the elephants. On each side of this blanket was an advertisement of the lines handled and these were read by the thousands of people who lined the streets to see the parade.

Seasonable Lines on Display

Emerson & Fisher, Ltd., always have their windows trimmed according to the weather. On hot days the passersby will see refrigerators, ice cream freezers, hammocks and camping outfits displayed. As the nights become chilly there is always a good display of oil heaters, and as the fall and winter approaches the self-feeders and stoves appear. At the time of writing this firm have a splendid display of mantels and fire-side furnishing on show. The appearance of their window makes the customer think of the pleasant evenings spent alongside a cosy fire. Coal boxes, fenders, andirons, spark guards and companion sets are so displayed that a desire to purchase is created. The newspaper advertising of the firm is always in keeping with the window displays.

LIVELY WASHING MACHINES

(Continued from page 39)

tub. Another point that was apparent from the very first was that women of all classes are interested in this problem—the farmer's wife, the city woman, the woman who has plenty of money and the woman who only has moderate means.

Several Direct Sales

Just how many sales will result from the three day demonstration is impossible to state. Several direct sales were made. A long list of really interested prospects was obtained to be followed up closely and the firm got some splendid advertising. Not only this but many of the women who came in to see the washing machines got interested in the numerous displays about the store and purchased aluminum ware and other merchandise.

Warns Hamilton Consumers Not to Use Gas for Heating

Hamilton. — Owing to natural gas shortage, the National Gas & Fuel Company has cut off supplies to manufacturers, and has issued a warning that natural gas must not be used for heating. If the warning is not heeded those places using gas for heating will be cut off without further warning.

Secret of Henry Ford's Outstanding Success

It is Based on Salesmanship Rather Than on Manufacturing—Important Lessons for Canadian Manufacturers—A Great Merchant as Well as a Great Producer.

THE editor of the New York Sun shatters accepted theories and thereby shocks his readers by a habit he has of doing his own thinking, of leading not following the public, and making his own analysis of conditions. When the press and public of the United States were enthusiastically and thoughtlessly happy over the enormous business coming to them for steel and other material for a war-devastated world, that paper burst the bubble by showing that there was more steel in an ordinary New York skyscraper than would rebuild the whole damaged area in Belgium and France.

If we were to ask the why of Henry Ford's super-success there would be a hundred per cent. reply that it was entirely due to his ability as a manufacturer.

The Sun editor, applying the analytical test, finds that the great, unthinking public is again wrong. Instead he shows that Mr. Ford is primarily a great salesman or merchant, that he was forced to develop his wonderfully efficient factory to supply the demand made by himself as a merchant. The "Sun" says:

Henry Ford Points the Way

Henry Ford is both a great manufacturer and a great merchant. He could never have become the great producer he is if he had not been a great merchant. It is because Ford is the outstanding genius of the automobile world as a merchant that he has become the outstanding genius of the automobile world as a producer.

The Ford automobile is primarily what it has come to be because Ford had greater genius than any of his competitors in the distribution of his car. With the price right and his selling organization right the production of his car became a matter of ways and means of keeping up with the demand. And as the output increased the cost of production decreased, and as this decrease in cost was deducted by the great merchant from the selling price the demand automatically increased.

In his early days Henry Ford was a mechanic at the bench. It was as a mechanic that he dreamed out the now world-famous Ford car. He had never been a merchant, had never fancied that he was endowed with the qualities of a merchant, though is was as a merchant that he was and is nothing sort of a genius of the first order.

And now he has given us fresh evidence of his vision as a matchless distributor of the products of his mammoth workshops in the drastic slashing of prices to pre-war levels. In this stroke Henry Ford has pointed the way for all other producers, all other merchants. The country is headed for lower prices, pre-war prices or prices thereabout.

No man, no body of men, no association of interests working in collusion or corporation, however gigantic, can hold up these unnatural and exorbitant war prices. What Henry Ford has done in his far-reaching vision other men must do or they cannot survive.

A review of the successes and failures in Canadian manufacturing confirms The Sun. Walter H. Cottingham, probably our outstanding present-day success, developed and acquired the largest paint and allied factories in the world to fill the demands created by him as a merchant.

Senator Nichols was induced to take over and direct the destinies of the General Electric Co. and allied interests because as a merchant he had created his own market for electrical products in Canada.

Sir George Foster, our Minister of Trade and a member of the Imperial Trade Commission, expressed this view in 1914. He said the commission had found in Australia that German trade was growing steadily because the Germans were better merchants. Their superior salesmanship was overcoming the handicap of the superior quality of British goods and the strong national sentiment that extends throughout the Empire in favor of the British manufacturers.

Canadian manufacturers are in a less fortunate position than they of the Mother Country. The latter have well organized plants, trained workmen and established connections. The majority of men at the head of Canadian industries have worked up from apprentice boys. They have had to build new organizations and train workers. It has been a mighty strenuous career. Neither the thousands of employees nor the country as a whole appreciate what we owe these pioneering executives. But their thoughts have been on production and they love their factories and their employees. They have neglected their accounting and merchandising departments. The Sun's editorial suggests a new thought to many, and a very timely one. We must give more attention to selling our products at home and abroad. In this way only can most of us hope to keep our workers and plants running full time.

But salesmanship means more than taking orders. The buyer must be able to pay. The products must be what he wants, and what he orders; and our service must be prompt, reliable and satisfactory in every way. That it has not been is shown by the persistent complaints of our late Overseas Commissioner, Lloyd Harris, and many of our local Trade Commissioners. But it can be made satisfactory.

Builders' Hardware Will Be a Big Seller

"THE outlook for builders' hardware is decidedly bright. Present trade is good but the prospects are even better, and while people are now hurrying to complete work on buildings before the winter, the spring demands will be much heavier, I believe."

This statement of Harry M. Patterson, president of the Stratford Brass Co., Stratford, Ont., to Hardware and Metal, indicates that there are improved demands in sight for these products and that the hardware dealer may hope to cater to an increasing trade for these lines in the very near future. In view of the fact that builders' hardware departments have suffered a slackness in recent years, due to the war and building stagnation, the outlook will be much more encouraging to the dealer.

Mr. Patterson is of the opinion that Canadians have everything to hope for and reasonably anticipate in the way of continued good business. "When we remember that many people will be coming to Canada from abroad, this means that they must have some place to live in. It will mean that some of them will take houses that we now occupy and we will want to go a step higher and live in a little better house than we had before. That means that the new houses will be built, and they are needed everywhere. I was waiting for a train at Montreal a day or two ago and the depot was packed with new arrivals from other countries. These people are coming here with a definite purpose—to work, and in this respect they may teach many Canadians a good example, for it is production we need."

The Tenor of Labor

Mr. Patterson states that while labor is more plentiful than before, it is nevertheless expecting wages to be maintained. And, for a long time at least he believes there will be no reduction of consequence. As he stated, the mechanic will doubtless get down to a better production basis. This will make up for any offsetting conditions and entitle the workman or the mechanic to a higher wage than he used to receive. The manufacturer is willing to recognize the wage-earners' rights in this respect; is recognizing them. And, whereas the employee of a few months ago was unreasonable, requiring his employer to treat him with extreme nicety, the former is now in a more normal frame of mind; a happy medium is gradually being established.

Referring to the laying off of many workmen by some of the big manufac-

(Continued on page 62.)

Present Market Outlook Gives No Reason for Curtailed Paint Sales: Confidence is Required

High Cost of Paint Has Not Altered Its Relative Value—Customer Who Holds Back for Lower Prices Will Meanwhile Lose Money in Property Depreciation and Likely Be Disappointed Finally—Many Economically Sound Arguments Which Can Form the Basis of Paint Selling—More Business from Existing Possibilities.

WHAT is perhaps one of the most important factors in connection with the successful operation of the paint department is the concentration of attention and effort and a thorough understanding of the goods being sold. One of the first things is for the dealer to stock a line of paint which he feels sure he can conscientiously recommend to all customers. This means having faith in the line, and this faith will engender initiative and enterprise and bring good business and profits to this department. Looking at it from the other side it is quite evident that should a merchant lose faith in the service and efficacy of paint, that it is then time for him to quit selling it.

The progressive paint dealer realizes that paint is an economic necessity. If his sense of value is in the right perspective he realizes that the relative value between paint and the materials it protects have changed a great deal.

As a means of protection and preservation, paint has in recent years assumed a much increased value to the consumer than its actual increase in costs. Looking over the market for structural materials, labor and other lines and comparing prices with those existing five or six years ago it is plainly evident that the protective and preservative value of a gallon of paint, figured on the basis of the number of square feet of surface to be covered by it, makes it well worth present costs as compared with the value to-day of the materials it covers. These several materials have risen simultaneously in price and therefore present day cost of painting is no more of an argument than at any time in the past.

What of Service Value of Paint?

An investigation of the reasons underlying the rise in costs will establish whether the service of paint has increased or lessened. From a protective standpoint the service of good paint has increased. Considering present day costs of building, paint is more needed than in the past and costs less from the fact that each square foot it preserves costs more.

The merchant does the customer just as much service when he sells a can of paint at to-day's prices as when he was enabled to sell at much lower prices in the past. It is therefore a question of establishing in his own mind the fact that the relative value is to-day just as great and then convincing the customer of this fact. Under present conditions paint provides just as much of a sanitary safeguard as before; it provides just as efficient an insurance policy against weather and decay as before and its decorative results have just as much assistance in improving the appearance and value of properties to-day as in the past.

While many dealers realize the truth of these points yet many paint salesmen in the retail stores are not definitely convinced and herein lies their lack of faith which is bound to reflect in a lack of enthusiasm on the part of customers. Overcoming the arguments which customers will bring up, based on these points, proves the ability of the salesman and proves the extent of his faith in painting at the present time.

Should Be no Slackening of Buying

Under present circumstances when there is a reported slackening of buying in some retail trades, due to the feeling that lower prices are coming quickly on many commodities, it is more than ever necessary for the merchant to keep himself informed on the subject and to keep faith in his paint department. It is the opinion of a number of authorities that the costs of building materials will show very little reduction for some time to come. The value of paint as a preservative therefore is likely to be maintained until this condition changes. It is also the opinion of these authorities that the readjustment to lower price levels will in most cases be gradual. It is therefore in the interests of the retail merchant for him to endeavor to maintain stability in the market by advising customers that drastic reductions are not to be expected, in the hardware trade at least. In the meantime the ill effects of a lack of paint will be increasing. The winter is approaching, the season when the elements will do their utmost damage to building properties unless they are well protected. It is therefore a good time to commence to convince vacillating customers that their properties will depreciate a great deal from the lack of paint during the period they may wait for lower prices and then the chances are they may be disappointed as far as lower prices are concerned.

High Cost of Doing Without Paint

It is more the high cost of doing without paint that puts the crimp in your customer's

MOORE'S LINE

"Save the surface and you save all" *Paint & Varnish*

Moore's Wagon and Implement Paint

is specially prepared for Wagons, Carts, Ploughs, Mowing Machines and other agricultural implements.

It gives satisfactory service to the consumer and new business to the dealer.

"Save the surface and you save all" *Paint & Varnish*

Moore's Automobile Finish

Easy to apply. Self-levelling and dries over night.

A durable, lustrous finish that renews the appearance of automobiles and makes them look like new.

It dries with a dependable lustre. It "grips the metal" and leaves a strong, elastic finish that does not chip or crack—a powerful selling point with the motorist.

If interested tear out this page and place with letters to be answered.

pocket book than the high costs of the materials. The merchant who has the unshakeable belief that he has a commercial mission in benefiting the physical, material and aesthetic welfare of his customers, will have no difficulty in convincing his customers that delaying of paint, with the expectation of lower costs will cost more money in the end.

If you are selling a brand of paint in which you have not the most implicit faith, or if you are selling a number of brands of paint and know very little about any particular one brand, it is unfair to yourself and to the manufacturers to continue this policy. Increased paint sales are wanted to-day to keep paint business active. More business is wanted from existing possibilities rather than from possibilities that may develop in the future and which are more or less uncertain. To achieve this end it is necessary for the dealer to be equipped with the best weapons. Far better it would be to overcome such a situation by changing to a brand of paint in which you can have faith and about which you can learn everything there is to be learned, or in the other case to clean up the paint department of the odds and ends and put in one standard quality brand of paint on which all energies can be concentrated.

Covering Various Classes of Trade

Glancing over the various kinds of paint trade which come to the retail store it is evident that no serious difficulty should be encountered in convincing all or any that paint is an economical necessity and has just as high a relative value to-day as at any time in the past. The manufacturer has had experience with increasing costs and can readily be convinced if the proper data are put before him. It can easily be shown to farmers that the same amount of wheat that bought a gallon of paint five or six years ago will buy more paint to-day than then. Butter and eggs, bacon and other farm products look smaller beside a gallon of paint than they did some years ago.

Laborers and mechanics do not have to work as long to-day to buy a gallon of paint as they did some years ago, and yet that gallon of paint will protect property that is of great deal more value to them to-day than in years past. There seems to be little reason for losing faith in selling good paint.

Losing faith means losing money, and the weakening of the whole foundation upon which retail business is to-day being conducted. Present conditions require the utmost confidence in buying and selling and it is well to keep in mind the statement of Napoleon that three-quarters of a victorious army consisted of morale while the other quarter represented guns, ammunition, officers, and all other such accoutrements. Paint selling has behind it numerous and sound economic arguments which can be employed to overcome any objection to painting under present circumstances. If faith, morale and belief in your line of paint are all where they should be, there will be little difficulty over prices.

McArthur Irwin Limited

Montreal.—F. W. Nugent has been appointed as representative of McArthur, Irwin, Ltd., with headquarters at 127 Wright Street, St. John, N.B. Mr. Nugent, for the past nine years, was associated with the jobbing firm of Robertson, Foster & Smith, St. John, and in his new work will cover the Maritime Provinces and Prince Edward Island.

The local hardware merchant is very often looked to, to establish a lead in respect to the sale of such a line as paint, in the Fall. At any rate if the dealer does not show enthusiasm over the Fall painting idea he can expect little from his customers. There is no reason why much exterior painting should not be done in the Fall, and certain education work now proceeding may be of assistance in establishing an all-year sale of paints and varnishes. Keeping the paint department at the front of the store, where the best light is available, as the dealer has done in this display, combined with the use of an occasional window display of paint at this time of the year, will help to establish the lead in arousing local interest which can then be fanned into enthusiasm.

Only One Jap-a-lac

And that is Glidden Jap-a-lac.

Like many another good product, Jap-a-lac is imitated. And as might be expected, its imitators fall far short of the original.

Because of these facts it is important that you sell the genuine Jap-a-lac. Its true, lasting colors, long-wearing qualities and worth of every kind assure satisfied customers for you and result in many repeat sales. It is in these repeat sales — sales without effort on your part — that your greatest profit lies.

There is a Jap-a-lac Household Finish for every home purpose. Stock up *now* with a complete line.

Write for our dealers' proposition.

Paint Companies to Hold Convention

Montreal.—The Canada Paint Company, Ltd., Montreal, is holding its convention this year during the week of October 25th. Sessions will begin on Monday.

The annual convention of the Sherwin-Williams Company of Canada, Ltd., will open on Monday next in Montreal.

Imports of Zinc, Varnishes and Paints Show Increase

Canadian imports of white zinc for the four months ending July, 1920, show a considerable increase over the 1919 period, being valued at $793,102, as compared with $319,649 in 1919. In 1918 they amounted to $543,789.

Paints, pigments and varnish imports were valued at $182,260 during the same period in 1920, as compared with $964,301 in 1919, and $1,308,776 in 1918.

Considerable decrease was registered during the same period in the imports of putty, especially imports from the U. S., being valued at only $4,154 in 1920, at $8,906 in 1919, and at $7,834 in 1918.

U.S. Exports to Canada of Turpentine for Four Months April-July

The exports from the United States to Canada of turpentine for the four months April-July during the periods as given below are as follows:

	Casks
1920-21	7,126
1919-20	7,921
1918-19	8,745
1917-18	9,250
1916-17	9,485
1915-16	8,771
1914-15	10,649
1913-14	8,369
1912-13	8,232

Total for 12 months, 1919-20, 21,041 casks.

Exports of Rosin From U.S. to Canada for Four Months April-July

The exports from the United States to Canada of rosin for the four months April-July during the periods given below are as follows:

	Bbls.
1920-21	26,573
1919-20	10,174
1918-19	35,095
1917-18	30,884
1916-17	21,693
1915-16	13,883
1914-15	12,434
1913-14	14,933
1912-13	16,069

Total for 12 months, 1919-20, 45,462 lbs.

Tuna Fish Oil

According to a circular issued by the U. S. Paint Manufacturers' Association, excellent results have been obtained with tuna fish oil, indicating that this product can be utilized, in whatever quantity produced, by the paint industry. Comparative drying tests have shown that tuna fish oil dries more rapidly than most grades of raw linseed oil. The gravity, iodine number and saponification value of the oil are similar to the constants of linseed oil, while the high iodine value, 184, is of unusual interest since it is actually higher than that of most linseed oils.

Yellow tail fish oil is another product supplied by the Bureau of Fisheries for these tests. It gives results almost as satisfactory as linseed oil.

Unsatisfactory Conditions in German Iron Industry

The German small iron industry is meeting with serious difficulties. According to the European press, a committee of manufacturers of ironware will shortly visit Luxemburg, Belgium, and North America with the object of buying bar iron. Experts say that American iron imported into Germany will be cheaper than home-made iron, principally on account of the coal agreement at Spa which will force various iron plants to reduce their output.

Algoma Steel Corporation Has Larger Output

Favorable figures regarding recent output at the plant of the Algoma Steel Corporation, Sault Ste. Marie, were presented at the annual meeting of the Lake Superior Corporation at Camden, N.J., last week. The Algoma, which is a subsidiary of the Lake Superior, is still working busily, though the rush for steel is slackening visibly. There are plenty of orders until the end of the year at least, and prospects of large business in rail making next year, although the price of rails has not yet been set.

The statement of production by the Algoma Steel Corporation submitted to the meeting covered the three months ending September 30, 1920, and is as follows, with comparison with the same period in the previous year (in tons):

	1920	1919
Coke	142,593	65,998
Pig iron	116,362	50,149
Steel ingots	92,360	55,456
Rails	52,540	33,033
Structural steel	4,107	.....
18-in. merchant mill products	9,068	6,805
12-in. merchant mill products	5,046	1,842

London Auto Accessory Trade is Booming

London, Ont.—While it is impossible to obtain the exact figures, sales of automobiles in London district this season so far run from 1,200 to 1,500 representing an outlay on the part of buyers of approximately $2,000,000. One of the greatest difficulties dealers have experienced is in getting deliveries. The demand seems to be for the better class of cars and an unusually large number of closed cars have been sold. One of the best indications of the development of the business here is that the Ford Motor Co., which already has a large assembling plant, recently closed a deal for property on which to erect an additional six storeys 200 x 250 of reinforced concrete.

Local hardware merchants who have been handling auto accessories report the greatest season's trade they have ever had. They see a splendid future for the business. While city sales have been large and very satisfactory the demand from the country is much greater owing to the unprecedented prosperity of the farmers. This fall they are harvesting perhaps the finest crops in their history and buyers are clamoring for everything they can raise at high prices.

Canadian Representation in Brazil

Montreal.—Major E. L. McColl has been appointed Canadian Trade Commissioner to Brazil. This has resulted owing to the development of trade with this country, and it is stated by the new appointee that much of Canada's products reached Brazil formerly through New York sources. The Commissioner is now visiting business men and Canadian manufacturers in order to familiarize himself with conditions here.

Building Trades

(Continued from page 57.)

turing plants in this country and the United States, Mr. Patterson said: "There was a great scramble at ticket offices by these workmen. They were making for other points where they knew there was employment, and the railway companies did not have enough tickets to go around. These men are able to place themselves elsewhere, so that there is not the unemployment that would result otherwise. Some of these men left for the north to aid in construction work.

"I expect that prices will be steady on the lines of our manufacture. It is not the cost of the raw material so much today as the cost of making and handling a product. For the reason that men will still be paid good wages, I do not expect there will be any reduction in prices for the present. Any changes will come gradually."

Another factor is that materials, while not so scarce as they were, are only obtainable by keeping after the producer. The manufacturer is able to get supplies if he insists on having them, but there has not been a return to normal in this respect as yet.

Mr. Patterson also states that there is an increasing sale for the better lines of sash and door hardware, the builder of a permanent block, especially, desiring the best that he can obtain, regardless of its being high in price.

In conclusion, Mr. Patterson stated that he believed the volume of building in prospect for 1921 would greatly increase in all parts of Canada, from coast to coast.

The Luxeberry Painter Says:

"PREVENTION IS BETTER THAN CURE is an old saying I always think of when I see a job of finishing that has gone wrong. It costs a whole lot less to prevent varnish mistakes than to make them, but I always find Berry Brothers' finishes a sure preventive of varnish troubles."

It is the uniform dependability of "Berry" products that maintains the always growing demand for them.

Weekly Paint Markets

Montreal

MONTREAL, October 21. — The paint markets are seasonably active although this does not mean that there is as much business passing as during other periods of the year. At the same time activity is satisfactory, and the volume of business passing is quite large. Some export business has been obtained by the manufacturers and export of corroded lead is still quite heavy. There has been little change in the market and linseed oil and turpentine, while being soft in undertone, are little changed from the quotations of last week.

Steady Price But Turpentine Quiet

Montreal.

TURPENTINE.—There is just a fair demand for turpentine and jobbers are quoting this as high as 2.30 per gallon. Arrivals are not excessive although amounts are obtained from time to time to meet the trade requirements.

Turpentine—	Imp. Gal.	
Single barrels	2 30	2 35
Small lots	2 40	2 45
(Packages extra.)		

Putty a Good Seller and Stock Is Ample

Montreal.

PUTTY.—There is a good seasonable demand for putty and prices hold firm without change. The following list is applying in this market.

Commercial Putty	5 tons	1 ton	Less than ton
Bulk Barrels, 800 lbs.	$6 50	$6 75	$7 10
Bulk Drums, 100 lbs.	7 50	7 75	8 10
Do., or tins, loose 25 lbs.	7 75	8 00	8 35
Bulk Tins, cased 25 lbs.	8 50	8 75	9 10
Bulk Drums or tins, loose 12½ lbs.	8 00	8 25	8 60
Bulk Tins, cased 12½ lbs.	8 75	9 00	9 35
Bladder Barrels, 400 lbs.	8 75	9 00	9 35
Do., Cases, 100 lbs.	9 00	9 25	9 60
Tins, 1 lb.	11 10	11 35	11 70

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Much Flax Arrives; Oil Reduced 5 Cents

Montreal.

LINSEED OIL.—The present linseed oil situation indicates that there may be a further recession of price and in fact $1.50 is now being quoted on "singles." The arrival of large supplies of seed is one reason for expecting that prices for oil will not advance any in any case. At the same time, as a Montreal crusher pointed out to Hardware and Metal this week, the price of linseed meal will have to come down to a parity with other cattle feeds, and if this is done, it is probable that oil will not reach a much lower level than that obtaining to-day. A great deal of flax has been put into Western elevators, one estimate placing this as at least 1,000,000 bushels, to date.

Raw—	Imp. Gal.	
1 to 4 barrels	1 55	1 60
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 58	1 60½
3 to 4 barrels	....	....

White Lead Basis Remains Unchanged

Montreal.

WHITE LEAD IN OIL.—There is a good local and export demand for white lead in oil, seasonably speaking, and prices remain unchanged with 5-ton lots selling at $9.50 per 100 pounds, 1-ton lots at $20.00 and less than ton lots at $20.35.

Spring Bookings For Prepared Paint Promising

Montreal.

PREPARED PAINTS.—At the present time there is naturally not a great deal of demand for paint wanted for immediate shipment. However, orders for spring delivery are coming to hand very satisfactorily, and in this respect a good healthy tone is indicated on the part of the retail trade, who anticipate good business next year. Prices are steadily unchanged, and the indications are for continued prosperity in this line of goods.

Steady Glass Trade; Supplies Are Ample

Montreal.

GLASS.—There is a considerable amount of business passing in window glass and the market is quite steady. At the same time quantities of Belgian glass are still being sent forward and these are being offered at fairly close prices, Hardware and Metal understands. The fine weather which has been obtaining in many parts of the country is making for activity in the industry.

Toronto

TORONTO, OCT. 21.—Prices are not very much changed in paint circles this week.

The chief feature is the continued decline in linseed oil and turpentine quotations. Linseed oil is less than half the price it was sold at during the early summer and turpentine last spring was quoted at nearly twice the price it is to-day.

White lead and putty are unchanged. Shellacs and rosins are easier.

Glass is selling at 25 per cent. and in some cases at 30 per cent. off list instead of 15 per cent. as formerly.

Business is reported a little brisker and a good fall trading is anticipated.

Turpentine Still Declining; Now Quoted at $2.05

Toronto.

TURPENTINE.—There is a continuation of the decline in the price of turpentine and it has nearly reached the two dollar mark.

Savannah reports indicate that there is a considerable stock on hand and the second crop is now gathered, though producers are said to be selling at pretty close to cost and whether it will go any lower is uncertain.

The present quotations are:

Turpentine—	Per Imp. Gal.	
1 barrel lots	....	2 05
2 to 4 barrel lots	....	2 04
5 gal. lots	....	2 20

Linseed Oil Down Another Eight Cents

Toronto.

LINSEED OIL.—The price of linseed oil has dropped another eight cents per gallon this week and it is now below the dollar and a half.

The demand for oil is not very large at present and buyers are purchasing for present needs only in most cases.

Quotations are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 47	1 50
3 to 5 barrels, gal.	1 46	1 49
6 to 9 barrels, gal.	1 44	1 47

White Lead in Oil Prices Are Unchanged

Toronto.

WHITE LEAD IN OIL.—The prices of white lead in oil are unchanged. Trading is reported to show a little improvement and the demand is very sat-

isfactory. If it continues jobbers will have no cause to complain, they say.

Prices of pig lead are still on the downward trend but it will have to be a permanent decline to affect prices of corroded lead, it is stated.

Demand For Paints and Varnishes Improving

Toronto.

PREPARED PAINTS AND VARNISHES.—The demand for prepared paints and varnishes is showing a decided improvement this last week or so, it is stated, and sales for present deliveries are very good. Prices are unchanged and continue firm.

Putty Quotations Holding Unchanged

Toronto.

PUTTY.—No change has taken place or is expected in putty prices and basis remains as last week. The demand is fairly good and sales are up to the average for the time of year.

Present quotations are the following:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80
Do., less quantities	10 05
Pure, in 100-lb. drums	11 05
Do., 25-lb. irons	11 30
Do., bladders in bbls.	12 30
Do., less quantities	12 55

Wood Alcohol Now Quoted Higher

Toronto.

WOOD ALCOHOL.—Higher prices are quoted for wood alcohol and this product has been rather scarce on the markets lately. Present quotations are $4.50 per gallon.

Shellacs and Rosins Show Easier Tendencies

Toronto.

SHELLACS AND ROSINS.—There is an easier tendency in rosins and shellacs and prices of both may possibly be lower in the near future.

Present shellac prices are:

Pure White, per bbl. $7.75; gal. jugs, $8.25.
Pure Orange, per bbl., $7; gal, jugs, $7.50.

Window Glass Quotations Show Variations

Toronto.

WINDOW GLASS.—Some variations in quotations on window glass are noted here. The difference is said to be due to importations of Belgian glass combined with a weaker market over there and the alteration in the customs ruling allowing duties to be fixed on a gold basis on imports.

The American glass markets appear to be very firm still, with deliveries taking from three to six months from placing of order

Discounts quoted are from 25 to 30 per cent.

NEW MAIL ORDER METHODS

(Continued from page 41)

the mails as usual, it sent them in bulk to local representatives in some of the larger towns, who distributed them from house to house. The book consisted of about 100 pages. So far as can be learned it is not the intention to distribute the big general catalogue in this manner, as such would involve great advertising expense. But it must have been considerable outlay to distribute broadcast even a catalogue of 100 pages.

"Apparently lavish use of advertising matter, however, can be justified by results when it comes from a house like Sears, Roebuck or Montgomery Ward. One theory behind the distribution of direct-mail advertising matter is that it should not be sent until asked for. When a catalogue has attained an advertising prestige like those of the big mail-order houses this rule can be interpreted with liberality.

"These new moves of Montgomery Ward & Company, while not particularly spectacular or sensational, are important in that they indicate an unmistakable intention to get out the beaten paths of mail-order selling and to cultivate relations with the people as much as possible like those enjoyed by the regular retail store.

"Only a lineal descendant of Saint Thomas can have any doubts as to the intentions of the mail-order houses to take every legitimate means of furthering their interests even at the expense of radical and unprecedented changes in operating method. The readiness of an institution like Montgomery Ward to break away from tradition ought to be an incentive to the retailer to do likewise. He will have to do it sooner or later, anyway."

Steel Industry in Satisfactory Condition

Montreal.—R. M. Wolvin, president of the Dominion Steel Corporation, has returned to Montreal after a two weeks' trip to the company's properties in Nova Scotia, etc. The steel industry, Mr. Wolvin stated, was in a satisfactory condition, and he had been successful in arriving at an agreement with the Government of Newfoundland, whereby the export of iron ore would be carried out under conditions favorable to the corporation and along the lines desired by those who had conceived the British Empire Steel Corporation.

Limit Lighting in Windows and Overhead Signs

Hamilton.—E. I. Sifton, chief engineer of the Hamilton Hydro Commission, said there was every indication of a power shortage this winter, and that conservation of power would have to be practised.

The first move in this direction would affect merchants. Mr. Sifton said there was no doubt but that a great amount of Hydro power was needlessly used for the lighting of store windows and overhead electric signs. Such lighting, to his mind, was quite unnecessary when a shortage was prevailing.

Street lighting would also be curtailed this winter, he said. There are about 8,000 street lights in Hamilton. Mr. Sifton thought that half of this number might well be shut off during the winter months, without imperilling the safety of citizens.

Electrical Convention at Montreal

The second convention of the electrical interests of Quebec and Eastern Ontario met this week at the Windsor Hotel.

In discussing the object of the association with John A. Burns, manager of the electrical department of Munderloh & Co., Montreal, Hardware and Metal was informed that the association work was on a good footing and the objects for which it is working are being attained. "These meetings," said Mr. Burns, "are composed largely of all classes of the electrical industry of the Province of Quebec, with visitors from Winnipeg, Vancouver and Toronto.

"The object of the meeting was also to foster kindly feelings between contractors, dealers, jobbers and central stations, each section endeavoring to help the others, the whole result being to permanently place the electrical trade on a sound business basis and to properly educate the public in the uses of electricity and the appliances operated thereby. It is probable that a new association will have been formed to be called "The Electrical Co-operative Association of the Province of Quebec." This matter was to be taken up as one of the last subjects on the convention programme.

Black Bass Prize Weighed at Hepworth Hardware Store

Rev. Father J. J. Flashhaven, of Teeswater, is this year's winner of the prize rod, reel and line in the Toronto Daily Star's contest.

The winning fish was weighed and measured in Hepworth at the Hardware Platform Counter scale in the presence of W. Kreutzweiser, hardware merchant of Hepworth, and W. R. Kinch, editor of the Hepworth Progress.

Extensions Double Factory Space

Andrews Wire Works of Canada, Ltd., Watford, Ont., have under way an addition to their plant that will more than double the present working space. The office space will be tripled and the tinning room will be doubled in size. The new buildings are modern in construction, being all concrete, brick and steel with fenestra windows. The plant when complete will be modern in every particular. The cost of the new building and equipment will probably exceed $50,000.

The One Best Varnish For Any Surface That Needs Varnishing

UNIVERNISH

Made in
Six Transparent Wood Colors

DARK OAK ***MAHOGANY***
LIGHT OAK ***WALNUT***
LOG OAK ***GREEN***

And as a Clear Varnish

For outside or inside use, wherever a good-looking and long-wearing varnish is required, Univernish proves entirely satisfactory.

Hot Water-proof, Steam-proof, Ammonia-proof, Soap-proof—a Univernished Surface will withstand the most severe usage and can be washed, when necessary, without the least injury to the original glass-like finish.

Recommend Univernish for furniture, floors, boats, yachts, automobiles and all other surfaces where the wear is hard and where protection as well as good appearance is essential.

Keep a stock of Univernish always on hand. You'll find it an easy seller when displayed in conjunction with the tasty window trims and show cards which we supply.

Write us to-day for particulars and prices.

The Dougall Varnish Co. Limited

MONTREAL

Associated with Murphy Varnish Company, U.S.A.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Little Visits

Beatty Bros. Limited Bulletin

with BT Dealers

Mr. James Wright, whose progressive business methods and good service have worked up a splendid business.

The interior of Jas. Wright & Son's store at Glencoe. BT Churns, Ladders, Hay Tools and Pumps are leading lines.

Mr. Jack Smith, Manager of the store, demonstrates a BT Square Top Fork. Mr. Smith's intimate knowledge of Pumping and Hay Carrier problems is largely responsible for firm's success.

Have Sold BT Hay Tools for 25 Years

For twenty-five years James Wright & Son of Glencoe, Ont., have been selling BT Hay Carriers, tracks, forks, slings and other Hay Carrier fittings.

When writing us this spring Mr. Wright said: "We have handled your line of goods for a period of 25 years, both here and at Strathroy, and have always had the best of service from Beatty Bros."

We feel that this is a genuine compliment—twenty-five years is a long time, and we are proud of our long association with this progressive concern.

James Wright & Son make a point of stocking Hay Tools in September and October and begin at once to canvass any farmers coming in the store for their requirements in this line.

When selling building material, such as cement, the matter of a Hay Tool outfit is always brought up. Splendid results have been obtained in this way.

During June and July a well-arranged display of Hay Tools is made on a table in front of the store.

Attractive window display of Hay Cars, forks, pulleys and other fittings are put on in July.

In addition to Hay Tools, Jas. Wright & Son sell BT Ladders, Churns, Washers and Pumps. When selling Hay Tool outfits a BT Extension Ladder is almost invariably sold for erecting the Hay Track.

Stock Hay Tools Now

The success this firm has gained in selling Hay Tools is largely due to the fact that they *get after the business early.*

Fall is the ideal time to erect a Hay Track. The mows are full, thus making erection easy and labor is comparatively plentiful. The need for a new outfit is fresh in the farmer's mind.

The experience of James Wright & Son proves that BT Hay Carriers can be sold—year after year—with very little trouble. It is extremely profitable business and can be operated on a small expense.

A Hay Carrier outfit is a necessity on every farm. Old outfits need replacing. New barns need new outfits. Old-fashioned outfits need replacing with modern Sling Carriers.

Our representative will be calling on you soon. We suggest that you place your stock order for Hay Tools with him.

TONCAN METAL

—Easy to Work

TONCAN METAL is a tough, ductile, rust-resisting sheet metal which holds a tight coat of galvanizing and is extremely soft and workable. There are no lumps of impurities or gritty spots to damage cutters. Toncan Metal is the same all the way through. It not only works better than ordinary sheet metal but it lasts much longer and when supplied to your trade gives satisfaction which reflects credit on you.

Galvanized, Fabricated and Stocked in Canada

All Toncan Metal sheets used in Canada are galvanized in Canada by the most modern processes. Each sheet is inspected and only perfect sheets are allowed to go into stock.

Usual sheet metal building accessories are fabricated in Canada and distributed at convenient points. If you are not acquainted with Toncan Metal find out all about it. It is worth while to any dealer.

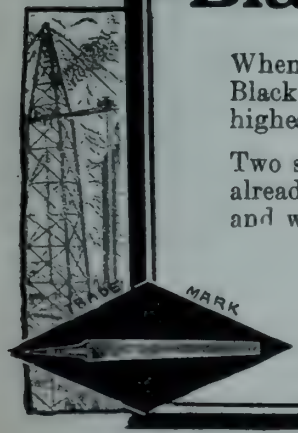
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone fills the bill for the Canadian housewife. She has tried it and liked it and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller.

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers.

Silkstone is a tried and proven, steady salesmaker. It satisfies customers because it gives good results.

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

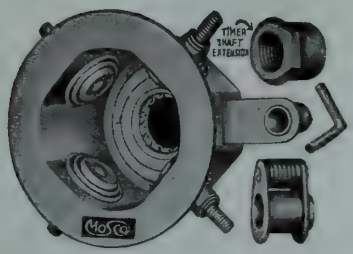
Dependable MOSCO Products



Improved Bemus Ball Contact Timer for Fords

Easier Starting--Smoother Running--Longer Life--Saves Coil Points

The IDEAL TIMER because form of contact is the only one which is correct both electrically and mechanically. This is made by a hardened tool-steel brush coming in contact with steel balls which are kept in proper position by means of a spring with plug on the end pressing against them. The impact of the brush causes the balls to turn so that a fresh surface is presented for each contact. The brush comes in contact only with the four balls, touching no fibre or insulation. The balls are so located that each has a track of its own on the brush, this insuring a maximum amount of wear.

Mosco Products Are Carried By All Leading Canadian Jobbers.

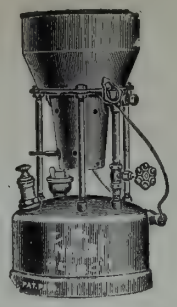
We can supply you with cotton waste at prices lower than any others for equal quality. Better write us your needs to-day.

ACME WASTE MFG. CO., LIMITED
492 Wellington St. W., Toronto



Your Profits Belong

is your pocket. Do not waste them by purchasing cheap, poorly made tools which burn more gasoline and give less heat than high-grade tools. Remember, you buy fuel often, but a Fire Pot or Torch only occasionally, and with C. & L. Fire Pots and Torches, you can do your work quicker and better and with a big saving in fuel expense. Jobbers supply at factory price. Send for catalog.

No. 21 Fire Pot.
List Price, Each, $21.20.

THE BANKERS HAVE AN ASSOCIATION to protect their interests. Membership is confined to banks that conform to legitimate banking practices.

Other professions and businesses have similar associations with a high ethical standard.

From the advertiser's standpoint, the greatest and most useful co-operative organization is the Audit Bureau of Circulations, comprising advertisers, advertising agents and publishers.

It protects the advertiser and his agent. They are enabled to know positively the facts regarding the circulation of the publications with which they place contracts.

It protects the publisher against unfair competition, as the falsifier of circulation statements is barred absolutely from membership in the A.B.C.

The experienced advertiser, before placing a contract for space, asks to be shown the A.B.C. credentials of the publication.

Hardware and Metal is a member of the A.B.C.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Hardware and Metal's unique circulation as proven by the A.B.C. audit is due to 31 years of honest effort to give the retail trade the best possible service.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500-lb. containers.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED — EXPERIENCED HARDWARE clerk of good appearance, single, with good education, to spend two months at Toronto and then go to Winnipeg branch of company. Give all details in letter to Box 31, Hardware and Metal.

WANTED — HARDWARE TRAVELLER TO push handy side-line. Address Box 440, Hardware and Metal.

WANTED IMMEDIATELY — FIRST-CLASS hardware man for head clerk in retail store. State age, experience and salary. Box 63, Hardware and Metal.

SITUATIONS WANTED

PRACTICAL HARDWARE MAN WANTS TO purchase partnership in established business, B.C. or Alberta, ten to fifteen thousand dollars to invest.

Married man, good references, wants position as manager of retail hardware store, B.C. or Alberta. Apply Box 125, Hardware and Metal.

ALUMINUM WARE SALESMAN, EIGHT years' experience British Columbia, familiar all makes, desires position on road with live, up-to-date manufacturer or jobber; go anywhere. Box 20, Hardware and Metal.

HARDWARE and METAL'S unique circulation as proven by the A B C Audit is due to 32 years of honest effort to give the retail trade the best possible service.

FOR SALE

HARDWARE STOCK AND PROPERTY FOR sale. Town of 800, on Provincial highway, good farming district; $10,000 stock. Retiring from business. Write Box 304, Hardware and Metal.

GOOD CLEAN HARDWARE BUSINESS AND store property for sale; central Alberta. No crop failures. Seven thousand will handle. Write Box 404, Hardware and Metal.

THE FOLLOWING COKE TIN PLATES IN stock at Toronto warehouse for immediate delivery: 254 packages, 112 sheets, 100 lbs. basis, sizes 15 x 30, 18¼ x 26¼, 18¾ x 28, 25 x 28, 22 x 26, and 19 x 28. Primes and Wasters. Box 341, Hardware and Metal.

FOR SALE—WIRE NAILS, 200 KEGS BLUED wire box nails, sizes 2¼", 2¾", 3". Price, $5.50 base, f.o.b. Montreal. Charles P. Archibald & Co., 285 Beaver Hall Hill, Montreal.

HARDWARE AND METAL

is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Your Wants are many here below. Use the Want Ad. page and get rid of a few of them.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

OPPORTUNITIES ARE BEING OFFERED EVERY WEEK ON THIS PAGE. ARE YOU MAKING USE OF THEM

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

"Paints and Varnishes for Every Purpose"

Sell Inside Paint

When the leaves begin to fall it's high time to turn attention to your inside paint sales. Your customers have already turned theirs, for they have had inside painting hammered in by all their favorite papers. The Canadian housewife has mentally listed the inside painting jobs—to enamel the kitchen cabinet; do the floors; stain some pantry shelves and renovate various old chairs, tables and other furniture. Dad will be down cellar in his spare time "doing" porch furniture, the baby carriage, lawn mower, and many other things.

Have you all the O.P.W. products for inside painting, staining, varnishing and enamelling, also gold, aluminum and metal paints?

O.P.W. covers and spreads
Because it's produced
By experienced heads.
It's well made, too,
By a skilled labor crew,
Who make it give service
—lasting and true!

"Save the surface and you save all" *Paint & Varnish*

O.P.W. is a Good Proposition—Let Us Show You

Ottawa Paint Works Limited

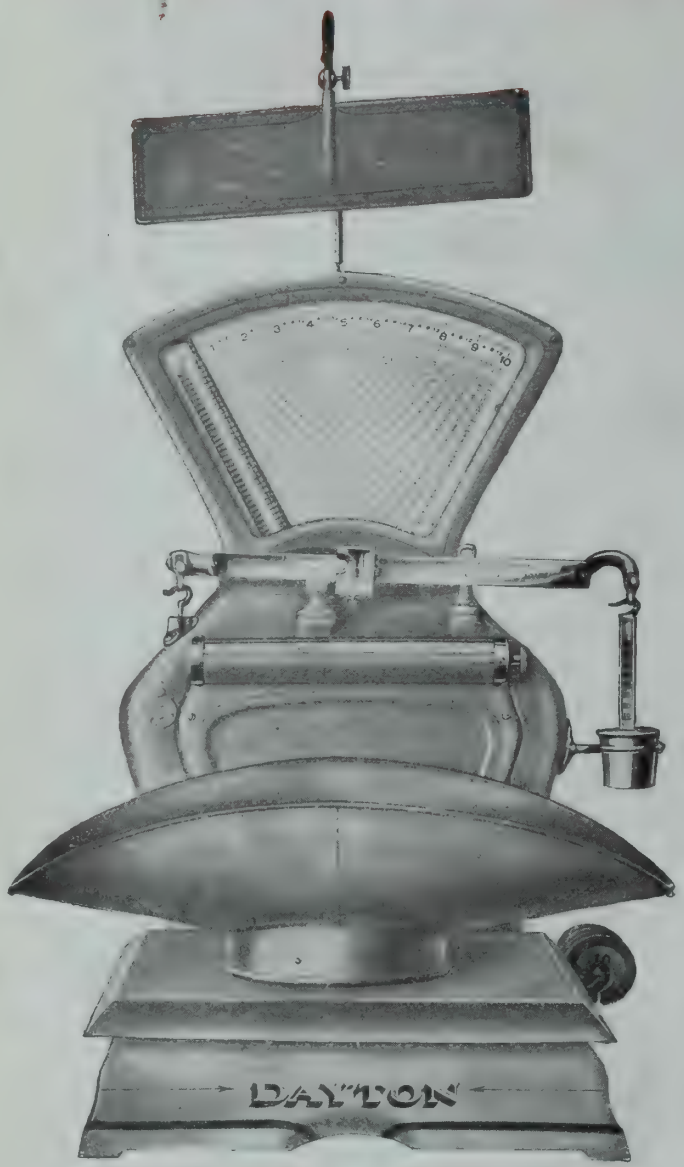
The Profit at the Bottom of Your Nail Keg—



That's where the profit lies—in the last pounds and in the last ounces. Any old-time Scale can give nails away—and leave you nothing at the bottom of the keg.

An International Dayton

Hardware Scale

Guards Your Profits

Ten two-inch nails make an ounce—nothing is easier, if you use out-of-date equipment, than to give away one ounce in each weighing. At this rate on a keg of nails, with fifty weighings, your loss is 3 lbs., 2 oz.

IT WILL HELP YOU TO TAKE STOCK

The International Dayton is the best Hardware Scale on the market with a special Counting Scoop attachment. The Counting Scoop is invaluable at Stock-taking time. Let us explain to you how it automatically counts Nails, Screw Bolts, etc.

International Business Machines products hereafter will be known under the following names: International Dayton Scales, International Meat Slicer, International Cheese Cutter and International Electric Tabulator.

CP
CANADA PAINT
AND VARNISH

OL' BILL Says—

"'Stra ordinary 'ow that Canada Paint sign keeps the paint buyin' folks a-comin'!"

The Paint of Merit

Old Bill is right. The Canada Paint sign outside the dealer's store does keep the "paint buyin' folks a-comin' "—and the reason is obvious.

The paint users of Canada know from past experience how good Canada Paint is. They are constantly reminded of its merits through C. P. consumer advertising, so that the buying impulse is created in every community and the C. P. outside store sign connects the dealer with the local demand.

What the Canada Paint Agency Proposition is doing for other Hardwaremen it will do for you. Why not investigate its possibilities? A copy of our free booklet describing this agency plan in detail will be mailed you on request.

TWO TO ONE

There was a time, not long ago, when one of anything was considered sufficient. Dealers never gave thought to selling more than one of an article at one time to a customer.

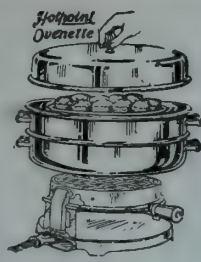
Nowadays two or more of anything or everything, from a spare tire to a dozen cakes of soap, has been found to be good business both from the dealer's and the customer's viewpoint.

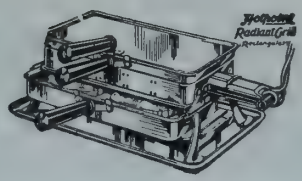
This good sense and efficiency has spread to the kitchen and most housewives realize the advantage of keeping an extra bottle of *O-Cedar Polish* on the shelf. It saves a housewife the annoyance of finding herself out of O-Cedar Polish in the midst of her work, and having to lose time sending for more.

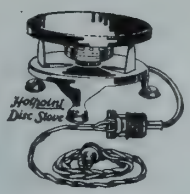
Suggest two bottles to a customer — or two cans. They will appreciate your advice. You'll appreciate the extra profit.

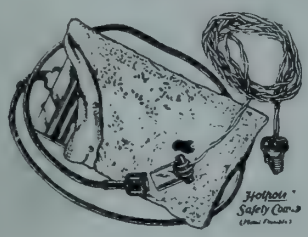
CHANNELL CHEMICAL CO.
LIMITED
TORONTO

HARDWARE AND METAL, October 30, 1920. Volume XXXII., No. 44. Published every Saturday at Toronto. Yearly subscription price, $4.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.









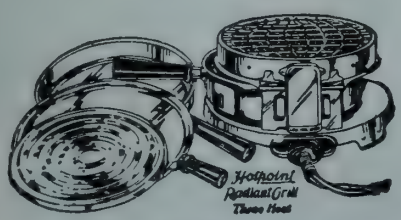
There'll be sane Christmas-giving this year

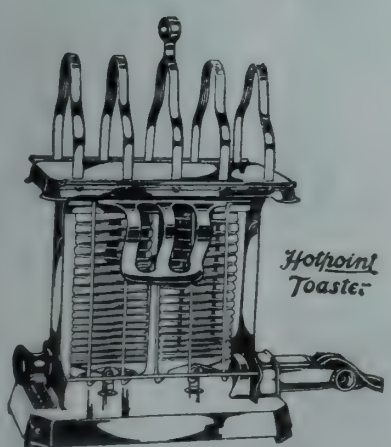
The day of reckless buying is fast drawing to a close and with it will go the extravagant, senseless buying which has been so marked during the past few years.

This change naturally means the diverting of buying from one class of store to another. It means that the hardware trade will come into their own.

Prepare to meet the Christmas buying demand for sane Christmas gifts, such as **Pyrex Ovenware, Electrical Appliances of all kinds, and labor-saving household devices, such as Vacuum Cleaners, Washing Machines, O-Cedar and Liquid Veneer Mops, etc., etc.**

Now is the time to start Christmas buying interest by displaying suitable lines.





Let us brighten up your Christmas stock.

Always On Edge To Please Trade

UNIVERSAL Knives are sturdily built, properly balanced---edged to the sharpness that stays sharp. They cut straight and true into the good graces of buyers. That's why sales make friends---friends make sales.

EVERYBODY knows that high-grade cutlery cannot be made from low-grade materials any more than nightingales can be hatched from goose eggs. The quality grade of "Universal" Cutlery is always ascending and at a sharp angle. The pinnacle of perfection is always the goal.

There is nothing in handling cutlery that is too dull to cut anything except its price in order to make sales. When the tide of selling recedes the flotsam and jetsam of low-grade goods is always left over. Sell "Universal" Cutlery and none will be left over. It isn't that kind.

Hatch Garage Door Outfits

Canada Will Possess a Total of 500,000 Autos in 1920: Every Automobile Must Be Housed

Records show that the number of automobiles in Canada has doubled about every two years. There is every indication that this will continue for some years. Your market for Garage Hardware is assured. Hatch Garage Door Outfits are sensible, practical and made with exacting care. They are exceptionally easy to apply and full directions are packed with each set. Slamming and sagging of the doors is impossible and snow and ice cannot interfere with their working easily and reliably.

The Hatch set is easy to sell and profitable.

The Set Includes:

3—*Special Swivel Door Rollers*, 22 *Feet of Track*, 3—*Paris Special Garage Door Hinges*, 3—*Stay Rollers (Floor Guides)*, 2—*Extra Heavy Garage Door Handles*, 1—*Safety Hasp (For Fastening Doors Outside)*, 1—*Hook and Eye (For Hooking Back Swinging Section Inside)*.

The track comes in separate bundles—2 eight-foot and 1 six-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

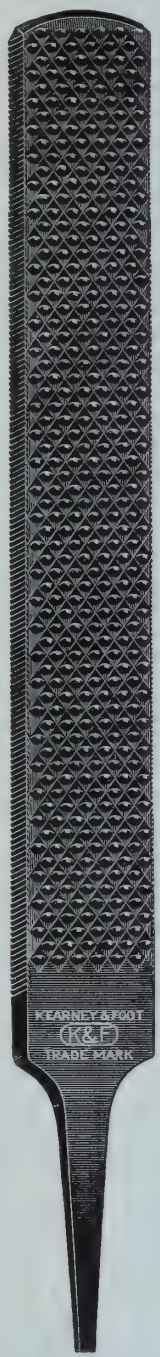
Horse-Rasps



are another excellent example of the completeness of the lines of goods we carry in our stock. We show here four of the best and most reliable makes of horse-rasps in the market. Our stock includes all of these four in both plain and tanged and in a large range of lengths. We have everything in that line you are likely to be asked for.

The completeness and the good selections of sizes and makers are characteristics of our stock. We choose the goods we will sell solely on their merits, and it will pay you to handle the goods we advertise. You can rely on their quality, which is backed up by the makers' names as well as by our own. You can make a good profit on them, too, because we sell right.

Order from us whenever you want hardware.

Plymouth Rope

Native Filipino Stripping and Cleaning Manila Fiber

WHEN the Manila hemp plant reaches maturity the native Filipino cuts the stalk which is some 15 feet long and a foot or more in diameter, being composed of separate leaf stems growing compactly together in overlapping layers. The fiber, from eight to twelve feet in length, is contained in the outer bark of these leaf stems, which after being stripped are drawn under a knife hinged to a block of wood as shown in the picture, the edge of the knife being kept down on the block by a treadle, and released by a lever consisting of a bamboo pole. This cleaning operation which separates the fiber from its surrounding pulp is very crude and slow, resulting in limited production, more especially of the superior grades, for the better grades of hemp are really the result of care and labor both in the cultivation of the plant and in the processes of gathering the stalks and preparation of the fiber which quickly deteriorates under certain conditions.

Of the relatively small percentage of really first-class fiber thus produced, the Plymouth Cordage Company is always alert to secure suitable material to maintain its long-established standard of quality, and the buyer of Plymouth Manila Rope is assured of greater satisfaction in using the better article.

3,000 Dwellings Built in Canada Under State Housing Schemes

More Homes Have Been Erected Under Canadian Plan Than Under That in Operation in Great Britain

Special to the "Mail and Empire," from Staff Reporter.

Ottawa, Sept. 14.—More than three thousand dwellings have been erected in Canada this year under the Dominion and Provincial housing schemes. This total will be increased by the end of the year by the continuance of building in sections of the country where climatic conditions permit. More homes have been built under the Canadian housing scheme, it is said, than under that in operation in Great Britain. The Canadian Parliament, it will be recalled, appropriated $25,000,000 for housing. This money was to be loaned to the provinces at 5 per cent. per annum. Provincial Legislature voted sums to supplement those borrowed from the Dominion and made provision for loans to persons desiring to build dwelling houses. Nearly all of the Dominion appropriation has been taken up. In Ontario the sum appropriated for housing, Federal and Provincial, totalled about eleven million dollars. In New Brunswick about 50 houses have been built under the Federal scheme. In Quebec homes have been erected and garden suburbs have been laid out. In the Western Provinces hundreds of homes have been built, mostly for returned soldiers.

The people were not so quick to take advantage of the housing scheme as they had been expected to be. They did not understand the plan fully and were faced early in the year by a shortage of material and labor. Much has been accomplished, however, and much has been learned which will enable the Provincial Legislatures to amend their housing legislation and make it more acceptable in various localities.

Indications are that building operations will be more extensive in 1921 than they have been in 1920.

Are You Getting Any Of This Business?

You Should.

MANY OF THESE HOMES HAVE BEEN EQUIPPED WITH A

"SOUVENIR" WARM AIR FURNACE

The small sizes of this furnace make it very suitable for workingmen's homes and for farm homes which usually have low cellars.

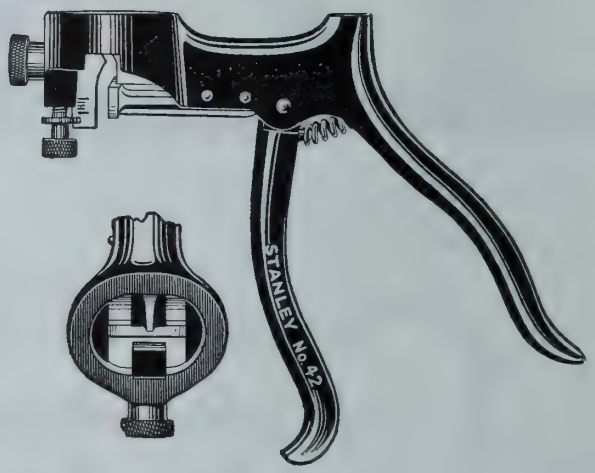
Stanley Tools



STANLEY "PISTOL GRIP" ADJUSTABLE SAW SET No. 42

This Saw Set embodies several unique and important features not heretofore seen in tools of this description.

The shape of the Body and Handle enables the user to operate the tool with great ease and with the least possible exertion, and the saw is held firmly against the gauge while the tool is being set.

It can be readily adjusted by means of the knurled thumb screw to give a greater or less set to the teeth of the saw, according as the saw is to be used for coarse or fine work. As the anvil or part against which the plunger works is graduated, the same adjustment can be easily obtained for duplicate work.

The tool is so designed that the saw teeth are in plain view, which enables the user to quickly adjust the tool to the tooth to be set.

The plunger and anvil are made of tool steel—hardened and tempered. All parts are carefully **machined** and are **interchangeable.**

The tool is given a fine black finish.

Speeding-up the Nation's Production

TO meet the nation's insistent call for greater production—production to bridge the gap caused by the long period of hostilities during which our every effort was concentrated on winning the war, the entire Canadian Fairbanks-Morse organization is again bending every effort, exerting its full strength to serve Canada and Canadians.

Here is a Canadian institution backed by a Dominion-wide distributing organization, its branch houses extending across the country, giving a new conception of service to manufacturer, farmer, fisherman—to every branch of industrial activity. Here is an institution which is a dominating factor in Canada, whose name has become the synonym of quality and whose service is recognized in every branch of business where mechanical goods are used.

Our 100% quality mark is the outward symbol of all that this organization stands for. This seal not only marks the standard of quality of Fairbanks-Morse goods, but it represents the ideals of the organization and of the men whose service and advice are yours.

Everything mechanical for factory, mill, farm or motorist
and everything backed by 100% mark of quality.

Ask our nearest branch house for information about anything mechanical.

Story for Week Dated Oct. 30, 1920 **Hull in 1851** **Being No. 29 in the Series**

Eddy Company Employees are all Happy. A Glimpse at the Girls.

HERE is just a peep at one of the tables in the E. B. Eddy Company's lunch room at the match factory for the nimble-fingered girls who help make the famous "Silent Fives." The Eddy Company girls are a merry bunch all the time. They do their work under excellent conditions, and are capable of earning very comfortable wages. There is a great tendency amongst Eddy Company employees to remain with the plant at Hull. Amongst the men employed by the E. B. Eddy Company are several who have seen half a century of service with the firm, while many are on their way to decades of experience. It was characteristic of the late E. B. Eddy that he thought constantly of the welfare of his employees, and the same kindly tradition has been upheld by the present Executive. As a result the excellence of Eddy Company products, and the loyalty of Eddy Company employees can always be counted on.

Consumers Are Put in a Receptive Mood For You to Sell

EDDY'S

People are getting more particular every day. If they find you can't supply just what they call for, they resent having a substitute offered. Especially is this true in the case of standard, well-known goods that have been acknowledged leaders for a generation or more.

A reputation for giving the customer exactly what he asks for is one of the biggest business-building assets you can have.

STAR HACK

If interested tear out this page and place with letters to be answered.

wouldn't take anything but Star Hack Saw Blades"

And the better known the standard merchandise you carry and the higher its quality, the stronger that appeal will be.

Few items in your whole stock are better known than Star Hack Saws, which have been the standard since 1883. In city or country, large store or small, these famous saws in the green box are often the only brand carried, so much higher are they in quality and so much more readily do they sell than any others made.

Now Star Saws are sold by the factory that has made them since the beginning. And it goes without saying that the factory that makes an article is in the best position to tell you how it is made, how it should be used, and how to sell it.

Our Sales Promotion Department is at your service to help you push Star Hack Saws with factories or individuals in every way possible.

And our national advertising on Star Hack Saws, which has made them known to users everywhere, will be continued in a bigger way than ever the coming year.

In ordering through jobbers be sure you get "Star." Inquiries or direct orders should be sent to this office.

Hard to Beat

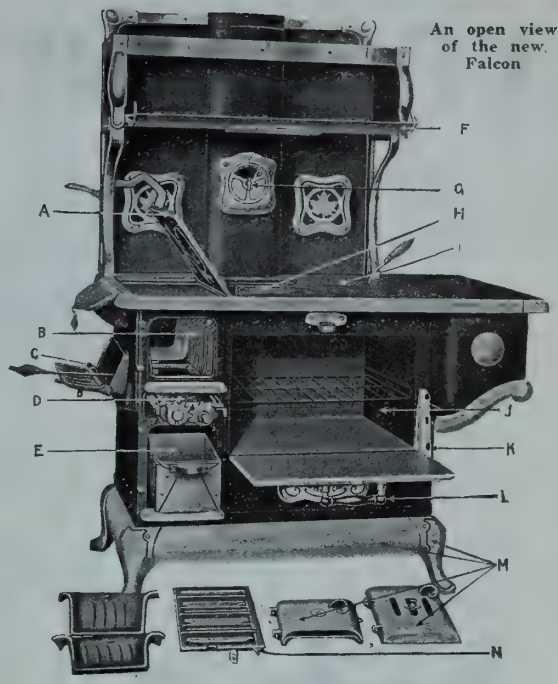
HERE'S a new range—a new member in the Maple Leaf line that acknowledges no superior in the field. It's beautiful in design—solid and genuine in construction and will make and keep friends for you.

Besides which you will make money in the transaction.

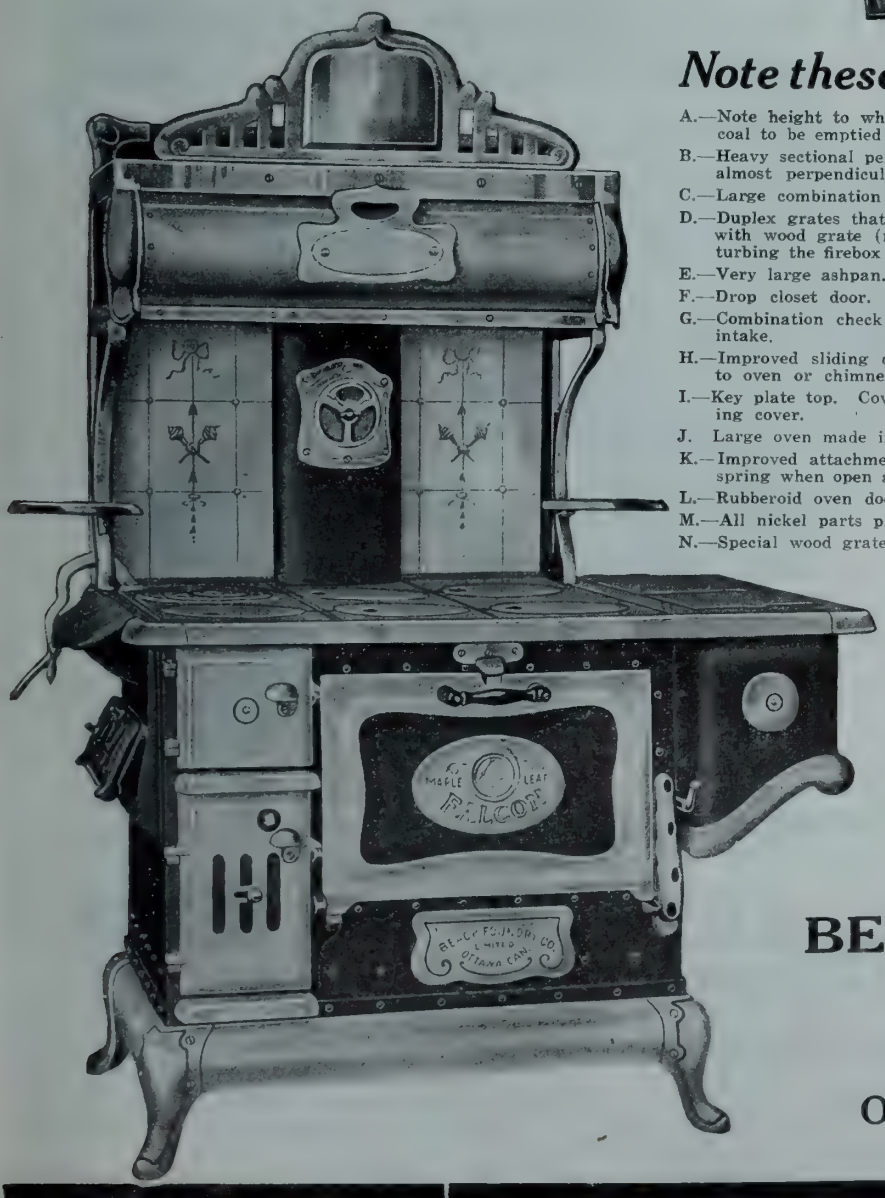
Let us send you one or more of these new Falcon ranges.

The New Maple Leaf Falcon

Made in two sizes :
18"—Oven 18x19x12½
Size of Top 43½x27
20"—Oven 20x19x12½
Size of top 45x27



An open view of the new Falcon



Note these construction features!

A.—Note height to which front key plate may be raised, allowing scuttle of coal to be emptied freely without use of shovel or poker.

B.—Heavy sectional perpendicular fireback. All other linings also heavy and almost perpendicular.

C.—Large combination draft and poker door opening.

D.—Duplex grates that may be removed through grate opening for replacing with wood grate (note letter N) or for any other purpose, without disturbing the firebox linings. Also note improved cog gudgeons.

E.—Very large ashpan.

F.—Drop closet door.

G.—Combination check draft with key to close off flue and opening for air intake.

H.—Improved sliding direct draft damper, giving full control of heat units to oven or chimney flue.

I.—Key plate top. Covers and short centres heavily ribbed. Sectional reducing cover.

J. Large oven made in two sizes, 18 x 19 x 12½ in., or 20 x 19 x 12½ in.

K.—Improved attachment for spring oven door balance. Door held down by spring when open and held tight in place by spring when closed.

L.—Rubberoid oven door handle—always cool.

M.—All nickel parts plain, high finish, easily kept clean.

N.—Special wood grate replaces duplex grates for burning wood only.

Shall we send you our full lists and prices of stoves and ranges?

Machinists' tools

probably mean little more to you than a line which sells easily at a good profit. But your *business* does.

The mechanic, however, has a different viewpoint. Tools are his breadwinners, therefore he demands the best. For three generations Brown & Sharpe Tools have been the choice of the best mechanics.

Why? Because their appearance always appeals to the mechanic. They earned a reputation for accuracy and have always lived up to it. *They give satisfaction.* And where can you find better advertising than in the good will of a satisfied customer?

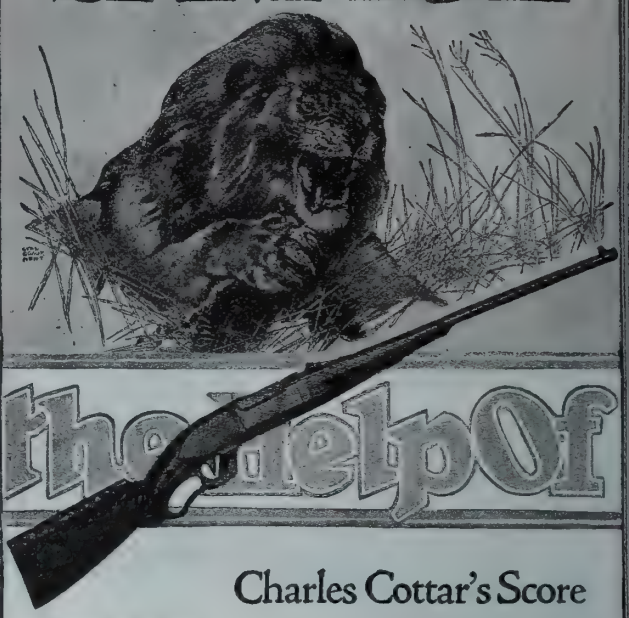
SAVAGE



.250-3000 Savage Rifle, take down model. 22-inch tapered round barrel with integral sight base. Checked extra full pistol grip and forearm, checked trigger. Corrugated steel shotgun buttplate. Commercial silver bead front and flat-topped windgauge sporting rear sights. Weight about 7 lbs

Charles Cottar's Score with the .250-3000 Savage on Lion — 100%

Do you know how many hunters are killed or mauled by lions every year? Do you realize that the lion is the African travellers' and hunters' greatest peril?

Listen to what Mr. Cottar says about what the little .250-3000 Savage does to the king of beasts —

"On lions and leopards—I have shot a score of the two species with the .250, and some of them at less than a rod distance—not one escaped that was hit"

The power of the 250-3000 Savage makes lions as easy as leopards to the man who has used it on both. And he has killed rhino, hippo, buffalo and elephant with it. Do you wonder that he finds it the most generally useful rifle for African hunting?

And don't forget that it's a six-shot repeater that weighs only seven pounds—that it has a point-blank range of over 300 yards—that it is accurate enough to make possibles at 800 yards—and that it hardly kicks at all.

You can see it—handle it—buy it—at your dealers. For particulars, write us.

Who is the "Right Man"?

Did you ever analyze a threading tool sale you've made to an industrial concern and try to find out just *why* the order came to you?

Perhaps you began by dropping in on the purchasing agent and talking to him about the saving you could give him with better tools—like the GTD line.

Possibly he said he would take it up with the foreman or superintendent or engineer—and you, not content with that, saw each of these persons yourself. Possibly you went further than this and saw the actual workmen who might use the tools—and invited them to drop in at the store and see the tools themselves.

If you will take each concern in your locality and write down all the "influences" that lead to business on a card-index, you'll find that sales invariably come, not from one person alone, but from a combination of from two to a dozen persons, depending on the circumstances of each particular case.

If you can understand the GTD line well enough to drive home the points which appeal to each person's interest in buying or using the GTD line, you will have a full right to boast that you are a "Threading Tool Specialist," a reputation which you can turn into dollars all the year round.

Two Judges of Good Tools

WHEN a real mechanic comes to you for tools, you always show him your best. Errors in design, flaws of workmanship, will never escape his keen eye. It's mighty satisfactory for you and him to display the Millers Falls line.

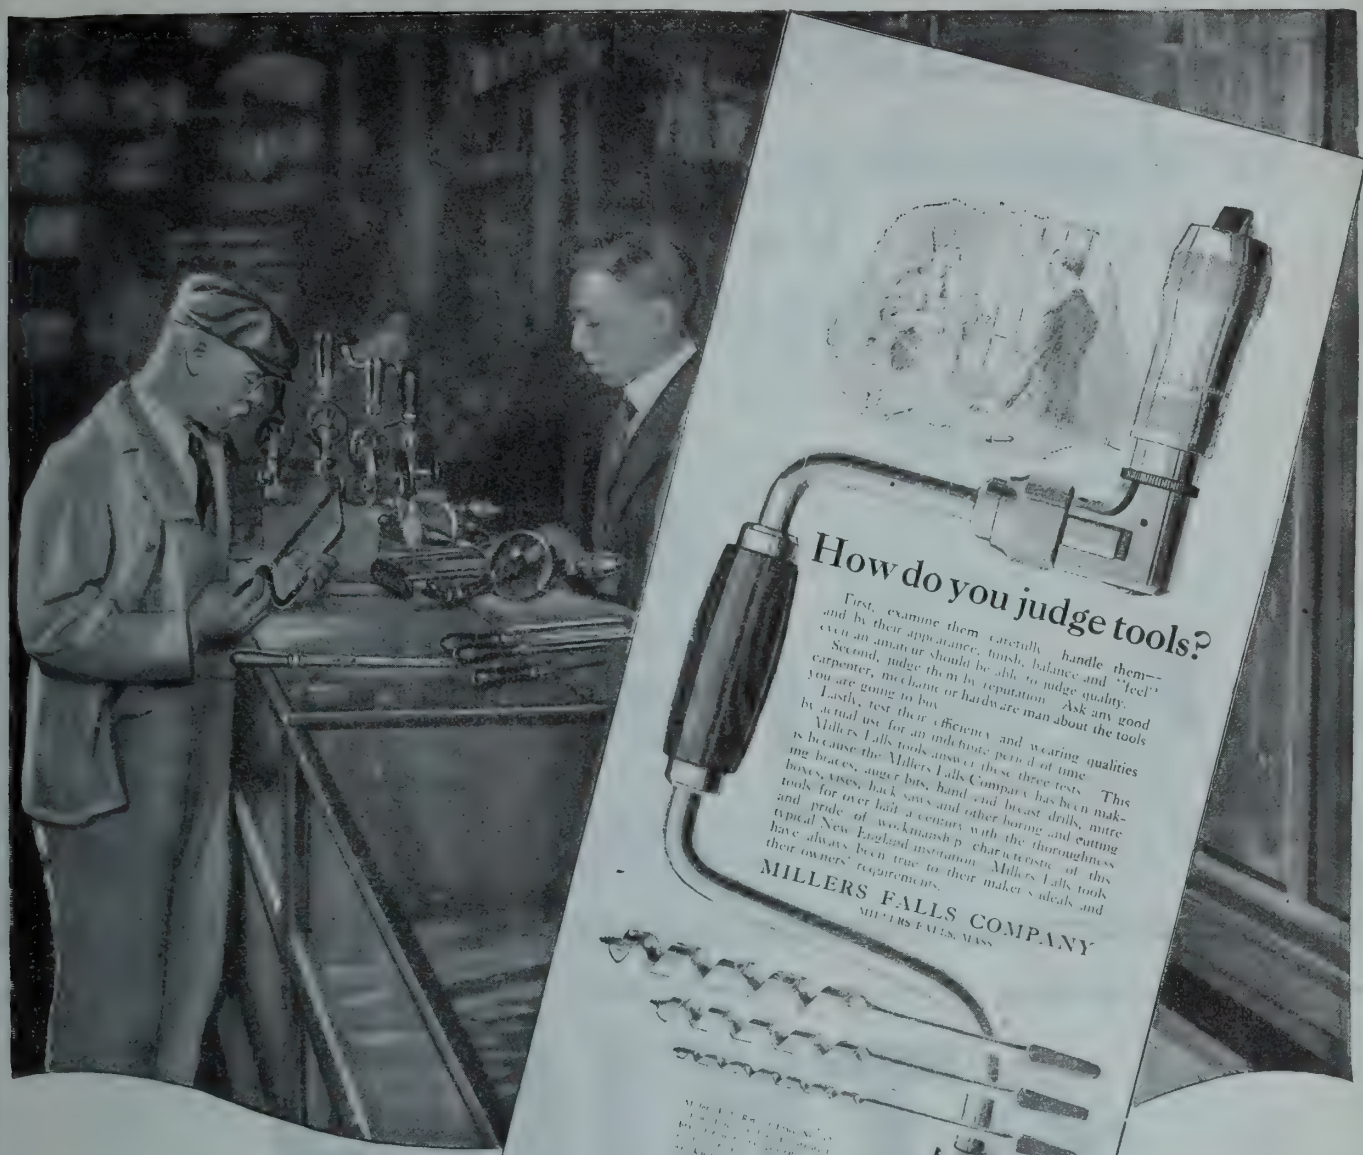
Men whose handicraft earns their living are not the only judges of tools. The amateur, who works about the house or builds furniture during the winter evenings, is often as shrewd as the professional. This "Saturday Evening Post" advertisement asks him to judge Millers Falls Tools closely by examination — and to ask your opinion, too.

Fifty years of service to you and your customers make us reasonably sure that your opinion will be favorable!

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.
Makers of Millers Falls and Universal Hacksaw Blades

Canadian Agents : Adcock & Brewer, Ltd., 222 St. James St., Montreal, Que.

If interested tear out this page and place with letters to be answered.



How do you judge tools?

First, examine them carefully—handle them—and by their appearance, finish, balance and "feel" even an amateur should be able to judge quality.

Second, judge them by reputation. Ask any good carpenter, mechanic or hardware man about the tools you are going to buy.

Lastly, test their efficiency and wearing qualities by actual use for an indefinite period of time.

Millers Falls tools answer these three tests. This is because the Millers Falls Company has been making braces, auger bits, hand and breast drills, mitre boxes, saws, back saws and other boring and cutting tools for over half a century with the thoroughness and pride of workmanship characteristic of this typical New England institution. Millers Falls tools have always been true to their maker's ideals and their owners' requirements.

Putting Westclox into the vocabulary

YOU have doubtless noticed that your customers are gradually adopting the word "Westclox" when they speak of alarm clocks. The advertising has done that.

The one big task our advertising has set for itself during the past several years has been to fix this word, "Westclox," in the public mind, to put it in the vocabulary —and to make it mean "a line of good alarm clocks."

Advertising can't accomplish a thing like this over night. It is a slow process. But you, and we at the factory, have felt the word sinking home. People are using it.

In the long run this means better and more business for you. The customer is sold on the kind of clock he wants even before he comes into your store.

Another thing: a group of Westclox in your window quickly recalls the advertising. In this way, Westclox bring in new customers who can easily be added to your list of "regulars."

Western Clock Co., Ltd., makers of Westclox

Luxury and Turnover Tax Debate Revived on Eve of Establishment of Stamp Collection

Majority of Retailers Favor Elimination of Luxury Tax and Substitution of Higher Sales Tax—"A Discriminate Tax, Detriment to Maker of Honest Goods, an Advantage to Maker of Junk"—Many Lines Taxed Are Not Luxuries and Turnover Tax Would Be More Equitable—Luxury Tax Collections Not Sufficient to Justify Resultant Disorganization of Business—Government Said to Be Sympathetic

THE use of stamps for the collection of the luxury tax, a regulation which is in effect from November 1, is not going to facilitate matters as far as the retail hardware trade is concerned, but rather it will be inclined to add another difficulty to the already complex problem, according to opinions expressed to Hardware and Metal this week, on the eve of the enforcement of the stamp measure.

The sales tax and turnover tax have come in for much discussion at recent meetings of retail merchants, and after going into the question from every standpoint it has been thought to be best, in most cases, to eliminate the luxury tax and substitute an increased sales tax. There has been no hesitation on the part of the Government in admitting that the luxury tax has not been as productive of revenue as was expected and that it has caused officials to the Inland Revenue Department a great deal of trouble. Much misunderstanding has been found among the retail trade concerning the articles to be taxed, the amount, methods of making returns, etc.

As a result of this evident dissatisfaction on the part of the trade and the Government it has been rumored that there was a great likelihood of the luxury tax being eliminated and some other form of revenue production adopted in its place. In this connection the Ottawa correspondent of Hardware and Metal has been unofficially advised by Mr. Breadner, Commissioner of Taxation, that no alteration in the taxes can be made at least until a new budget is brought down by the Minister of Finance unless special legislation was put through, which is said to be unlikely.

One thing is sure, however, that while it looks as though there may be little hope of an immediate change, the Government cannot continue to turn a deaf ear to the resolutions of retail merchants' associations, which are being received almost daily in protest of the cumbersome method of collecting the taxes on luxuries.

Dominion R.M.A. Voices Protest

Foremost among the retail merchants bodies which are on record as opposed to the luxury taxes is the Dominion Board of the R.M.A., which favors a turnover tax and no luxury tax. Supporting this the Ottawa correspondent of Hardware and Metal writes: "I find practically every retailer spoken to, to be in accord with this idea."

The chief source of difficulty with some of the more conservative hardware dealers is dissatisfaction over the change from the system in vogue prior to November 1 to the stamp system to be used in future. They claim that as soon as they had the machinery of collection running smoothly under the old plan they now have to change and adopt a more laborious system through the necessity of affixing stamps to invoices or sales slips and then perforating them. While this class of dealers are possibly less radical in criticising the whole taxation plan yet they are very critical of the vacillating attitude of the Government and the constant changes which are being made.

Hamilton Retailers Favor Turnover Tax

Retailers of Hamilton, Ont., are making protest of the plan of taxation. At a recent meeting the dealers of that city went on record as favoring the immediate abolition of the luxury tax and the increasing of the turnover tax to retailers to a degree that would recompense the Government for any consequent loss of revenue. It was pointed out that in the first four months the luxury tax had been in operation total collections had amounted to only $2,676,119. It was stated as doubtful if the collections for a year would amount to more than $8,000,000. It was thought to be a pity that the Government would disrupt business simply to collect so small a revenue. It was pointed out that total collections of the luxury tax so far amounted to only about 20 per cent. of collections for the sales tax. If the Government had put an additional half of one per cent. on the sales tax it would have got vastly more revenue than it has through the luxury tax.

"It is patent to everyone that the tax is not being collected as it should be," said Mr. Douglas, chairman. "An army of collectors would be necessary to enforce it rigidly. There are many evasions. Dealers split sales and resort to many other things to avoid paying. It is a discriminate tax, a detriment to the man who makes honest goods, and an advantage to the man who makes junk."

Opinions of a number of Toronto dealers support this criticism of the luxury tax and support the suggestion for an increased turnover tax.

Stamps Will Cause Much More Trouble

"The collection of the luxury tax is a lot of trouble but we had a system nearly perfected when along comes this announcement concerning the use of stamps. The stamps will cause a lot more trouble," said Mr. Walker, of W. Walker & Son, hardware merchants, Toronto. Mr. Walker added that the imposition of the luxury taxes had resulted in restrict-

ing sales of those lines at first but that later this effect had not been so noticeable, probably due to the fact that the tax can be included in the price quoted to the customer, and it is unlikely that the separate tax change would be noticed. The trouble is, however, that customers do not like to pay the tax which is called for in most cases, and it does not help matters any to make the tax change too prominent. Mr. Walker is of the opinion that the necessity of affixing stamps will not only give clerks much more trouble but will result in making the tax charge more apparent to customers, with the result of possibly curtailing sales of such lines. Mr. Walker is also opposed to the "excess profits" tax, thinking that such a tax would be more equitable if levied on the total profits.

Luxury Tax is Cumbersome

Mr. Gilverson, store manager of Rice Lewis & Son Co., Toronto, confirms the opinion that the luxury tax collection in the retail hardware store is cumbersome and gives much more trouble than should be occasioned the retailer when he is being called upon to collect this revenue without remuneration. Mr. Gilverson is also of the opinion that a larger tax on turnover would be more equitable and much less costly to the Government. The opinion that the present system must be giving the officials much difficulty in checking and also causing much unnecessary expense was also expressed.

Prefer Turnover Tax

"It is quite clear that the country has to meet its debts and that the only way to do so is to secure the revenue through taxation, but the most direct way would be to have a tax on turnover," said Mr. Russill, of the Russill Hardware Co., Toronto, to Hardware and Metal, pointing out that such a system would distribute the burden in equal portion over all parts of the community.

"To keep all the data required by the present tax system would require a large staff of clerks and is practically impossible in the average hardware business," said Mr. Russill. "Besides the whole tax based on turnover would encourage thrift and be beneficial to all concerned."

A Decidedly Backward Step

That the use of stamps to collect the luxury taxes is a decided step backward instead of helping to better conditions for the retailer is the opinion of J. Hewitson, hardware, Toronto. "The system of collection we have been employing, while it requires the expenditure of much time, is in my opinion the better idea of the two. There is, however, no doubting the fact that the most efficient and direct way of collecting the tax would be on the turnover."

Favors Luxury Taxes

An opinion favoring the stamp idea as a means of collecting the luxury tax was expressed by A. Moses, hardware, Toronto. "Why should the whole community have to pay for what only a few will use. If the people want luxuries let them pay for them. Stamps will do away with the data required by the present system and I do not see how any confusion or misunderstanding can be brought about by its enforcement."

Should the Luxury Tax Be Abandoned?

Many retailers associations in Canada are protesting that the luxury tax and its collection by the use of stamps is too cumbersome, too expensive, and too unproductive of revenue for the trouble it causes in selling and the keeping of records. It is possible some action may be taken to eliminate this form of taxation and substitute a higher tax on turnover. Read the details in the first article in this issue and then send along your opinions on this matter. The expression of opinions of those in the trade in all parts of the country will help to bring about a change if such is desired. Your opinion, whether for or against, and any suggestions for improvement are wanted. Address: The Editor, Hardware and Metal, 143 University Avenue, Toronto.

Need Educational Campaign

That there was still much misunderstanding of the luxury taxes was stated by Mr. Blue, store manager of the Vokes Hardware Co., Toronto. "When they launched the Victory Loan drive," he said, "they did not come out suddenly and try to force the people to take the bonds. They started an educational campaign a month or so before and let them know what they were going to do. Something similar should have been done in connection with the enforcement of the luxury tax to avoid the bungling and misunderstanding which has been evident. Whether the new system of attaching stamps will prove any better remains to be seen."

Quebec Section R.M.A. Oppose Luxury Tax

In discussing the luxury tax workings as they apply to Quebec retail merchants, with M. Lapointe, provincial secretary, R.M.A., Hardware and Metal was informed that there is a great deal of dissatisfaction among members of all trades with regard to the application and operation of the luxury tax. So opposed are various sections of the Retail Merchants' Association of the Province of Quebec, according to Mr. Lapointe, that every one of them has passed resolutions disapproving of the application and continuance of this tax. These resolutions have been of similar nature and have pointed out how great a hardship is worked on the retailer, who can ill afford to undertake the details of applying the tax.

Mr. Lapointe also referred to the fact that in certain lines of business, possibly only one line of goods are taxable under the luxury tax clause of the law, and in such cases he might overlook the necessity of collecting the fee. Then again, in stores where there are a great many clerks, the detail in connection with working out this tax properly was altogether too great and would cause much delay in serving customers, as well as the possibility of sales being made without the fee being collected. The stamp idea, where there are many clerks, will work an added hardship, Mr. Lapointe thinks.

"I was consulting a retailer on Beaver Hall Hill a few days ago, and he said that he would absolutely refuse to undertake compiling the necesary data and collecting this tax. He felt, with many others, that the tax should be collected at the producing end, that is that this should be applied when the goods are manufactured, or when they pass from the manufacturer to the jobber."

Minister Agrees

Mr. Lapointe feels that Sir Henry Drayton, the Minister of Finance, is sympathetic towards the contentions of retailers, and that they should have been given a closer hearing long before now with regard to the application of this tax.

As the matter stands the manufacturers and jobbers have been heard, and their suggestions have been acted upon. It is the intention of the Government to hear the recommendations of the Retail Merchants' Association from various parts of Canada, but just when this will be done is not ascertainable at the present time. With so many calls on the time of the Finance Minister from various parts of the country and in the prosecution of various duties, the matter has been put off from time to time, but it is expected that at an early date the matter will be given full consideration. Retail merchants in the Province of Quebec would certainly welcome an early hearing, and if possible it would be generally satisfactory if the sales tax were increased somewhat and the luxury tax was done away with altogether. This, Mr. Lapointe stated, was the general feeling of the Quebec merchants.

Labor Opposes Luxury Taxes

Organized labor is joining hands in the condemnation of the luxury tax, basing their action upon the ground that its imposition has led to a great deal of unemployment. Manufacturers have given the reason for laying off employees that people would not buy them with the added cost due to the imposition of the luxury tax.

The delegation inquired whether the

(Continued on page 38)

Accessories which have a special call during the cold weather can be featured in a display such as this. The sloppy roads of fall and the rough, icy roads of winter call for the best tires and tubes, chains are needed more, a different grade of oil is required, windshield cleaners, heaters, robes, etc., are also good lines to feature. For the motorist mechanically inclined who wishes to overhaul his car in the cold weather, tools and such lines may be included in the display.

Proposed Legislation Affects Accessory Trade

Plan to Cut Down Auto Accidents Involves Better Insurance Rates to Motorists Using Bumpers, Fire Extinguishers, Locking Devices, Windshield Cleaners, Etc.—Safety Leagues Ask Use of Lights, on All Vehicles, Traffic Signals on Autos, Greater Use of Chains, Etc., as Preventive Measures.

THE increase in the number of accidents attributed to the use of automobiles, which have occurred in recent months, has led to a desire for legislation to exert more control over the motorist. The increase in the number of such accidents is much to be regretted, but it is doubtful if the increase in accidents has been any greater than the increase in the number of automobiles in use. However, if accidents can be prevented by the use of certain devices, coupled with requiring more care on the part of the driver, then such action will have unanimous support.

The recent legislation requiring all motorists to adopt non-glare headlight lenses in the Province of Ontario is one of the most recent enactments and this lead is likely to be followed by other provinces in the Dominion. Motor Leagues in various provinces are now urging that all vehicles be compelled to carry lights at night. There have been many collisions recently owing to wagons and automobiles coming together on country roads in the dark, the former carrying no light and thus hard to discern. In this connection it is interesting to note the following extract from a letter written by the foreman of the coroner's jury which recently investigated a fatal accident from the cause outlined. The letter reads: "We recommend that all cars be equipped with dimmers and that all wheeled vehicles on roads at night be compelled to carry lights. There was no doubt in the jury's mind that had the buggy with which the car collided carried a light, the accident would never have occurred."

The question of added protection against accidents brings into the matter the likelihood of the wider adoption of certain accessories now on the market and the probable addition of others. In this connection it is interesting to note that in the United States the Underwriters Laboratories, with the assistance of the National Safety Council, have been carrying on experiments with appliances to prevent automobile accidents. The nature of these accidents is similar to those occurring in Canada, and anything which will solve the problem in the United States is likely to be followed in Canada, as was the case with the anti-glare headlight law.

Various Accessories Being Tested

The use of laminated glass for windshield construction, windshield cleaning appliances, the construction of steering gears, and the whole subject of head lamp dimmers and diffuses are involved in the tests under way. While the lab-

Pride in the Appearance of the Auto Is a Social and Business Asset

A dirty, dusty, dingy motor car is apt to reflect a careless and slipshod driver. No man of ambition and standing in his community wants to create such an impression.

You realize that dust, grime and grease are fatal to the costly finish, which the car had when it was first out of the salesroom. But you cannot afford to risk an ordinary soap. One application of such a soap may ruin the finish for all time—leaving the surface pale, dull and smoky. But the purpose of

EXCELO AUTO SOAP

is to clean cars. It is made from pure vegetable oils and contains no alkali. Quickly removes grease, stains and dirt leaving the surface on which it is applied lustrous and bright. Guaranteed absolutely harmless.

In Tins, 5 lbs., net .....$1.50.

Phone 'M. 2540 **McAVITY'S** 11-17 King St.

This advertisement by McAvity's, St. John, N.B., is devoted to a cleaning material, the ad. pointing out that a dirty car is a reflection upon the driver, and that no man of ambition and standing in his community would want to create such an impression. A number of other good points are also made in the ad. The sloppy weather which precedes the cold of midwinter will soon be upon us—it is already found in some parts of the country. Now is, therefore, a good time to use such an argument as this, for automobiles in use at this time will be hard to keep clean.

oratories are conducting these tests with mechanical sources of automobile accidents and their prevention, the National Safety Council through its local councils is making a study of all traffic accidents. The report of one of the leaders covering traffic accidents in a large city during a recent month reveals the following accident causes:

Not determined	190
Given as unavoidable	81
Skidding	91
Driving on wrong side of street	3
Parked too close to tracks	3
Mechanical defects in automobile	20
Jay Walking	27
Careless driving	205
Car trying to pass another	9
Pulling from curb without signal	7
Backing automobile without signal	11
Stopping without signal	3
Turning without signal	9
Horses left unguarded	4

In a communication the Underwriters Laboratories says:

"The stock insurance companies are giving reductions in insurance rates for the use of listed fire extinguishers and locking devices and they have advised us that use of bumpers found acceptable by us in tests, will entitle the car owner to a substantial reduction in collision insurance rate.

Traffic Signals on Cars

"We have tested some five or six of automobile traffic signals and have listed only one. The main trouble appears to be they will not be sufficiently durable to last for the life of the automobile on which they are installed. We now have before us several traffic signals which apparently possess some merit.

"The use of laminated glass for windshield construction is a comparatively new feature in automobile work and considerable attention is being given to this item at the laboratories. With the use of a suitable form of laminated glass, injuries due to collisions will be markedly decreased if the flying glass hazard is reduced to the minimum. Three or four other manufacturers have submitted their product for examination or signified intention to do so. Application of windshield cleaners to automobiles is of marked advantage in reducing the possibility of accidents from collision. We are now arranging tests of steering gears and hope to do conosiderable work along this line in the near future. The subject of head lamp dimmers and diffusers has received some attention from us and we have developed means whereby the 'glare' can be defined in terms of apparent candle power."

The foregoing indicates that the growing popularity of the automobile is calling for further legislation as to the equipment necessary both from the standpoint of the prevention of accidents and the requirements of insurance companies for the lessening of damage from various causes.

Legislation along these lines will be an important matter in Canada and the dealer selling automobile accessories should keep himself well informed as to the progress of such legislation in order that he may be able to advise customers to their best interests.

Reliable Auto Accessories

You will find in our assortment, just the right kind of Auto Goods, to fill your needs.

whether you want a New Horn, Bumper, Spot Light, Tire Repair Tools or Spark Plug

We can take care of your motoring requirements to your entire satisfaction.

We have just received a shipment of Good Year Tires in all sizes.

James S. Neill & Sons, Ltd.

FREDERICTON'S BIG HARDWARE STORE

Reliable accessories is the point emphasized in this accessory ad. by James S. Neill & Sons, Ltd., Fredericton, N.B. The layout of this ad. is such that it allows of emphasis being laid on two or three special points, namely, the reliability, the completeness of stock, and the satisfaction of having motoring requirements fully met.

LUXURY AND TURNOVER TAX

(Continued from page 36)

Government could not see its way clear, if the luxury tax was absolutely imperative, to have it included with the sale price of a number of the "luxury lines" instead of over and above it as at present.

The delegation was given a sympathetic hearing, and the Ministers promised to take the matter under advisement.

Ontario Merchants to Go to Ottawa

W. C. Miller, secretary of the Ontario branch of the R. M. A., advises that retail merchants intend to go to Ottawa shortly to protest against the luxury tax because they consider it entirely too cumbersome in many ways. Collection of this tax was the principal objection. The Government will be asked to substitute a straight sales tax in the place of the luxury tax.

Plan New Factory Buildings

Crouse-Hinds Company of Canada, Ltd., Toronto, has purchased approximately five acres of land at the corner of Hanson Street and Coxwell Avenue, Toronto, and plans and specifications are being prepared covering the erection of buildings. The main building will be 500 ft. long x 80 ft. wide, and either three or four stories high. The foundry will be 300 ft. long x 60 ft. wide. A fireproof pattern warehouse, approximately 100 ft. x 100 ft., and two stories high, will also be erected. This will be a modern daylight plant of the best brick and mill type construction, completely sprinklered throughout.

It is planned to break ground about May 1st, 1921, so that the plant will be complete and ready for occupancy November 1st, 1921. The company will invest in the neighborhood of $500,000, which will cover the cost of the buildings only.

When the new plant is complete there will be three companies operating in these buildings, namely, Crouse-Hinds Company of Canada, Limited; Harvey Hubbell Company of Canada, Limited; Hubbell-Mack Machine Screw Company, Limited.

E. G. Mack will act as managing director for all the above named three companies.

Business Firms Are Fined for Not Making Returns

Fines of $20 and costs were imposed upon 32 Toronto business firms, found guilty in the afternoon Police Court for failing to give the Dominion Government sufficient information concerning their business and the money taken in annually.

Making the Most of the Small Arms Department

Formation of Local Shooting Clubs Important in Developing Sales of Arms and Ammunition—Suggested Plan for Such Clubs —Movement is Growing in Canada—Successfully Adopted in Other Countries

AN important opportunity lies before the retail hardware dealer to-day in the development of a department that might be rightly styled "Small Arms and Ammunition Department." Have you one?

For the past three years one Canadian manufacturer has been conducting a department for the education of the Canadian boy in marksmanship. It has been growing apace, and bids fair to become a feature in every community where boy life thrives, and if there are no definite boy organizations at present, they can be formed.

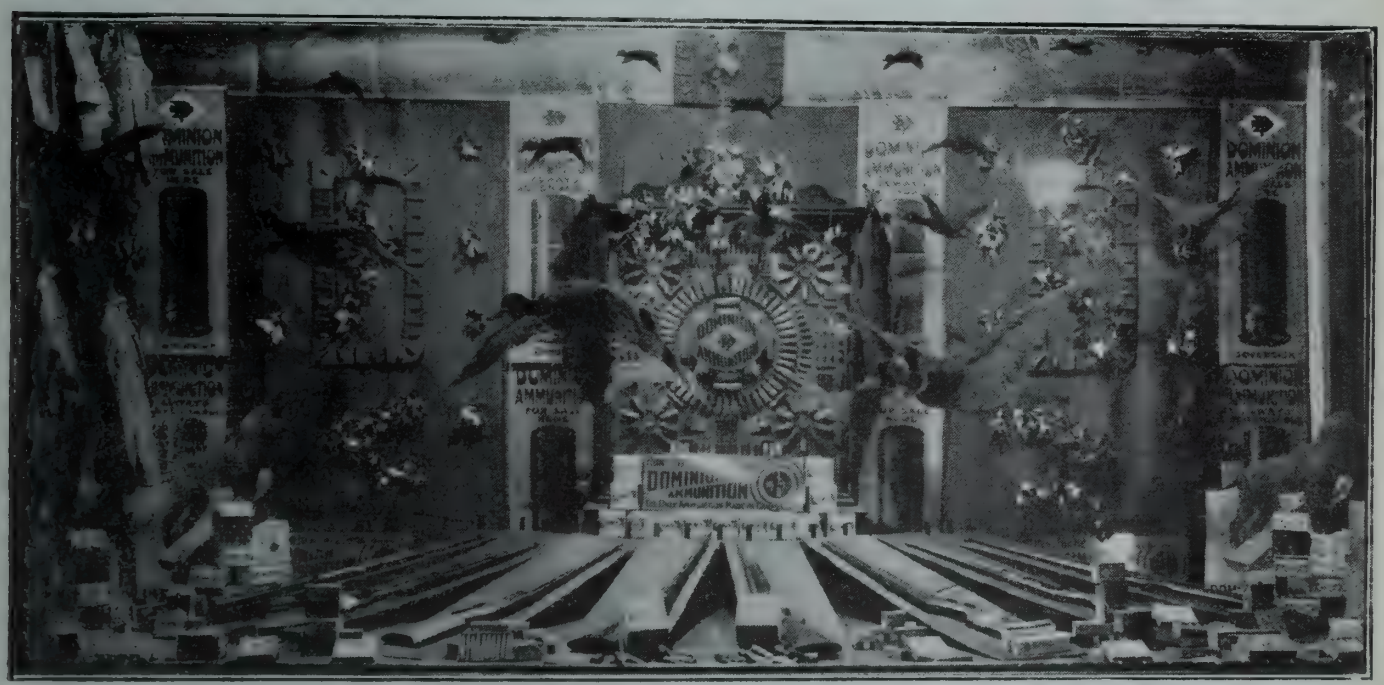
In discussing this feature with the representative of this firm, a man who is an enthusiastic shot himself, he stated to Hardware and Metal that the plan holds big things for all concerned—in his opinion—and especially for the hardware dealer. While the plan is not exactly new, it is one of those developments which require time and education. To put it "across" will require the best co-operation of the dealer, and the facts of the plan seem to be well worth close study on his part.

The Plan As It Is

A real Canadian boy is interested in the open. This very fact means that when he has the opportunity he will indulge — particularly in the favorable months of the year, in many a hike to the country — where nature holds sway uninterruptedly. But he will not content himself with a hike merely. He has a pair of hands as well as two feet, and these he will naturally want to use. One of the most logical desires — and one that is very generally manifest in thousands of boys—is that of handling a rifle. Frequently it needs no introduction, but there is one thing called for right here, and that is the education of the lad in the proper use of the rifle. A dangerous weapon in the hands of the careless and untaught, it may become the very best means of training the eye and steadying the nerves, and one of the best means of developing good citizenship that is possible. From these standpoints, as well as from many others, a linking-up by the dealer with this plan should suggest itself as worthy. From an unselfish standpoint the hardware man will be helping the betterment of the young life of his community, and from the more selfish or ulterior viewpoint he will reap financial returns.

In brief, the idea of Marksmen's Clubs is that of forming, in communities that will adopt the plan, clubs for the purpose of training boys in the art of marksmanship. While the plans may be followed as laid down, there is every opportunity to modify them, whether it is desired to plan indoor or outdoor shooting galleries. Membership in the

Continued on page 43.



An attractive small arms window arranged for A. M. Ballam Company, Limited, Halifax, Nova Scotia, by Jack Dalton, displaying an excellent showing of ammunition, shot gun, rifles, and other shooting accessories. The beauty of the display rests in the fact that great pains have been taken to build up a strong background. In the centre a large square panel is neatly arranged showing various styles and sizes of shot shells and also of sporting cartridges. This, with a hunter's coat suspended from the top portion on either side, and advertising matter suspended on either side, make an excellent showing. This was the drawing feature of the window. Not less important, however, are several lifelike figures of ducks "on the wing." This naturally attracted those possessed of hunters' instinct, and another cut-out of a dog, ready for the hunt, called attention to the display in a realistic manner.

On the side of the window, hunters' coats, rifles, and various accessories are displayed to advantage, while in the foreground are boxes of shells with covers removed and some of them displayed loosely near the glass.

On reclining slabs of wood, rifles are resting and this gives the interested onlooker an opportunity of sizing up a given arm for himself. To improve the fall appearance of the whole display, gold and red leaves were put against the background. The display, made during a recent carnival held in Halifax, attracted a great deal of attention on the part of sportsmen generally.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, OCTOBER 30, 1920

THE usual promise of consideration was extended by the Government to a labor delegation, which protested the luxury taxes as responsible for much unemployment, but a deaf ear cannot long be turned to the protests coming from merchants and others.

* * *

ONCE more the Board of Commerce has been disbanded. The position is more or less of a sinecure in any case and it is no wonder the Government has a hard time maintaining such an organization.

Sound Advice From Judge Gary

THAT further adjustments of prices in the iron and steel industry are required and that the trade might best face the situation with confidence and make such reductions as will again bring buyers into the market, rather than continue present conditions, with its consequent slackness in trading, was the subject matter of the address made by Judge Gary, chairman of the Board of the U. S. Steel Corporation, before 1,200 members of the American Iron and Steel Institute in New York.

This survey of conditions in the iron and steel industry is always an important one and it is conceded that Judge Gary has brought out the fundamental principles of the present market condition and pointed out how best to bring about a readjustment to normal conditions. He believes that the law of supply and demand will bring about reasonable reductions and that the tendency is toward a fairer basis. He points out that there is a selfish attitude shown, in that everyone is willing that price reductions should be made by others, but not by themselves.

When prices were advancing everyone in the trade was keen to take advantage of increased profits, and now that there is a tendency toward lower levels everyone is just as keen to see that they do not take a loss, or, at least, no more than they can help. Judge Gary, in the face of this situation, calls upon the people to "be reasonable and just, reducing our prices if and when other reductions and costs permit, and then, with level heads, clear minds and honest convictions, stand solid as against panic or lack of confidence in the industrial situation."

Death of F. H. Whitton

THE death of F. H. Whitton, vice-president and general manager of the Steel Company of Canada, Ltd., referred to elsewhere in this issue, removes a prominent figure in the iron and steel trades. Mr. Whitton has been interested in this branch of business for many years, was always an outstanding figure at trade conventions and was looked to as an authority on matters pertaining to hardware and other products of iron and steel. He was invariably a speaker at the conventions of the Canadian Wholesale Hardware Association and his annual survey of conditions in the basic industry in which he was interested was always looked forward to as one of the important addresses. It is truly significant that at the recent convention of this association about two weeks ago Mr. Whitton made the statement that he felt it was time some new face was present in his stead, and it is much regretted that the expression bore more truth than anyone then anticipated.

Canadian Goods in Foreign Markets

THERE are many important developments taking place in Canadian commercial affairs to-day which will have a distinct bearing on the future status of Canadian export trade. Wherever Canadian products have been marketed in foreign countries they have been well received and encouragement is thus given manufacturers. Evidence that Canadian manufacturers are alive to the possibilities of such trade is found in the increasing interest being taken in foreign trade developments, fairs, etc. The war undoubtedly gave Canada an unique opportunity to develop a large export trade, for, from 1914 to 1918, Canada exported large quantities of goods, which had not formerly figured in anything but domestic trade.

Canada is developing a mercantile fleet capable of carrying her products to the markets of the world, and the latest move is the securing of a number of warships, which will form the nucleus of a Canadian navy sufficient to protect coastwise shipping and later to guard Canada's channels of trade to the world's foreign markets. The Canadian Government Merchant Marine is already one of the largest in the world, operating 38 vessels and 28 more under construction. There is now a service every ten days to London and Liverpool, monthly service to Wales, weekly to West Indies, monthly to South Africa, Australia and New Zealand. A service is now commenced to India, Ceylon, Straits Settlements, Java, China and Japan.

The possible development of the St. Lawrence Waterways scheme, which will allow ocean vessels to reach the inland ports on the Great Lakes, would also be a favorable factor in the export trade situation.

Auto Accessory Legislation

LEGISLATION affecting motorists in the United States is oftentimes followed by similar legislation in Canada, certain difficulties arising in that country first, due to its greater density of automobile and other traffic in many places. In this connection it is interesting to note that some U. S. insurance companies are planning to give better insurance rates to motorists who use such accessories as bumpers, windshield cleaners, fire extinguishers, locking devices, etc. There is no reason why such preference should not be expected for the prime advantage of such accessories is their value in helping to prevent accidents or lessen the effects from damage. Another point of interest is that Safety Leagues are asking for legislation regarding the enforced use of lights on all wheeled vehicles, the use of traffic signals on automobiles, greater use of chains, etc. The wider employment of such lines as are mentioned will not only enable the motorist to drive with a feeling of more security, but will help to curtail the annual list of accidents and fatalities from this cause. Dealers should watch carefully legislation along the lines suggested.

Judge Gary Sanely Optimistic About Future

(By a Staff Representative)

NEW YORK.—The address of Judge Gary to the members of the Iron and Steel Institute is looked forward to each year as a statement that will give the estimate the steel world of United States has of business conditions, and prospects of their betterment or otherwise.

Judge Gary spoke plainly on this matter. There was no effort to mince matters. When the speaker was through reading his address there was a feeling that he had indulged to too great an extent in a description of affairs in Europe, but when, in the lobbies afterward, steel men started to analyze the statement, they found that he had put his finger on the real situation, viz., that it was possible to resist price deflation to the point of keeping buyers out of the market, or, on the other hand, make the concessions necessary to keep the buyers in the market.

"All, or nearly all, of us have for months been unable to supply the demands of our customers as to quantities or deliveries, and our prices, considered as a whole, have resulted in profits," he said. "As a matter of course some adjustments will need to be made. The average of the general scale ought to be reduced equitably and relatively. Without referring to individual cases or lines of general business, I believe in many instances prices have been outrageously high. This observation applies more especially to middlemen, so called, and to smaller departments of industry. It also includes employees in certain trades; but it does not pertain under present conditions to the masses of workmen.

"Labor questions are always under consideration in this country and others. It should be constantly borne in mind that, in order to secure the best results to both employee and employer, mutual confidence and friendly co-operation are essential.

"The present tendency is toward a lower, more reasonable and fairer relative basis. The whole community desires and strives for this. The difficulty is found in the fact that every individual is perfectly willing that all others shall make reductions—the larger the better.

Selfishness Expected

"As there was more or less a scramble for higher and still higher prices when they were advancing, there will be just as much selfishness in the enforced use of brakes when there is a tendency toward decreasing prices. Now a general public, including particularly those who are neither sellers nor buyers to a large extent, will in one way or another bring about a fair and reasonable adjustment of prices. The law of supply and demand will be the principal factor.

"We naturally ask ourselves what shall we personally do; what shall be our attitude in these circumstances? I answer: We must evidence the same disposition which was displayed before the Industrial Board in March, 1919, when our Steel Committee co-operated with the Government's representatives in the endeavor to secure a general, equitable, orderly and methodical reduction in the prices of all commodities and services. We would have succeeded except for the sudden change in the attitude of the administration which resulted in the abolition of the Industrial Board, and thus limited the leaders in the industry to their own resources.

"Notwithstanding that episode, we have done since then much to prevent unreasonable advances, and at present we are called upon to exert a further steadying influence upon the general situation. Let us be reasonable and just, reducing our prices if and when other reductions and costs permit, and then, with level heads, clear minds and honest convictions, stand solid as against panic or lack of confidence in the industrial situation. Let us strive to be right. If we are right we can be determined and courageous. Let us as individuals, consider the interests of all others. Our business is basic. It is perhaps one of the most important. We may, we must, exert an influence for stability throughout the business world at a time when readjustments are more than usually liable to provoke disturbed conditions."

Progress in France and Belgium

Judge Gary's comment on the business outlook concluded an address devoted to the situation in France and Belgium, as he found it on his recent trip abroad. He described graphically his trip over the devastated regions of the two countries and told in detail of the reconstruction work being carried on. He said the virulent germ of Bolshevism has been brought to these countries by vicious, unworthy and selfish persons, but that the Governments are strong and vigorous and will have the support of the large majority of the people in the protection of property and home and family.

"On the whole I am of the opinion that both France and Belgium should be well satisfied with conditions and prospects," he said. "They are making good progress and with increasing momentum. They are in better shape than I had expected to find them."

Judge Gary said he was satisfied there was no ground for the assertion that Frenchmen were much dissatisfied with the attitude of Americans concerning the after effects of the war. He said the French are very friendly toward Americans and are deeply grateful for the service rendered during the war.

The iron and steel industry of United States attend the Institute meeting. The corporation heads and the independents are always there. It is the big chance the technical and operating heads have to meet the big executives, and also it is the big chance the former have of making the latter sit still and listen. When Judge Gary finishes, the meeting goes on with the discussion of highly technical matters. The steel barons may understand some of the discussion, but the chances are that much of it goes over their heads. But they do not bolt. They occupy the front seats and take their medicine in spite of the fact that practically all the steel men of the country are waiting around to meet them—for, as a matter of fact, there is a general scatteration of the members as soon as Judge Gary is through with his address.

One hears many exchanges of market news—for instance, that a fairly large tonnage of pig iron has sold at $40—that premium mills are doing in some cases as low as six cents on black sheets for Canada, with fair delivery, against 5.35 of the corporation, with no promise of quick action in the matter of shipment.

The rumors that the corporation might advance prices to cover the $50,000,000 which has been added to its freight bills, did not materialize in fact. If there had been any intention of making such a move, or had there been any necessity for it, three months ago was the time when it could have been put across. It would have a hard time trying to gain popularity now—in fact it could not be reconciled with the trend of Judge Gary's remarks, which were all pointed and tuned toward lower levels as soon as possible.

News of Western Canada

The Romance of a Western Hardware Firm

Interesting Details of the Small Beginnings of Those Who Later Formed the Firm of Merrick-Anderson Co., Winnipeg, Recently Merged With Marshall-Wells Co.

IN view of the recent merger of the wholesale hardware interests of Merrick-Anderson Co., Winnipeg, with Marshall Wells Co., it is interesting to read of the early days of pioneering in the prairie country of those who laid the foundation of the former company. Dealing with this subject the Manitoba Free Press printed the following editorial in a recent issue:

"Almost 40 years ago, in the earlier days, four young men, engaged in business here, roomed for some time together. All afterward became prominent and well known in the commercial and financial life of the city.

"Adjoining the apartment where the four young men lived was a smaller room, seven feet square. Two of the young men rented this space, and furnished it with a table, which cost $1.90, and a chair which cost 60 cents. They also secured the loft of a nearby stable for the purpose of a warehouse. One of these young men was Mr. T. A. Anderson, recently deceased, and the other was Mr. George Merrick. The first note which they discounted at the bank was for $500, and when it matured, it was renewed. It was finally paid by a loan from the father of Mr. Merrick, who, for many years, was an honored clergyman of the diocese of Montreal. It was stated that this $500 was the result of the savings of the clergyman through a period of 20 years, the emoluments of the faithful servants of the church being even more scanty in those times than in the present.

Supplied Goods to Early Settlers

"Beginning in this extremely modest and unassuming way, the firm of Merrick-Anderson has continued an uninterrupted business career to the present time. The city and province have had their vicissitudes in the interval, and hundreds of business enterprises have come and gone, but this organization was one of the few which have survived through the decades of trial and change. The firm never became very large, but it was always solvent, and through its activities in various lines it contributed to some extent to the development of the West. It supplied goods to many thousands of the earlier settlers, and wherever its representatives went they carried with them from the house good business principles and ideals.

"Both Mr. Anderson, now dead, and Mr. Merrick, the surviving partner, enjoyed the confidence, respect, and esteem of the business community of Winnipeg in a high degree. It was said of these partners many times that Mr. Merrick got the business, and that Mr. Anderson kept it. In recent years Mr. Merrick in a quiet way has rendered an important public service. He has taken a very deep interest in agriculture, and to the utmost limit of his knowledge and ability he has sought to foster it. He has for years endeavored to bring about a better understanding between the farmers and the financial institutions. He has consistently advocated the view that industrial development could safely be left to take care of itself, and that the entire effort of the Government ought to be devoted to the development of the agricultural interest. He was always ready with his money when it could be spent in the advancement of this cause, and was equally prepared for any personal service.

"As has already been announced in the news columns, Mr. Merrick has now decided to merge his business with that of the Marshall Wells company. Mr. Merrick becomes a director of the Marshall Wells company, and will confer on matters of policy of this larger concern. His many friends in the city express the hope that he may for many years continue to take the same interest in the public life of the province, and that he may continue to give his support to any agencies which are seeking the development and betterment of farm life here."

Sifton, Man.—Chas. Walwun has suffered a loss to his hardware store by fire.

Death of James J. Flemming

Winnipeg, Man.—James J. Flemming, for many years connected with the hardware trade, and latterly representing Merrick-Anderson Co., Ltd., died recently at the King Edward Hospital, Winnipeg. His hardware career was commenced when he joined the Chinic Hardware Co., Quebec City, as a junior. He remained with this firm until joining the staff of Lewis Bros., Ltd., Montreal, with whom he was connected until he went West in 1907 to accept a position with Miller Morse Hardware Co., Winnipeg, as chief of the invoicing and pricing department. He later joined Marshall Wells Co., Ltd., in the same capacity, and subsequently entered the employ of Merrick-Anderson Co., Ltd., with whom he was engaged at the time of his death.

Annual Convention of Institute of Mining

The annual convention of the Canadian Institute of Mining and Metallurgy, held at the Fort Garry Hotel, Winnipeg, is one of the most important gatherings ever held in the city. Delegates were present from all the provinces of Canada, and also from the United States. Representatives of gold, copper, nickel, steel, iron and silver mining corporations were present, and the coal mining companies, not only of the entire West, but of the East, also had delegates there. The asbestos, gypsum, building stone, and other mineral industries were represented as well. The proceedings lasted three days. Papers on the coal resources of the West, its transportation, etc., were read by the leading coal authorities.

Western Notes

Calgary, Alta.—The Hardwareteria has commenced business here.

Darmody, Sask.—Brown Bros., hardware dealers, have suffered fire loss.

Southey, Sask.—The Southey Hardware Co. has been burned out.

Pelly, Sask.—Lewis & Orchard are commencing a hardware business here.

Winnipeg.—W. J. Fulton, manager of the Dominion Radiator Company, has been appointed member of the Joint Council of Industry. He will replace John Stovel, M.L.A., on the board. Mr. Stovel resigned when he was elected member of the Legislature.

The Pig Lead Situation To-day

IN discussing the pig lead situation with John Irwin, vice-president and managing director of McArthur, Irwin Ltd., Montreal, Mr. Irwin referred to advices just received from their London office. The situation, as it obtains, will be of interest to Hardware and Metal readers. The cable states:

"The present position of pig lead supplies is that the arrivals from abroad during October are 8,500 tons more than are now en route to England, consequently a marked decline in stocks will shortly be apparent. In addition the shipments from Spain have been from stocks that have been piled up at the smelters, and liberal supplies from this source will not continue indefinitely as the output of the principal smelters has been curtailed at least 30 per cent., and it is the unanimous opinion that the current selling prices are far below present costs.

"If the Australian strike is settled upon the basis of the recent award it must not be forgotten that the lead output from Broken Hill will be reduced by 30,000 to 40,000 tons annually. Therefore under normal conditions an advance of from £6 to £7 would have been probable, but as might be expected the unsettled financial and industrial condition was reflected in the early part of the week in the lead market. A firmer tone is now evident and the market closed decidedly stronger at £34 17s. 6d."

Elucidates New Customs Ruling

IN view of the misunderstanding of the Customs Department ruling regarding the valuation of imports for duty, a definite ruling has been issued, as follows: All invoices shall be made out in the currency of the country when the goods are imported, or in the currency in which the goods are actually purchased. And in computing the value for duty of such currency the rate shall be based upon the actual value of the standard coins or currency of such country, as compared with the standard dollar of Canada. It will be necessary for the exporter to put on all invoices the following declaration:

The fair market value for home consumption at the time shipped shown on this invoice is £.. s.. d.. in paper currency, and is equivalent to £.. s.. d.. in gold sovereigns, as compared with the Canadian dollar, on the basis of $... to the pound sterling.

To make that perfectly clear we may give the following example: Supposing that an invoice shows that the fair market value for home consumption at the time shipped is £100 in British paper currency, and the rate of exchange on the said date is $3.9946, then the equivalent in gold sovereigns would be £80, on which latter amount the duty would be payable at $4.86 2-3 to the pound.

The British exporter will, of course, obtain the current rate of exchange from his banker on the day the invoice is made out, and the Canadian Customs will issue a bulletin weekly, showing the minimum and maximum rates for the week, for the purpose of verifying the exporter's statements.

The Customs Department will allow refunds for the amounts of duty overpaid since July 22, 1920, if certified amended invoices are forwarded with the above statement and signed by the exporter.

The pre-war values of standard currencies are still recognized whether of gold or silver. The difficulty is that no European Government would acknowledge that its paper currency has depreciated from its standard gold and silver currency, even if it had stopped payment in specie.

Therefore, exporters make the above declaration for the benefit of importers who pay the duty, not acknowledging depreciation of their own currency, but only relatively to the Canadian dollar.

New Plant at Allenby, B.C.

Allenby, B.C.—The plant of the Canada Copper Corporation, Ltd., at Allenby, B.C., began operations on October 18. Lack of transportation facilities prevented starting operations on July 1, 1919, when the place was ready.

SMALL ARMS DEPARTMENT

Continued from page 39

junior department is open to boys of 12 to 19, and in this way cadets, boy scouts, church clubs and Y.M.C.A. boys' departments may be embraced in any plan that interested parties desire to develop. It will thus be seen how elastic the application of the plan can be made, and it is for this reason that it should have a broad appeal to the trade.

One of the helpful features of the plan is that a dealer may call upon a booklet published by this manufacturer for guidance in forming or starting the formation of a club in his own community. But supposing he hasn't the time to do this personally, he will be able to enlist the expert help of a marksman — a representative of the company who will be asked to call and discuss the matter with the dealer, or better still, this expert would arrange to call on the principal of the high or public school and arrange to give the boys interested in such a plan a 15 or 20 minute talk, after four, outlining the plans of the club and enlisting their support. All little details of the scheme are thus made clear to the local enthusiasts, and many of the school masters or principals are taken with the idea and sometimes support it by becoming personally interested. They, perhaps to a greater extent than others, are quick to sense the advantages of the plan in cultivating in the boy manliness and self-reliance, keen observation, etc. The dealer could at least interest himself to the extent of introducing the school principal, the local master of the boy scouts or leader of such local club as may have been formed. In this way he would start the ball rolling, and the plan would doubtless gain momentum as time went on.

The possibilities of development as they affect the hardware trade are at least twofold. The sale of small arms and of small arms ammunition would be greatly stimulated, and the extent to which these two lines will sell is dependent upon the size of the community, but even more upon the aggressiveness with which the formation and starting of clubs is followed.

It is just at this point that the marksmen's junior department steps in, making it decidedly interesting for club members. After a decision has been reached to form a club, a supply of targets is furnished. These are of cardboard (Canadian standard 25 yards) central bull's eye ½ inch, counting ten points, outer bull, counting nine points, and rings counting 8, 7, 6, 5, 4, 3, 2 and 1 points. These targets, after being fired at in accordance with the club rules, with any standard "22" rifle, are forwarded to the headquarters and given so many points. Pins are awarded as follows, to contestants:

For Bronze pin.—Ten targets scoring 50 points each; Silver pin.—Shooter must have won bronze pin and also forward ten targets scoring 58 points each, or better; Gold pin.—Shooter to have won both bronze and silver pins and must send in ten targets scoring 65 points or better. Only one pin may be shot for during period of 30 days.

There are few boys, if any, who are not anxious to enter a competition where there is a reward at the finish. Any individual is the more interested in a competition when there is some mark or merit if it be earned.

The outlook seems favorable for the boosting of this idea. It will probably be necessary for the average hardware dealer to "set the ball rolling," and when matters get away to a start he will find opportunities for development by offering moderate prices on ammunition, etc. He may also cultivate within the growing generation a keener appreciation of the fine points of a better rifle, and, in the years to come, he will have cemented the growing lad—the man of the next ten years—to him for all that he needs in sporting goods, and will also have helped in the development of a better, brainier and more worthy type of citizenship. Have you tried the plan out? If you have, let Hardware and Metal have your experience to pass along to others.

Events in the Trade

Business Changes

Harriston, Ont.—W. J. Pike has been admitted into partnership with Ashley Blair, hardware merchant.

New Firms

Windsor.—Jas. R. Johnston, for the past ten years Western Ontario representative for H. S. Howland Sons & Co., Toronto, and D. H. Howden Co., London, Ont., has purchased the hardware business of D. L. Wigle & Son, Windsor. The store has been considerably altered.

* * *

Toronto.—J. A. McFadden has commenced a hardware business at 512 Danforth Avenue, under the name of the Danforth Hardware Co.

* * *

Toronto.—L. W. McNeil has commenced a hardware business at 1997 Dundas Street West.

Incorporations

Toronto. — The Dyrob Steel (Consolidated), Limited, has been incorporated with a capital of $1,000,000 to manfacture and deal in steel, iron and tools, their chief place of business to be at Toronto.

* * *

Montreal. — Ira Sessenwein, Ltd., has been incorporated with a capital of $30,000 to manufacture and deal in all kinds of iron and steel products, their chief place of business to be at Montreal.

Obituary

Toronto.—John Ross, of the hardware business of John Ross & Son, is dead.

* * *

Montreal.—John Norris, assistant inspection superintendent of the Northern Electric Company, Ltd., is dead. The late Mr. Norris was with the Northern Electric Company and its associated companies, since 1883. Deceased was 55 years of age.

* * *

What is described as one of the most impressive tributes ever paid to any man in connection with the glass industry was that in evidence at the funeral of J. R. Johnston, president of the Johnston Brokerage Co., Pittsburgh, and the Johnston Glass Co., of Hartford City, Ind., in Pittsburgh. Glass manufacturers, jobbers, workers, were largely represented among the mourners. Among the business associates who attended the funeral was Joseph Taylor, McKinnon Bldg., Toronto.

John R. Johnston, Jr., has been elected to the vice-presidency of Johnston Brokerage Co.

* * *

Hamilton, Ont.—The death of Frank Leslie Nash, the Steel Co. of Canada, Ltd., is announced. Mr. Nash was 54 years of age, and had resided in Hamilton for 51 years, 33 of which he had spent in the employ of the Steel Co. of Canada. He was prominently identified with several fraternal organizations.

Personal

W. N. Andrews, chairman of the board, Pratt & Lambert, Inc., is now at his winter home at Montesita, a suburb of Santa Barbara, Cal.

* * *

Toronto.—Fred R. Whittall, managing director of A. R. Whittall Can Company, Limited, Montreal, spent a few days in Toronto during this week.

* * *

Toronto. — Among those who attended the funeral in Hamilton, of the late F. H. Whitton, vice-president of the Steel Co., of Canada, Ltd., were J. H. Webber and C. J. Knott of the local office of the Steel Company of Canada; T. B. Williamson, of H. S. Howland Sons & Co.; James Hardy, secretary of the Canadian Wholesale Hardware Association.

* * *

Montreal.—Jas. Dowling, past president Canadian Wholesale Hardware Association, returned from the Atlantic City Convention on Tuesday. Archie McFarlane, of A. McFarlane and Co., is expected home from an extended trip to the Old Country this week. W. A. C. Hamilton, of the Consumer's Cordage Co., Ltd., Montreal, returned from a trip to the Pacific Coast.

* * *

Montreal.—Gordon Hale, of the sales staff of A. McFarlane and Co., Montreal, has returned from an extended sales trip through Ontario.

* * *

Montreal.—W. Twible superintendent Graham Nail Works, was in Montreal this week.

* * *

Montreal.—George Henderson, president of Brandram-Henderson Limited, is away to the Maritime Provinces on a tour of inspection. W. G. Harris, Sr., president of the Canada Metal Company, was a Montreal visitor during the week.

* * *

Guelph, Ont.—T. A. Keating, Bond Hardware Company, has been elected president of the Canadian Club of this city.

"Armco" in Moving Pictures

Something which the naked eye cannot see—the boiling of an incandescent mass of molten metal in an open hearth furnace, is shown in closest detail in motion pictures recently filmed at the Middletown, Ohio, plants of the American Rolling Mill Company. This "movie" is soon to start on a tour of technical schools, engineering societies, and sales conventions where the study of results in modern metallurgy is of paramount interest.

Canada Foreign Trade Increased $220,230,000 in Six Months

Ottawa. — Figures issued by the Department of Customs show an increase in Canadian trade for the first half of the fiscal year ended September 30, amounting to $220,230,040, as compared with the same period in 1919. The grand total was $1,274,878,592.

Opening Canadian Branch

Hamilton, Ont.—S. E. Ryder, Canadian manager of Moto-Meter Company of Canada Ltd., has opened the company's plant at Hamilton, and a complete line of moto-meters will be manufactured.

Whittall Can Company Appoints New Manager

Montreal.—H. R. Phipps has been appointed the Toronto manager for the A. R. Whittall Can Company, Ltd. Mr. Phipps assumed his duties at once and will occupy offices at 202 Royal Bank Building.

Popularizing the Use of Cement

Montreal. — An interesting address was delivered in Montreal last week by J. R. Curtis, of Chicago, a director of the extension division of the Portland Cement Association of that city. The work of that association is not one of selling, but of service, and even though the uses of cement have grown so extensively during recent years, Mr. Curtis pointed out the assistance that was available for dealers through efforts such as those exerted by his association.

Canadians Attend Atlantic City Convention

Among the Canadian hardware men in attendance at the big convention of the National Hardware Association held at Atlantic City, N.J., last week were: A. E. Dykes, J. H. Ashdown Hardware Co., Winnipeg, Man.; S. Rae, D. H. Howden & Co., London, Ont.; Col. Hatch, Canada Steel Goods Co., Hamilton; H. S. Alexander, Wood, Alexander & James, Hamilton; D. Griffith, B. Greening Wire Co., Hamilton; T. B. Williamson, H. S. Howland Sons & Co., Toronto; E. A. Gilverson and T. Lawson, Rice Lewis & Son, Ltd., Toronto; S. R. Kennedy, Kennedy Hardware Co., Toronto; Joseph Dowling and W. McCutcheon, Caverhill, Learmont & Co., Montreal; Geo. Davis, Hardware and Metal, Toronto; James Hardy, Canadian Wholesale Hardware Association, Toronto; Col. Starke and Herb Seybold, Starke, Seybold & Co., Montreal.

Canada Chief Importer of Tin and Terne Plate

Canada purchased almost one-third of the total exports of tin plate, terne plate and taggers' tin from the United States during August. These exports during that month aggregated 36,890,671 pounds, worth $3,061,972.

Iron Nails Are Taken For Tips in Russia

Halle, Germany.—"When we left for Moscow several months ago, Daumig and Stock (members of the German economic mission to Russia) advised me to fill my pockets with iron nails, one of which they said would readily be accepted throughout Soviet Russia in payment for courtesy or service."

This information was conveyed by Herr Crispien to the delegates of the Independent Socialistic convention.

Prospects Bright for Brazilian Trade

Montreal. — Returning to Montreal after an extended trip through the Maritime Provinces, during which he looked into trade possibilities with Brazil, Major E. L. McColl, newly appointed Trade Commissioner to that country, thinks prospects are bright for trade connections in that country.

Personal

Toronto.—Mr. Geo. A. Marshall, of Marshall, Son & Bunney, 39 Richmond St. East, Toronto, sailed on S.S. Metagama on October 23rd for England on a business trip and hopes to return about the middle of December.

Montreal.—J. R. Anderson, manufacturers' agent, 36 St. Dizier St., Montreal, has been appointed representative in the Province of Quebec for W. D. Shambrook & Company, aluminum ware manufacturers of Hamilton, Canada.

F. H. WHITTON DIES IN HAMILTON

General Manager of Steel Co. of Canada Failed to Rally from Operation

Hamilton. — F. H. Whitton, general manager of the Steel Company of Canada, died at St. Joseph's Hospital, Hamilton. Mr. Whitton failed to rally from a serious operation performed on October 21.

In the death of Mr. Whitton, Hamilton loses one of the leading figures in its commercial life. Deceased was born in Northamptonshire, England, 61 years ago, and spent his early youth in that country. He attended college at Cambridge, but when 18 years of age came to Canada and entered the employ of the Grand Trunk Railway at Montreal. He later removed to the United States, but returned to Canada to assume the management of the Ontario Tack Company, which position he held till 1907. When the Steel Company of Canada was formed Mr. Whitton was appointed assistant general manager and in 1916 became general manager.

F. H. WHITTON.

Mr. Whitton was prominent in social and religious life, as well as in the commercial world, being a devout Roman Catholic and a member of many clubs. He attended St. Joseph's Church. His wife and one son, Corbett F. Whitton, assistant secretary of the Steel Company of Canada, survive.

Incorporation has been granted to the British Radio Corporation of America to make, buy, sell, lease, etc., electric appliances of every description, including wireless, telephone apparatus, etc.

Death of Thomas Birkett

Ottawa.—The death is announced of Thomas Birkett, president of the Thomas Birkett, Son & Company, wholesale hardware merchants, Canal Street, Ottawa, and former mayor of this city. Mr. Birkett was born in the city on February 1, 1844, his father having come over from England in 1837 from Cokermouth, Cumberland. In 1866 Mr. Birkett began his career as a store proprietor by purchasing a small business at 24 Rideau Street, and rapidly forged ahead. Business did not stop Mr. Birkett from doing his share as a citizen, and he ably filled the offices of public school trustee, alderman, mayor, and Member of Parliament, representing his home city.

Mr. Birkett is survived by his second wife, one son, T. M., vice-president of the firm, one brother, one sister, two daughters-in-law, and a host of grandchildren. A Conservative in politics, a Methodist in religion, and a mason of over 50 years standing, a director of public institutions, and a philanthropic purse at the disposal of the sick and needy, left a record of sterling worth that will live for many years.

Merchants Ask for University Course

"We hope at our convention on the 17th of next month to make representations to the Government which will result in their establishing at the University of Toronto, as soon as possible, a course in business ethics, salesmanship, accounting and other subjects of interest to the retail merchants," said Mr. W. C. Miller, secretary of the Ontario branch of the Retail Merchants' Association.

Not only would the clerks in retail stores benefit by this, Mr. Miller said, but many merchants were prepared to take the course. He urged the establishment of this course at as early a date as possible, as the retailers were keenly interested in it as an aid to their business.

Canadian Imports of Hardware and Cutlery

Canadian imports of hardware and cutlery during the four months ending July in 1920 show an increase of nearly a million dollars over the same period in 1919.

The imports and origin are as follows:

From United Kingdom, four months ending July, 1918, $93,761; in 1919, $159,632; and in 1920, $630,449.

From United States during same period in 1918, $1,286,017; in 1919, $938,443; in 1920, $1,354,235.

Other countries in 1918, $33,060; in 1919, $19,908; in 1920, $23,587.

Total: 1918, $1,412,838; 1919, $1,117,938; 1920, $2,008,271.

Letters to the Editor

Communications expressing the opinions of subscribers concerning matters of interest to the trade.

TURNOVER TAX

The Editor, Hardware and Metal.
Dear Sir:—

The writer has read with interest your article on the proposed new tax. In a previous letter on this matter I mentioned the fact that under the General Turnover Tax, applying to manufacturer, wholesaler and retailer, all classes of business pay the same rate of tax. The concern with the large turnover and small net profit is hit hard, while a smaller concern with a much better net profit is let off very easy. Our wholesalers are up against this problem now, but can cover same, as their invoices are bulky. Now, the retailer in handling small goods must sell them by the piece or more, and in the case of a five cent sale must add a cent to the transaction or absorb the tax. Of course, if this change is made law we will all have to do our best to take care of ourselves in the collecting of the tax. It has been one colossal muddle from the beginning and has shown that not many of the different classes of business have been consulted. Whatever the decision is we hope that it will be kept permanent for a year at least, so that a thorough trial can be made. There is also another side to the turnover tax that, so far as we have read, has been overlooked, and that is the fact that the average poor man, of $900.00 or $1,000 salary, will pay the bulk of the tax, while the single people and couples without children will get off easy. The same applies to the people of better salaries that do and do not have families.

Yours truly,
DAKIN BROS.,
Digby, N.S.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

REPAIRS FOR OAKLAND STOVE

Patterson & Park, Dummer, Sask.—Kindly advise us where we can obtain repairs for Oakland cook stove.

Answer.—The North Dighton Stove Co., North Dighton, Mass., are the makers of this stove. They have no Canadian agent or distributor.

"GOLDEN RULE STOVE"

Leith Bros., Prince George, B.C.—Can you inform us of the name of makers or agents of the Golden Rule stove?

Answer.—The only maker of a stove of this name we have been able to discover is A. Weiskittel & Son, Baltimore, Md., U.S.A. We have been unable to trace a Canadian agent.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2119. **Hardware, etc.**—A commission agent in Barbados, in good standing and representing a number of English firms, is desirous of obtaining a Canadian connection for general hardware, including such lines as valves, stop-cocks, etc., for machinery; also nails, locks, etc.

2220. **Hardware and metal goods.**—A firm of commission agents in Port of Spain, Trinidad, and having a permanent branch office in Demerara and covering the West Indies, are desirous of getting in touch with Canadian manufacturers of hardware and metal goods of all kinds.

2228. **Hardware.**—A Rhodesian firm, with branch offices at Bulawayo, Rhodesia, and Beira, Portuguese East Africa, wish to get in touch with Canadian manufacturers of hardware of all kinds. Catalogues, together with price lists, requested.

2229. **Iron and iron products.**—A firm in Jassy, Roumania, are desirous to receive quotations c.i.f. Roumanian port, as well as other particulars, from Canadian firms in a position to export iron and iron products (tools, utensils, stoves, etc.)

2230. **Steel baling wire.** — An Ormskirk firm ask to be placed in touch with exporters of Canadian grain and steel baling wire used for pressing hay and straw by steam.

2222. **Hot-water heating stoves.**—A Devonshire firm wish to get into touch with Canadian manufacturers of hot-water heating stoves.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

CANNON PUMP OILERS

A new catalog has been issued by the Cannon Oiler Co., of Keithsburg, Ill., listing and describing the pump oilers made by this firm.

The Cannon oiler is a "force pump" delivering oil instantaneously to bearings and machinery parts needing oiling, saving time and eliminating danger, it is said, owing to the fact that with the extension spouts and the force pump attachments of these oilers oil can be pumped as much as 22 feet straight upwards and delivered at any angle and the danger of getting caught in revolving shafting, moving belting or dangerous pulleys is done away with.

The catalog illustrates the different styles of pump oilers made by the company; oilers are made for various needs, such as tractors, farm implements, as well as for all machinery in mills, factories and work shops, etc.

The construction details of the Cannon pump oiler are shown and described. All parts are interchangeable and pump leathers working in oil as they do rarely wear out and can be easily renewed if necessary.

The makers point out that the oilers will pay for themselves in a very short time by cutting down oiling time. No time is lost climbing ladders and manoeuvering same through the shop.

The Cannon Oiler claims to be the largest exclusive pump oiler manufacturers in the world.

ALUMINUM APPLICATIONS

The British Aluminum Co., Ltd., 265 Adelaide St. W., Toronto, Ont., have issued a booklet entitled "Aluminum Applications," showing a few of the many uses of aluminum. Some of the uses for this metal as illustrated are, automotive work and castings, aeroplane and engine construction, public passenger and commercial service vehicles, storage vats for nearly every industry, electric work of all descriptions, culinary utensils of every kind, bathroom fittings, and there is hardly an industry that does not find a use for aluminum in some shape or form.

The British Aluminum Co., Ltd., with head offices in London, Eng., have reduction works in Scotland and Norway, with mills in England, Scotland and Ireland. The New York office is 165 Broadway, and the company have branches and agents all over the world.

Aluminum publications are published by them dealing with different industries and those interested in the metal are invited to write or call at the Toronto office.

AUTOMOTIVE EQUIPMENT

A bulletin is just off the press, issued by John Millen & Son, Ltd., 321 St. James St., Montreal, and 53-57 Adelaide St. W., Toronto, illustrating some of the recent additions to their line of automotive equipment and automobile accessories.

The price list is printed on a sheet separately and is perforated so that it and the other pages can be added by the dealer to his regular Millen catalogue.

Attention is drawn to the line of jacks listed. The firm states that these jacks are representative of the British high standards, and are capable of handling all jobs up to the largest loaded truck with ease.

A copy of bulletin will be sent on request.

"MAPLE LEAF" STOVES AND FURNACES

A new catalog, No. 26, of the "Maple Leaf" line of ranges, heaters and furnaces manufactured by the Beach Foundry, Ltd., Ottawa, Ont., is just off the press.

The firm draw attention to the new lines, the "Falcon" and "Emblem" ranges, and the combined heater and cook stove under the name of the "Composite."

The Composite has proved a popular seller and is much in demand for flats and houses, where space is limited.

Besides the different ranges and cook stoves, the various styles of Quebec heaters, with or without grates, and with extension tops, are featured, and Shanty steel ranges and camp heaters are also manufactured and listed.

The Beach Foundry are makers of four types of furnaces for coal and wood, and the usual lines of cauldrons, kettles, feed cookers, registers, etc., are listed and shown.

The catalog is well printed and special features are the lists for ordering repairs and the instructions and directions for setting up and operating stoves and ranges and showing common faults and how to correct them.

Stove dealers are invited to write for a copy of this catalog.

Form New Firm

Montreal.—Charles E. Adcock and David Brewer have entered into partnership as manufacturers' representatives, with offices at 222 St. James street, Montreal. Both Mr. Adcock and Mr. Brewer are well known to the Canadian hardware trade, having covered the country from Newfoundland to Vancouver for many years. Mr. Adcock joined the firm of A. MacFarlane and Company, Ltd., Montreal, six years ago, and represented them throughout Canada, calling on the hardware trade from coast to coast. Prior to this he was associated with the wholesale hardware firm of McLennan, McFeely and Co., Ltd., Vancouver.

Mr. Brewer's association with A. McFarlane and Company, Ltd., covered a period of twelve years, he too travelling in all parts of Canada in the interests of this firm. Prior to this, Mr. Brewer was connected with the wholesale hardware firm of Caverhill, Learmont and Company, Montreal.

The new firm has secured several lines for Canada, having been appointed representatives for the Miller Lock Company, Philadelphia; Enterprize Manufacturing Co., Philadelphia, and the Millers' Falls Tool Company, Millers' Falls, Mass.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of November 3, 1900.

* * *

"An observing business man who has just returned from a trip through the United States tells us that Americans are firmly convinced of a rising post-election market. It is claimed that prices are below the cost of production and that the financial concerns, to save themselves, will attempt to force prices at least to a paying basis."

In view of the present predictions as to post-election conditions in the United States, this item is interesting.

* * *

"J. W. Oram, 836 Yonge Street, Toronto, and the trustees of the estate of J. P. Mowatt, Campbelltown, are putting in Bennett's hardware shelf boxes."

* * *

"The Toronto office of Wood, Vallance & Co., located heretofore at 88 York Street, will remove about November 1 to more commodious and central quarters, 32 Front Street, west, near Bay Street. Mr. H. T. Eager who is in charge of the office invites the trade to call and inspect the firm's line of samples."

* * *

"Mr. A. T. Chambers, one of H. S. Howland Sons & Co's Northwest representatives, is in Toronto for a few weeks getting his samples in shape."

* * *

"Mr. Walter H. Cottingham, general manager of the Sherwin-Williams Co., accompanied by Mr. C. C. Ballantyne, Canadian manager, was in Toronto this week to visit their Toronto branch."

* * *

"Appended is the constitution recently adopted by the constitution committee appointed by the Retail Hardware and Paint Dealers' Association of the City and District of Montreal."

* * *

The following are some market quotations given in the November 3 issue, 1900:—Wire nails $2.85 per keg l.c.l. and $2.75 in carloads; cut nails $3.35 per keg, base price; sisal base price is now 7 1-2 cents and for manila 10 cents per pound; terne plates are quoted at $8.75 and IX at $10.75; black sheets base price is $3.40 per 100 pounds; English galvanized sheets at $4.85 and American at $4.50; ingot copper 10 to 20 cents; sheet copper 23 to 23 1-2 cents; white lead, pure, $6.62 1-2; liquid paints, pure, $1.20 to $1.30 per gallon; linseed oil, raw, 1 to 4 barrels, 84 cents; turpentine, single barrels, 63 cents.

Tendencies Continue Strong on Fire-Arms

Montreal.—In discussing the situation on fire-arms with Captain F. E. Fraser, of the Fraser Company, Montreal, Canadian representatives for B.S.A. Small Arms Co., Birmingham, England, Hardware and Metal was informed that the tendencies are very strong. This is due to the continued high cost of special grades of steel and to high wage costs.

Mr. Fraser feels that for some time at least, there will be no reduction of consequence in the price of small arms or of shotguns. The situation has been aggravated owing to the high price of fuel and at the present time the coal strike in England is not assisting towards the bettering of conditions from the price standpoint.

Deliveries Are Excellent

With regard to delivery, this has greatly improved of late and for some time past it has been possible to get prompt delivery of small calibre rifles as well as of army service rifles. As a matter of fact these may be had from stock at the present time and deliveries are exceedingly prompt. Supplies of rifles are satisfactory, and the trade is being supplied regularly with these.

The Army Service Rifle, which is the standard rifle used throughout the war by the British and Canadian forces, is available in desired quantities, and these are being sold rather freely in some sections of the Canadian trade.

With regard to double-barrel shotguns, Captain Fraser informed Hardware and Metal that the requirements of the Canadian trade, which call for a different chamber than that used in the English gun, have temporarily affected delivery. At the same time he assured Hardware and Metal that deliveries in 1921 would be very much improved and that this condition would soon be overcome. Shipments are looked for in ample time to meet the demands of early spring.

Problems of Price Readjustment Period

IT IS generally conceded that the hardware merchant who pays close attention to business, who is energetic and thoughtful every business day of the week, gets his reasonable share of the business that is procurable from the field he serves. Just now, when some would preach pessimism, it is the same, level-headed hardware merchant that can do much, in his own community, to steady conditions which might otherwise not improve. He is a factor in the present situation.

Weigh and Consider

A representative of Hardware and Metal was recently discussing the business outlook with a prominent Montreal hardware jober. "If people would only take the statements that are made in the press and then 'weigh and consider' them," he said, "this would save a great deal of anxiety, and people would find that there was no need to dread the future, and that, in time, prices would find their own right level."

There is a world of truth in this observation. The trouble with multitudes to-day is that they do not think. That is one reason why news headlines are taken, all too often, at face value.

In the prosecution of selling to-day, the hardware merchant can be of great assistance in advising his customers just what conditions are in the outside and larger markets. He can be a missioner of sane, sensible views, and in advising his customers frankly that, while the crest of the market on many lines has been passed, the process of price reduction will be gradual.

Take This Tip

"If this price re-adjustment is not based on a plan providing easy stages in its descent, it will go down with a crash and result in chaos. "Labor wages do not need to come down with the high cost of living if labor increases production."

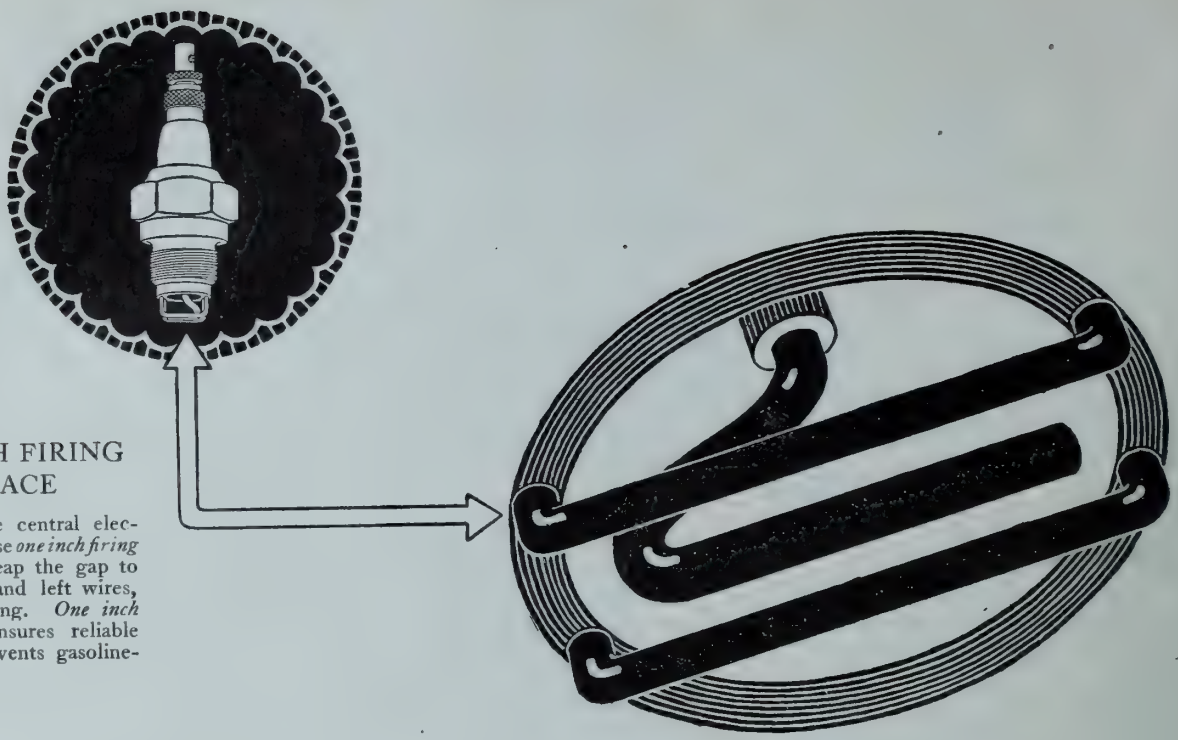
Those are the reported words of Herbert Hoover, known the world over as a sane, thoughtful administrator of one of the most important departments created by the war.

Montreal 1921 Motor Show

Montreal.—Dates have been arranged for the annual motor show of the Montreal Automobile Association, Ltd. This will be called the National Motor Show of Eastern Canada and will be held from January 22 to 29, both dates included. The Motordrome Building, in which last winter's show was held, will be the scene of this year's array of cars and accessories. It is understood that enquiries have already been made for space by car manufacturers.

Would Facilitate Trade Expansion

Montreal.—So extensive has the work of His Majesty's Senior Trade Commissioner become at the Montreal office that application is being made to the British Government for additional assistance. Increased appropriation of funds is being applied for. Among other pressing needs at the moment is that of the development of trade between Canada and India and Ceylon. Already, it is understood, the Canadian Government Mercantile Marine has helped supply a former lack of shipping between Canada and the Far East.



ONE INCH FIRING SURFACE

This shows the central electrode, from whose *one inch firing surface* sparks leap the gap to the stout right and left wires, made to live long. *One inch firing surface* insures reliable power, and prevents gasoline-formed carbon.

Canadian Money at Par

In three years Fyrac rose to third in production of 197 brands of spark plugs—unadvertised. The plug built its own business—not alone by performance, but also because at first glance the customer sees the Fyrac feature which assures that performance—*one inch firing surface.*

FYRAC

If interested tear out this page and place with letters to be answered.

One INCH Firing Surface

Today, by intensive advertising, that phrase is held ever before the consumer; that *firing surface*, plainly illustrated, is familiar to him—as is the service it assures.

A glance at the plug clinches the bargain. That flint-hard insulator, heat and air tested to withstand seventy-pound shocks 960 times a minute, tells better than words how enduring is Fyrac's service.

Fyrac sells itself, *keeps itself sold.*

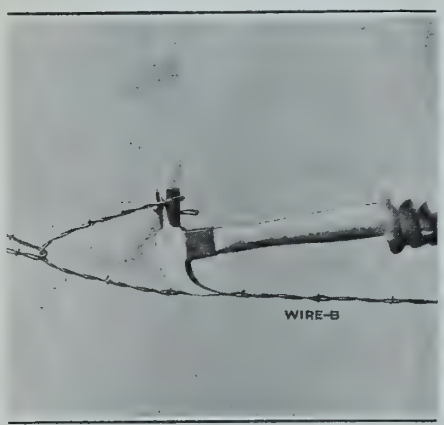
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"CHENEY" FENCING TOOL

Henry Cheney Hammer Corporation, Little Falls, New York, are placing on the Canadian market through Richardson and Bureau, 55 St. Francis Xavier

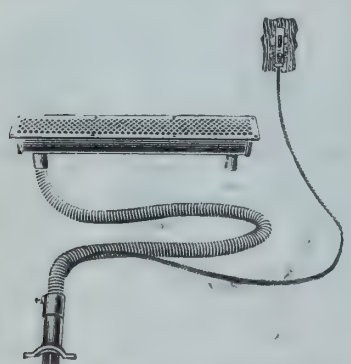


"Cheney" Fencing Tool

Street, Montreal, the "Cheney" Fencing Tool. This is really an ordinary hammer, in appearance, but in effect is a tool designed to meet the needs of farmers and fence-builders. The principle of the tool is that of acting, first, as a lever for stretching the wire when building a fence, and secondly in making a splice. In the accompanying illustration it will be seen how the tool works. The company's description is as follows: "When the wires are tight simply turn an entire hammer around B, making a splice as Fig. 2. This tool is simply a 1 pound four ounce plain hammer, with a 1-4-inch hole in the neck. It is fully warranted as a hammer as well as a fencing tool."

UTILITY PROTECTED HEATERS

The Utility protected heater, manufactured by the Hill Pump Valve Co., Chicago, Ill., utilizes the heat from the exhaust for the comfort of the passenger.



Utility Protected Heaters—Foot Rail Type.

It is made in two styles, the foot rail type and the register type. A simple control operated with one finger can be located at the driver's seat or in the tonneau, whichever is preferred.

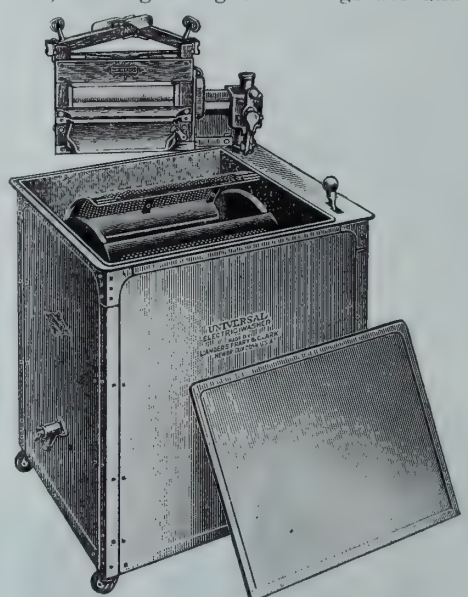
The heater can be had in either black or nickeled finish and is said to be noiseless in action and properly protected to allow sufficient heat to warm the car without burning shoes or robes.

"UNIVERSAL" ELECTRIC CLOTHES WASHER

The Universal electric clothes washer made by Landers, Frary & Clark, New Britain, Conn., manufacturers of the well-known Universal Home Needs, is guaranteed by them to be of the same high grade construction.

As can be seen from the illustration, the washer is of the enclosed type, eliminating all danger of clothing being caught in the driving mechanism. The side panel is removable to give access to all moving parts.

There are no belts or chains. The gears are of the automobile type of construction, running in light motor grease and



"Universal" Electric Washer

with ordinary family use will not need lubricating for several years, it is said.

The wringer is of the swinging reversible type, has four positions and will not operate except when locked in position.

Should motor become overloaded a safety clutch cuts off power, preventing injury to motor or mechanism, it is stated.

A control lever at top of machine starts motor, stops it and releases tension of wringer rolls by one stroke of the hand.

LUTHER GRINDER

The Dimo-Special type of Universal tool grinder now offered to the Canadian trade is distinctive in that it is offset at such an angle that it makes for greater

Luther Grinder

convenience in grinding. It sets on bench or table instead of hanging on the edge, making it better balanced and eliminating vibration.

In place of being cut straight across the gears are helical so that parts of at least three teeth are in mesh all the time, insuring steady pull, smooth action and greater wearing surface.

It is finished in black enamel and made by the Luther Grinder Mfg. Co., Milwaukee, Wis.

MARBLE'S NO. 16A SHEARD SIGHT NOW READY FOR SAVAGE RIFLES

New sights for Savage rifles are being put on the market by the Marble Arms & Manufacturing Co., of Gladstone, Mich., and the following is the maker's description of same:

The Sheard gold hunting or target sight shows up well in darkest timber and under no circumstances will it blur. It shows the same color on different colored objects and greatly improves the shooting. The Marble Co., Gladstone, Mich., announces that the No. 16A Sheard sight is now ready for the model 1920 .250 bolt action Savage rifle. They are also supplying their No. 47 standard front sight with 1-6 or 3-32 ivory or gold bead, No. 47 V.-M. front sight and No. 47 Sheard gold bead front sight for the model 1919 .22 N. R. A. Savage rifles. The No. 48 standard and No. 48 Sheard gold bead front sights are being made suitable for the Model 10 Stevens pistol.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICES of hardware commodities are ruling firmly this week with the exception of products of cotton, such as sash cord, cotton cordage, twines, etc., which show a further decline as the result of lower raw cotton prices.

New quotations for screen doors and window screens and refrigerators for next season show some advances.

Polish mops, repair links and new extras on tinning wire show increases.

The metal markets with the exception of lead and copper hold firm, but reports from Pittsburgh indicate a general dulness with cancellations in steel and pig iron.

Country business is fair but would be improved by a spell of cooler weather.

Montreal Markets

MONTREAL, October 28.—Prices have been firm this week on some lines, among them being pumps, lamp and lantern glasses, polish mops, iron bars, pipe and small hardware. Repair links are up. There is a great weakness on cotton goods, twines being reduced materially. Galvanized sheets, some expect, will soon be priced lower. Lead pipe may decline. New extras are out on tinning and coppering wire. Some expect grindstones to advance. Country trade is active, while city demand might be improved.

Pump Sales Active and Stocks Fair

Montreal.

PUMPS.—The fall demand for various cistern and well pumps is now very active and prices are firm. Stocks are in fair condition although there does not seem to be any great surplus in jobbing quarters here.

Line of Polish Mops Will be Advanced

Montreal.

POLISH MOPS.—Prices will be advanced, Hardware and Metal is informed, in Liquid Veneer mops on November 1st. The new prices will probably be $20 per dozen, with a resale cost to the consumer of $2.50 each. No mention is made of polish prices.

Sheets May be Less Before Many Weeks

Montreal.

SHEETS AND PLATES.—Advices are encouraging with regard to galvanized sheets. Supplies are coming forward in increased quantities from week to week and there is reason to anticipate that there will be some lowering of prices in the immediate future. The declines will at first be slight, some believe, but the outlook is better than it was, considerably so.

18 and 20 gauge	11 60	11 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Steel and Iron Bars Showing Improvement

Montreal.

STEEL AND IRON.—There is some improvement of delivery, though this is slow in developing. Jobbers state that they are able to secure supplies a little more rapidly and in the meantime the situation is steady and the undertone firm. Business is quite active.

IRON AND STEEL

Common bar iron, 100 lbs.	5 15
Refinish iron	6 15
Iron finish machinery steel	5 25
Mild steel	5 30
Band steel	5 50
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	5 20
Tire steel	5 50
Toe calk steel	6 20
Harrow Tooth Steel	5 45
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined Iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Wares and Stoves Are in Fair Demand

Montreal.

WARES AND STOVES.—Prices have been maintained on various wares. There is a fair demand for these, although many of the booking orders, most of them in fact, have gone forward. Prices do not promise to be higher, but for some time manufacturers believe it will not be possible to make much lower prices, if any.

STOVES are in fair demand. The mild weather conditions of recent weeks have served to ease the demand for heating stoves, and had this not been the case there would have been considerable noise from some sections of the trade. As it is, some manufacturers are sold out for the season, practically speaking.

Rope Prices Held; Tendencies Better

Montreal.

ROPE AND CORDAGE.—No changes have been made from the latest lists issued about three weeks ago. The manufacturers are working along on fair supplies. Production of manila hemp is reported to be one-third short of normal this year, and this will mean that the world supply will be much short, though the raw material may be ample, even at that. There will be no advance in price, Hardware and Metal is assured, but declines are expected to come about only gradually. Pure manila is quoted at 33½c base, New Zealand and Beaver at 26c and sisal and lathyarn at 21½c per pound.

High-grade Gasoline Will Probably Hold

Montreal.

OILS, GASOLINE.—Prices remain unchanged this week, and there is a fair sale for both products, coal oil selling at 31 cents per gallon and gasoline at 43½ cents, motor grade. While there may be some relief in the way of lower prices on ordinary grades of both oil and gasoline in the near future, refiners state that the higher test grades are likely to remain firm.

Steady Demand For Small Firearms

Montreal.

FIREARMS.—There is a steadily good demand for some types of firearms, although small calibre rifles are not selling as freely as the trade would like. Supplies are satisfactorily large and the trade is taking care of them without difficulty. Prices show a tendency to decline and a firm undertone is expected to continue for some time.

Builders' Hardware Is Scarce Still

Montreal.

BUILDERS' HARDWARE.—There is a considerable strength of undertone to the market on various kinds of builders' hardware. According to advices secured by Hardware and Metal, indications do not point to any serious change of price, although the peak of the market has perhaps been reached on a number of lines. The difficulty of getting high-grade steel and the maintenance of wages at their high points are two factors holding the market as it is at present.

Small Tools Now Selling Actively

Montreal.

TOOLS.—There is a fair demand for tools from the trade, hammers and such lines being in active demand. This line has shown little inclination to change from the price standpoint, quotations being held firmly.

Active Movement on Various Wrenches

Montreal.

WRENCHES.—There is considerable activity in various lines of wrenches, and these are going forward to the trade regularly. Prices remain unchanged, the undertone being fairly steady.

Better Sales Prevail on Aluminum Wares

Montreal.

ALUMINUM WARE.—There is a steadily urgent demand for aluminum ware in this market, manufacturers, jobbers and retailers all experiencing an active demand from the trade. Prices are steady and unchanged and stocks are fairly satisfactory.

Twenty-five Per Cent. Reduction on Twines

Montreal.

TWINES.—Cotton wrapping twines have declined in price, in common with the general decline in cotton products. Three-ply in balls is now selling at 61 cents per lb., 4-ply, 67 cents and 3-ply in cones 57 cents. This price range is the lowest that has obtained for a long time. Some are selling one grade at 54 cents a pound and this is a reduction from the high levels of 25 per cent.

Slight Improvement in Iron Pipe Deliveries

Montreal.

PIPE.—The pipe market is without material change this week, although the continued shortage of galvanized pipe in small sizes is giving the jobbers considerable concern. So long as demand remains as active as at present stocks will likely continue short. One jobber states that delivery is improved, but only slightly so.

Repair Links Are Marked Up

Montreal.

REPAIR LINES.—Prices have been revised upwards on japanned repair links and the new net prices per gross are as follows: 3-16, $6.80; 1-4, $8.00; 5-16, $8.50; 3-8, $11.50; 7-16, $15.60; 1-2, $23; 9-16, $31.50; 5-8, $43.50; 3-4, $72.

Common Solder Sets Selling at $2.40 Doz.

Montreal.

SOLDER SETS.—A change has been made in the price of common soldering sets and No. 10 are now selling at $2.40 per dozen.

Candle Wick Much Lower Now

Montreal.

CANDLE WICK.—A decline of price has been made this week in candle wick, the same selling at 75 cents per lb., which is considerably lower than prices have been for a long period.

New Extras For Tinning Various Wire

Montreal.

WIRE GOODS.—There is a fair movement of various wire products, although this year there does not seem to be the usual heavy enquiry for baling wire. New extras have been announced on coppering and tinning and these are as follows: No. 0 to 12, 75 cents per 100 lbs.; No. 13 to 16, 90 cents. These charges are for coppering, whilst the tinning extras are: No. 0 to 12, $2 per 100 lbs.; No. 13 to 15, $2.50, and No. 16, $3 per 100 lbs. An extra charge over these additional prices is made for papering of 30 cents per 100 lbs. and for burlapping 30 cents.

Active But Scarce Are Animal Traps

Montreal.

GAME TRAPS.—There is a fair demand for game traps at the present time but certain sizes are scarce. The movement will continue during fall months, and for the time being supplies will likely continue inadequate.

Horse Shoes Move Actively

Montreal.

HORSE SHOES.—An active demand exists at present for horse shoes, which, while unchanged in price, have a strong tendency.

Nail Stocks May Soon be Improved

Montreal.

NAILS.—Demand for wire nails is active, although jobbers expect that demand will fall off in the near future. This will mean that manufacturers will be able to accumulate a little more stock but in the meantime supplies are rather short. Standard wire nails remain unchanged at $6.40 per keg and cut nails at $6.90.

Strong Undertone on Various Chimneys

Montreal.

LAMP GLASSES.—There is an active sale just now for lamp glasses and lantern globes. The former have advanced in price recently but there has been no

increase as yet in the price of lantern globes. The market is very firm, however, and with the strong undertone prevailing at present it is not probable that lantern globes will be moved upwards.

Prices to be Higher on Various Grindstones

Montreal.

GRINDSTONES. — The market on grindstones is very strong and prices may be advanced in the near future, jobbers feel. The movement is rather brisk at present and supplies are fairly large.

Sales Are Active of Cobbler Sets

Montreal.

COBBLER'S SETS.—There is a good demand at present for cobbler's sets, which are moving forward actively and supplies are said to be fair. There is no indication of any price change at the present time.

Food Choppers Moving and Prices Steady

Montreal.

FOOD CHOPPERS.—The demand for food choppers at the present time is active and while prices have remained unaltered the market holds steady, with supplies fair.

Solder May Advance; Lead Pipe May Ease

Montreal.

LEAD PRODUCTS.—Prices are unchanged this week on various lead products. Lead pipe may possibly be revised downward in the immediate future. Solders are considered pretty low at present levels and one manufacturer states that there is probability of a reaction upward. The present trade movement is fairly satisfactory.

Lead pipe, per 100 lbs.	....	17 00
Lead waste, per 100 lbs.	....	18 00

Weakness Manifest on Old Materials

Montreal.

OLD MATERIALS—Prices are easing on the whole list of old scrap. Manufacturers are still able to get along without buying extensively, and this means that there is a certain accumulation of supplies in dealers' hands that they will probably have to take less for. There is strong probability of further declines coming.

Ingot Melats Are Not So Unsteady

Montreal.

INGOT METALS.—The market this week has somewhat steadied itself, and prices are not subject to the sudden fluctuation obtaining last week.

TIN.—The market has reacted somewhat this week, although price remains unchanged at 50 cents per pound. The condition is considerably stronger in London.

COPPER.—This has continued rather weak and uninteresting with electrolytic selling at 21 cents per pound and casting at 23¾ cents.

LEAD.—Nine cents a pound is quoted. The market is fairly steady.

SPELTER.—The market is slightly weaker and quotations state that it is 9¼ cents per pound and there is little demand.

ANTIMONY.—This is still selling at 8¾ cents per pound and little trade is being expected.

ALUMINUM.—The prices still range from 35 to 37 cents per pound and trade is much restricted.

Toronto Markets

TORONTO, Oct. 28.—Most hardware prices have been firmly held this week; the exception being cotton goods, such as sash cord, twine, rope and clothes lines, which have all had another decline as the result of lower raw cotton prices.

Prices out for next season's booking on screen doors and windows, and on refrigerators show an increase, and the same is the case with farm and lawn fencing.

While a little improvement is observed in deliveries of bar iron and steel and wire nails and a better condition is believed imminent in wrought pipe, there is a very great deal of shortages. It is said that a cold spell will reveal a scarcity of stoves and heaters.

At the present time a little quietness is reported in business.

Collections are said to be good.

Screen Door Prices For 1921 Are Higher

Toronto.

SCREEN DOORS—New prices for booking for next spring are issued for screen doors and while new prices are not very much in excess of present prices, they constitute an advance of about 25 per cent. above booking prices of a twelvemonth since.

The higher cost of all materials, labor, etc., but especially the increased cost of lumber is given as the reason for advance in prices.

New quotations are given:

Screen doors, ⅞ in. thick, dowelled, 4-in. styles—No. 1, grained only, $23.25 doz.; No. 2, grained only, $28; No. 21, grained, filled and varnished, $35; No. 21½, grained, filled and varnished, $36.50; No. 24, grained, filled and varnished, $36.50; No. 3, grained, filled and varnished, $38; No. 6, grained, filled and varnished, $39.75; No. 8, grained, filled and varnished, $41; No. 9, grained, filled and varnished, $46.15.

1⅛-in. thick, mortised frame—No. 28, 3-in., grained, filled and varnished, $42 doz..

Stock sizes—A, 2 ft. 6in. x 6 ft. 6 in.; B. 2 ft. 8 in. x 6 ft. 8 in.; C, 2 ft. 10 in. x 6 ft. 10 in.; D, 3 ft. x 7 ft.

Combination Storm and Screen Doors.—No. 80, 1⅛ in. thick, mortised, interchangeable panels, grained, filled and varnished, $80 per doz.

Higher Prices For Refrigerators

Toronto.

REFRIGERATORS—The new prices for next season's booking for Paris make of refrigerators show an advance over last year's prices, due to increased cost of lumber and other materials. The manufacturers state that all costs entering into the manufacture of these goods is costing more, not only lumber, but the metal used, and locks and fastenings. Varnish and enamels also cost more than they did a year ago.

Range Boilers Selling; Prices Unchanged

Toronto.

RANGE BOILERS—The demand for range boilers has been very fair. Supplies are said to be sufficient in spite of shortage of material. Manufacturers had made up these goods before the scarcity of material became so severe and had stocks of boilers on hand to meet the demand. There is no change in quotations.

Sash Cord Prices Reduced Again

Toronto.

SASH CORD—New and lower quotations are in effect on sash cord, due to recent declines in raw cotton. This is the second reduction within a few weeks. New prices are the following: No. 6, 88c per lb.; No. 7, 87c; Nos. 8 to 12, 86c.

"Mendets" Advanced; Selling Prices Higher

Toronto.

MENDETS—There has been an increase in the price of "Mendets," the little repair plugs for tin and enamelware, and instead of 10 and 25c packages these are now put up in sizes to retail at 15 and 30 cents.

Cotton Clothes Lines Are Cheaper

Toronto.

COTTON CLOTHES LINES—The decline in cotton prices is responsible for lower prices on cotton clothes lines. New prices are: 40 ft., $3.05 per doz.; 48 ft., $3.65; 60 ft., $4.60.

Window Screen Prices For 1921 Booking

Toronto.

WINDOW SCREENS—The booking prices for 1921 booking for screen windows are now out. They are approximately 20 per cent. over last year's prices, though very little above prices ruling at the close of the present season. Quotations are the following:

PERFECTION WINDOW SCREENS

No.	High	Closed	Open	Per Doz.
12	10 in.	20 in.	32½ in.	$ 4.40
12½	10 in.	24 in.	40½ in.	4.90
1	14 in.	15 in.	22½ in.	4.25

8	22 in.	26 in.	44½ in.	9.10
9	24 in.	26 in.	44½ in.	9.90
10	24 in.	34 in.	60 in.	12.20

TERMS.—2 per cent. for cash, 30 days, or 90 days net from date of shipment, or if shipped prior to May 1st, may be dated May 1st.

Reduction in Prices of Cotton Rope

Toronto.

COTTON ROPE—A decline has taken place in cotton rope prices following lower cotton prices.

Lower Quotations on Cotton Twines

Toronto.

COTTON WRAPPING TWINE—A further reduction in the prices of cotton wrapping twine has taken place as the result of a lower raw cotton market. The 3 ply in balls, selling in 5-lb. cotton sacks, is now quoted at 62c per lb., and the 3 ply cones at 57c per lb.

Iron and Steel Supplies Improving

Toronto.

IRON AND STEEL—An improvement is reported in deliveries of iron and steel. Better service is being given by the mills with improved transportation facilities. Prices are ruling firmly and while no increases are expected, little hope is given of any decline for the present. General quotations are as under:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	6 00
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 60
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	6 00
Hoop steel	7 50

But Little Change in Steel Situation

Toronto.

BLACK AND GALVANIZED SHEETS—Very little that has not already been said can be mentioned regarding sheets. While some profess to see a little improvement in deliveries, others say conditions are worse if anything. There is scarcely any doubt that the lighter gauge of sheets, especially galvanized, are still very scarce, and if the coal strike in Great Britain is prolonged, the supply of sheets from there will be cut off. A lessening of demand and cancellations was reported by independent sheet makers in the States, during the week, and an increase in prices was asked. A large jobber in sheets and metal stated to Hardware and Metal that producers claim that the cost of production has been raised so that demand must increase and present prices be maintained or production will have to be curtailed. Prices are only nominal yet and as much as fifteen cents per pound is said to be asked and obtained for sheets.

BLACK SHEETS

14 gauge	$10 15
16 gauge	10 25
18-20 gauge	10 70
22-24 gauge	10 75
26 gauge	10 80
28 gauge	10 50
3-16 inch plate	7 00
¼-inch boiler plate	6 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier	Apollo	
10¾ oz.	$12 50	13 25	$15 00
U.S. 28	12 70	12 85	14 75
U.S. 26	12 40	12 55	14 25

16	11 95	12 10	13 50
12 and 14	11 20	11 95	....

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Soil Pipe and Fittings Unchanged; Quotations

Toronto.

SOIL PIPE AND FITTINGS—No change has taken place in soil pipe or in soil pipe fittings. Prices are steady and unchanged. The demand has been good, but it is said to be lighter now.

No Quotable Change in Compression Goods

Toronto.

COMPRESSION GOODS — No changes are reported on compression goods, valves and bibbs. Stocks are fairly plentiful, with no apparent shortage. Quotations on the better known lines are the following:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%

J.M.T. C.	Net
Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%
Radiator valves, standard	23%

Seine Twines; Prices Are Lower

Toronto.

SEINE TWINE—Lower prices are in effect on seine twine, following the drop in raw cotton prices. New quotations are as follows: Nos. 12 and 15, 96c per lb.; No. 18 and up, 95c per lb.

Pipe Still Scarce, But Improvement Expected

Toronto.

STANDARD PIPE—At the present time pipe of all descriptions, especially the small sizes, is very scarce, and is causing a great deal of inconvenience and delay in many jobs. Manufacturers, however, report an improvement visible in conditions. Transportation is said to have improved to the extent of making supplies of skelp more available and the plants, if improvements are maintained, will be able to make much better deliveries, it is stated. The trade generally, both jobbers and retailers will be very pleased to see some improvement, but stocks are so depleted that it will be some considerable time before they could become normal again. Prices are unchanged, as follows:

LIST NO. 46
Standard Buttweld Pipe
Per 100 Ft.

Pipe Fittings Holding Unchanged

Toronto.

PIPE FITTINGS—There is not much difference in conditions regarding pipe fittings. A little improvement in supplies is reported, but until deliveries of pipe become better there will not be a very great demand for fittings. Quotations are unchanged, as follows:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%

No Change in Cotton Waste Prices

Toronto.

COTTON WASTE—Conditions in the waste trade are reported to be steady with a fairly good demand. No further changes are announced in prices and it is pointed out that the price of waste did not advance in the same proportion as did other cotton goods, and there is not likely to be the same decline as has been experienced in some of these lines. Present quotations are as follows:

Metallic Roofings Scarce; Good Demand

Toronto.

METALLIC ROOFINGS—Prices are still ruling very firmly on the various grades of metallic roofings and sidings. There is the same difficulty in getting supplies and light gauges of materials are very much below the demand. The strikes in Great Britain will tend to make matters worse, as supplies from there were beginning to be heavier and an improvement in supplies from the Old Country was expected.

Rope Is Quieter; Prices Maintained

Toronto.

ROPE—There is no change in rope quotations and business at present is seasonably fair with sorting up sales. No change is expected at present. Prices are maintained, as follows:

Pure Manila, basis	0 33½
Beaver Manila, base	0 26
New Zealand hemp, base	0 26
Sisal, base	0 21½
Single lath yarn	0 21½
Double Lath Yarn	0 22

Two-cent Decline on Black Oils

Toronto.

BLACK OILS—A reduction in prices of two cents per gallon is announced this week. The summer oil is quoted at 31.10 per gallon, and the winter black at 31.60.

Lead and Zinc Products Maintained Prices

Toronto.

PRODUCTS OF LEAD AND ZINC —No further changes in these goods are reported. Prices are fairly well maintained on the finished product, though ingot and pig lead have easier quotations than formerly. Solder is unchanged. Quotations are given herewith:

Lead pipe, list, per lb.	....	0 17
Lead waste pipe, list, per lb.	....	0 18

Liquid Veneer Mops Advance in Price

Toronto.

LIQUID VENEER MOPS—An advance of approximately 25 per cent. takes effect in the price of Liquid Veneer mops on the 1st of November, and new quotations are $20 per dozen.

Wire Nails Supplies Improved

Toronto.

WIRE AND CUT NAILS.—Some improvement in deliveries of wire nails is noted, but there is still a scarcity of certain sizes. Cut nails are becoming scarcer. Prices ruling are $6.40 base for wire and $7.35 for cut nails.

Fencing Quotations For Spring Booking

Toronto.

FENCING.—Prices are now out for fencing for shipments up to April 1 next, guaranteeing against decline in prices. The discounts on the Steel Co. of Canada Ltd. lists are: Farm fence, car lots, 10 and 5 per cent.; less than car lots, 10 per cent; gates, 10 per cent.; lawn fençing, 10 per cent.; steel fence posts, 10 per cent.; fence tools, 10 per cent.; f.o.b. Montreal. Freight allowed on 50 rods and over.

New Prices on Copper Wire

Toronto.

COPPER WIRE.—The new prices on copper wire show a decrease. Copper wire on electric basis is quoted at $24 per 100 pounds f.o.b. Toronto and Hamilton; freight equalized.

Ingot Metals Quieter; Some Easier Prices

Toronto.

INGOT METALS—The markets in ingots are rather dull again this week. A little lower level has been reached on some metals. Tin recovered somewhat, copper is very weak and lead, while easier, has slowed up.

TIN—Tin, true to its form, has again recovered, and is quoted at 50 to 52, or two cents above last week's prices. The coal strike caused a sharp break, but it reacted later.

COPPER—This metal is reported as very dull and sagging bodily. Further price-cutting is in evidence and present prices in U.S. markets are below pre-

war levels. Local quotations for casting copper are 22 cents per lb.

LEAD—Weaker and quiet will reflect the state of this metal. With easier prices it appears to be steadying. London, England, markets are firming. Quotations here are at nine cents.

SPELTER—A slightly easier tone is shown in quotations at 9½ cents.

ANTIMONY—This is reported weak and dull with little demand and prices unchanged at 10 to 14 cents per pound, according to grade.

ALUMINUM — This metal is unchanged, but little trading or interest being shown. Quotations are unchanged at 37 to 39c per lb.

New Extras Noted on Wire

Toronto.

WIRE EXTRAS.—The following are extras now in effect on wire:

	Per 100 lbs.
Coppering, 0-12 gauge	0 75
Do., 13-16 gauge	0 90
Tinning, 0-12 gauge	2 00
Do., 13-15 gauge	2 50
Do., 16 gauge	3 00
Annealing	0 25
Mild drawn	0 40
Oiled and Annealed	0 50
Papering	0 30
Burlapping	0 30
Papering and Burlapping	0 60

London Markets

LONDON, Ont., Oct. 28.—Prices of hardware lines are holding firm and very few changes have gone into effect this week.

Business in London and surrounding districts is seasonably good with merchants and jobbers reporting a steady and healthy trade.

Collections continue remarkably good.

Wire Nail Supplies; Some Sizes Improved

London, Ont.

NAILS—There is said to be an improvement in the supplies of wire nails and they are coming in better now, some sizes though are still very scarce. The base price for wire is unaltered at $6.25 per keg, and $7.50 is still the base price for cut nails.

Turpentine Holding; Prices Unchanged

London, Ont.

TURPENTINE—No change has taken place in turpentine prices and present quotations are the following:

1 barrel lots, gal.	2 05
2 to 4 barrel lots, gal.	2 04
5 gal. lots, gal.	2 20

Linseed Oil Unchanged; Demand Fair

London, Ont.

LINSEED OIL—A fair normal demand for linseed oil is being experienced which is quoted at prices reported last week.

	Raw	Boiled
1 to 2 barrels, gal.	1 47	1 50
3 to 5 barrels, gal.	1 46	1 49
6 to 9 barrels, gal.	1 44	1 47

Less barrels add 15c gal.

White Lead in Oil Demand Light

London, Ont.

WHITE LEAD IN OIL—The demand for white lead in oil at present is only light and sales have not been heavy. Prices remain unchanged at following quotations:

Pure, tons, $20.45 per 100 lbs.; less ton, $20.80; Elephant, tons, $20.95 per 100 lbs.; less tons, $21.30.

Cotton Wrapping Twines; Lower Quotations

London, Ont.

COTTON WRAPPING TWINES — New and lower prices are in effect on cotton wrapping twine, due to declines in the raw cotton markets. The cones are quoted at 70 cents per lb. in 3 ply, and 74 cents in 4 ply. The 5 lb. sack of 3 ply balls is selling at 70 cents per lb.

Shellac Prices Lower; Ten Per Cent. Decline

London, Ont.

SHELLACS—A reduction of approximately ten per cent. has taken place in shellac prices and the following lower prices are now in effect:

	White	Orange
1 gal. jugs, gal.	7 30	6 80
½ gal. jugs, gal.	7 40	6 90
¼ gal., gal.	7 60	7 30
Pint bottles, doz.	12 05	11 75
½ pts., doz.	6 40	6 05
¼ pts., doz.	3 60	3 40
⅛ pts., doz.	2 20	2 10

Screen Door Prices For Next Season

London, Ont.

SCREEN DOORS—Booking prices are now out for screen doors for the spring of 1921, and are in advance slightly of this year's prices. New quotations are given as under:

Sanderson-Harold Make—Doors: No. 1, grained only, $23.25 doz.; No. 2, grained only, $28; No. 3, with brackets, grained, filled and varnished, $38; No. 21, Mission style, grained, filled and varnished, $35; No. 8 with panel, grained, filled and varnished, $41; No. 9, with panel and oval, grained, filled and varnished, $46.15.

Window Screen Quotations For 1921 Unchanged

London, Ont.

WINDOW SCREENS—The following prices are quoted for next season's booking for window screens. They are practically unchanged from this year's prices.

Window Screens—No. 12, $4.40 doz.; No. 12½, $4.90; No. 1, $4.25; No. 13, $4.80; No. 14, $5.15; No. 14½, $5.45; No. 15, $5.90; No. 16, $8.15; No. 2, $5.65; No. 3, $6.20; No. 4, $6.60; No. 5, $7.25; No. 6, $7.80; No. 7, $8.40; No. 8, $9.10; No. 9, $9.90; No. 10, $12.20.

No Change in Rope; Demand Smaller

London, Ont.

ROPE—The sales for rope at the present time are light and are mostly of the sorting up variety. Prices are unchanged, as follows:

Pure manila, 33½c lb. base; beaver manila, 26c lb. base; New Zealand hemp, 26c lb. base; sisal, 21½c lb. base.

Root and Ensilage Forks in Good Demand

London, Ont.

ROOT FORKS—There is a very good sale at the present time for beet, potato and ensilage forks. The quotations for these lines is 50/10 per cent.

Ammunition Sales Continue Good

London, Ont.

AMMUNITION—The sales for ammunition, both loaded shot shells and metallic cartridges still continue very good and with the near approach of the deer hunting season many sorting up orders are coming to hand. The Dominion make is quoted at list less 37½ per cent. and the Winchester and Savage makes at 27½ per cent. above American list.

Horse Clippers Are Selling Well

London, Ont.

HORSE CLIPPERS—At the present time there is a good seasonable sale for horse clippers and selling prices are: Handicap, $2.95 pair; Newmarket, $3.50 pair; No. 1 Stewart power, $12 each.

Brisk Demand For Electric Washers

London, Ont.

ELECTRIC WASHERS—This fall is witnessing a very brisk demand for electric washing machines, and sales of the different makes are very good. Prices are as per current market quotation pages, less 20 per cent.

Horse Shoes and Nails Have Good Movement

London, Ont.

HORSE SHOES AND NAILS—There is a very good movement of these lines just now and present selling prices are as follows:

Horse Shoes—Iron, No. 1 and smaller, $8.50 per 100 lbs.; No. 2 and larger, $8.25; light steel, No. 1 and smaller, $8.95 per 100 lbs.; No. 2 and larger, $8.70 per 100 lbs.

Horse Shoe Nails. — Capewell, 10% off list; Montreal, M.R.M., Brand, net list.

Good Sales For Flashlights, Batteries

London, Ont.

FLASHLIGHTS AND BATTERIES—These lines are having very good sales at the present time, and the demand this season seems larger than usual. Prices are unchanged.

Oil Polishing Mops Expected Advance

London, Ont.

POLISHING MOPS—There is a very good demand for these lines and the Liquid Veneer make is expected to advance to a higher price about Nov. 1.

Neverslip Toe Calks in Good Demand

London, Ont.

TOE CALKS—The following are present quotations on the Neverslip toe calks which are in good demand at the present time. The discount from list is 15 per cent.

Neverslip Toe Calks—No. 4 x 5-16 in., $3.10 per 100 lbs. list; ⅜ in., $3.10; 7-16 in., $3.30; ½ in., $3.30; 9-16 in., $3.50; ⅝ in., $3.50. Less 15%.

Lanterns and Globes Are Selling Well

London, Ont.

LANTERNS AND GLOBES—There is a good seasonable demand for lanterns and also for lantern globes at the present time. The tin case lantern in both short and long patterns is quoted at $15 per dozen and globes as follows: Cases of 1 doz., $1.20 per doz.; 3 doz., $1.15; 6 doz., $1.10.

Thumb Latches Moving; Present Quotations

London, Ont.

THUMB LATCHES—These articles are meeting with a seasonably good demand at the present time and prices are: No. 2, $2.35 per doz.; No. 3, $3.10; No, 4. $4.75.

Good Demand For Spades and Scoops

London, Ont.

SPADES AND SCOOPS—Very good sales are being made on ditching and drain spades at the present, and also on grain and coal scoops. Selling prices are list less 35 per cent.

Skates and Hand Sleighs Easier

London, Ont.

SKATES AND HAND SLEIGHS—Shipments of booked orders for skates and hand sleighs are being shipped out promptly and supplies this season should be easier than was the case last year.

Coaster Wagons Moving; Present Quotations

London, Ont.

COASTER WAGONS—There is a very fair sale for the Auto-Coaster wagons despite the higher cost. Present prices are:

No. 00, $62 doz. list; No. 01, $116; No. 1, $133; No. 2, $145; No. 3, $160; No. 4, $182. Less 35%.

Aluminum Figures Costing More

London, Ont.

ALUMINUM HOUSE NUMBERS—A new higher price is being quoted on aluminum figures used for numbering houses, etc., and they are now quoted at 60 cents per dozen.

Winnipeg Markets

WINNIPEG, Oct. 28.—Very few lines of hardware have any revision in prices this week. Higher prices are in effect on annealed wire, bright market and coppered spring wire. White lead is also a little higher in price. Little improvement is reported in deliveries of pipe and fittings, or in sheets and plates. The lighter gauges of galvanized sheets are still very scarce.

The sale of automobile tires and accessories has continued good on account of the exceptionally good weather all over the west. In general trade is falling off a little which can only be expected at this time of the year. Fall and winter goods are in fair demand.

Collections continue good.

Wire Nails Are Still Scarce

Winnipeg.

WIRE NAILS—There is a heavy demand for all sizes of wire nails and there is only a limited supply of certain sizes. Prices are unchanged and are quoted at $7.35 base.

Scarcity of Wire; Higher Quotations

Winnipeg.

WIRE—There has been a continued scarcity of wire on the market and the demand is heavy. The prices have been advanced slightly and are as follows:

Annealed—Nos. 0 to 8, $7.60; No. 9, $7.70; No. 10, $7.75; No. 11, $7.85; No. 12, $7.90; No. 13, $8.10; No. 14, $8.20; No. 15, $8.45; No. 16, $8.90.

Bright Market.—Nos. 0 to 8, $7.85; No. 9, $7.95; No. 10, $8; No. 11, $8.10; No. 12, $8.15; No. 13, $8.35; No. 14, $8.45; No. 15, $8.70; No. 16, $9.15.

Coppered Spring—No. 8, $11.16; No. 9, $11.26; No. 10, $11.38; No. 11, $11.55; No. 12, $11.70; No. 13, $12.01; No. 14, $12.23.

Freight Rates Increase White Lead Prices

Winnipeg.

WHITE LEAD IN OIL—The demand for white lead in oil continues good and the price has been advanced slightly, due, principally, to higher freight rates. Following are the quotations on Decorators' Pure:

1-lb., $24.10 per 100 lbs.; 2-lb., $24.10; 5-lb., $23.60; 12-lb., $22.10; 25-lb., $21.60; 100-lb., $21.60.

Penberthy Valves Up in Price

Winnipeg.

VALVES—Many lines of brass goods have gone up in price and among them are Penberthy valves which are quoted as follows:

Globe and Angle—20% advance on list.
Check—20% advance on list.
Regrinding Swing Chuck—25% advance on list.
Gate—10% advance on list.

Compression Bath Cocks Costing More

Winnipeg.

BATH COCKS—A new higher price has been made on bath cocks, compression, and they are quoted at 25 per cent. off the list prices.

Cotton Waste; Lower Prices Expected

Winnipeg.

COTTON WASTE—There is very little demand for cotton waste at the present time, probably due to everyone holding back awaiting decisions on the fluctuation of the cotton market. It is expected there will be a revision in prices in the near future.

Cutlery Is Scarce; Prices Are Firm

Winnipeg.

CUTLERY—Shipments of cutlery from the Old Country are coming in very slowly. Many are booking at firm prices and it is doubtful whether a sufficient supply will be forthcoming to meet the demands. Many orders are being received for pocket cutlery and table cutlery.

Penberthy Oilers Higher in Price

Winnipeg.

OILERS—New higher prices are recorded this week and are quoted as follows:

Slide Top—No. 300, 5% adv.; No. 301, 5% adv.; No. 302, 5% adv.; No. 303, 5% adv.; No. 304, net list; No. 305, net list.
Salute—50% off.
Sancho—Nos. 600, 601 and 602, 15% off; Nos. 603, 604 and 605, 15 and 2½% off.
Sultan, No. 652, 10% adv.; Nos. 653, 654, 655, 656 aid 657, 7½% off.
Safety Crank Pin, 5% adv.

Penberthy Grease and Oil Cups Costing More

Winnipeg.

GREASE CUPS—A revision has been made in the prices of Penberthy grease cups and they are higher. Following are the quotations:

Grease Cups—Samson, Nos. 800, 801, 802 and 803, 5% adv.; Nos. 804 and 805, 25% adv.
Silex—Nos. 900, 901, 902 and 903, 20% off; Nos. 904, 905, 906 and 907, 15% off.
Oil Cups—Screw top, 5% off; spring top, 15 and 2½% off.

Candle Wick Packing Drops in Price

Winnipeg.

CANDLE WICK PACKING—The price on candle wick packing has dropped three cents per pound and is now quoted at 85 cents per lb.

Pittsburgh Markets

PITTSBURGH, Oct. 28.—General dullness characterizes the iron and steel markets, with very little new buying, and through present conditions are not expected to last long, the general opinion is that the turning point with regard to prices will not be reached for some months.

Prices on steel bars, considered probably the strongest of the steel products, have been cut.

A decline in foundry coke prices has taken place, but with the present high level of coke, pig iron cannot come down very much.

PITTSBURGH, Oct. 28.—Few parallels can be found in history for the present dullness of the iron and steel markets. There is no new buying of any consequence in pig iron, none at all in semi-finished steel and scarcely any in finished steel. Pig iron and semi-finished steel contracts are, by trade custom, firm and not subject to cancellation, but there is latitude, particularly in pig iron, as to delivery. Sometimes, as a few months ago, the furnaces are behind in deliveries. Now many consumers are instructing furnaces to defer shipment or reduce the rate of shipment. In finished steel products, while there was a considerable volume of cancelling a few weeks ago there is further cancelling even now, together with many requests for postponement of shipment. If a correct statement could be prepared it would probably show that the independents as a whole are losing more by cancellations and postponements than they are gaining by booking new business, while, of course their order books are thinning each day by the amount that they ship.

Sometimes when orders fall off the iron and steel producers get into a pessimistic frame of mind and look on the dark side of things. That is not the case at this juncture. Those who held their prices down and those who sought the highest price obtainable, during the scarcity, realized very well that the situation could not last and that a staple basis with reasonable profits would have to be established some time, fair prices resulting in a healthy and full demand eventually. That is the prospect the producers are now looking forward to. There will have to be lower prices and there will have to be a period of light operation, but prices are not expected to become really unprofitable and the period of light operation is not expected to last long.

Producers Variously Situated

The steel market is a very disorderly one, and it is uncertain in what manner prices will decline and how long the decline will require. This complexity results from the producers being situated so variously. In times past, when demand stopped, the mills, or at least the large mills, would find themselves all in about the same position as to the volume of business on books. Then it was a clear case of holding prices until as much tonnage as possible had been squeezed out of the contracts. Eventually a point would be reached when there was more business to be obtained by reducing prices than by holding prices and shipping on contract.

Now, however, the mills are very variously situated. The Steel Corporation is booked for an average of about nine months. Some of the large independents are booked for three or four months, provided the market stays up moderately well. Other large independents have much less business on books. Among the small mills a few have a good volume of business but some have practically nothing. The state of order books today depends upon the price policy pursued this year. The mills that sought the highest prices had to keep their order books clear so as to be able to make early deliveries, for it was early deliveries that brought the highest prices, and at the same time they were quite unable to sell ahead. These mills have made a great deal of money and can well afford to sell at very low prices, even below cost, for the purpose of buying their way into the trade again. Some, however, seem to prefer idleness. Instances are cropping out of a mill that was formerly one of the very highest priced sellers being now the lowest priced seller among the independents.

Steel Bars Cut

The Pittsburgh Crucible Steel Company suddenly began offering merchant steel bars in rounds, squares and flats, at 2.35c, which is the Steel Corporation price. Other independents have been quoting 3c to 3.25c, and while they learned within a day or two of the cut, they assert they will not meet the cut or even reduce prices, preferring to sit back and let the company involved fill up. In the past few weeks bars have been considered one of the strongest, if not the strongest, item in the whole list of steel products.

In plates the majority of the mills are naming 3.25c as "the market" and then cutting this figure, on individual inquiries, down to 3c as the limit. There are exceptions, however. Two western mills have quoted 2.65c and 2.75c respectively, and a sales representative of one of the mills is reported to have canvassed his trade offering to go $1 a ton below any quotation received elsewhere.

While it is still uncertain whether steel prices will experience most of their decline in the next few weeks or will hold, for, say, two or three months and then begin their real decline, predictions are already beginning to appear as to how long the general readjustment will require, the prediction being that next April will see the turning point, with prices at their minimum and with buying increasing.

There is much discussion as to the attitude of the United States Steel Corporation, which has maintained up to date the Industrial Board prices of March 21, 1919, except for two or three little advances made last August. There have been continued rumors for two months past that the corporation would advance its prices slightly, by an average of $3 or $4 a ton, based on the increasing costs caused by the freight rate advances of August 26. This would give the independents some encouragement to drop to the corporation price level. There is, however, the factor that since the war-time control there has been no realignment of prices, one price with another, on the basis of production cost and relative demand, and a horizontal advance in the Steel Corporation prices would hardly produce a fair and equitable price structure. Very few predict, however, that the independents will reduce their prices just to the Steel Corporation level, whatever that may be, the view being that when the independents get down to the corporation level they will have to cut under the corporation prices in order to get business.

Two or three small lots of basic pig iron have been sold by furnace inter-

ests at $40, valley, marking a further decline in the market of $2 a ton, a total of $8.50 from the top price, reached late in August. In Bessemer iron there is recorded a decline of $1.50, to $47, valley, as a furnace interest has formally offered iron at that figure, though, as a matter of fact, a single carload represents the only sale actually reported. Foundry iron remains quotable at $47, valley. An inquiry for a round tonnage would no doubt develop a lower price, but the inquiry must first appear.

Pig iron cannot find its true level as long as coke is at an altogether fictitious level. There has been a spectacular decline in coke in the past week, but there is still much distance to travel. In approximately a week Connellsville furnace coke for spot shipment has dropped from $17 to $14. Foundry coke lags in the decline, being quotable at about $17, but in time it will respond to the furnace coke market. A price of $8.50, or half the recent $17 price, may be seen within a fortnight or a month, but as even that would be nearly six times the $1.50 price that prevailed in May, 1915, no one can say where the coke market will stop.

To Protect the Honest Debtor

G. T. Clarkson Who Helped Frame the New Bankruptcy Act Explains Its Details—Is a Check on Fraud—Standardize Basis for Winding Up Estates.

G. T. CLARKSON, who was a member of the committee that assisted the Dominion Government in framing the new Bankruptcy Act, which came into effect on July 1 last, recently traced the history of insolvency legislation from the time of Confederation down to the present, and outlined a number of the outstanding features of the new act. Under the terms of Confederation, the Dominion Government has control over all matters affecting bankruptcy, and the Insolvency Act was passed in 1869. This act remained in force until 1880, when it was repealed, and since that time action regarding bankrupts had been carried on under the provisions of the various Provincial Assignment Acts. Owing to the fact that there were nine of these acts in force throughout the Dominion, and each of them different to a more or less degree, it was decided to have Dominion-wide legislation that would control all matters pertaining to bankruptcy.

The new Bankruptcy Act supersedes the Provincial Assignment Acts, which, although economical, were varied, and to a large extent also supersedes the Winding-Up Act, although in certain cases connected with corporations, the creditors can decide whether the latter legislation will be used. The new act governs all matters affecting the insolvency of individuals, partnerships and corporations in Canada, except banks, the incentive to commit fraud and companies, building societies and saving banks, which are still dealt with under the Wind-Up Act.

In framing the new act the advantages and benefits of the old Assignment Acts were recognized, and many of the disadvantages of the old Winding-Up Act are expected to be abolished. Mr. Clarkson explained the provisions of the act regarding ranking of creditors and the order of payment and said that the act now permits an honest or unfortunate debtor securing a discharge, while a dishonest one cannot secure one. Thus the incentive to committ fraud and compound with a creditor for the best possible rate is withdrawn.

"It will be seen," he stated, "that the Bankruptcy Act will be of benefit in that the bases for the winding up of estates throughout Canada are standardized by it, and that the different Assignment Acts are superseded. It also means that the unfair preferences that have existed in some of the provinces will be done away with, and unwilling debtors will be forced to turn their property over to their creditors. The honest debtor is protected throughout. If the new act is to be successful and to operate economically, that can only be done when the procedure under it is held simple, and formalities are not allowed to surround it, as has happened in the operation of the Winding-Up Act."

Exports of Ready Mixed Paints,

Exports of white lead from the United States to Canada during August, 1920, amounted to 7,425 lbs., valued at $909.

Exports of ready mixed paint to Canada amounted to 5.987 gals., valued at $11,895.

Exports of varnish to Canada during the same period amounted to 11,454 gals., valued at $18,493.

Exports of zinc oxide to Canada amounted to 806,271 lbs., valued at $76,-459.

Good Trade Prospects for Canadian Products

"WE could have trebled or quadrupled our sales if we had been able to get supplies of iron and steel of various kinds, and there still is a great shortage. We tried to secure 25,000 tons of steel rails from Canada and it was not possible to get even a small portion of this amount."

Tr. de Schryver, general manager and director Th. de Schryver, wholesale hardware and metals, Auckland, New Zealand, thus spoke in the course of an interview with Hardware and Metal on the possibilities of trade expansion as between the two countries. Mr. Schryver has been in Canada for a few weeks conferring with Canadian manufacturers whose lines he distributes in the Southern Dominion, and seeking better connections, particularly from the standpoint of transportation. After twenty years experience in importing Canadian products he is more enthusiastic than ever regarding the possibilities. His efforts, aside from those of his own personal interests in securing the lines his firm sells extensively, have been exerted toward securing a recognition of the possibilities by interesting shipping companies in establishing a direct line of steamers to New Zealand, and of the ultimate success of this Mr. de Schryver is confident.

"Our country needs many manufactured products that you, in Canada, produce. We have extensively imported nails and iron and steel bars. But of these we have been unable to get enough. Much more could have been sold, and the New Zealanders have a real desire to obtain products from the Colonies and will buy more. During the war it was not possible to obtain goods from the ordinary sources — particularly from Great Britain, and to some extent the great amount of trade between the Mother Country and ours has not returned to its normal volume. But this will, as circumstances permit, get back to much the same basis as before. Canada stands well in the estimation of the New Zealanders and there is every possibility of increasing trade between the two countries. It has been figured that, in the matter of trade between England and New Zealand, and New Zealand and England, things pretty evenly balanced, so that imports and exports were about equal. It is possible to develop along the same lines with respect to our trade with you.

"There are many other lines that we require. Among these are various automobile accessories and, as these are not manufactured to any extent by us, they will sell readily. Paints and varnishes are in good demand and are already being imported. Various railway supplies, too, are needed. And we can, of course, use increasing quantities of steel products, for ours is extensively an agricutural country."

Mr. de Schryver's firm also handles stamped and other wares extensively.

"Floor Paint Week" Stimulates Fall Business

Preparation of Verandah and House Floors to Withstand Winter Elements is Very Necessary—Encourages all Season Painting—Suggests Interior Finishing of Walls and Woodwork—How One Dealer Planned a "Floor Paint Week."

THE prolonging of the clear crisp fall season this year has greatly extended the possibilities for paint sales in most sections of the country. While stove trade has been slack in some cases owing to the prevailing mild weather many dealers are making up for this deficiency by continuing to sound forth the advantages of fall painting. In farming districts where a good crop has been harvested the farmer has had plenty of opportunity to take a rest from his labors and then have time left to carry out the suggestion of the local hardware dealers that he apply some of his profits this year to capital account by helping to preserve the buildings and implements which make it possible for him to earn his living. The educational work being done along this line, linked up with the efforts of the dealer, has proved a success according to reports from a number of districts, both rural and urban.

When the appeal for this class of business becomes unseasonable there are a number of other distinctive and seasonable classes of paint trade to which the dealer can turn his attention. One of the first of these is floor finishes. The sloppy weather of fall makes it difficult to keep the floors of the home in good condition especially if there are a number of children to track snow and slush into the house. Unless floors are well protected and given constant attention they will soon reflect the damaging effect of such treatment. It takes very little to spoil good hardwood floors, laid at big cost to-day, and it also takes very little to preserve them. Then there is verandah floor paint to be sold. There are few verandah floors which are not much rubbed after the summer's use, and if the snows of the winter are allowed to settle and thaw on such floors, the flooring will very likely have to be soon replaced through warping or rotting. The shoveling of snow off verandah floors and steps in the winter also is hard on the woodwork and makes it necessary that every possible protection should be afforded.

Woman Customer Suggests Special Floor Paint Sale

In this connection the following statement, overheard in a hardware store recently, is significant. A woman customer conversing with the paint clerk asked why the store owner did not get after local people to paint their porch and verandah floors better, pointing out that every house now has a verandah or porch of some kind and that she had noticed that lack of sufficient paint on such woodwork greatly detracted from the appearance of the respective houses. The hardware dealer kept the matter in mind and a little close observation revealed the truth of the woman's statement. He thereupon decided to hold a "floor paint week" in the fall of each year. This plan is now working successfully in his case, quarts being the favorite quantity sold and grays and drabs the popular colors.

Selecting the Stock

For those who might adopt the suggestion this dealer points out that in order to avoid overstocking and any too great investment of capital it is advisable to prepare for such a week by stocking quarts only in say three of the best selling shades. He says to fix the resale price at as popular a figure as possible consistent with good business practice. This line can be made the leader of floor finishing specials which can comprise waxes, floor mops, polishes, etc.

During the week regular floor paint colors for interior work will be featured along with varnish stains for floor use.

Planning the Advertising

In the advertising many of the splendid arguments for fall painting can be put forward. The logical time to protect the floors against the elements is in the fall of the year just prior to the time when they will receive the greatest amount of abuse. In regard to house floors there is a strong appeal in the fact that people are confined indoors more in the winter than in the summer and the floors come in for more use in the winter months. While much of this kind of work has been done in connection with spring housecleaning in the past, yet customers are reasonable enough to see the advantage of taking these steps towards preservation in the fall of the year. Judicious advertising and sales talk will do much to arouse interest at this time of the year, and help to bring all year business to the paint department without detracting any from the usual rush of spring business.

Encourages All Season Painting

Another important factor in establishing such periods as a floor paint week is the fact that it encourages the general idea of painting and makes easier the appeal for other classes

MOORE'S Guaranteed PAINTS

The Paints with Qualities that make the "Save the Surface" Slogan possible.

"Save the surface and you save all" *Paint & Varnish*

Shingle Stain

Moore's Shingle Stain will protect Shingles from decay, and prolong their life by years. This efficient stain can be used either by dipping, spraying, or hand method.

Roof and Barn Paint

Is composed largely of Oxides ground finely and thoroughly incorporated with our processed oil.

It is a very elastic and durable paint, works easy, covers well, retains its color, will not peel or blister, and is water-proof.

It is especially adapted for Barns, Stables, Sheds, Fences, Bridges, Roofs, in short, it is a preservative for all wood and structural iron work.

Splendid Prospects for 1921 Paint Trade

Paint and Varnish Interests of U.S. and Canada Review the Situation at Annual Convention—Lack of Confidence Only Possible Obstacle to Big Business—Before Spring Prices Are Announced Manufacturers Hope to Have Paint Prices Stabilized—Thrift May Be Carried Too Far—Resents Reflection on Paint Industry—Should Offset Low-Price Propaganda.

A THREE day convention of the National Paint, Oil and Varnish Association held in St. Louis, brought forth a discussion of many points of interest to the paint trade, and in so far as a survey of present conditions and predictions as to the future are concerned, many of the observations made are of interest to Canadian dealers.

A spirit of optimism was reflected by most of the speakers, among whom was S. Marshall Evans, vice-president of the Central District, who, according to a report in the American Paint Journal, spoke as follows:

"Concerning what is termed the industrial reaction, price readjustment and depression, about which so much is now being heard, we in the paint industry must bear in mind the primary fundamentals of our industrial outlook. The certainty of a demand for paint products in excess of normal is not to be questioned.

"High prices alone have interfered with the building program and prevented the building industry and building labor from reaping a rich harvest. Now that the tendency in prices is downward, we can look into the future with the calm certainty of a very large volume of business. Yes, I am an optimist. The outlook for a big paint business never looked more certain."

Fish Oil Established in Paint

Fish oils and their place in paint and varnish formulae was discussed by Arthur C. Trask, vice-president of Marden, Orth & Hastings Co., Chicago.

"Rapid strides have been made during the past few years in processing fish oils for the paint trade. The writer recalls, in the early years of his acquaintance with the paint trade, that fish oil was not looked upon with favor. It was predicted then that it would make a permanent place for itself in the industry. This prediction has come true and regardless of the market price of competing oils, fish oil always will be used in products where certain results are desired.

"It is no longer referred to as a 'substitute' for linseed oil. The principal reasons for this have been the result of research work of many concerns, the careful selection of the best grades, and the scientific processing of the crude oils, making it easy for a paint manufacturer to use fish oil in their products with success."

Good Prospect for Spring Trade

C. A. Ommanney, Western sales manager of the Carter White Lead Co., commented favorably on the outlook for future business as follows:

"There seems to be every reason for thinking that volume of paint business will continue heavy, for as far ahead as it is necessary to look at this time.

"Doubtless demand will fall off during the balance of 1920, due to general business uncertainty, coupled with tight money, and declines in many lines. The paint trade, in connection with all others, believe that the peak of high prices has been reached, and that any change is sure to be downward. Under these conditions they are not buying freely, but instead are confining their purchases to immediate requirements, and are endeavoring to reduce stocks on hand as much as possible.

"The result is a reduction in volume on present orders, but this is offset to a considerable extent by tonnage moving on back orders, with factories still working to capacity. It seems reasonable to conclude that manufacturers in the Middle West will have to continue capacity production, in order to complete back orders, take care of present buying, and accumulate stock for spring.

"With jobbers and dealers stocks low at the end of this season they will have to buy liberally for spring delivery, in anticipation of the usual demand from the ultimate consumer.

"With big crops in 1920, a continued shortage of buildings and houses and painting still undone because of the scarcity of material and labor in 1920, the outlook for next season appears to be bright.

"Before spring prices are announced it is

The Brush Department

Developing New Brush Business

Comparison of Two Methods of Brush Selling—How Smaller Store Got Bulk of Brush Trade from Larger Store by Seeking New Business and Better Handling of Stock

THE difference in the way brushes are displayed in hardware stores is very great and the results of the attention on the one hand and the neglect on the other hand are very evident in the difference in volume of sales of brushes in these two types of stores.

There are two hardware stores in a large town east of Toronto where this comparison is very evident. The smaller of the two stores shows brushes of some kind practically throughout the year and their volume of sales of brushes is larger in proportion than the larger store with double the staff but which neglects this important matter.

The larger store does not show any brushes, nor has it even a table or case to display them. When their stock arrives the brushes are taken out of the boxes and dumped in a drawer and before long they have the appearance of being in a rummage sale, as they are scratched and twisted out of shape.

When talking to the buyer about methods of keeping brush stock, he remarked: "Everyone who deals here knows that we sell brushes and they usually go to the drawer and pick out what they want themselves." Of course the development of new business is being overlooked in such a plan.

The motto of to-day is to show the goods. Every second customer may want a brush of some kind and if they are not shown they may walk out and go to the smaller store, as previously mentioned, where a seasonable display is shown for the benefit of customers and prospective new arrivals that are moving into cities and towns every week.

A new salesman came to the aforementioned larger store one day and one of the first things he did was to go into the storehouse and find a piece of board to which he affixed samples of household varnish brushes. The clerks were surprised that they had not thought of this before and remarked: "Why this will save us time when a buyer comes in, as we will just show them the board with the samples on and get the brush from stock."

The little things that help your customer and which give satisfaction not only improve the store but bring extra business for all concerned.

The Bristles Can't Come Out *Every Boeckh Brush Guaranteed*

BOECKH'S
Rubber Set
Paint and Varnish Brushes

Perfect Brushes to Use or Sell

Boeckh's Brushes are perfect because they include every known advantage in material, workmanship, design and service. We cannot make a better brush, so we are seeking ways to give even better service and co-operation to the trade.

The first service we can render any dealer is to show him clear-cut, convincing reasons why he should display, advertise and sell Boeckh's Brushes. We can then help in logical order with prompt shipments, reasonable terms, display helps and the advantages of any selling methods of particular success that are applied by the progressive Boeckh dealers scattered throughout the Dominion.

Give the Boeckh salesman a welcome. He is interested in your success. Talk with him. He may have recently seen a retail problem solved that affects your business. He knows what has made successful sales for other merchants. He is intimate with the affairs of many retail stores of various sizes and kinds in many localities. Let him help you.

SPLENDID PROSPECTS

Continued from page 62.

to be hoped that manufacturers will be on a firm price basis, thus enabling them to stabilize prices and instill confidence in the paint market. A lack of confidence is the only thing which may come between manufacturers and a big business in the Middle West the first part of 1921."

Thrift Talk Goes Too Far

Pointing out that thrift talk could go too far, President N. D. Chapin, of the Billings-Chapin Co., Cleveland, spoke as follows:

"The wave of conservative buying seems to be sweeping the country, borne along by the daily price reductions in various lines. While it is natural and right that a certain amount of conservatism should prevail, I think each one of us, manufacturers, dealers and all others should see to it that we do not let this conservatism carry us too far. Thrift and economy are good things, but, like all good things, they can be abused by being carried too far.

"If now the people are encouraged to buy nothing that they can get along without, it will not be long before the wheels of industry are slowed down to such an extent that the workers will not have the wherewithal to buy when they want. Instead of urging rigid economy, let us urge sane buying, and let us tell the people that if they are going to wait for pre-war prices before they buy, they will only get them in the near future by going through the hardest time this country ever experienced; and when they come out of it they will find wages as well as merchandise on a pre-war basis, and that they are practically no better off than before. If we have been overeating and experiencing troubles therefrom, then let us eat sanely and not go to the other extreme and suffer the effects of malnutrition through not eating enough."

Glidden Co. President is Optimistic

Another enthusiastic speaker regarding the business outlook was President Adrian D. Joyce, of the Glidden Company, speaking as follows:

"I am very enthusiastic about the future of the paint and varnish business during the next four or five years. There is no doubt in the world that our manufacturers, jobbers and dealers are going to have a splendid business, and, best of all, this business is going to be on a safe and sane basis.

"I feel that the paint and varnish industry is in an enviable position, because we have a definite timely task before us to 'save the surface and to save all,' for painting and varnishing have been greatly neglected because of the war for nearly six years and no matter what the general business conditions, owners of property of every description are finding that the way to economize is to save, and to save is to use the products of our industry.

"Concerning general business conditions I firmly believe that when the election is over we are going to have sound, prosperous conditions and that there is going to be business enough for everyone. Our own concern is optimistically planning for a better and bigger business than ever during 1921."

The Price Situation

Dealing with the price situation Charles R. Cook, president of the Cook Paint & Varnish Company, spoke as follows:

"Admittedly business is quiet, and this, in the face of an imperative need and demand for paints and allied supplies, only means that the buyer is holding off for lower prices.

"Frankly, and in all honesty, our costs to-day are considerably higher than when present selling schedules were established.

"While it is true that all oils, driers and reducers, used as paint and enamel vehicles, have declined, everything else entering into the cost of a gallon or a barrel of paint or enamel or allied product has radically advanced, to say nothing of our increased manufacturing expense and increased cost of doing business.

"In the meantime, everyone is cleaning up his stocks of odds and ends; therefore, if, in the future, we are favored with lower costs on pigments and other necessary raw materials and supplies that enable us to reduce prices to our trade, I believe business will pick up with a rush.

"It certainly is good business for the manufacturer and the dealer to cover his requirements, as usual, for paint is a necessity and cannot be done without."

Resents Reflection on Paint Industry

John G. Lowe, president of the Lowe Bros. Co., Dayton, related the following incident:

"Two weeks ago we entered into a contract with a new consumer to furnish one hundred barrels of iron oxide paint. This resulted from our shipping a sample barrel which proved satisfactory. After the contract was placed the president of the firm in question returned from a trip and immediately wrote, stating that he noticed we had received their contract and requesting that we do not cheapen the quality of their material as was the usual practice among paint manufacturers. This attack upon the paint industry made me 'hot under the collar' and I immediately replied that there were five or six hundred paint manufacturers in the United States, that there were some unscrupulous ones, but that the majority were as good and reliable firms as could be found in any other industry.

"The standing of the prepared paint industry is being strengthened yearly, in my opinion. Our big difficulty is that mixed paints in the majority of cases are used by amateurs and these often lack knowledge in preparing suitable surfaces and in methods of application. It seems to me that the best ways to further advance the standing of our industry are through our salesmen and advertising, to educate our customers in the uses of our products, and, in addition, of course, to adhere strictly to furnishing materials as represented."

1921 Will be One of the Best Years For Paint

"If 1921 is not one of the best years the paint trade ever had then there are going to be a vast number of disappointed retailers, architects and painters," said Tyler W. James, of the J. A. & W. Bird & Co., Boston.

"I have called upon many dealers, architects and painters, and the general belief among them seems to be that there will be an immense amount of building in 1921. In fact many with whom I talked predicted that it would be the greatest building year in history.

"However, I found a widespread complaint that many prospective users of paint were holding off for a decrease in all building materials, including the cost of paint. I believe I state it fairly when I say that it is the consensus of opinion among members of the trade that there will be no early reduction in the price of paint. At any rate there will be no great reduction. It seems to me that it would be good business to offset some of this low price propaganda by getting all the publicity we can for the true conditions. With the cost of operation sky-high there can be no reduction in the price of paint, simply because linseed oil and turpentine prices have been reduced. I have found no possible reduction in the price of high-grade enamel or varnish."

"FLOOR PAINT WEEK"

Continued from page 60.

of painting at other times of the year. If the house owner gets in the habit of renewing the finish in the interior of his house regularly and seeing the good results therefrom, he will be a much easier customer to convince as to the advantage of more frequent painting of the house exterior. A nicely painted verandah floor will suggest that pillars, posts, cornice, lattice work, etc., need painting. Thus it is seen that the suggestive value of this appeal is also important.

The suggestion conveyed through the finishing of the house floors in the fall is that the walls and other woodwork might also be refinished to good advantage. This suggestion will possibly make good business for the usually quiet months in the paint department. Keeping interest in painting alive during the winter months will make it much easier to get enthusiasm started in the spring. A locomotive has little difficulty keeping a heavy train on the go if it is kept moving at all, but once it stops then the load is increased many times over to get it moving again. So it is with the paint department. The paint salesmen can arrange special weeks during the winter months specializing in various interior finishes, displays in the store interior and window can be used to advantage periodically through the winter months even though business may be slack. These are all efforts to keep the interest moving along and it will then be an easy matter to speed up later. It will also be surprising the amount of interior finishes which can be sold in the winter months by following this plan.

Stimulating interest in floor painting in the fall of the year means additional business for the trade, helps to make paint an all-year seller, and adds to the comfort of the homes that would otherwise go with poorly finished floors throughout the winter until the usual spring habit comes around, at which time it is found that the woodwork has suffered irreparably through the neglect. Encouraging fall painting of floors is one important means of keeping interest in the paint department alive throughout the year and it is worthy of attention.

New Glass Plant Now in Operation

Montreal.—The Delorimier plant of the Dominion Glass Company, Montreal, has been re-opened, and is now being operated regularly. This plant was closed from 1914 until very recently, and the renewal of activities will enable the firm to manufacture lamp chimneys, punch tumblers, etc. While only one tank is being operated at the present time, within a short while three tanks will be in operation.

The Luxeberry Painter Says:

"The Australian savage is not the only one who makes boomerangs. I was hit by a varnish boomerang once. I figured too low on a contract and bought some cheap varnish that made me do the job over at my own expense. It was sure some boomerang. I have never wandered away from 'Berry' brands since."

The Berry label is a certain protection against inferior varnish, and all buyers know it.

Weekly Paint Markets

Montreal

MONTREAL, Oct. 28.—The present condition of the paint market is interesting in several important respects. Linseed oil has reached a new low level of $1.35 per gallon, raw basis. Some believe that the bottom has been reached while others think that somewhat lower prices will prevail before the low level has been reached. The turpentine situation is also easier with barrel lots selling as low as $2.05 per gallon. The tendencies are downward on this product and some would not be surprised to see the price $1.75 or $1.80 in the near future. Shellac is easier. White lead in oil remains steady and unchanged, and advices to hand indicate that there will be no revision of price in the immediate future. Prepared paints and various specialties are in small demand for immediate shipment, but in regard to spring booking orders these are excellent. The prospects are very satisfactory and all manufacturers are banking on a healthy state of trade during the coming year.

Lower Prices Are Ruling on Turpentine

Montreal.

TURPENTINE.—Prices have declined considerably on turpentine and will go lower still according to latest advices given to Hardware and Metal. Prices this week are ranging from $2.05 to $2.10 per gallon single barrel basis. Within the next two weeks there may be a further decline of 15 or 20 cents per gallon, which will bring the price around $1.80 to $1.85. It is a long time since turpentine showed the weakness of undertone which obtains to-day, and it is apparent that southern producers are not finding a very active market for their production.

Turpentine —	Imp. Gal.	
Single barrels	2 05	2 10
Small lots	2 15	2 20

(Packages extra.)

Linseed Oil Has Reached Low Levels

Montreal.

LINSEED OIL.—Prices have declined again this week and are from $1.35 to $1.40 per gallon, raw, single barrel basis. The whole situation seems to be dependent upon the general tendency of the wheat market and this grain has been declining steadily. One factor which is of interest at the present time is that of the effect which linseed oil meal and cake have on the situation. For a considerable length of time prices on these two products have been high and this was one reason for declining oil prices, a crusher stated. Of late declines have been manifest on linseed oil meal and cake and some feel that the bottom has been reached on oil prices. Stocks at the present time are really heavier than they have been for a long while and buying is restricted.

	Imp. Gal.	
Raw—		
1 to 4 barrels	1 35	1 40
Boiled—		
1 to 4 barrels	1 37½	1 42½

White Lead Prices Are Ruling Steady

Montreal.

WHITE LEAD IN OIL.—The demand for white lead in oil while light is seasonable; supplies are normal and prices remain unchanged with 5-ton lots selling at $19.50 for 100 pounds; ton lots at $20.00 and smaller quantities at $20.35.

broad survey of the situation reveals a strong market in general, although local stocks are quite ample to take care of any demand that may arise. The situation is more or less involved from a world standpoint, as will be referred to in a special article elsewhere.

Paint Bookings Have Been Better

Montreal.

PAINTS, SPECIALTIES.—While present business is limited, bookings for paint are very active. One manufacturer speaking to Hardware and Metal states that their bookings had already totaled more than during any previous season up to September 15th. The outlook is remarkably gratifying and some dealers are taking delivery of their spring requirements already.

Putty Sales Are Seasonably Good

Montreal.

PUTTY.—There is a good steady demand for putty and prices remain unchanged. Some might anticipate a lowering of the basis due to the fact that linseed oil has been declining steadily, but jobbers point out that the high price of whiting offsets any favourable conditions arising from lower-cost oil used in the manufacture of the product.

Commercial Putty	5 tons	1 ton	Less than ton
Bulk Barrels, 800 lbs.	$6 50	$6 75	$7 10
Bulk Drums, 100 lbs.	7 50	7 75	8 10
Do., or tins, loose 25 lbs.	7 75	8 00	8 35
Bulk Tins, cased 25 lbs.	8 50	8 75	9 10
Bulk Drums or tins, loose 12½ lbs.	8 00	8 25	8 60
Bulk Tins, cased 12½ lbs.	8 75	9 00	9 35
Bladder Barrels, 400 lbs.	8 75	9 00	9 35
Do., Cases, 100 lbs.	9 00	9 25	9 60
Tins, 1 lb.	11 10	11 35	11 70

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Shellac Market Has Been Easier

Montreal.

SHELLAC.—There is plenty of shellac to be had at present and prices are easier than for some time. Pure orange shellac in barrel lots is now selling at $8.50 per gallon and white shellac at $7.00, the usual differentials applying.

Toronto

TORONTO, October 28.—Business in paint circles is said to be seasonably fair but below the average obtained during the spring and summer. Linseed oil has become a little steadier and the price of flax has begun to advance again. Turpentine is lower, but many believe it to have reached the bottom of the decline for the present at any rate. Shellacs and rosins have steadied. English white lead prices have advanced slightly. Putty prices are holding firm.

Glass Unchanged; Demand Is Normal

Toronto.

GLASS.—There is no change in either the plate or the window glass situation. The American markets continue very firm and there is said to be considerable cancelling of orders placed in Pittsburgh districts on account of overdue deliveries. There appears to be a difference of opinion regarding the Belgian markets. Some glass jobbers state that supplies from that source are satisfactory, while other views are that deliveries are uncertain. Prevailing quotations for window glass are 25 per cent. off list for case lots with 30 per cent. for large quantities.

No Price Changes White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—No changes in quotations of white lead in oil have taken place. Prices of English white lead, however, are advanced, it is stated, following pig lead prices which are stiffening. Corroded lead here has not been affected by the drop in pig lead prices. Quotations are as per current market pages.

Putty Prices Are Holding Firm

Toronto.

PUTTY.—Prices of putty are holding firm and no change is anticipated. Whiting supplies are more available now than was the case at the beginning of the season. Quotations are the following:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80
Do., less quantities	10 05
Pure, in 100-lb. drums	11 05
Do., 25-lb. irons	11 30
Do., bladders in bbls.	12 30
Do., less quantities	12 55

Linseed Oil Prices Are Steadying

Toronto.

LINSEED OIL.—There is not so much change in the linseed oil situation this week and the bottom appears to have been reached, at least temporarily. The flax seed market has stiffened up considerably and this would react on the oil. The demand is only seasonably fair, it is said. Quotations are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 45	1 48
3 to 5 barrels, gal.	1 44	1 47
6 to 9 barrels, gal.	1 42	1 45

Wood Spirits Show Firmness

Toronto.

METHYLATED SPIRITS AND WOOD ALCOHOL.—Prices have been holding very firmly on these products and supplies have been a little scarce at times. Present quotations are $3.00 per gallon for methylated spirits and $4.50 for wood alcohol.

Shellacs and Rosins Display Easier Tendencies

Toronto.

SHELLACS AND ROSINS. — An easier tendency is shown in prices of these two products. Rosins are being quoted at 10 cents in barrels and 13 cents in small quantities. Shellac prices are the following:

Pure White, per bbl, $7.75; gal. jugs, $8.25.
Pure Orange, per bbl., $7; gal. jugs, $7.50.

Turpentine Prices Under Two Dollar Mark

Toronto.

TURPENTINE.—With more competition and a lessened export demand turpentine prices have been steadily declining for some time and another ten cent reduction has been made in quotations this week. It is now below the two dollar mark, and whether still lower prices may be expected is uncertain. A month or so back the present prices would have seemed impossible to the trade. Sales are not as large as conditions warrant. Present quotations are:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 95
2 to 4 barrel lots	1 94
5 gal. lots	2 10

British Plate Makers Seek Canadian Trade

BRITISH manufacturers of silver plate are especially interested at the present time in the development of better trade relations with Canadians, according to Edward P. Van Geun, special representative of W. J. Myatt & Co., Ltd., Birmingham. Mr. Van Geun is at present in Montreal in the interests of his principals, and will also tour other parts of Canada. The better conditions of manufacture has enabled various manufacturers to turn their attention to outside markets, and Canada is being looked upon very favorably as a market for many varied products made extensively in the Old Country.

"We will do anything desired by the Canadian trade in the way of conforming to their wishes regarding finish, pattern and packing," said Mr. Van Geun. "We believe that, as far as packing and shipping goes we know how to do this well, but we are ready to meet the desires of the Canadian buyer in this and any other respect."

It is in this respect that some fault has been found here and there in the past, that is, many assertions have been made that the British maker would not lend himself to these conformities when it was desired that he do so.

Delivery to Be Better

One of the difficulties that has been experienced heretofore, Mr. Van Geun says, has been that of the delays between the placing of orders and the receipt of the goods. Coupled with this, and even worse, manufacturers were unable or unwilling to name a price that would apply when the goods were invoiced. "We are prepared to name firm prices on orders now taken," he remarked, "and for a considerable volume of orders taken now delivery will be made before Christmas."

This desirable improvement is meeting with the appreciation of the Canadian buyers, for it was pointed out that they are glad to obtain a definite price, and then to know that within a reasonable period delivery will be assured. Up to the present time there has been all the demand at home that the factories could handle, and this condition exists to a great extent still. At the same time, the British manufacturer is anxious enough to secure the Canadian trade; so much so that he is making a stronger bid than ever for a portion of it. To this end samples are being exhibited, on a number of products, for the first time in twelve years, Mr. Van Geun states. It was as far back as 1908 when the Canadian trade was offered a number of imported lines in sterling and electroplate ware.

Prices Are Favorable

In the matter of prices, Mr. Van Geun states that these are favorable and that thus far the Canadian buyer has been well satisfied with the quotations. Shipments are being based with Liverpool as a starting point, so that there is no need for the Canadian buyer to figure his transportation costs from an inland point to shipping point. This simplifies matters considerably and is generally appreciated.

The cost of chemicals has affected the price of manufacturing plate, and on sterling silver products the cost, per ounce, has been very high. Nevertheless, as compared with many other manufactured products, it is pointed out that the increases have been not excessive. On a number of lines, for instance, the pre-war prices have not advanced over 75 per cent., while in others they will total nearly 100 per cent. Numerous other products have risen since the pre-war period several hundred per cent.

In the matter of Christmas trade, Mr. Van Geun states that the English trade, while gradually adopting the Canadian and American idea of exchanging Christmas gifts, has to go a long way still before the idea has the hold on consumers as it has here.

Greater Expansion

While the present activities of the British manufacturer, in Mr. Van Geun's opinion, will be confined to a gradual cultivation of trade among Canadians, as conditions warrant, the field will be catered to even more extensively. That is, warehouses will be provided on this side of the water, and later again factories will be established.

At present, he asserts, the sterling exchange rate is proving to be an added advantage, and that laid down costs are favorably considered by the average buyer.

Exports of Rosin and Turpentine From U.S. to Canada

Domestic exports of rosin from the United States to Canada during August, 1920, amounted to 9,183 lbs., valued at $150,542.

Exports of spirits of turpentine to Canada during the same period amounted to 47,995 gals., valued at $75,640.

Safety for the Ship

WHEN a ship at sea has to anchor to weather a gale its safety is dependant on the strength of the anchor chain.

Every mariner realizes that this chain must always be ready for an emergency. He makes certain that it is the best possible obtainable and that it receives constant care and attention.

He has it inspected regularly for every sign of wear, and a protecting coat of paint is applied at intervals to prevent corrosion and the destructive action of the elements.

If Barns and outbuildings were carefully inspected occasionally, and a protecting coat of paint applied, it would mean that many expensive repair bills would be saved and the contents of the Barn protected from the elements. Neglect is costly.

DISTRIBUTORS OF CROWN DIAMOND PAINTS AND VARNISHES:—Stewart & Wood, Limited, Toronto; W. B. Dalton & Sons, Kingston; Crowell Bros., Halifax, N.S.; Robertson, Foster & Smith, Limited, St. John, N.B.; Farquhar & Gill, Vancouver, B.C.

If interested tear out this page and place with letters to be answered.

Protection for the Barn

The Barn that is worth painting is worth painting well, and it is poor economy to use the cheapest paints for protection. It pays to use a paint of guaranteed purity,—a paint which covers more area per gallon and lasts longer—looks better, and gives real protection with its water-proof and weather-proof coating.

For real economy in a paint for the Barn, recommend Crown Diamond Utility Red, which is manufactured from pure natural oxide of iron and linseed oil, and—Every gallon sold is backed by the McArthur Irwin Limited reputation for reliability and fair dealings.

We would like to send you further details of Crown Diamond Utility Red, and why it is economy for every farmer to use it when painting his Barn or outbuildings—

Westco Tankless Water System

A Necessity in Every Rural Home

Nothing is so badly needed in most rural homes, farms, etc., as running water. The Westco Tankless Water System—which weighs less than a hundred pounds—performs its duty thoroughly wherever installed, and is receiving whole-hearted praise from farmers and rural residents who have installed one.

The agents, salesmen and engineers now recommending—and selling—the Westco System are making good profits, because the high reputation of the system is spreading rapidly. It can be used wherever electricity is available.

These are the selling features—the points that will interest the farmer, and the rural suburban resident:

(a) Requires no pneumatic or attic storage tank.
(b) Simply constructed; no possibility of complications.
(c) Entirely automatic. Open tap, pump immediately starts pumping. Close tap, pump stops.
(d) Pumps 300 to 500 gallons per hour.
(e) Costs less to buy, install, maintain and operate.
(f) Has no tank, no gears, no valves, no belts, no oil cups, no grease cups, etc.
(g) Is self-lubricating.
(h) Pump has only one moving part — the impeller. Nothing to wear out, except two small bearings, which will last for years.
(i) Size 16½ in. long; 14½ in. wide and 11 in. high.
(j) Uses less power than an electric iron, while supplying water for four faucets.

Write us for full particulars. There are still a few good territories left open.

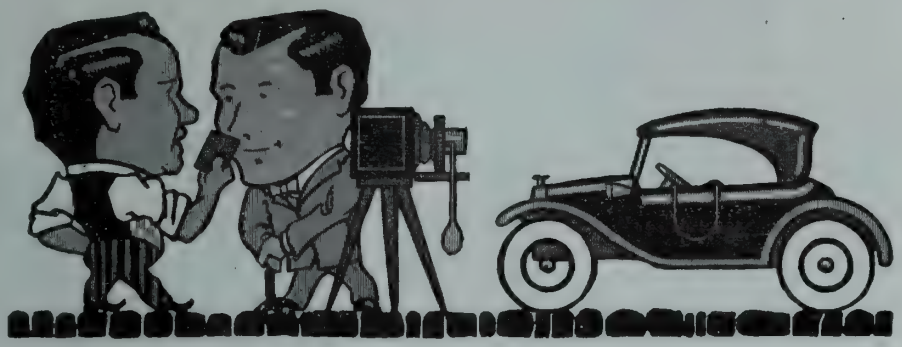
Let this Picture Work for You!



HERE'S an inkling of the first advertisement in the heavy Effecto magazine advertising campaign this Fall — an advertisement that will reach more than six million subscribers to Cosmopolitan, American, Red Book, Farm Journal, Christian Herald and Farm and Fireside. This campaign will sell goods for you — if you have Effecto, the original auto enamel, on your shelves.

Effecto AUTO Finishes

Effecto Advertising has been working for Effecto Dealers for many years. Each season a larger campaign sends more prospects to the Effecto Dealer. It's a permanent part of the Effecto proposition — one of the chief reasons why the dealer who is keen for *new* sales is keen for Effecto.

You will be surprised and pleased with the amount of co-operation included in the Effecto proposition, in addition to this constantly enlarging magazine campaign. May we tell you what this proposition is? — a post card will let us know that you are interested. *Get "lined up" now for sure, steady sales and profits on Effecto!*

The Standard Since 1876

Standard not only in Canada but all over the world. That is the record of Wheeler's Patent Wood Filler, a record established entirely on results.

There is no reason for using a substitute when

WHEELER'S WOOD FILLER

is the most economical as well as the best-wearing. It not only covers more surface per pound, but forms so perfect a foundation for finishing that it saves considerably in labor and material.

There is but one Wheeler's Wood Filler. Order your stock to-day. Manufactured and sold by—

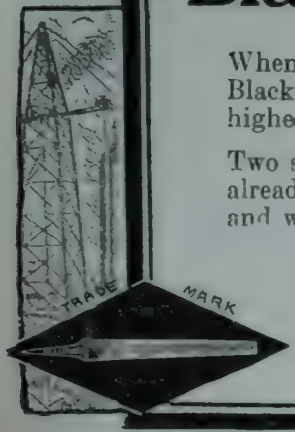
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Stephens'

REGISTERED TRADE MARK

Celebrated Wa-Ko-Ver Stain

Wa-Ko-Ver beautifies all woodwork and literally wears like iron. Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore its freshness. This reliable, trustworthy stain has long since won the confidence of consumers. It gives full value in service and creates consumer-satisfaction in the goods and confidence in the store that sells it.

This established reputation makes Wa-Ko-Ver Stain a pleasure to sell. A good display in your windows or on your counter reminds the housewife and keeps it moving.

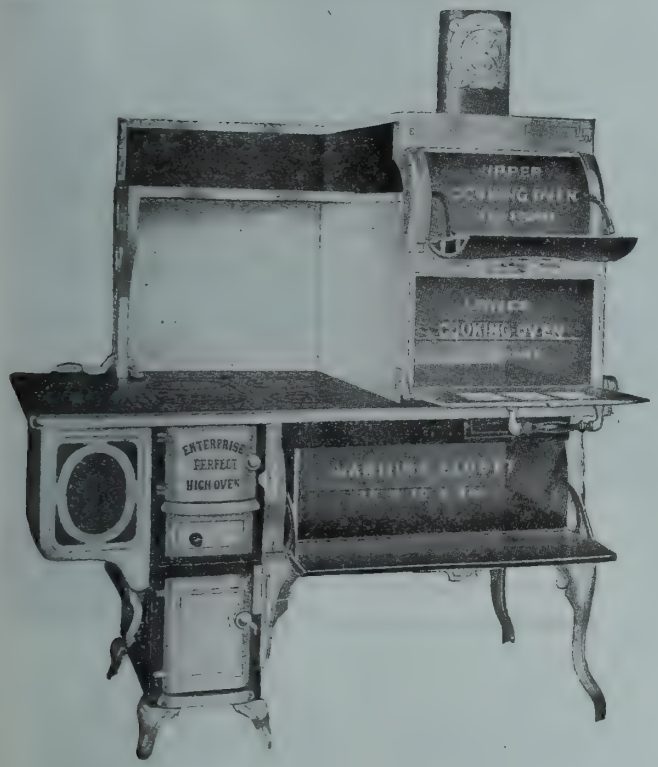
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



"Perfect" Double High Oven
Over 20,000 Satisfied Users

Write to-day for the Ashdown catalogue giving complete information of the Ashdown lines of ranges, of note for service and sales; "Perfect," "Monarch," "Ideal," Domestic," "Oak Heaters," and "The Open Franklin."

ENTERPRISE

Ranges, Stoves and Heaters

Delight Customers with their service-giving qualities

That there are 20,000 satisfied users, is surely convincing proof of the popularity and quality of Enterprise Ranges. It has been received and acknowledged as the last word in service-built ranges and its popularity is still growing. Customers do not buy a range every week, but the dealer will find his stock moving fairly fast the way the experienced housewives continue to recommend Enterprise Ranges to their friends.

Here's One Way To Sell More LIQUID VENEER

LIQUID VENEER MOP

Famous for its removable swab, which slips from frame like a curtain from a rod, easy to wash, dry and slip back on frame.

Also noted for the full, fluffy yarn center which picks up and carries away vast quantities of dust and dirt. This is an exclusive feature and a wonderful improvement.

Treated with Liquid Veneer, it makes your floors RIVAL YOUR PIANO in cleanliness and brightness.

CHAMPION OF THE WORLD

Supply your customers with a few Liquid Veneer Mops, without question the finest, quickest-selling mop ever offered. It sells on sight. Its *5 Big New Features* appeal to every housewife.

Every user of a Liquid Veneer Mop will immediately become a bigger buyer of Liquid Veneer. It takes more Liquid Veneer to clean and polish a floor. So, every mop you sell puts you in line for increased Liquid Veneer business, and you know the extra large profit there is in Liquid Veneer for you.

Each mop packed in beautiful lithographed metal can, a distinctly handsome. salable package. Retails for $2.50 each, complete with long 54" handle. Advertised heavily in leading Canadian publications.

Ask about the Liquid Veneer Mop Assortment, just the thing to make a trial with and a *big profit-payer.*

Barrett Roofings, Cements Industrial Paints etc.

YOUR customers know that the use of these Barrett Products will absolutely insure their barns and other buildings against the ravages of the winter months. You owe it to your trade to be well stocked to meet their needs.

Everlastic Liquid Roofing Cement

UNEQUALLED for resurfacing worn-out felt and "Rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has the same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1-pint tins to 40-gallon barrels.

Elastigum Plastic Patching Cement

THE plastic cement of a thousand uses—tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions. Elastigum is a popular repair material for which dealers are finding a tremendous demand this year.

In 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. packages, ½ barrels (about 300 lbs.) and barrels (about 600 lbs.).

HERE are some other Barrett Products ready to make money for you. They all bear the Barrett name—and they're all Barrett quality. The popular Everlastic "Rubber" Roofing, Everjet Elastic Carbon Paint, Nox-Aer-Leek Boiler Setting Cement are money-makers and satisfaction-producers.

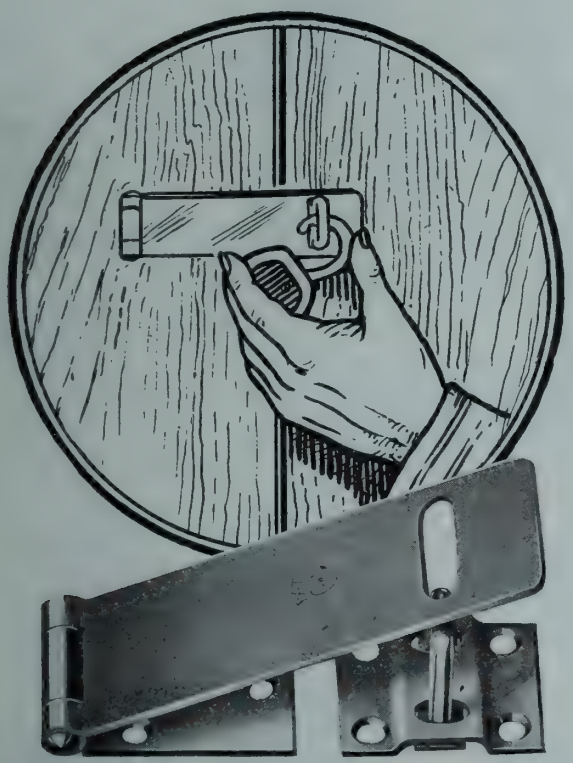
Safety Padlock Hasp No. 915

Positive Security



WHEN closed all the screw holes are covered, making this Hasp as nearly burglar proof as possible.

Made in Wrought Steel in sizes 3-4½-6 inches.

No. 915½ is the same as No. 915 except being extra heavy and made in 7 inch size.

Send for Booklet R 101.

These ads. are working for you

You can't help selling VICTOR Traps because more VICTOR Traps are bought than all other makes combined.

With the bigger demand on account of the increased trapping this Fall, you will do well to link your store in no mistakable fashion with

Oneida Community Game Traps

The ads.—shown here in a much reduced size—are educating fur-getters to avoid substitution by looking for the "V" cut in each pan.

Since trappers want only Oneida Community Game Traps, you owe it to yourself to display them prominently.

Feature VICTOR Traps and get all the benefit of these ads.

Your jobber can give you all information.

Oneida Community, Limited

Niagara Falls, Ontario

Makers of Victor, Oneida Jump, Hawley-Norton and Newhouse Traps.
Oldest and Largest Manufacturers of Game Traps in the World.

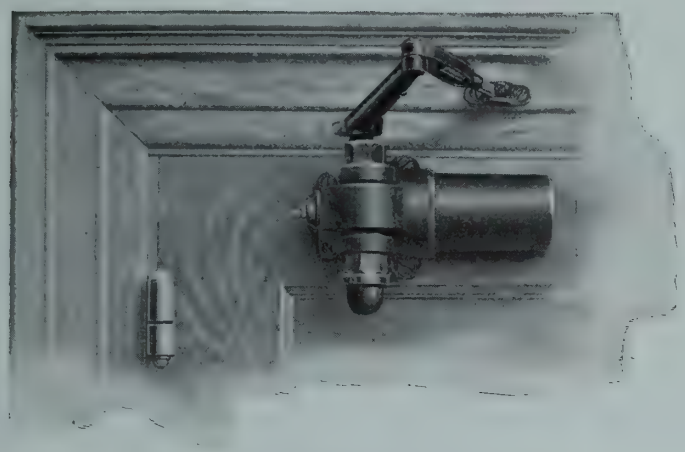
REGISTERED TRADE MARK

Simplicity—Durability

No Lefts or Rights
No "Winding-Up" Springs
Longer Plunger
Larger Bore

RIXSON



Oil Stays Fluid at 40° Below
Springs and Working Parts Always in Oil
18 Years Without an Equal

RIXSON

Genuine Rixson Door Check

Single-Acting

Guaranteed for two years

The spring in this check will stand more wear and tear than any other type—it would serve even if it were broken in two places; our "cut-open" sample shows this. The spring is ready for business—no guesswork in adjusting. The check is most active when the door is nearly closed—important in overcoming latch friction, or sagging, etc. The oil contains no alcohol to evaporate—the element used is a valuable lubricant. Working parts always in oil—no friction or rust.

This splendid check is one of the good sellers offered the trade by the Toronto Lock Mfg. Co.,—the To-lo-co people. Those who have tried it find this organization determined to give superior service to the trade, prompt service and the best prices the market will permit. This house always stands ready to replace without discussion any defective part—should there be one. It appreciates trial orders from hardwaremen who are looking for good service. Ask for Catalogue A on Builders' and Cabinet hardware.

The average dealer usually carries various types of Cordage, each possibly efficient in its own limited sphere; why isn't it good business to concentrate on the sale of

AERO CORD

which gives superior efficiency for all purposes, thereby reducing stock and eliminating much unnecessary detail work and which will result in a larger percentage of profit.

AERO CORD will give equal satisfaction indoors or out.

If your Jobber cannot supply you write us.

Corrugated Garbage Cans

Galvanized

A Davidson Garbage Can does not rust because it is heavily galvanized after the body is made up. Iron rings japanned in colors at top and bottom counteract the very roughest usage—seamless overlapping cover. The corrugations around the body give extra strength.

Several other styles of galvanized cans—write for particulars.

Type No. 6001

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly

Manufactured in Canada

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

CARTER'S

Carter's Genuine Dry Red Lead

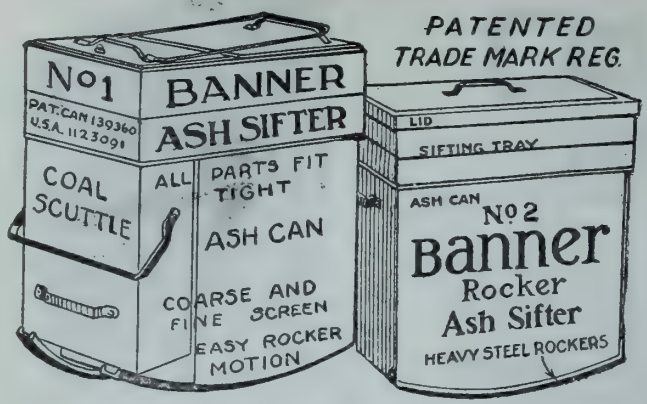
A pure, uniform and economical paint and preservative for metal work, steam pipes, etc.

Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity.

Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for prices on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

The Carter White Lead Company of Canada Ltd., 91 Delorimier Ave., Montreal



HARDWARE DEALERS!

Five Minutes' Concentration of Thought on Ash Sifters will convince you that the

BANNER ASH SIFTERS

are superior and more satisfactory than other styles.

First, the back-breaking shaking is eliminated. Easy rocker motion. All weight on ground. Sifts the cinders clean. Cannot clog. Convenient height. Sifts quickly. All parts made to fit tight. The No. 1 has a coarse and fine screen that saves extra fuel. Also an attached scuttle that closes in all dust in transferring. Can you conceive of more satisfactory ash sifters?

TORONTO, ONT.

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the most economical saws to buy in the long run. They stand hard usage and wear exceptionally well, hold their cutting edge and temper longer than the ordinary saw and do not bind in the kerf. Lumbermen prefer the Simonds Crescent Ground Cross-Cut saw because they have proven that it will cut 10 per cent. more timber than other brands.

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

More Prefitable Lines for the Hardware Dealer

Our products earn maximum profits for the dealer. A trial order will convince you of their great sales-producing qualities.

We manufacture—

Iron, Copper and Brass Rivets
Small Washers and Burrs
Wire Nails
Countersunk Clout Nails
Escutcheon Pins (Brass and Steel)
Tubular and Bifurcated Rivets
Copper and Steel Boat and Canoe Nails, Etc.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough, leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

The Publisher's Page

TORONTO OCTOBER 30, 1920

We're with You

ON Wednesday, Oct. 20, the Association of Canadian Advertisers endorsed the statement of W. G. Steward of Goodyear Tire and Rubber Company that all trade newspapers should be required to furnish audited statement of circulation.

Advertisers who are members of A. C. A. and those who are not would be acting in their own interests and in the interests of Canadian publishers by insisting that every publication in which their advertisements appear should come out into the open and furnish a statement of circulation certified by some independent organization such as A. B. C.

Hardware and Metal is the only hardware publication in Canada that has submitted its circulation records to the pitiless audit of the Audit Bureau of Circulations.

Hardware and Metal reaches all the wholesalers and jobbers, 90 per cent. of the retailers, and many travellers, salesmen and clerks of the Canadian hardware trade, and is the only Canadian hardware paper that furnishes a circulation statement audited by the Audit Bureau of Circulations. The rates are moderate: $65 per page; $36 for half page; $21 quarter page, and $120 for two pages. Cost of color, and inserts on special stock, supplied on request.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

Montreal Branch, Southam Bldg. **Winnipeg Branch, Union Trust Bldg.**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

No. 91 Kerosene Torch.
List Price, Each, $17.60.
Ask for Discount.

The No. 91 Kerosene Torch

is well balanced and is popular with the Trade where kerosene as fuel is desired. The burner is fitted with shut-off needle, producing a steady blue flame of intense heat and will quickly melt quarter-inch copper rod and do medium and light brazing. All parts are interchangeable and the improved construction of the burner practically eliminates carbon deposit. The tank is made of heavy gauge drawn brass, reinforced and fitted with patented automatic brass pump, which easily and quickly supplies the required air pressure. Jobbers supply at factory price. Send for catalog.

In Temper With the Times

Huther Brothers Inserted Tooth Milling Saw

(Coarse Pitch Type)

A SAW guaranteed to increase the production of any cut off machine. During the World War, when the great Ordnance Plants required milling saws to cut the great cannons, several of the largest plants chose

Huther's Inserted Tooth Milling Saws

and they were wise in their judgment, for they are guaranteed to be the fastest, freest cutting, thinnest, inserted tooth milling saws on the market.

The Inserts may be worn down to about 3/16 inch from the heel before it is necessary to replace them. This allows you over 1¼ inch wear, which means that you can get more day in and day out use from this saw than any other in the market.

The inserts are made of the very best quality high speed steel, according to our patented process, perfected through fifty years of "know how."

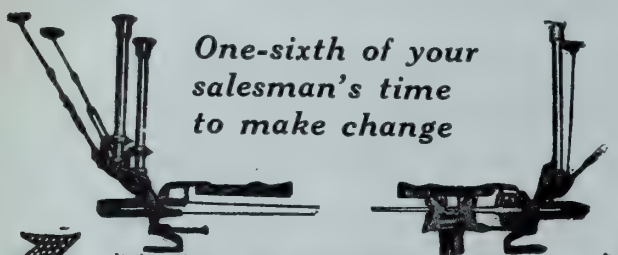
Why the Head Engineer Stands by "Maple Leaf" Belting

Sells Easily

Engineers everywhere have the utmost confidence in "Maple Leaf" Belting. It stands by them. It is reliable and dependable and can be trusted to fulfil its mission. That is why engineers use "Maple Leaf," and dealers find good profits and repeat orders.

The Dominion Belting Co Limited
Hamilton Canada



One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

"The City of Peril"

By Arthur Stringer

"THE CITY OF PERIL" is full to the brim—and overflowing—with thrills, as it moves with kaleidoscopic swiftness from New York to Petrograd, and back again. Mr. Stringer always writes vividly and picturesquely—and every chapter has its *punch.* No living Canadian author can write more absorbing fiction, or put more compelling action into every chapter. "The Hammer of God" writes mysterious notes which throw Wall Street into a panic. Who is the "Hammer of God?" By reading this short-length novel, which will appear in huge instalments in this and the following issues of MACLEAN'S, you can satisfy your curiosity.

What Will Calder Do ?

NO one knows, not even Mr. Calder, according to J. K. Munro. This article also tells in Mr. Munro's inimitable fashion some secrets of Crerar, the Hired Man's Hero; of Mackenzie King and his all-star Talented Entertainers; of Premier Meighen, who has "hurled himself into the arena, with the National Policy in one hand and an axe in the other."

Other Articles and Stories Include :

"Banquets and Banqueteers"—Col. George Ham continues his recollections of famous and piquant characters. These reminiscences are being read from P.E.I. to B.C.—and beyond, and attracting scores of interested letters.

"St. Denis and the Plague"—By E. Llewellyn Hughes. A distinctive story of real merit, and a very charming girl.

"The Little Warrior"—By P. G. Wodehouse, has another rib-tickling instalment of generous proportions.

"Orsifer of the Law"—By Archie McKishnie, is another Lenix Ballister story, which shows the swarthy "hero" in a new light.

"Cash and Carrie"—By Leslie W. Barnard, a young Canadian author whose fiction is attracting attention.

"Sketches of Many Premiers"—Mrs. Asquith knew seven Premiers of England—and knew them intimately. There are not many untold secrets in Margot's life.

Review of Reviews Section

Some of the subjects discussed here are :

"Startling Facts from Versailles."
"One Solution of the Servant Problem."
"The New British Empire."
"Cancer Increase and How to Check It."
"The Women of Poland."
"Co-Partnership, the Labor Trouble Remedy."
"America Must Take Sides."
"Hungary Aiming to Restore the Monarchy."
"Murder of the Czar and His Family."
"Wealth vs. Love."
"Signs That Show a Man is 'Slipping'."

Why is the Disston Trowel the choice of so many careful workmen?

Because it is manufactured in one piece from extra quality Disston-Made Steel. It is hardened and tempered by special Disston processes to give the much desired flexible blade. It is ground perfectly, insuring a smooth working surface. The post is straight and sits at an angle to the blade which gives an excellent balance to the tool. The handle whether Beech, Gum, Hickory, or Apple, fits the hand with unusual comfort. All these things mean a tool that is a real pleasure to use.

307—Horsehide palm and thumb, four fourchette back split, leather cuff.

334—Full split, four-inch leather cuff.

401—Full horsehide, Plymouth pattern, strap around thumb, welted back and closing, four-inch sheepskin cuff.

SAID a travelling salesman in his report: "In one store where I got the initial order for Carhartt Gloves, I was informed that they had repeated twice in spite of the fact that the glove season had been very backward."

Isn't that pretty conclusive proof that Carhartt Gloves would be a profitable line for you to handle? Carhartt Gloves sell well because they have a good appearance. They turn over quickly because they give the customer the best value he can get for the money. Even the lowest-priced range is finished well. And they bring repeat business because they give good service to the various classes of workers for whom they are especially made.

In the Carhartt line you can get split and horsehide gloves for all classes of trade ranging from farmers' mitts, mechanics' and motormen's one-finger mitts and gloves to the highest class of railwaymen's gloves and gauntlets.

A display case or window of Carhartt Gloves, besides adding a note of attractiveness and progressiveness to your store, will often influence or suggest other purchases as well. Drop a line to-night for a sample assortment.

Canadian Products Popular in Foreign Markets

Future of Canada's Mercantile Marine is Assured—Better Transportation Facilities—Harvesting of Crop Will Ease Money for Financing of Export Trade—Export Trade in Hardware, Cutlery, Vehicles, Paints, and Metals Shows Increase in Latest Figures.

WHERE Canadian products have found their way into the markets of the world these products have been well received and encouragement given for further trade. While present conditions in the Canadian market are somewhat unsettled, owing to the wave of price reduction proceeding chiefly in the United States and reflected in this country, manufacturers realize that there is a shortage both in Canada and abroad for most lines of goods and they are planning their production accordingly. Underlying business conditions in Canada are good; one of the largest crops in history is now being marketed and when this crop has been sold there will be provided a much increased credit for the financing of export trade. It is a recognized fact that the development of export trade requires considerable capital and this factor is receiving attention at the hands of Canada's banks. Owing to the wise curtailment of credit in recent months by the Canadian banks, credit has been kept on a sound basis and speculation discouraged. The result is that business is on a sound foundation and with the easing of money there is expected to be a great increase in the volume of business in Canada.

New Year Will See Big Business Resumption

While conditions are unsettled in many parts of the world to-day owing to labor troubles and difficulties encountered in the readjustment to more normal conditions, Canada is rapidly surmounting these troubles at home and through wise administration business men now feel confident in pointing to the likelihood of the resumption of business on a scale larger than any since the war, to commence early in the new year.

The existence of such conditions in Canada proves encouraging to manufacturers and evidence of their confidence in the outlook is found in the plans they are making for factory extensions, new products and increased production. Thus Canada is in splendid shape for the development of export trade from the standpoints of quality and quantity of products, credit facilities, etc.

Canada's Mercantile Fleet

Another big factor in the development of export trade is the necessity of having a mercantile fleet which is capable of taking Canada's products in required quantities to the markets of the world. Here Canada also stands well for this country now possesses a splendid mercantile fleet under Government ownership, a fleet of ships which are carrying Canada's produce to the farthest markets of the world to-day. The present fleet is but the nucleus of bigger developments in the future and the Canadian Government is prepared to add more ships from time to time as trade warrants.

Another fact which indicates Canada's increasing attention to matters of mercantile marine is the recent addition of a number of first class warships to the naval quota, for the purpose of giving ample protection to Canada's coastwise trade, and to form the nucleus of a fleet capable of protecting the future channels of trade to the markets of the world which Canada will maintain.

Effect of St. Lawrence Waterways Scheme

At the present time there is a movement under way which will have for its object the improvement of Canada's shipping facilities in connection with the development of export trade. This movement deals with the deepening of the St. Lawrence river, Canada's natural outlet to the sea, in order to permit ocean vessels to proceed up to the Great Lakes and thus take shipments from the centre of Canada direct to foreign markets without re-shipment or the use of rail transportation. A commission is now investigating the matter fully in both the United States and Canada as it is intended that the tremendous cost of such an undertaking would be shared by both countries. While this movement is largely forecast, it is an indication of the progressive measures being adopted in this

country having in mind the successful development of export markets and enabling Canada to achieve a high place in the markets of the world.

How Canadian Goods Are Received Abroad

An indication of the manner in which Canadian goods are received in foreign markets is found in the statement of William Whiteley Ltd., one of the largest departmental stores in Britain. This firm's buyer reported that Canadian lawn mowers, garden tools, oil stoves and other hardware lines were very satisfactory and sold readily. In such lines as washing machines it was stated that the Canadian product was of a high quality but some educational work should be undertaken by manufacturers on such lines.

While it may be commonplace to repeat the statement, yet it is nevertheless true that the war gave Canada an unexampled opportunity to enter the world's markets. It is significant that during the five years ending March 31, 1919 (corresponding approximately to the war period), Canada exported almost exactly one and a half times its total exports from Confederation (1867) down to 1914. Exports of Canadian produce reached, during this period, the enormous total of $5,050,000,000. Those of the fiscal year ending March 31, 1919, the second highest year, were $1,207,000,000—a contrast indeed with the $126,000,000 of 1909.

While much of these large exports consisted of war supplies yet it is a fact that Canada shipped abroad much greater supplies of articles previously exported, and found a market for many articles new to export trade. New markets were also found in the Continental Allied Countries. At the same time Canada nearly trebled its exports to British Countries outside of the British Isles from 1914 to 1919, increased its exports to the United States one and a half times and more than quadrupled its Central and South American trade.

Latest Figures of Export Trade

Latest figures of Canada's export trade representing the first four months of the fiscal year ending July, 1920, show a total export trade of $342,112,423.

Canadian sporting goods were exported in that period to the value of $21,339 in 1920 as compared with $15,593 in the same period ending July, 1919.

Iron and its products were also exported in a larger quantity than formerly. These exports for four months ending 1920 totalled $26,525,-299 as compared with $25,945,185 in 1919 and $18,157,058 in 1918.

Wire of all kinds also showed an increase, total exports in four months ending July, 1920, being valued at $770,269 as compared with $610,504 in 1919.

Automobile parts were exported in that period of 1920 to the value of $834,418 as compared with $343,356 in 1918. Passenger automobiles were exported to the value of $3,557,-945 in 4 months ending July, 1920, compared with $2,859,668 in 1919. Freight automobiles are exported to the value of $807,045 in 1920 period compared.

Total hardware and cutlery exports also show an increase, these totalling $3,033,390 in four months ending July, 1920, compared with $2,102,882 in 1919 period and $1,735,110 in 1918 period of 4 months.

The export of paints has also increased, figures for 4 months ending July, 1920, being $650,671 as compared with $254,295 in the same period 1919. Total paints, pigments and varnish exports in that period are $679,349 as compared with $265,145 in the 1919 period.

What Harris Told the Salesman

"Sorry, old man, but I'm not in the market for any other radiator repairers. I've got one here—and it's a dandy. Retails at 75 cents and is *guaranteed* to repair cooling system leaks quickly—and for good. It sells easily, and gives me a quicker turnover at a bigger profit."

"But—." started the salesman.

"No 'buts' about it, my friend. To buy your brand I'd have to carry about six different sizes—tying up more of my money. One can of SE-MENT-OL is enough for the largest cooling system—no need to stock other sizes. And I don't intend to change brands—I'm 'sold' on

SE-MENT-OL

SE-MENT-OL is the **original** self-acting radiator repairer. SE-MENT-OL Liquid, kept in the radiator, will keep the cooling system leak-proof for the life of the car.

If you're not already handling SE-MENT-OL and the other NORWESCO products, take a tip from Harris. He used to sell several brands—now he's pushing only NORWESCO.

Retail price, Liquid or Powder, 75 cents

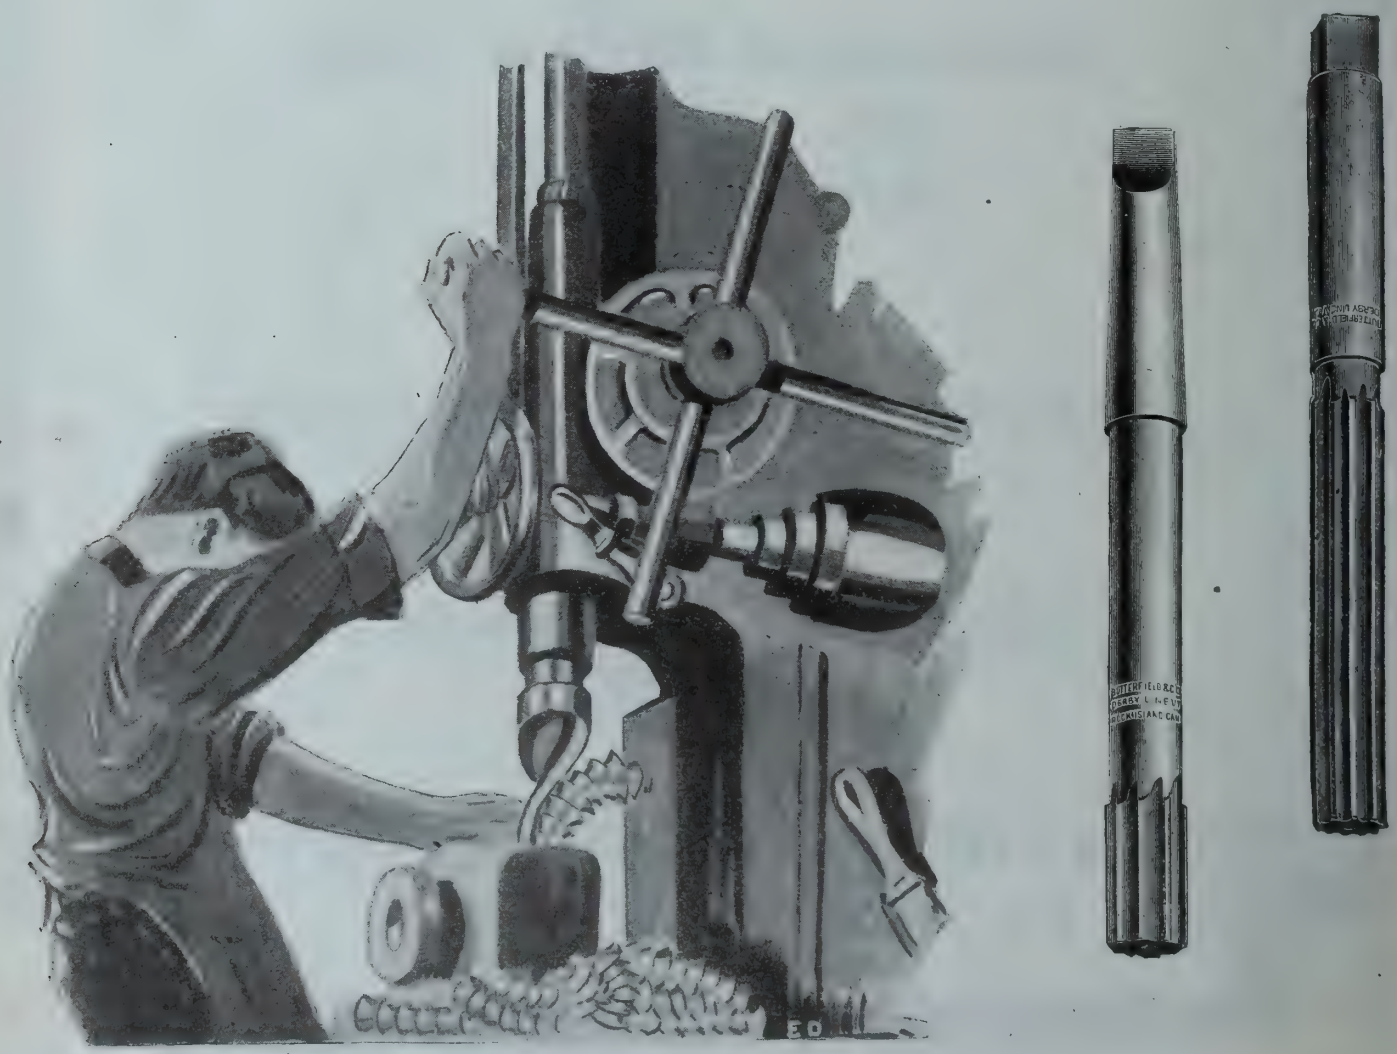
We are ready to supply

Foreign Buyers' Needs

BUTTERFIELD'S Tools have been made for 40 years. In the Dominion of Canada, and in the United States of America, they are regarded as a standard of tools. Machinists engaged in engineering work, tool users and buyers—especially purchasing agents of large plants—are familiar with the well-known, reliable qualities of Butterfield Tools. They are accurate, fast-cutting tools that stand-up to the work required of them and give increased production.

On the opposite page is shown a list of the Butterfield Foreign Representatives. There is one reasonably near you, wherever you may be. He will be glad to give you every assistance and counsel in selecting from the wide range of Butterfield Tools those most suitable for the needs of your customers, or your own use, as the case may be. As market conditions are changing we shall be able to give still better service to the export field.



FOREIGN REPRESENTATIVES: Great Britain, Geo. H. Alexander, 83-84 Coleshill St., London, England; France, Italy, Belgium, and Switzerland, Fenwick Freres, 8 Rue de Rocroy, Paris; Sweden, Norway and Denmark, Ab. Sigfr. Anderson & Co., Malmo; Spain, Casamitjana Hermanos, Barcelona; Japan, Abe-Kobei & Co., Yokohama; Greece, Stephen S. Stephanson, 11 Lycourgan St., Athens; Netherlands, Wynmalen & Hausman, Rotterdam; Australia, H. R. Richardson, 82 Pitt St., Vickery's Chambers, Sydney; South America, Charles Dreyfus, B. Mitre, 785, Buenos Aires, R.A.; South Africa, H. Parker Wood, Cape Town, Durban and Johannesburg.

Butterfield Tools Are Made In Wide Variety

Special Tools Made to Order From Samples or Working Drawings

A catalogue of Butterfield Tools will best show the very wide range of tools. We can meet most conditions from standard models, but in case your customer's industry, or your own, requires special tools, we make them to order from samples or working drawings.

Used by the World's Champions

The very fact that the famous "Falcons"—who won the Olympic Amateur World's Hockey Championship at Antwerp last spring—with one exception used Automobile Skates, will make all ambitious hockey players keen to use the same skates.

It will pay to use this big talking point freely when showing Automobile Skates to customers. It will make sales quickly and easily.

MADE of the same special steels as used in highest grade automobiles. Given the C.C.M. heat treatment, which produces the unusual combination of a glass-hard running edge over a tough core, making the blades practically unbreakable. Also heavily nickel-plated over copper to prevent rust.

Automobile Skates

4 Good Reasons --READ 'EM

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Practice Putting on— WEED TIRE CHAINS in the Garage

It only takes a few moments to attach them when you know how. No jack required. Study the directions. Practice makes perfect. No danger of injury to tires.

THE careful driver regularly gives his car "the once over" every few days before he takes it out of the garage. He gives a turn or two to the grease cups—tests out the brakes, sees that there is a sufficient supply of oil, water and gasoline and that the batteries are in good condition, etc. By so doing he is assured, barring accidents, that he will have no trouble on the road. But—

HOW few there are that pay the slightest attention to the proper method of attaching Weed Tire Chains

Rain comes on, the road and pavements suddenly become slippery and treacherous—the car slips or skids—the Weed Chains, carried in nearly every tool box, are hauled out and a hundred to one the driver has only a hazy idea how to attach them. He fumbles around, gets hot under the collar and falsely accuses them of being a nuisance.

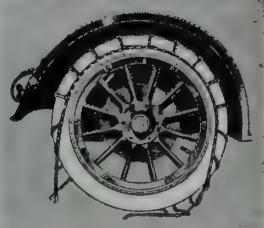
Women drivers are very numerous nowadays. They are driving out into the country over all sorts of roads—*they surely need protection against the dangerous skid.* How many of them know how to put on Weed Chains? Have you ever instructed your wife, your sister or your daughter?

The directions for attaching Weed Chains are simple yet most important. Avoid annoyances on the road—learn how easy it is to put them on correctly—*practice in the garage* and give the women instruction. It will amply repay you in security, satisfaction and comfort.

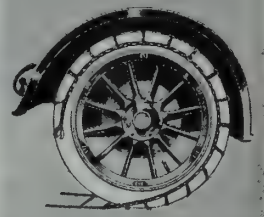
Printed instructions for attaching Weed Chains are packed in every bag—If you desire a copy write us and we will gladly mail it to you.

Weed Chains are also made to meet the demand for an efficient traction and anti-skid device for trucks equipped with single and dual solid tires or with the very large pneumatic tires. They are so constructed that they satisfactorily meet the requirements of heavy truck service in mud, sand or snow.

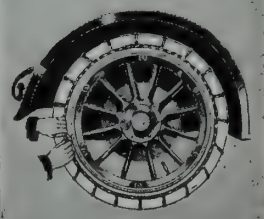
Observe these three fundamentals



Lay chains over wheel with hooks toward rear, and tuck the slack under front part of wheel.



Start car forward just enough to run over slack ends.



Hook chains as tightly as possible by hand.

Do Not Anchor

MR. DEALER: Write us for advertising material, also for names and addresses of nearest jobbers stocking Weed Tire Chains

DOMINION CHAIN COMPANY, Ltd.

Niagara Falls, Ontario, Canada.

We manufacture a complete line of welded and weldless chains—all types, sizes and finishes — and every link will hold for the purpose intended.

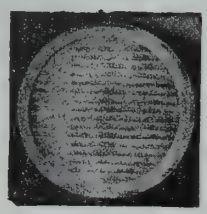
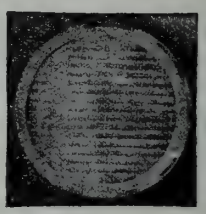
LEGALITE LENS

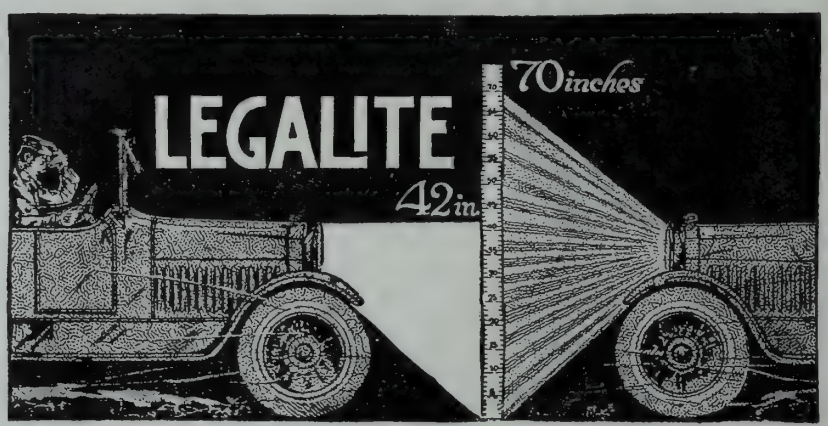
Accepted by Department of Public Highways

THE LEGAL-LIGHT



THE Department of Public Highways has recently announced that the Legalite lens has passed the required test and is accepted as complying with the Anti-Glare law passed last session of Provincial Parliament. This Legalite lens is, therefore, the legal and logical one for the Motorist.





Comply with the Law—More Light, No Glare

With the Legalite lens the motorist takes no chances of being apprehended by the law. It is legal and has received the endorsement of every Province in Canada and every State in the Union.

It is scientifically constructed so that the light beams are never more than 42 inches above the ground at any distance from the car, as required by the law. You get the light where you need it—on the ground, even when going up hill.

Dealers' Opportunity

The announcement of the Legalite lens passing the test of Department of Highways will surely create a big demand for Legalites. Be in position to supply the demand for the 150,000 passenger cars, commercial vehicles and trucks which will be obliged to be equipped with suitable non-glare device. Get your supply at once.

A Business-Building Line

THE dealer who sells Mossberg Tools not only makes a good profit—he gets a quick turnover on his stock and builds up his trade through satisfied customers.

The completeness of the Mossberg line makes the possibility of a sale greater. There is a wrench or tool for every purpose.

The garage man, the motorist, the expert mechanic, each with his individual requirements, may find the right wrench among your Mossberg stock.

The Mossberg reputation for strength and service helps you to make your sales—it builds your business.

TRADE MARKS
B. S. A.

B·S·A

BRITISH MADE

Products of Master Gunsmiths

Perhaps no shot gun made has found such universal favour with sportsmen as the B. S. A., and since its introduction into Canada and the United States its popularity has constantly been increasing.

Nor is it strange, for sportsmen recognise in it a gun of unusual accuracy, unusual beauty, balance and all round adaptability. Made by gunsmiths whose one ideal is to produce better guns, it instantly attracts the appreciative eye of the outdoor man. A B. S. A. shot gun, placed on display, always wins admiring attention.

Its weight is scientifically distributed from breech to muzzle, its trigger-pull is smooth and sweet; it is a trustworthy pal of gundom. While no elaborate decorations embellish it, one glance at its trim, beautifully fashioned lines tells you at a moment that it is a thoroughbred.

B. S. A. AIR RIFLES

.177 and .22 calibres

Do not confuse the B. S. A. Air Rifle with the ordinary spring-controlled "air gun," the plaything of small boys. For in the B. S. A. Air Rifle are combined the accuracy and power of powder rifles without the dirt and noise, and it is vastly superior for indoor target practice.

We will gladly answer your inquiry with a booklet describing B. S. A. firearms in detail, and the terms upon which dealers handle them.

The TRADE MARK that Reflects the Truth

You need never hesitate in making any claim as to the safety of the Iver Johnson. Thumps, jolts, jars, knocks — cannot discharge it. You can actually "Hammer the Hammer." Only one way to discharge the Iver Johnson—pull the trigger all the way back.

That's why the Iver Johnson is easy to sell Sales are closed with a minimum of time and selling effort.

IVER JOHNSON SAFETY—AUTOMATIC REVOLVERS

The Iver Johnson stays sold. No comebacks, no complaints. Its automatic safety feature, its simplicity and strength of construction, its assurance of accuracy and dependability — all these features create good-will, which reacts favorably on Iver Johnson dealers.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips. Why not stock Iver Johnson shotguns too? Then you can capitalize on the entire Iver Johnson line of firearms.

Send for free catalogs which show the entire line of Iver Johnson firearms. Complete dealer information will be sent you. Write for information on bicycles and motorcycles, too.

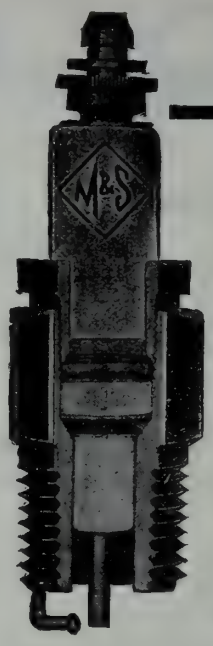
"The Safe Revolver to Sell"



M&S
The Plug with the Hotter Spark

The ball point of the "M&S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high-grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

No.	Models
500	½" Standard
501	⅝" Standard
502	⅞" Long
503	⅞" Long with Chevrolet Terminal
506	½" Long
504	Regular Porcelain
505	Chevrolet Porcelain

Dealers—The "M&S" plug is standard equipment on the new Overland "4". Ask your jobber for them.

Have You Had Trouble With Your Tires?

MOST tire troubles can be traced to either too little or too much air pressure. Keep the pressure at the exact point recommended by the tire-maker and your tires will give less trouble and more mileage—to say nothing of greater riding ease. The Schrader Universal Tire Pressure gauge enables you to test the pressure easily and quickly anywhere, anytime. It is one of the indispensables for every motorist.

Price $1.75 anywhere in Canada.

EVERY CAR AT YOUR DOOR
A PROSPECT

Clark Double Purpose Heaters

Warm the Passengers in the Car

Warm the Engine While Standing

Put Joy In Winter Driving

Clark Heaters, with their double purpose feature, offer twice the sales opportunity for dealers. Canadian motorists, many of whom drive all winter, are delighted with the efficiency of Clark Heaters for warming the engine while standing, as well as for warming the passengers in the car while driving.

There is a splendid range of Clarks, and sales for them all. The Duchess, the No. 7X and 8A, as well as the 5B, 3D, 7C and 7D, are all worthy of careful investigation by the dealer, according to his trade and location.

The wonderfully lasting Clark Fuel is the backbone of the whole success. Clark Carbon Bricks are prepared for use in five minutes and given genial, comforting heat for from 12 to 14 hours. With the Clark there is no odor, smoke or flame. You are sure of agreeable warmth all day.

Clark Heaters fill an existing need. Every person who drives in winter is interested at once. The milkman, the baker, the rural letter carrier, the doctor and many others are ready purchasers of these useful heaters. The double purpose feature moves them quicker than ever.

Ask your jobber's traveller about these splendid sellers—You should stock them now.

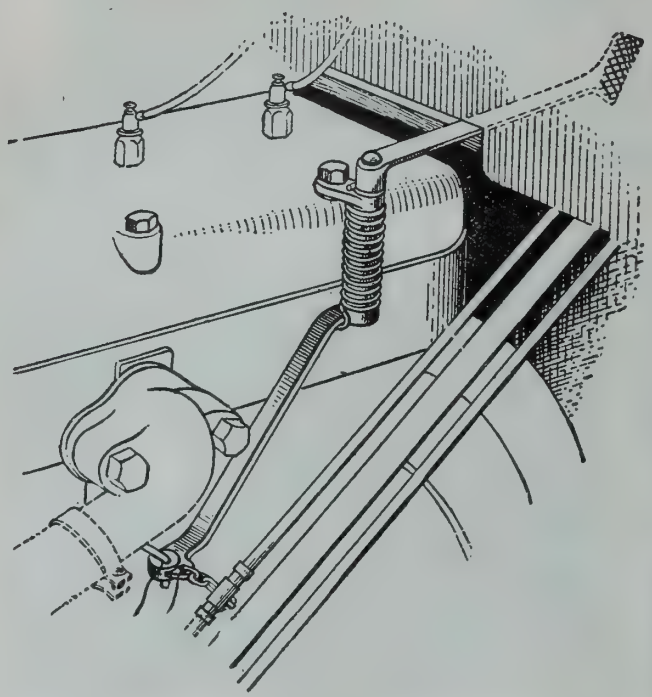
Adamson Foot Accelerator



Accelerator for Fords

Every Ford Owner a Prospect!

Every town has a good sprinkling of Fords, and every Ford owner is a prospect for the wonderful Adamson Foot Accelerator.

It affords perfect throttle control with the foot. Other cars have this convenience. Why not Fords?

Just one moving part, so there is nothing to get out of kilter.

Attached with a wrench and in a jiffy. And it won't rattle, not even one little bit.

Sells for $2.00.

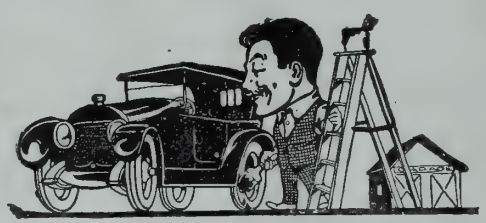
Makes every Ford owner a satisfied customer.

Manufactured by

Adamson Manufacturing Co.
Hamilton, Canada

Our prices will save you money, and we can make prompt deliveries.

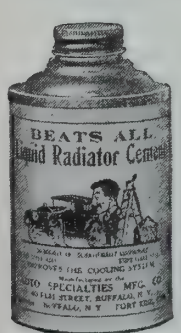
It's Easy BEATS-ALL Way



Supply your trade with either

BEATS-ALL Liquid or Powder RADIATOR CEMENT

Two Sizes—Liquid 50c. and 75c.—Powder 35c. and 50c.



Why resort to a soldering iron?—Use BEATS-ALL.

It is safe and dependable. When left in radiator acts as a preventive for new leaks.

Guaranteed to repair leaks quickly and permanently.

Dealers—write to-day for our remarkable proposition. It will pay you.

Auto Specialties Mfg. Co.
FORT ERIE, CAN.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.

Ask any Thresherman, Mechanic or user.

A sure good sale and splendid profit.

THE BANKERS HAVE AN ASSOCIATION to protect their interests. Membership is confined to banks that conform to legitimate banking practices.

Other professions and businesses have similar associations with a high ethical standard.

From the advertiser's standpoint, the greatest and most useful co-operative organization is the Audit Bureau of Circulations, comprising advertisers, advertising agents and publishers.

It protects the advertiser and his agent. They are enabled to know positively the facts regarding the circulation of the publications with which they place contracts.

It protects the publisher against unfair competition, as the falsifier of circulation statements is barred absolutely from membership in the A.B.C.

The experienced advertiser, before placing a contract for space, asks to be shown the A.B.C. credentials of the publication.

Hardware and Metal is a member of the A.B.C.

If interested tear out this page and place with letters to be answered.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED — EXPERIENCED HARDWARE clerk of good appearance, single, with good education, to spend two months at Toronto and then go to Winnipeg branch of company. Give all details in letter to Box 31, Hardware and Metal.

WANTED—TWO EXPERIENCED HARDWARE salesmen for an aggressive Northern hardware firm. Kindly state age, experience, religion, married or single. Apply Box 15, Hardware and Metal.

WANTED—HARDWARE CLERK WITH FOUR or five years' experience. State particulars and salary expected to A. G. Dobbie & Co., Brockville, Ont.

WANTED—AN EXPERIENCED TRAVELLING salesman for wholesale and retail hardware firm in enterprising Northern city. Apply Box 23, Hardware and Metal.

WANTED

WANTED — ACTIVE FINANCIAL INTEREST in good paying hardware, or experienced man to take partnership. Box 60, Hardware and Metal.

SITUATIONS WANTED

CAPABLE MAN, WITH TWELVE YEARS' EXperience, would like to take charge of hardware store. Box 12, Hardware and Metal.

FOR SALE

HARDWARE STOCK AND PROPERTY FOR sale. Town of 800, on Provincial highway, good farming district; $10,000 stock. Retiring from business. Write Box 304, Hardware and Metal.

THE FOLLOWING COKE TIN PLATES IN stock at Toronto warehouse for immediate delivery: 254 packages, 112 sheets, 100 lbs. basis, sizes 15 x 30, 18¼ x 26¼, 18¾ x 28, 25 x 28, 22 x 26, and 19 x 28. Primes and Wasters. Box 341, Hardware and Metal.

HARDWARE STOCK AND BUILDINGS FOR sale in town of 1,500 in best farming and fruit-growing district in Grey County. About twelve thousand will handle. Stock can be reduced Ill-health reason for selling. Turnover about forty thousand, can be increased. Box 18, Hardware and Metal.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

OPPORTUNITIES ARE BEING OFFERED EVERY WEEK ON THIS PAGE. ARE YOU MAKING USE OF THEM

HARDWARE and METAL'S unique circulation as proven by the ABC Audit is due to 32 years of honest effort to give the retail trade the best possible service.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

HARDWARE AND METAL

is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

"Paints and Varnishes for Every Purpose"

For Better Floors

These are the days of rugs and shining floors. Even those who are reluctant to give up the old-fashioned, insanitary carpets at least leave a little "breathing space" around the edge next the wall. In houses where there are no hardwood floors this border of exposed floor is usually stained and varnished or waxed and gives a very pleasing effect. O.P.W. Stains and Indestructo Floor Varnish do the work and show no heel-marks or white spots from water. O.P.W. on the hardwood floors is simply unequalled, and kept in condition with O.P.W. Floor Wax it gives a mirror-like polish that is the pride of housekeepers.

There is an O.P.W. Product "for every purpose" —for the finest or roughest of floors and all the inside decoration of the home.

Have you a complete line? Are you going to turn every inquiry into an order, this season?

O.P.W. makes floors shine
By better quality
In this good line.
Most dealers know
And records show
That O.P.W. makes sales grow!

"Save the surface and you save all" *Paint & Varnish*

O.P.W. Satisfaction Multiplies Business

COMMUNITY PLATE

Get Your Share of Community sales during Community Week

Prepare for big business November 6 to 13—Community Week.

Community Plate will then be featured in all the better shops from coast to coast, and every housewife will be keen to utilize the opportunity to inspect the different pieces.

Community Week is your opportunity to do a big business in Community Plate. Send now for the Community Week window display.

This window will attract many interested women to your shop.

Get your stock ready—bring Community Plate to the front. Let its attractiveness sell it in your showcase.

Be sure and have a full line of the Community Correct Service pieces. They, especially, will be in demand.

Check up your stock and get in touch with your jobber without delay.
